FOREWORD

NOTE

SPECIAL ADVANCEMENT BIBLIOGRAPHY LISTING NOTICE

This is the last year of publication for the *Bibliography for Advancement Study*, NAVEDTRA 12052. The bibliography will be deleted effective January 1996. The following guidance is provided to ensure personnel are able to identify correct advancement study publications:

- *Bibliography for Advancement Study, NAVEDTRA 12052* — Continue using this last edition to initially identify study references for calendar year 1995 examinations. However, be sure to check the *Catalog of Nonresident Training Courses*, NAVEDTRA 12061, for up-to-date TRAMAN/NRTC titles and NAVEDTRA numbers, including **mandatory** TRAMAN/NRTC advancement eligibility requirements. Do NOT use for any calendar year 1996 examinations.
- *Catalog of Nonresident Training Courses, NAVEDTRA 12061* — Continue using to identify and order the most up-to-date TRAMAN/NRTC references, including **mandatory** TRAMAN/NRTC advancement eligibility requirements. The "catalog" will continue in its present form with a new section containing **mandatory** TRAMANS/NRTCs. The catalog does not and will not contain advancement study references other than TRAMANS/NRTCs. For references other than TRAMANS/NRTCs, refer to advancement handbooks.
- *Advancement Handbook for Petty Officers, NAVEDTRA 71000 (series)* — Continue using handbooks to initially identify study references. However, be sure to check the *Catalog of Nonresident Training Courses*, NAVEDTRA 12061, for up-to-date TRAMAN/NRTC reference listings, including **mandatory** TRAMAN/NRTC advancement eligibility requirements.

Advancement handbooks will continue as the only listing to include both TRAMANS/NRTCs and any other references recommended for study, such as instructions, manuals, guidebooks, regulations, standards, and so forth.

INTRODUCTION

ABOUT THIS BIBLIOGRAPHY

This *Bibliography for Advancement Study*, historically called the "bibliography" or "bib," includes general Navy Enlisted Advancement System (NEAS) information and study reference listings. The listings support Personnel Advancement Requirements (PARs) and advancement-in-rate examinations (apprenticeships, military/leadership, and Navywide advancement-in-rate). The following study reference listings are provided in tables:

- Military requirements (for all ratings);
- Apprenticeships; and
- Ratings.

In addition to the study reference listings above, this bibliography also provides general information about the NEAS.

NOTE

This publication will be discontinued effective 1 January 1996. See the note on page i.

AUTHORIZED STUDY REFERENCES

Study reference listings are published each year in this bibliography and in advancement handbooks. The study references are selected by examination and training manual writers at the Navy Advancement Center Department, Naval Education and Training Program Management Support Activity (NETPMSA), Pensacola, Florida. Because advancement handbooks are printed about a month before this publication, it is occasionally necessary to make last-minute changes to correct or update specific study references in this publication. This may result in minor differences between the advancement handbooks and this publication. **If there is a difference, this publication takes precedence.**

GENERAL ADVANCEMENT INFORMATION

The bibliography is intended to assist ESOs and other responsible personnel in helping enlisted members prepare for advancement. The following paragraphs provide an overview of the NEAS, but should not be used as guidance. For authoritative guidance, ESOs and other responsible leaders should use the *Advancement Manual*, BUPERSINST 1430.16; enlisted personnel should be directed to their advancement handbooks.

OCCUPATIONAL AND NAVAL STANDARDS

Occupational standards (OCCSTDs) are the Navy's **minimum** requirements for enlisted occupational skills. They are the authority supporting personnel advancement requirements (PARs), rating training manuals (TRAMANs) and nonresident training courses (NRTC's), apprenticeship examinations, and Navywide advancement-in-rate examinations.

Naval standards (NAVSTDs) are the **minimum** skills and knowledge, other than those defined by occupational standards, that are essential to the overall effectiveness of enlisted personnel in the performance of duty. They are the authority underlying military requirements TRAMANs and NRTC's, and military/leadership examinations.

OCCSTDs and NAVSTDs are issued by the Bureau of Naval Personnel in the *Manual of Navy Enlisted Manpower and Personnel Classifications and Occupational Standards*, Volume I (NAVPERS 18068F).

DEVELOPMENT AND PRODUCTION OF PARs, TRAMANs, NRTC's, AND EXAMINATIONS

PARs, TRAMANs, NRTC's, and all advancement examinations are written by E-7/8/9 subject matter experts (SMEs) assigned to the Naval Education and Training Program Management Support Activity (NETPMSA), Pensacola, Florida. SMEs use OCCSTDs and

INTRODUCTION

NAVSTDs to support PARs, TRAMANs and NRTC's, and examinations. They also use study references listed in this bibliography.

ADVANCEMENT PATHS

A person's advancement path is the path that he or she would normally follow from recruit to master chief petty officer and on to chief warrant and limited duty officer programs.

