13. ABSTRACT *(Maximum 200 words)*

This document describes the procedures performed to develop the Officer Administrative Data Base (OADB). The OADB consists of Warrant and Commissioned officer data for fiscal years 1979 through 1991. The data include officers that received their original appointment from the Regular Army (RA), the United States Army Reserve (USAR), the National Guard of the United States (NGUS), and the Army of the United States (AUS). The source data are the Officer Master Files (OMF), which consist of all active duty U.S. Army officer personnel, and the Separation Officer Master Files (SOMF) containing all separations from active duty occurring within the fiscal year. The OADB data sets are available in both Statistical Analysis System (SAS) and character file formats.
