19. ABSTRACT (Continue on reverse if necessary and identify by block number) CHAMPUS - Leading Procedures and Diagnoses This report presents a summary analysis of the Ambulatory CHAMPUS Data for FY92. The source of the data was the Tri-Service CHAMPUS Statistical Database Project (TCSDB). Numerous crosstabulations were employed to reveal the outpatients' distributions based on several criteria such as sponsor's branch of service, sex, age, beneficiary category and rank. The total number of visits and services, the totals paid by the government, the patient and other sources computed also as percentages of grand total for each category considered by sponsor's branch of service and at the DOD level were presented. The leading 100 diagnoses and procedures by descending number of services were displayed along with the episodes of care, the number of visits, associated costs and ratios of government pay to episode, government pay to services and episode to services.

CHAMPUS AMBULATORY DATA ANALYSIS

SUMMARY REPORT

This report presents a summarized analysis of the ambulatory data within the Department of Defense's Civilian Health and Medical Program for the Uniformed Services (CHAMPUS). The source of all the data in this report is the Tri-Service CHAMPUS Statistical Database Project's (TCSDB) Main Relational Database. The analysis was done for Fiscal Year 1992 (FY92) both at the DOD level and the sponsor's branch of service level. The demographics for outpatients are presented through tables for each branch of service, by age, sex, beneficiary category and sponsor's grade. Patient episode of care was used in the analysis of the leading procedures and diagnoses. Approximately 23 million records were processed for FY92.

Appendices A through C present the summarized data for DOD and for the four branches of service: Army, Navy, Marine Corps and Air Force. Appendix A lists the dollar amounts and the percentages by sex and age, by sex and beneficiary category, and by sex and rank, of the total number of services, visits and associated cost. Appendix B lists the 100 leading diagnoses by sponsor's branch of service and includes the number of services associated with a diagnosis. Also the number of episodes of care for each diagnosis are presented, along with the associated costs. Appendix C summarizes the 100 leading procedures listed by descending number of services and visits. The analysis of the first 100 procedures for each sponsor's branch of service included the number of services, visits, episodes of care, payments by government, patient and other sources, as well as the amounts allowed and billed. Appendix D lists CHAMPUS-unique procedure codes and their transformations to CPT-4 code.

DISCUSSION

General Demographics and Workload/Payments

The DOD level results are presented in Table 1. It lists the total number of visits, total number of services, amount paid by the government, amount paid by the patient and amount paid by the other sources. A percentage breakdown of the DOD costs by branch of service is also included.

A selected summarization of results by sponsor's branch of service is provided in Tables 2 through 4. Table 3 contains total amounts paid by the other sources, percent of services by sex and percent of total number of visits for each sponsor's

branch of service. Table 4 presents the total number of visits and services and the associated costs. The analysis was performed by outpatients' gender for each sponsor's branch of service. In the tables and the following discussion, percentages are in terms of grand total amounts for one of the branches of service or the total DOD. Table 5 presents the top five diagnoses for each sponsor's branch of service, while Table 6 presents the first five procedures by descending services.

Appendix A shows that patients whose age fell in the 55-64 category accounted for the highest number of visits, services, and costs covered by the government. From this age category, male patients accounted for 11.90% of the total DOD government cost and female patients accounted for 15.21% of the total DOD government cost (p.A-1).

Sponsor's grade E7 accounted for the highest number of services, visits, and amounts paid by the government, patient and other sources. Of the total DOD amount paid by the government, 7.52% was spent on male and 12.25% on female patients in this grade category (p.A-3).

In terms of beneficiary category, the government spent 31.34% on female dependents of active duty sponsors, 28.36% on female dependents of retired/deceased sponsors, 18.66% on male retired sponsors, and 12.75% on male dependents of active duty sponsors (p.A-6).

Analysis conducted for the Army showed, that the 55-64 age category had the topmost number of services, visits, and government costs: \$35,975,601 (11.13%) of this cost was for male patients and \$49,184,724 (15.21%) was for female. Males in the unknown age group constituted 0.02% of government cost and females accounted for 0.02% (p.A-7).

Demographics by sponsor's grade revealed that the E7 category had the most number of services, visits, and associated costs for Army patients. Total government paid was \$23,594,063 (7.30%) for male and \$39,958,304 (12.36%) for female. For this branch of service, male outpatients received 34.86% of the total number of services rendered in FY92 (p.A-9). The total number of services was 10,551,364, total number of visits was 4,090,799, total government paid was \$323,299,707, total amount paid by patient was \$129,487,852, and total paid by the other sources was \$95,493,868 (p.A-12).

Patients associated with the Navy had a total of 10,028,278 services and 3,810,704 visits (p.A-14). The total paid by the government was \$322,331,901. The highest number of services and visits, in this branch of service, pertained to patients in the 55-64 age group. In this age group, the total number of services for male and female, were 10.23% and 15.05% of the total number

of services for the Navy, respectively, and the government paid \$31,401,948 (9.74%) for male patients, and \$41,464,037 (12.86%) for female patients. Small proportions of the government paid amount were attributable to the unknown age categories for male and female patients (0.04% for each).