In most ratings, a person progresses from PO3 through MCPO in the same GENERAL RATING. However, some general ratings do not start at PO3. For example, the Navy Counselor (NC) rating path begins at NC1 and goes to NCCM. Other general ratings **compress** at certain paygrades. Patternmaker (PM) and Molder (ML) are two general ratings that compress to form MLCS at the SCPO level. Also, some general ratings have SPECIALTY AREAS. The Aviation Warfare Systems Operator (AW) rating has three specialty areas: AWA (Acoustic), AWH (Helicopter), and AWN (Non-Acoustic).

Other general ratings contain SERVICE RATINGS. Sailors in service ratings are specialists in specific areas within a general rating. An example of a general rating with service ratings is Gunner's Mate (GM): GMG and GMM are service ratings that form two paths of advancement within the GM general rating. GMG and GMM start at third class and continue to first class. They compress at the chief (GMC) level.

Individuals in a rating that compresses must be prepared in all branches of the rating leading to the compression rate. For example, the GMC is responsible for both GMG and GMM rating skills.

QUOTAS

Vacancies in each rate are determined on the basis of current and prospective losses. The vacancies are converted to quotas for each rate in all Navy ratings. These quotas are used to determine the number of selectees for advancement in each advancement cycle.

A person's ability to fill one of the quotas in a rating depends on how well that person knows and does his or her job and on his or her initiative and readiness for advancement.

PROFESSIONAL DEVELOPMENT

A person's ability to advance in the Navy depends largely on his or her professional development. Two of the most important aspects of a person's professional development are **SUSTAINED SUPERIOR PERFORMANCE** and **STUDYING FOR ADVANCEMENT**. Sustained superior performance is shown by job performance. Study habits are reflected in examination performance, rating knowledge, and work performance.

Sustained Superior Performance

The key to success in the Navy is sustained superior performance. The higher the advancement goal, the stiffer the competition. The *Enlisted Performance Evaluation Report* must show that a person is among the best in the Navy, not just at his or her present command. It is the most significant management tool in the service record. The performance evaluation is one of the first documents used by superiors to make advancement decisions because it is a continuous record of a person's performance. A person can influence what goes into his or her evaluation by having sustained superior performance. In plain words, a person should **ALWAYS DO TOP-NOTCH WORK**.

Studying for Advancement

Study references listed in this bibliography contain TRAMANs, NRTC's, instructions, technical manuals, and other publications pertinent to each rating.

INTRODUCTION

A person should always use the latest editions of all references. The references listed in this bibliography were effective at the time of printing. However, because of revisions that occur to many of these publications, the sailor should always study the most up-to-date versions of the study references. NETPMSA SMEs are alert for changes to their bibliographies. If a reference for any examination questions changes, the SME makes whatever changes necessary to examination questions affected. Sometimes the questions are unaffected; sometimes they must be deleted. Either way, the sailor is never penalized on an advancement examination for studying the latest edition of a text or change to any instruction.

Persons studying for advancement should be sure to look up any additional references discovered in the listed study references during study. References that fall into this category are called WITHIN-TEXT REFERENCES. Such within-text references are not listed in this bibliography; rather, they are only discovered when a person is studying the study references from his or her advancement bibliography. For example, say a person is studying a topic in one of his or her TRAMANS and notes a reference to another publication for further information. This is a within-text reference; the well-prepared candidate will take the time necessary to look it up. The intent of the author in making reference to another publication is usually to provide the reader with additional or clarifying information. It would be impossible to list all the within-text references one might find in his or her study.

THE ADVANCEMENT PROCESS

An enlisted member must complete the following four major steps to advance:

1. Complete eligibility requirements to take the Navywide advancement-in-rate exam;
2. Pass the Navywide advancement-in-rate exam;
3. Have a final multiple score (FMS) high

enough to get selected or become selection board eligible; and

4. Be advanced by his or her commanding officer.

ELIGIBILITY REQUIREMENTS

A person must meet the following eligibility requirements to take the Navy advancement-in-rate exam:

Minimum Time-in-Rate (TIR) Requirements

Time in rate (TIR) is determined by one's service in paygrade (SIPG) plus, if eligible, USNR drill service in paygrade (DSPG).

Total Active Federal Military Service (TAFMS) Requirements

The Department of Defense (DOD) prescribes the Total Active Federal Military Service (TAFMS) as the minimum service one must have to compete as a REGULAR CANDIDATE for advancement. The TAFMS requirements for advancement to paygrades E-4 through E-9 are shown below.

<u>PAYGRADE</u>	<u>TAFMS</u>
E-4	2 Years
E-5	3 Years
E-6	7 Years
E-7	11 Years
E-8	16 Years
E-9	19 Years

Personnel who qualify in all other respects and are recommended by their commanding officer, but do not have the minimum TAFMS required to be a regular candidate, may still be able to compete as an EARLY CANDIDATE. However, the number of advancement quotas that may be filled by early candidates is determined by DOD manning restrictions to a maximum of 20 percent of the total enlisted forces for E-4, and 10 percent for E-5/6/7/8/9.

