SUBJECT: Submittal of Deliverable
Sequence 3 (Above Action Level Letter, due quarterly)
(McClellan Site)

Dear Ms. Varnadore:

Table 1, enclosed with this letter, presents the preliminary Above Action Level List containing analytical results for samples from six extraction wells, one extraction well composite, and 44 monitoring wells sampled from October through December 1993 for the McClellan AFB Groundwater Sampling and Analysis Program (GSAP). The listed wells contain analytes at concentrations exceeding the California Environmental Protection Agency (EPA) Department of Toxic Substances Control (DTSC) Maximum Contaminant Levels (MCLs), DTSC Action Levels, and/or Cal-EPA Primary MCLs. The sector location, methods of analysis, analytes above Action Levels, reported concentrations, and referenced water quality standards are given for each well in Table 1. The locations of the wells listed in Table 1 are shown in Figure 1.

If you have any questions please contact me at (916) 362-5332.

Sincerely,

Marie J. Yates
Project Director

FOOTNOTES AND ABBREVIATIONS

DATAFLAGS:

C = Confirmed on second column.
H = Previously confirmed on second column or by GC/MS.
B = Inorganic Methods - Analyte is found in the associated blank, but the sample results are not corrected for the amount in the blank.
P = Results from primary and secondary columns differ by greater than a factor of three due to coelution or interference.

FIELD DUPLICATE ANALYSIS:
FD = Field duplicate.

LAB:
RAS = Radian Analytical Services, Austin.

MAXIMUM CONTAMINANT LEVEL/ACTION LEVEL:

AL = Cal/EPA Dept. of Toxic Substances Control Action Level.
MCL = Cal/EPA Dept. of Toxic Substances Control Maximum Contaminant Level.
PMCL = U.S. Environmental Protection Agency Primary Maximum Contaminant Level.

WELL IDENTIFICATION:

EC = Extraction well composite. (EC-1 is a composite of EW-73, EW-83, EW-84, EW-85, EW-86, and EW-87)
EW = Extraction well.
MW = Monitoring well.

QUALIFIED RESULTS:

G = Primary and second column results differ by more than a factor of three times for method SW8010.
Therefore, the lower of the two values is reported.
PF = Qualified as estimated due to high total variability as measured by field duplicates.
PL = Qualified as estimated due to high laboratory variability, as measured by matrix spikes/matrix spike duplicates.
R = Detected in reagent blank.

UNITS:

METHODS 8010, 8020 = ug/L.
METHODS 6010, 7060, 7421, 7470, 7740 = mg/L.
MCL FOR METHODS 8010, 8020 = ug/L.
MCL FOR METHODS 6010, 7060, 7421, 7470, 7740 = mg/L.
mg/L = milligrams per liter.
ug/L = micrograms per liter.

NOTICE

This report has been prepared for McClellan Air Force Base (AFB) to aid in the implementation of a final remedial action plan under the Air Force Installation Restoration Program (IRP). As this data summary relates to actual or possible releases of potentially hazardous substances, its release prior to an Air Force final decision on remedial action is in the public's interest. The limited objectives of this data summary, the ongoing nature of the IRP, and the evolving knowledge of site conditions and chemical effects on the environment and on human health all must be considered when evaluating this data summary, since subsequent facts may become known that make this data summary premature or inaccurate. Acceptance of this data summary in performance of the contract under which it is prepared does not mean that the Air Force adopts the conclusions, recommendations, or other views expressed herein, which are those of the contractor only and do not necessarily reflect the official position of the Air Force.

PREFACE

Radian Corporation is the contractor for the IRP, Stage 3 Remedial Investigation/Feasibility Study (RI/FS) at McClellan AFB, California. This work was performed for the Air Force Center for Environmental Excellence, Environmental Services Office, Environmental Restoration Division (AFCEE/ESR) under Air Force Contract No. F33615-90-D-4013, Delivery Order 0003.

This data summary presents and summarizes the Groundwater Sampling and Analysis Program results for October through December 1993. The data includes analytical results from monitoring and extraction well groundwater samples and from groundwater-level data measured from on- and off-base wells.

