GENERAL INSTRUCTIONS FOR COMPLETING SF 298

The Report Documentation Page (RDP) is used in announcing and cataloging reports. It is important that this information be consistent with the rest of the report, particularly the cover and title page. Instructions for filling in each block of the form follow. It is important to **stay within the lines to meet optical scanning requirements.**

Block 1. Agency Use Only (Leave Blank)

Block 2. Report Date. Full publication date including day, month, and year, if available (e.g. 1 Jan 88). Must cite at least the year.

Block 3. Type of Report and Dates Covered. State whether report is interim, final, etc. If applicable, enter inclusive report dates (e.g. 10 Jun 87 - 30 Jun 88).

Block 4. Title and Subtitle. A title is taken from the part of the report that provides the most meaningful and complete information. When a report is prepared in more than one volume, repeat the primary title, add volume number, and include subtitle for the specific volume. On classified documents enter the title classification in parentheses.

Block 5. Funding Numbers. To include contract and grant numbers; may include program element number(s), project number(s), task number(s), and work unit number(s). Use the following labels:

C - Contract	PR - Project
G - Grant	TA - Task
PE - Program Element	WU - Work Unit Accession No.

Block 6. Author(s). Name(s) of person(s) responsible for writing the report, performing the research, or credited with the content of the report. If editor or compiler, this should follow the name(s).

Block 7. Performing Organization Name(s) and Address(es). Self-explanatory.

Block 8. Performing Organization Report Number. Enter the unique alphanumeric report number(s) assigned by the organization performing the report.

Block 9. Sponsoring/Monitoring Agency Name(s) and Address(es). Self-explanatory.

Block 10. Sponsoring/Monitoring Agency Report Number. (If known)

Block 11. Supplementary Notes. Enter information not included elsewhere such as: Prepared in cooperation with...; Trans. of ..., To be published in When a report is revised, include a statement whether the new report supersedes or supplements the older report.

Block 12a. Distribution/Availability Statement.

Denote public availability or limitation. Cite any availability to the public. Enter additional limitations or special markings in all capitals (e.g. NOFORN, REL, ITAR)

DOD - See DoDD 5230.24, "Distribution Statements on Technical Documents."

DOE - See authorities

NASA - See Handbook NHB 2200.2.

NTIS - Leave blank.

Block 12b. Distribution Code.

DOD - DOD - Leave blank

DOE - DOE - Enter DOE distribution categories from the Standard Distribution for Unclassified Scientific and Technical Reports

NASA - NASA - Leave blank

NTIS - NTIS - Leave blank.

Block 13. Abstract. Include a brief (Maximum 200 words) factual summary of the most significant information contained in the report.

Block 14. Subject Terms. Keywords or phrases identifying major subjects in the report.

Block 15. Number of Pages. Enter the total number of pages.

Block 16. Price Code. Enter appropriate price code (NTIS only).

Blocks 17. - 19. Security Classifications.

Self-explanatory. Enter U.S. Security Classification in accordance with U.S. Security Regulations (i.e., UNCLASSIFIED). If form contains classified information, stamp classification on the top and bottom of the page.

Block 20. Limitation of Abstract. This block must be completed to assign a limitation to the abstract. Enter either UL (unlimited) or SAR (same as report). An entry in this block is necessary if the abstract is to be limited. If blank, the abstract is assumed to be unlimited.

19 July 1994

MEMORANDUM FOR US Army Medical R & D Command
ATTN: SGRD-RMI-S/Virginia Miller, Ft. Detrick,
Frederick, MD 21702-5102

SUBJECT: Final Report of MIPR 92 MM 2539

1. Refer to memo dated 24 August 1993, enclosure 1.
2. This memo pertains to the research period 15 March 1992 through 15 September 1993, for the subject MIPR, titled: Comparison of Work of Breathing During Mechanical Ventilation Using Assist Control and Intermittent Mandatory Ventilation.
3. During the study period, 2 patients were enrolled. Data from the study is uninterpretable due to the wide range in values which was unavoidable during the collection period. The experiment was unsuccessful from the onset with patients not tolerating the adjustments to the ventilator, culminating in patient-ventilator dyssynchrony and ultimately bad data. The instrument used to collect the data, the metabolic cart, was overly sensitive to these fluctuations in breathing changes and unreliable in the data results. The research effort was terminated after these failed attempts.
4. MIPR expenditures during the study period include:

Personnel	\$ 857.00	(Sept 92)	- Research Nurse
Equipment	\$7462.00	(June 92)	- Computer
Supplies	\$ 490.00	(Sept 92)	- Software

Total	\$8809.00
-------	-----------
5. Allocated funding for the project included:

FY 1992:	\$32,521.00
FY 1993:	\$16,667.00
6. There were no publications or manuscripts generated from the failed experiment.
7. It is regrettable that such a delay in generating this final report occurred. In addition, the memorandum format of this final

report, which deviates from normal procedures, was discussed with MAJ Bruttig, USAMRDC, Ft. Detrick, MD, who provided guidance and approval of this format.

A handwritten signature in cursive script, appearing to read 'R. Poropatich, M.D.', written in dark ink.

24 Aug 93

MEMORANDUM FOR U.S. Army Medical R & D Command, Attn: SGRD-ACQ/Ms.
Jean Feldman, Ft. Detrick, Frederick, MD, 21702-5102

SUBJECT: Termination of MIPR 92MM2539

1. Request termination of MIPR 92MM2539, titled: Comparison of Work of Breathing During Mechanical Ventilation Using Assist Control and Intermittent Mandatory Ventilation.
2. Since initiation of the above study in March 1992, only 2 patients have been enrolled. Difficulties in enrollment has been due to patients not tolerating the various ventilatory settings, as well as the metabolic cart (which measures the exhaled carbon dioxide and oxygen consumption) having too large a range in measured variables. This latter fact may be related to the difficulties encountered in tolerating the ventilator changes.
3. In addition, there has been insufficient time to pursue research by this investigator due to the many taskings assigned for the Remote Clinical Communications System (RCCS); see enclosures. This is a project which began in December 1992, from the Office of the Surgeon General of the U.S. Army and is a form of telecommunications among physicians, involving much time and resources. Such efforts have culminated in this investigator deploying the RCCS to Somalia in February 1993, Germany and Croatia in May 1993, and this coming September 1993 at a military conference in Hungary. Other taskings included development of a poster and its presentation at 1 general meeting in May 1993 in Washington, DC as well as 2 upcoming scientific meetings in October and November 1993 (AUSA and AMSUS respectively). In addition to clinical duties in Pulmonary and Critical Care Medicine at Walter Reed Army Medical Center, no scientific work could be pursued on the above project.
4. In light of the on-going clinical and telemedicine demands placed upon this researcher, as well as the inherent difficulties enrolling patients and collecting data, request that the study be terminated.