INTRODUCTION

Personnel Advancement Requirements (PARs)

PARs (located in Part C of Advancement Handbooks for Petty Officers) are used to verify a person's ability to meet minimum prerequisite skill qualifications required for advancement. PARs completion is **MANDATORY** for advancement to E-4 through E-7.

NOTE

PARs are applicable only to the paygrade for which a candidate is competing. Once PARs have been completed for the paygrade and entered in the candidate's service record, he or she is finished with that paygrade's PARs. If PARs are subsequently changed, an individual is **NOT** required to go back and complete new or changed requirements for a prior paygrade(s).

TRAMAN and NRTC Requirements

TRAMANs and NRTC's are prepared for individual study. They present information about a rate/rating. By studying the TRAMAN and completing its associated NRTC, a person will be able to learn important information about his or her rating. This information can be used in completing PARs and in preparing for Navywide advancement-in-rate examinations.

MANDATORY TRAMANs/ NRTC's.—Enlisted members **must** complete certain mandatory TRAMANs/NRTC's as part of their advancement eligibility requirements. Tables containing mandatory TRAMANs/NRTC's are marked as **mandatory requirements** in this bibliography and in advancement handbooks. To check for the most current mandatory TRAMAN/NRTC requirements, refer to the *Catalog of Nonresident Training Courses*, NAVEDTRA 12061, which is updated quarterly.

SATISFYING MANDATORY TRAMAN/NRTC REQUIREMENTS.—The *Advancement Manual*, BUPERSINST 1430.16,

cites cases in which exemptions from mandatory requirements may exist. Mandatory requirements may be accomplished by the following methods:

1. **Passing the nonresident training course (NRTC) based on the TRAMAN.** (This is the most commonly used method.)

a. Some mandatory TRAMANs/NRTC's are applicable to a single rate, others to two or more rates. **Satisfactory completion of a single-rate course, based on either a single- or multiple-rate TRAMAN/NRTC, satisfies the requirements for ONLY one rate.** For example, completion of the AK3 TRAMAN/NRTC satisfies the requirement only for AK3. For TRAMANs/NRTC's written for two or more rates, completion satisfies requirements for all rates listed. For example, completion of the EM 3&2 TRAMAN/NRTC satisfies requirements for both EM3 and EM2.

b. If a mandatory TRAMAN/NRTC is not available in the supply system, the requirement for completion is normally waived by the NAVADMIN message announcing the examination (See BUPERSINST 1430.16). **ESOs should be aware of waivers.**

2. **Satisfying the TRAMAN/NRTC requirement for a rate through class "A" school.**

Successful completion of class "A" school fulfills the requirement for completing a mandatory TRAMAN/NRTC for E-4, unless otherwise specified in BUPERSINST 1430.16. Completing a class "A" school **DOES NOT** satisfy completion requirements for military requirements TRAMAN/NRTC's, PARs, performance tests, mandatory E-3 TRAMAN/NRTC (SN, AN, FN), or military/leadership examination, unless the equivalent requirement is satisfactorily completed as part of the curriculum and appropriate entries are made in the service record.

a. Graduating from the expanded Apprenticeship Training Program (ATP) satisfies

INTRODUCTION

the requirements for completing mandatory apprenticeship training course(s) (SN, FN, AN) for advancement to paygrade E-3.

b. Only certain fleet and special schools are authorized to assign striker identifications to graduates. Personnel who have a school-assigned striker identification have met the mandatory rating training course(s) requirement for advancement, **BUT NOT** the military/leadership requirements or the specific apprentice training manual.

CAUTION

Even though a person may have been exempted from completing mandatory requirements for his or her last advancement, he or she may still be responsible for demonstrating a knowledge of the information in the mandatory publication for the **NEXT** higher rate, unless otherwise exempted. For example, an MM3 (who was automatically advanced after completing class "A" school) was not required to complete the MM 3&2 TRAMAN/NRTC to be eligible for advancement to MM3. However, to be eligible for MM2, that same person must meet the MM 3&2 TRAMAN/NRTC requirement.

Mandatory training courses are applicable only to the paygrade for which an individual is competing. Once such courses have been completed and entered in a service record, an individual is finished with that paygrade's advancement requirements. If mandatory training course requirements are subsequently changed, an individual is **NOT** required to go back and complete new or changed requirements for a prior paygrade(s). If however, individuals are not advanced and a mandatory training course requirement is **added** to the paygrade for which they are competing, they must complete that new requirement.

Navy Leadership (NAVLEAD) Course

To compete in the CPO examination, personnel must complete the LPO NAVLEAD course prior to 1 January of the examination year. For SCPO selection, personnel must complete the CPO NAVLEAD course prior to 1 October of the nomination year for advancement.