Radian would like to acknowledge the cooperation of the McClellan AFB Office of Environmental Management Restoration (EMR). In particular, Radian acknowledges the assistance of Ms. Doris Varnadore of EMR. Ms. Varnadore was the Contracting Officer's Technical Project Manager.

This Data Summary presents the results of groundwater sampling activities conducted on and in the vicinity of McClellan Air Force Base during the sampling period of October through December 1993. Concentrations of purgeable hydrocarbons and aromatic compounds detected in wells (44 monitoring wells, 6 extraction wells, and 1 extraction well composite) exceeded state and/or federal drinking water standards. These wells are located in Sectors A, B, C, and D.

1.0

INTRODUCTION

In support of ongoing Remedial Investigation/Feasibility Study (RI/FS) activities at McClellan Air Force Base (AFB), California, Radian Corporation (Radian) personnel measure water levels and collect and analyze groundwater samples from selected on- and off-base wells on a quarterly basis. This data summary provides, in tabular form, analytical results of data collected during the October through December 1993 (Fourth Quarter [4Q93]) sampling effort. Data are provided in the following 11 tables:

- Table 1 — Wells Sampled and Analyses Performed;
- Table 2 — Quarterly Groundwater-Level Data;
- Table 3 — Master Log of Wells Sampled;
- Table 4 — Wells Containing Analytes at Concentrations Equal to or Exceeding State and Federal Drinking Water Standards;
- Table 5 — Ambient Blanks with Associated Well Samples;
- Table 6 — Trip Blanks with Associated Well Samples;
- Table 7 — Summary of Quality Control Results for Blanks;
- Table 8 — Summary of Quality Control Results for Duplicates;
- Table 9 — Summary of Quality Control Results for Spikes;
- Table 10 — Summary of Qualified Data; and
- Table 11 — Wells Scheduled and Analyses to be Performed.

Six monitoring zones (A through F) divide the groundwater regime, by depth and lithology, beneath McClellan AFB. The base and adjacent off-base areas are also divided into six geographic sectors, designated A through F (Figure 1). Results are presented by zone and sector to support review and data use.

In October 1993, groundwater levels were measured in 285 wells (237 monitoring wells, 39 piezometers, and 9 extraction wells). The locations of all wells and piezometers are shown on Plate 1; water-level elevations are provided in Table 2. Potentiometric-surface contours are shown on Plates 2, 3, 4, and 5.

Radian personnel collected groundwater samples from a total of 97 locations between 01 October and 30 November 1993. The locations included 87 monitoring wells, 6 extraction wells, 3 background wells, and one composite sample of 6 Sector D extraction wells (EWs) (EW-73, EW-83, EW-84, EW-85, EW-86, and EW-87) from the Sector D pipeline.

Groundwater samples were analyzed by Radian Analytical Services (Austin, Texas) using United States Environmental Protection Agency (U.S. EPA) *Test Methods for Evaluating Solid Waste, Third Edition*, Physical/Chemical Methods SW846 (U.S. EPA, 1986). Selected samples were analyzed for the following analytes:

- Halogenated volatile organic compounds (HVOCs) using Method 8010;
- Aromatic volatile organic compounds (VOCs) using Method 8020; and
- Metals using Methods 6010, 7060, 7421, 7470, and 7740.

A total of 90 locations (80 monitoring wells, 6 extraction wells, 3 background wells, and one composite of 6 extraction wells) were sampled for Method 8010 analyses during 4Q93. Method 8020 analyses were performed on 66 samples (from 56 monitoring wells, 6 extraction wells, 3 background wells, and one composite of 6 extraction wells). None of the samples were filtered during collection to remove suspended solids. The analytical results of all these analyses are summarized in Table 3, and estimated trichloroethene concentration isopleths are shown on Plates 2, 3, 4, and 5 (background wells are excluded from plates).

Table 4 presents the Above Action Level List for samples in which one or more contaminants equaled or exceeded either the federal or California Maximum Contaminant Levels (MCLs) or the California Action Levels for drinking water. Samples from 44 monitoring wells, 6 extraction wells, and one composite from 6 extraction wells exceeded standards for either organic or inorganic analytes.