Demographics done by Navy sponsor's grade reveals that the E6 category had the highest total number of services, visits, and amount paid by the government (p.A-15). Of the total government paid, \$26,292,127 (8.16%) was for male patients and \$49,287,117 (15.29%) for female. The E7 category followed, with 7.29% of the total government amount spent on male patients and 12.71% on female.

The 55-64 age group accounted for the highest number of visits, services and costs in the Marine Corps. Male patients received 10.03% of the total number of services rendered and 9.35% of the total paid by the government (p.A-19). Female patients received 12.7% of the total number of services rendered and 10.83% of the total government paid. The second leading age group for female was the 25-34 category. This group accounted for 12.0% of the total services and 14.92% of the total government paid.

Overall for the Marine Corps, the results show that the E7 grade had the highest total of visits, services and costs (p.A-21). The total for the number of visits for FY92 was 967,288, the total number of services was 2.6 million, the total paid by the government was \$89,939,366, the total paid by the patient was \$32,223,829, and the total paid by other sources was \$21,329,540.

Analysis of the Air Force outpatients for FY92 also showed that the 55-64 age group had the highest number of services and costs. Male patients in this group accounted for 15.9% of the total number of services and 15.42% of the total amount paid by the government (p.A-25). Female patients received 21.14% of the total number of services and were responsible for 18.65% of the total amount paid by the government. Male patients in the unknown age group represented 0.02% of total government payments and females accounted for 0.01%. Some of the sponsor's grade had been miscoded in the CHAMPUS files (for the Air Force). Grades G1, G2, G3, G4, 08 and 09 should be combined as 07.

Sponsor's grade E7 had the highest number of services - 8.83% of Air Force total, and the highest total government pay - 8.63%. In this branch of service, the total number of visits was 4,110,373, the total number of services was 10,665,969, the total amount paid by the government was \$333,005,715, the total amount paid by other sources was \$124,104,646, and the total paid by the patient was \$122,676,898 (p.A-30).

Leading Diagnoses and Procedures

The total number of diagnoses found in the data was 26,605 for the Army, 26,761 for the Navy, 18,860 for the Marine Corps and 25,947 for the Air Force. Table 4 displays the first five diagnoses shown in Appendix B for each sponsor branch of service along with the number of services and the amount paid by the government. A summary of the first six diagnoses for FY92 at the DOD level are presented below in descending order, starting with the leading diagnosis (p.B-1):

- 1) ICD-9 code 4779 (ALLERGIC RHINITIS NOS). It accounted for 765,686 services and the government paid total of \$4,657,131.
- 2) ICD-9 code 7890 (ABDOMINAL PAIN). The number of services was 449,319 and the government paid amount was \$15,823,306.
- 3) ICD-9 code 4019 (HYPERTENSION NOS). The number of services totaled 422,917, and the government paid totaled \$6,938,337.
- 4) ICD-9 code 3829 (OTITIS MEDIA NOS). The total number of services was 373,921, and the government paid was \$8,708,148.
- 5) ICD-9 code 2500 (DIABETES UNCOMPL TYPE 2). The total number of services was 366,343 and the government paid totaled \$4,226,890.
- 6) ICD-9 code 7865 (CHEST PAIN NOS). The number of services performed was 352,325 and the total government paid was \$13,227,410.

Based on the descending order of services associated with each procedure, the leading procedures at the DOD level are listed below(p.C-1):

- 1) CPT-4 code 99088 (SPECIAL SUPPLIES). The total number of services were 2,093,460 and the total government paid was \$44,167,308.
- 2) CPT-4 code 99070 (SPECIAL SUPPLIES). There was a total of 1,263,578 services and the government paid \$13,916,563.
- 3) CPT-4 code 90844 (INDIVIDUAL PSYCHO-THERAPY). There were 1,183,743 services and \$43,208,003 paid by the government.

4) CPT-4 code 84999 (CLINICAL CHEMISTRY TEST). The total number of services was 1,170,728 and the government spent \$17,925,033.

5) CPT-4 code 99213 (OFFICE/OUTPATIENT VISIT). The number of services totaled 1,031,226 and the government paid \$19,303,264.

6) CPT-4 code 90050 (OFFICE/OP VISIT, EST, LTD). There were 843,384 total services and \$11,168,516 total government paid.

CONCLUSIONS

This preliminary analysis for CHAMPUS Ambulatory Data gives an insight as to who are the CHAMPUS users, which diagnoses and procedures occur the most, the amount of payments from the government, patients, and other sources, and an episode of care breakdown by sponsor's branch of service.

Various demographic analyses were presented at the DOD level and the different branches of service. The above analysis showed that majority of CHAMPUS users are in the 55-64 age group. The leading diagnosis was ICD-9 code 4779 (Allergic Rhinitis Nos), which accounted for 765,686 services and \$4,657,131 total government paid. The leading procedure was CPT-4 code 99088 (Special Supplies), which accounts for 2,093,460 services and \$44,167,308 government paid.