Required Service Schools

Candidates in certain ratings require a service school (at certain paygrades) to become eligible for advancement. (See the *Advancement Manual*.)

Citizenship, Security Clearance, Special Requirements for Certain Ratings

Generally, only U.S. citizens are assigned sensitive duties or granted access to classified information. For this reason, aliens generally are not permitted entry into ratings requiring access to classified information, unless citizenship is imminent. Information on citizenship, security clearance, and special requirements for each rating can be found in the *Manual of Navy Enlisted Manpower and Personnel Classifications and Occupational Standards*, Volume I (NAVPERS 18068F).

Minimum Performance Requirements

The minimum performance mark average (PMA) for a candidate to be eligible to take the E-4 through E-7 advancement-in-rate examination is 3.0. PMA is figured by adding all trait marks assigned in the present paygrade (including those prepared while serving in frocked status) received during the computation period specified in the respective Naval Administrative Message (NAVADMIN) based on the below minimum time-in-rate periods:

E-4 — 6 months as E-3

E-6 — 3 years as E-5

E-5 — 1 year as E-4

E-7 — 3 years as E-6

INTRODUCTION

The total of all marks on all valid evaluations (excluding traits marked NOB) are then divided by the number of marks to attain a PMA. **PMA is not required for E8/9 advancement candidates.**

Military/Leadership Examinations

Commanding officers use military/leadership examinations as a part of the overall qualifying process to determine an individual's qualifications for advancement. A person must demonstrate knowledge of naval standards by passing a military/leadership examination as part of the qualifications for advancement (PO3 through CPO). Military/leadership examinations are administered and graded at local commands.

Meet Physical Readiness Requirements

There are special fitness requirements for advancement. See the Physical Readiness Test (PRT) Coordinator for the latest requirements.

Recommended by the Commanding Officer

The recommendation of the commanding officer is the most important eligibility requirement in the Navy advancement process. The recommendation is not automatic, even if an individual has completed all other eligibility requirements. The recommendation shows that a person has convinced the chain of command, including the commanding officer, that he or she has the ability to perform the work and assume the duties of the next higher rate, particularly in terms of leadership and personal integrity.

Obligated Service Requirements for Advancement

Most ratings have no obligated service requirement to accept advancement to paygrades up to and including E-6. There are, however, exceptions. E-7/8/9 candidates have specific obligated service requirements for advancement.

NAVYWIDE ADVANCEMENT-IN-RATE EXAMINATIONS

Navywide advancement-in-rate examinations are given to all candidates who are (1) fully qualified for advancement, (2) capable of performing at the next higher rate, and (3) recommended for advancement by their commanding officers. Navywide advancement-in-rate examinations are given according to a set schedule at locations and times that are announced in the Plan of the Day. Active duty examinations are given in March and September for petty officer third class, petty officer second class, and petty officer first class, and in January for chief petty officer. Naval Reservist examinations are given in February for petty officer third class through chief petty officer and in August for petty officer third class through petty officer first class.

Examination Day

Every question on an advancement examination pertains to professional knowledge candidates should know about their job. All questions are thoroughly researched by the examination writer before they are included in an exam. **There are no "trick" questions on an advancement exam.** Every precaution is taken to ensure that each question on the examination is fair, and that it is based on a reference that is available to the person taking the exam.

The advancement examination will have 150 multiple-choice questions, each with four answer choices. The examination is given to everyone on the same day, worldwide. This examination is part of a RANK-ORDERING process for advancement selection. Just "getting by" may not be good enough for a person to advance.

Examination participants will have 3 hours to complete the exam. They should (1) fill in their answer sheets carefully, being very sure to blacken correct circles in the correct columns of their answer sheet, and (2) erase mistakes cleanly.

INTRODUCTION

After the Exam

When a person finishes an exam, the answer sheet is forwarded to NETPMSA. The answer sheet will be graded as quickly as possible, but there are many examinations to grade. The results will be reported after approximately 95 percent of the examinations have been processed.

THE SELECTION PROCESS

The Bureau of Naval Personnel (BUPERS) establishes **quotas** for each rate based on vacancies. The number of vacancies determines the number of candidates who can be selected — a number is generally less than the number of qualified candidates. The selection process identifies selectees by using a process called **rank-ordering**. In rank-ordering candidates, NETPMSA calculates the **final multiple score (FMS)** for each candidate and ranks each candidate by score — from the highest to the lowest. For example:

Assume there are 500 exam-passing candidates for BM3; but BUPERS has established that only 200 BM3 quotas are available. The FMSs for the 500 exam-passing candidates will be used to rank-order the candidates, from the *most* qualified to the *least*, thereby assisting in the selection.

Calculating the Final Multiple Score Considering the "Whole Person"

The FMS, which is used to rank-order and select from among all qualified, test-passing candidates, is based on the **"whole person"** concept. This concept considers the candidate's knowledge, experience, and performance, as calculated in the following factors:

1. **KNOWLEDGE** — Reflected in the **examination score**;
2. **EXPERIENCE** — Reflected in **length of service, time in rate, award points, and passed but not advanced points**; and

3. **PERFORMANCE** — Reflected in the **performance evaluation and awards**.