The quality control (QC) data presented in this report have been evaluated according to the quality assurance objectives specified in the final *McClellan AFB Quality Assurance Project Plan (QAPP)* (Radian, 1992). These objectives represent accuracy and precision performance goals for each analytical method. The results of the QC sample analyses are summarized in Tables 5 through 11.

Method SW8010 and Method SW8020 results were reported from the second column analysis rather than the first column. For these results, the values between the first and second columns differed by more than a factor of three. When this occurs, coelution is suspected, and the lower of the two values is considered more accurate. For the 4Q93 sampling event, 85 second-column results were reported and qualified with a "G" flag.

Under the new laboratory reporting system, the reported detection limits were instrument specific. The laboratory uses several instruments to analyze project samples, and each instrument has unique detection limits. The laboratory continued to run second column confirmation analyses based on project detection limits, rather than the lower instrument limits. Because of this, many results were flagged with a "T." The results reported with a "T" flag were low-level detections below the project required detection limits for which no second column analyses were required. Any "T"- flagged results other than methylene chloride and toluene, which do not require second column confirmation for low level detections, are therefore considered false positives due to instrument and/or background noise and were not reported. This is consistent with previous reporting procedures.

Method SW8010: Though the laboratory-established protocol for daily calibration verifications was met, the stricter method-specified protocol was not always met. The laboratory-established protocol is generally more representative of the method capabilities. The daily calibration verifications indicate that, with the exception of 2-chloroethylvinylether, the method was operating under control. The results from the 2-chloroethylvinylether daily calibration verifications indicate a slight low bias potential for this compound.

First column surrogate spike recoveries for a MW-1067 sample analyzed by SW8010 and a MW-27D sample analyzed by SW8020 were not within control limits. The samples were reanalyzed in accordance with the QAPP protocol, but the first column surrogate recoveries were still unacceptable after reanalysis. However, the surrogate

recoveries for the second column analyses were acceptable and therefore the second column results are reported for these two wells.

The completeness objective for all the measurement parameters is 95 percent. Although several individual sample results required qualification (196 analyte measurements from a total of 4,915), the remaining unqualified analytical data met the objective. Ninety-six percent of the data produced are valid, and the completeness objective has been met for the 4Q93 sampling event.

(a) The letters 'S' and 'D' associated with monitoring well numbers are part of the well identification notation and do not refer to monitoring zones at McClellan AFB.

EC = Extraction Well Composite

EC-1 is a composite of EW-73, EW-83, EW-84, EW-85, EW-86, and EW-87.

EW = Extraction Well

MW = Monitoring Well

OW = Observation Well

WELL IDENTIFICATION:

EW = Extraction Well
 MW = Monitoring Well
 PZ = Piezometer

ZONE IDENTIFICATION:

A = Screened in the A zone (-16.72 to -93.46 ft msl).
 AB = Screened in both the A and B zones (-47.89 to -126.0 ft msl).
 IAB = Screened in an intermediate zone between the A and B zones (-69.51 to -94.61 ft msl).
 QAB = Screened in the aquitard between the A and B zones (-63.84 to -85.84 ft msl).
 B = Screened in the B zone (-50.3 to -149.73').
 QBC = Screened in the aquitard between the B and C zones (-122.18 to -146.05 ft msl).
 C = Screened in the C zone (-117.11 to -213.2 ft msl).
 ICD = Screened in an intermediate zone between the C and D zones (-225.97 to -235.97 ft msl).
 QCD = Screened in the aquitard between the C and D zones (-225.76 to -227.76 ft msl).
 D = Screened in the D zone (-261.69 to -306.95 ft msl).
 E = Screened in the E zone (-327.74 to -365.36 ft msl).

TABLE 2 (Continued)

NOTES:

- (a) = The letters 'S' and 'D' associated with monitoring well numbers are part of the well identification notation and do not refer to monitoring zones at McClellan AFB.
- (b) = Unintentionally omitted.
- (c) = Blocked well access.
- (d) = Dry Well.
- (e) = Sounding tube obstructed.
- (y) = Water-level measurement greater than -90 feet msl.
- (z) = Well needs re-surveying.
- 4Q93 = Fourth Quarter 1993.
- 3Q93 = Third Quarter 1993.
- NM = No previous water-level measurement.
- msl = Mean Sea Level.