The candidate has the greatest influence over the examination score, PNA points, and personal performance — affecting performance mark average (PMA). Here is some information on these factors:

EXAMINATION SCORES.—When an examination is scored, the raw score is converted to a standard score that ranges from 20 to 80. Standard scores are used rather than raw scores to ensure that all examinations measure each candidate's performance on the examination in the same way.

PNA POINTS.—PNA points are automatically included in the FMS for E-4 through E-6 candidates. PNA points are given to any candidate who, **compared to other candidates**, achieved a relatively high examination score and/or had a relatively high performance mark average (PMA) on a previous exam cycle for the same rate, but was not advanced because of quota limitations. Maximum PNA points for one exam cycle is 3. Maximum cumulative PNA points for E-6 is 12; for E-4 and E-5, maximum is 10. PNA points are credited as follows:

<u>RELATIVE TEST SCORE</u>	<u>PNA POINTS</u>
Top 25 percent	1.5
Next 25 percent	1.0
Next 25 percent	0.5

<u>RELATIVE PERF MARK AVG</u>	<u>PNA POINTS</u>
Top 25 percent	1.5
Next 25 percent	1.0
Next 25 percent	0.5

PERFORMANCE MARK AVERAGE (PMA).— Performance evaluation marks are converted to a performance mark average (PMA), which is one of the most important factors used to compute the FMS. Remember, the FMS is used to rank-order a candidate against all other candidates who took the same examination. Thirty percent of PO3 and PO2 candidate's FMS is based on performance; it's 35 percent for PO1 candidates, and 40 percent for CPO candidates.

INTRODUCTION

Computing Final Multiple Score (FMS)

Table A-1 shows what comprises the FMS for E-4 through E-7 (only PMA and SS are used for E-7). Refer to BUPi RSINST 1430.16 for instructions on computing FMS.

Exceptions to the FMS for E-7, E-8, and E-9

Only two factors are included in the FMS for E-7 candidates: PMA and standard score. Final multiple scores are not applicable for advancement to E-8 and E-9 because there is no E-8 or E-9 examination.

Notification of Results

When examination results arrive at a command, candidates are given an EXAMINATION PROFILE INFORMATION FORM (see figure A-1) and a TEAR SHEET (see figure A-2). A person should compare his or her Profile Information Form to the Tear Sheet to evaluate his or her examination performance (E-8 and E-9 candidates do not receive these forms).

Table A-1.— Computing the Final Multiple

FACTOR	EXAMINATION PAYGRADE	COMPUTATION	MAXIMUM POINTS and (%)		
			E-4/5	E-6	E-7
Standard Score (SS)	ALL	Indicated on Exam Profile Sheet	80(35%)	80(30%)	80(60%)
Performance	E-4/5	PMA X 60-170	70(30%)		
	E-6	PMA X 60-148		92(35%)	
	E-7	PMA X 13			52(40%)
Length of Service (LOS)*	E-4/5	(TAS-SIPG)+15	30(13%)		
	E-6	(TAS-SIPG)+19		34(13%)	
Service in Paygrade (SIPG)*	E-4/5	2 X SIPG +15	30(13%)		
	E-6	2 X SIPG +19		34(13%)	
Awards	E-4/5	Values in advancement manual	10(4.5%)		
	E-6			12(4.5%)	
PNA Points	E-4/5	See past Profile Form	10(4.5%)		
	E-6			12(4.5%)	
Max. FMS Possible	ALL		230 (100%)	264 (100%)	132 (100%)
* After calculating LOS and SIPG by using years/months, convert to decimal by using the following conversions:					
<u>Month</u>	<u>Fraction</u>	<u>Month</u>	<u>Fraction</u>	<u>Month</u>	<u>Fraction</u>
1	.08	4	.33	7	.58
2	.17	5	.42	8	.67
3	.25	6	.50	9	.75
				10	.83
				11	.92

H (High) = Upper 30%

HA (High Average) = Upper 40%

A (Average) = Middle

LA (Low Average) = Lower 40%

L (Low) = Lower 30%

P (Poor) = Lower 20%

VP (Very Poor) = Lower 10%

YOU MAY CONTACT YOUR ESO FOR DATA USED FOR YOUR MULTIPLE COMPUTATION

1. PREVIOUSLY RECEIVED PNA POINTS.—Shows PNA points a person previously received (included in person's FMS).
2. PROJECTED PNA POINTS.—Shows projected PNA points from this exam for the next exam cycle. Automatically added to person's FMS on the next exam.
3. EXAMINATION STATUS.—Shows whether a person passed or failed and his or her exam standard score. For example, PASS/SS 56 would mean the person passed the exam and his or her standard score was 56.
4. FINAL MULTIPLE.—Shows the FMS.
5. MINIMUM MULTIPLE REQUIRED.—Shows the minimum FMS required for advancement in a given rate. If the final FMS were equal to or higher than this figure, the person would be selected for advancement.
6. SECTION/STANDING 1-12.—Shows the examination section and a person's standing in that section compared to all others who took that exam. The section number corresponds with the sections shown on the Examination Tear Sheet (figure A-2). Personnel should use this information to discover how well they fared on this exam only. Personnel **SHOULD NOT** base future examination study on the profile form or the tear sheet. Remember, each exam is new. NOTE: SEE INFORMATION ABOUT PROFILE FORM MYTHS AT THE END OF THIS INTRODUCTION.

Figure A-1.—Examination Profile Information Form.

INTRODUCTION

Give This Sheet To Your Proctor
**ADVANCEMENT EXAMINATION TEAR SHEET FOR ALL
ABZ
EXAMINATIONS WITH SERIAL NUMBERS
FROM 1380001 TO 1389999**

WHAT TO FILL IN

Fill in NAME, RATE, SSN, DIV, AND SHIP/STATION in the spaces provided at the bottom, then give this sheet to your **EXAM PROCTOR**.

HOW TO USE THIS SHEET

Compare this sheet with your *Examination Profile Information Form* to find your level of success, as compared to all others in your rate taking this exam. See the back of this sheet for an explanation of the *Examination Profile Information Form*.

WHAT IS THE SOURCE OF EXAM QUESTIONS

Exam questions are written by chief petty officers in your rating from the perspective of job experience and knowledge and are supported by occupational standards listed by rating in Volume I of the *Manual of Navy Enlisted Manpower and Personnel Classifications and Occupational Standards*, NAVPERS 18068. Do not expect to find questions and responses written directly from references.

DO NOT use this sheet to study for the next exam. Exam content varies from one exam series to another. This sheet is for this exam only, **NOT** future exams.

SECTION	JOB AREAS AND KNOWLEDGE
1	<i>Electronic Theory.</i> Electronic components; Schematics; AC and DC Theory; Circuit Diagrams
2	<i>Electronic and Electrical Maintenance.</i> Troubleshooting Techniques; General Equipment Repair; Test Equipment Operation and Maintenance
3	<i>Electronic Countermeasures.</i> Threat Identification; Threat Countermeasures; Emergency Conditions
4	<i>Security.</i> Communications Security; Personal Censorship; Emergency Destruction; Storage and Handling
5	<i>Technical Administration.</i> ESM Logs; Technical Library Maintenance; Equipment Maintenance
6	<i>Documentation</i>
7	<i>Electronic System Operations.</i> Radiation Characteristics; ESM System Capabilities and Limitations; General Operating Procedures
8	<i>Communications.</i> Radiotelephone Procedures; Tactical Communications

Under authority of Title 5 USC 301, information regarding your military status is requested. The information will be used to match exam results and profile information. This information will not be divulged, without written authorization, to anyone other than those within DOD for official use in determining performance.

NAME: _____ RATE: _____ SSN: _____

DIV: _____ SHIP/STATION: _____

Figure A-2.—Tear Sheet.

INTRODUCTION

ADVANCEMENT

A person selected for advancement may have to wait before actually being advanced. BUPERS specifies the number of advancements that may be made each month. NETPMSA "fair-shares" these advancements among the ratings.

Selectees are advanced in increments. E-4 through E-9 advancements are made in two segments consisting of monthly increments (see table A-2).

Remember, although NETPMSA issues the authority to advance an individual, **the commanding officer is the one who will actually award the ADVANCEMENT**, provided the person has maintained his/her eligibility up to the effective date of advancement.

Table A-2.—Segments and Increments for Advancement

CANDIDATES FOR	EXAM OR NOMINATION	SEL BRD CONVENES	SELECTEES NOTIFIED	ADVANCEMENT INCRMTS/SEGMENTS
E-4/5/6	MAR SEP	NA NA	JUN SEP DEC MAR	JUL-SEP (1st) OCT-DEC (2nd) JAN-MAR (1st) APR-JUN (2nd)
E-7	JAN	JUN	AUG FEB	SEP-FEB (1st) MAR-AUG (2nd)
E-8/9	NOV ¹	MAR	JUN DEC	JUL-DEC (1st) JAN-JUN (2nd)

¹Month of nomination for advancement by commanding officer.

Frocking

Frocking is an administrative authorization to assume the title and wear the uniform of a higher paygrade without entitlement to the pay and allowances of that grade. Frocking provides early recognition for members selected for petty officer third class through master chief petty officer. After verifying eligibility data, commands may frock selectees as follows:

E-4 FROCKING.—Qualified E-4 selectees (including those in a training status) may be frocked as soon as the Examination Status Verification Report (ESVR)/Rating Change Authorization (RCA) announcing selectee status has been verified and after completing the Petty Officer Indoctrination Course (POIC).