TABLE 3 (Continued)

FOOTNOTES AND ABBREVIATIONS

DATAFLAGS:

- B = Analyte is found in the associated blank but the sample results are not corrected for the amount in the blank.
- C = Confirmed on second column or by GC/MS.
- H = Previously confirmed on second column or by GC/MS.
- ND = Not detected at specified detection limit.
- P = Results from primary and secondary GC columns differ by greater than a factor of three due to coelution or interference.
- S = Analyte concentration obtained using Method of Standard Addition (MSA).
- T = Second column confirmational analysis not performed.

QUALIFIED RESULTS:

- G = Results from primary and secondary columns differ by greater than a factor of three due to coelution or interference.
- H = Qualified as estimated due to matrix spike or surrogate recoveries outside the control limits.
- O = Detected in blank other than reagent blank.
- PF = Qualified as estimated due to high total variability as measured by field duplicates.
- PL = Qualified as estimated due to high total variability as measured by laboratory duplicates.
- R = Detected in the reagent blank.

UNITS:

ug/L = micrograms per liter.
 mg/L = milligrams per liter.
 METHOD 8010, 8020 = ug/L
 METHODS 6010, 7060, 7470, 7740, 7421, 7740 = mg/L

WELL IDENTIFICATION:

- EC = Extraction well composite.
 (EC-1 is a composite of EV-73, EV-83, EV-84, EV-85, EV-86, and EV-87)
- EV = Extraction well.
- MW = Monitoring well.
- DW = Observation well.
- EB = Equipment blank.
- AB = Ambient blank.
- HAQ93XX = Field duplicate samples.

NOTES:

- AL = Cal/EPA Dept. of Toxic Substances Control Action Level.
- GC = Gas Chromatography.
- GC/MS = Gas Chromatography/Mass Spectrometry.
- MCL = Cal/EPA Dept. of Toxic Substances Control Maximum Contaminant Level.
- PMCL = U.S. Environmental Protection Agency Primary Maximum Contaminant Level.

TABLE 4 (Continued)

FOOTNOTES AND ABBREVIATIONS

DATA/LABS:

- C = Confirmed on second column.
- H = Previously confirmed on second column or by GC/MS.
- B = Inorganic Methods - Analyte is found in the associated blank, but the sample results are not corrected for the amount in the blank.
- P = Results from primary and secondary columns differ by greater than a factor of three due to coelution or interference.

FIELD DUPLICATE ANALYSIS:

- FD = Field duplicate.

LAB:

- RAS = Radian Analytical Services, Austin.

MAXIMUM CONTAMINANT LEVEL/ACTION LEVEL:

- AL = Cal/EPA Dept. of Toxic Substances Control Action Level.
- MCL = Cal/EPA Dept. of Toxic Substances Control Maximum Contaminant Level.
- PMCL = U.S. Environmental Protection Agency Primary Maximum Contaminant Level.

WELL IDENTIFICATION:

- EC = Extraction well composite. (EC-1 is a composite of EU-73, EU-83, EU-84, EU-85, EU-86, and EU-87)
- EW = Extraction well.
- MW = Monitoring well.

QUALIFIED RESULTS:

- G = Primary and second column results differ by more than a factor of three times for method SW8010. Therefore, the lower of the two values is reported.
- PF = Qualified as estimated due to high total variability as measured by field duplicates.
- PL = Qualified as estimated due to high laboratory variability, as measured by matrix spikes/matrix spike duplicates.
- R = Detected in reagent blank.

UNITS:

- METHODS 6010, 8020 = ug/L.
- METHODS 6010, 7060, 7421, 7470, 7740 = mg/L.
- MCL FOR METHODS 6010, 8020 = ug/L.
- MCL FOR METHODS 6010, 7060, 7421, 7470, 7740 = mg/L.
- mg/L = milligrams per liter.
- ug/L = micrograms per liter.