E-5/6 FROCKING.—Qualified E-5/6 selectees

may be frocked once the data on the ESVR/RCA announcing selectee status has been verified.

E-7 FROCKING.—Qualified E-7 selectees may be frocked no earlier than the first advancement increment (normally 16 Sep) and after completing the Chief Petty Officer Indoctrination Course (CPOIC).

E-8/9 FROCKING.—Qualified E-8/9 selectees may be frocked upon receipt of the selection board results (usually by NAVADMIN message).

ADVANCEMENT HANDBOOKS

The *Advancement Handbook for Petty Officers* (one for each rating) is a convenient tool for personnel studying for advancement. It provides, in one easy-to-use handbook, information to personnel who need to prepare for advancement. Each handbook presents a bibliography for advancement

INTRODUCTION

examination study and Personnel Advancement Requirements (PARs). Each PAR includes a PAR initial and date line. Supervisors should use PARs to evaluate each person's occupational readiness for advancement in rate or change in rating. A PARs Completion Memorandum form signed off by a division/supervising officer indicates satisfactory completion of all the PARs.

The *Advancement Handbook for Apprenticeships* (combines AN, CN, DN, FN, HN, and SN into one book) serves the same function as the handbooks for petty officers, with the exception of PARs. There are no PARs for apprenticeships.

Petty officer and apprenticeship handbooks are produced by the Naval Education and Training Program Management Support Activity (NETPMSA). Distribution is NOT automatic.

An individual copy of the *Advancement Handbook for Petty Officers* should be ordered, by rating, for each individual preparing for advancement to the next higher paygrade. A copy of the *Advancement Handbook for Apprenticeships* should be ordered for each individual preparing for E-3. Each command is responsible for ensuring that a copy of the appropriate handbook is provided to each candidate preparing for advancement.

The Naval Education and Training Program Management Support Activity issues an ordering letter for advancement handbooks in February or March. The order blank should be completed and returned before 31 March to the following address:

COMMANDING OFFICER
NETPMSA CODE 03221
6490 SAUFLEY FIELD ROAD
PENSACOLA, FLORIDA 32509-5126

INTRODUCTION

KEY POINTS FOR THE ESO TO REMEMBER ABOUT THE BIBLIOGRAPHY

- The bibliography is valid until changed. Where there is a difference between this bibliography and the bibliography in the advancement handbook, this publication takes precedence. (The handbooks are prepared before the *Bibliography for Advancement Study*. Therefore, some references herein may have been updated.)
- Some E-3 and E-4 mandatory training course requirements may be fulfilled by successfully completing an appropriate apprentice program or class "A" school.
- A person should study the bibliography for the next higher rate, present rate, and lower rates in his or her path of advancement.
- The bibliography for each rating is only the starting point of a person's study for advancement. Within-text references (specific referrals) form the balance of the bibliography and should be considered study material.
- PARs and mandatory training courses are applicable only to the paygrade for which an individual is competing. Once the requirements have been completed and documented in the candidate's service record, the individual is finished with that paygrade's advancement requirements. An individual is **NOT** required to go back and complete new or changed requirements for a prior paygrade(s). If, however, individuals are not advanced and a mandatory training course requirement is added to the paygrade for which they are competing, they must complete that new requirement.
- Command is responsible for ordering advancement handbooks. **DISTRIBUTE HANDBOOKS TO ALL HANDS UPON RECEIPT.**

QUESTIONS OFTEN ASKED OF EXAM WRITERS

- *How can I best prepare for advancement?* Be a top-notch performer. Gain experience in all aspects of your rating. Study publications listed in your *Bibliography for Advancement Study* for your present rate, the rate below, and the rate for which you are competing.
- *Will I find word-for-word answers to exam questions in referenced publications?* For the military/leadership exam, the answer is "probably so," as it is a *qualifying* exam with questions similar to questions in the mandatory military TRAMAN/NRTC. For the Navywide advancement-in-rate exam, the answer is NO. This exam is a *rank-ordering* exam with questions written at the highest level of application to ensure selection of only the "best" candidates from a group of fully qualified candidates.
- *How can I improve my test scores?* To score high on the Navywide advancement-in-rate exam, you need to be able to *understand and apply* the concepts presented in your mandatory TRAMAN/NRTC and all reference publications for which you are responsible. Use your Examination Tear Sheet, along with your Examination Profile Information Form, to identify subject matter areas in which you need to improve your knowledge. Study ALL reference publications to fully understand the application of the material to your rating.

EXAMINATION PROFILE INFORMATION FORM AND TEAR SHEET "MYTHS"

MYTH 1 — "The profile form tells candidates how many questions they answered correctly in each examination section."

NOT TRUE. The profile form only tells candidates how well they did in each examination section in relation to their peers. For example: A rating of superior indicates a candidate was in the top 10 percent of the candidates taking this section -- NOT how many questions were answered correctly. A superior standing simply tells candidates that *they answered MORE questions correctly than their peers who were rated below superior.*

MYTH 2 — "The profile form tells candidates what they should study for the NEXT exam."

NOT TRUE. The profile form only reflects how well candidates performed, in relation to their peers, on THIS exam. The NEXT examination will not have the same questions, and candidates will not be competing with the same peers. There are no shortcuts! For the next exam, candidates should always study the bibliography listed in their advancement handbook.

MYTH 3 — "Profile forms may be used as a basis for training programs."

NOT TRUE because of the reasons stated in myths 1 and 2. Again, there are no shortcuts. A training program that covers the entire advancement handbook bibliography will produce the best results. One method of organizing study is to use Personnel Advancement Requirements (PARs). PARs are divided into job areas with pertinent references listed for each job area.

MILITARY AND APPRENTICESHIP REQUIREMENTS

Mandatory Military Requirements For All Ratings

GRADE	TRAMAN/NRTC TITLE	IDENTIFYING NUMBER
E-3	Basic Military Requirements	SEE NAVEDTRA 12061 FOR UP-TO-DATE TITLES & NAVEDTRA NUMBERS
E-4	Military Requirements for PO3	
E-5	Military Requirements for PO2	
E-6	Military Requirements for PO1	
E-7	Military Requirements for CPO	
E-8/9	Military Requirements for Senior and Master CPO	

Basic Bibliography For Apprenticeships

(Mandatory Requirements Marked With An Asterisk (*))

APPREN- TICESHIP	TRAMAN/NRTC TITLE	IDENTIFYING NUMBER
AN	* AIRMAN	(TRAMAN -- See NAVEDTRA 12061)
	Use and Care of Hand Tools and Measuring Tools	(TRAMAN -- See NAVEDTRA 12061)
	Aircraft Weapons System Cleaning and Corrosion Control	NAVAIR 01-1A-509, Jul 88
FN	* FIREMAN	(TRAMAN -- See NAVEDTRA 12061)
	Use and Care of Hand Tools and Measuring Tools	(TRAMAN -- See NAVEDTRA 12061)
SN	* SEAMAN	(TRAMAN -- See NAVEDTRA 12061)
	Use and Care of Hand Tools and Measuring Tools	(TRAMAN -- See NAVEDTRA 12061)
CN, DN, HN	There are no E-3 Apprenticeship Examinations or mandatory TRAMANS/NRTCs for these three apprenticeships.

Chap 001, General - Publication Index and User Guide	NAVSEA S9086-AA-STM-010
Chap 075, Threaded Fasteners	NAVSEA S9086-CJ-STM-000
Chap 078, Gaskets, Packings, and Seals	NAVSEA S9086-CM-STM-000
Chap 079, Vol 3, Damage Control - Engineering Casualty Control	NAVSEA S9086-CN-STM-030
Chap 220, Vol 1, Boiler Water/Feedwater - Water Chemistry	NAVSEA S9086-GX-STM-010
Chap 220, Vol 2, Boiler Water/Feedwater - Test and Treatment	NAVSEA S9086-GX-STM-020
Chap 221, Boilers	NAVSEA S9086-GY-STM-010
Chap 233, Diesel Engines	NAVSEA S9086-HB-STM-000
Chap 234, Marine Gas Turbines	NAVSEA S9086-HC-STM-000
Chap 244, Propulsion Bearings and Seals	NAVSEA S9086-HN-STM-010
Chap 245, Propellers	NAVSEA S9086-HP-STM-010
Chap 262, Lubricating Oils, Greases, Hydraulic Fluids and Lubricating Systems	NAVSEA S9086-H7-STM-010
Chap 300, Electric Plant General	NAVSEA S9086-KC-STM-010
Chap 302, Electric Motors and Controllers	NAVSEA S9086-KE-STM-000
Chap 310, Electric Power Generators and Conversion Equipment	NAVSEA S9086-KN-STM-010
Chap 313, Portable Storage and Dry Batteries	NAVSEA S9086-KR-STM-000
Chap 320, Electric Power Distribution Systems	NAVSEA S9086-KY-STM-000
Chap 491, Electrical Measuring and Test Instruments	NAVSEA S9086-Q5-STM-000
Chap 503, Pumps	NAVSEA S9086-RH-STM-000
Chap 504, Pressure, Temperature, and Other Mechanical and Electromechanical Measuring Instruments	NAVSEA S9086-RJ-STM-000
Chap 505, Piping Systems	NAVSEA S9086-RK-STM-010
Chap 541, Petroleum Fuel Stowage, Use, and Testing	NAVSEA S9086-SN-STM-000
Chap 542, Gasoline and JP-5 Fuel Systems	NAVSEA S9086-SP-STM-000

GAS TURBINE SYSTEMS TECHNICIAN (GSE)

REFERENCE TITLE	IDENTIFYING NUMBER