7740 (1 analyte)	3	3	Selenium (1)	0.000860 S mg/L

TABLE 7 (Continued)

NOTE: Some concentration values in ranges may have associated flags; see individual result tables.

NA = Not applicable.

B = Analyte detected in reagent blanks, but concentration not corrected for the amount found in the reagent blank.

S = Result obtained by method of standard addition.

T = Second column analysis not required.

mg/L = Milligrams per liter.

µg/L = Micrograms per liter.

**TABLE 8. SUMMARY OF QUALITY CONTROL RESULTS FOR DUPLICATES,
GROUNDWATER SAMPLING AND ANALYSIS PROGRAM,
OCTOBER THROUGH DECEMBER 1993, McCLELLAN AFB**

U.S. EPA SW-846 Method	Number Performed	Number of Detected Pairs (= Number of Possible Results)	Compound	Range of Results RPD (%)	Acceptance Criteria ^a RPD (%)	Results Not Meeting Criteria ^b
Duplicate Samples						
8010	11	30	Varies	0.6-188	30	7
8020	7	9	Varies	0-62	30	1
6010	7	90	23 Metals	0-128	50	14
7060	7	5	Arsenic	8-53	50	1
7421	7	6	Lead	0-90	50	5
7470	7	2	Mercury	13-150	50	1
7740	7	1	Selenium	84	50	1
Matrix Spike Duplicates						
8010	36	324	9 Compounds	0-50	30	2
8020	27	108	4 Compounds	0-14	30	0
6010	7	161	23 Metals	0-12	20	0
7060	6	6	Arsenic	1-7	20	0
7421	7	7	Lead	1-10	20	0
7470	5	5	Mercury	0-4	20	0
7740	8	8	Selenium	0-7	20	0

^a The acceptance criteria represent the upper acceptable bound of the RPD (%) for duplicates.

^b Refers to individual analytical results, not overall sample results.

RPD = Relative Percent Difference

**TABLE 9. SUMMARY OF QUALITY CONTROL RESULTS FOR SPIKES,
GROUNDWATER SAMPLING AND ANALYSIS PROGRAM,
OCTOBER THROUGH DECEMBER 1993, McCLELLAN AFB**

U.S. EPA SW-846 Method	Number Performed	Total Possible Number of Results	Compound	Range of Results Recovery (%)	Acceptance Criteria ^a Recovery (%)	Results Not Meeting Criteria ^b
Matrix Spikes						
8010	72	648	9 Analytes	37-155	Varies	1
8020	54	216	4 Analytes	82-124	Varies	0
6010	14	322	23 Metals	46-117	80-120	9
7060	12	12	Arsenic	88-117	80-120	0

MW-1058	8010	Trichloroethene	PL	Poor RPD between MS/MSD
		Methylene Chloride	G	Second column result used as primary record
	6010	Beryllium	R	Detected in reagent blank
MW-1058 (Field duplicate)	8010	Methylene Chloride	G	Second column result used as primary record
MW-1061	8010	Methylene Chloride	R	Detected in reagent blank

TABLE 10 (Continued)

Sample Number	U.S. EPA Method	Analyte(s)	Type of Qualification	Reason
MW-1063	6010	Thallium	R	Detected in reagent blank
	7421	Lead	M	Low MS recovery
MW-1065	7470	Mercury	PF	Poor RPD between field duplicates
	7421	Lead	PF	Poor RPD between field duplicates
	6010	Aluminum, Molybdenum	PF	Poor RPD between field duplicates
MW-1067	8010	All first column results	M	Surrogate out
		All compounds	G	Second column result used as primary record

AB = Ambient blank.
 EC = Extraction well composite.
 EW = Extraction well.
 G = Qualified to note the use of second column result used as primary record.
 LCS/LCD = Laboratory Control Sample/Laboratory Control Duplicate.
 M = Qualified due to unacceptable surrogate recovery.
 MW = Monitoring well.
 MS = Matrix spike.
 O = Detected in a field blank.
 PF = Qualified as estimated due to high total variability, as measured by field duplicates.
 PL = Qualified as estimated due to high total variability, as measured by laboratory duplicates.
 R = Detected in reagent blank.
 RPD = Relative percent difference.
