10.i INTRODUCTION

This is an Electronic Data Interchange (EDI) systems design document that describes the standard or "convention" the Department of Defense (DoD) will use to accept a transportation invoice using the ASC X12.104 Transaction Set 210 Motor Carrier Invoice (003020). It contains information for the design of interface computer programs that serve to link systems application computer programs and an EDI translator computer program.

Who Needs to Use This Document

Computer programmers can use this document to identify the data in a populated EDI transaction with data requirements of their specific application database. Conversely, programmers can identify where their applications data requirement should be carried in an EDI transaction.

Why Use a Convention

There are more ways to populate an EDI transaction than there are ways to fill out a blank form. A convention defines the rules for filling in or "populating" an EDI transaction with a specific data set. Following a convention ensures the integrity of data that is produced and processed by EDI capable computer systems.

Contents

Four sections are included in this document.

- Section 10.2, Control Segments, identifies the specific data requirements for formatting the EDI interchange control segments needed to send and receive EDI transactions.
- Section 10.5, Data Element Cross-Reference Matrix, lists the data requirements of DoD and specifies where each data element should be carried in the transaction set. This section can be used to map an existing application database into the transaction set.
- Section 10.7, DoD Conventions, lists the layout of the target transaction set by segment and data element. Identified along side each transaction set data element is the cross-reference data element from Section 10.5. This section can be used to interpret segments and data elements of a populated transaction set.
- Appendices contain examples of populated transaction sets, trading partner data element matrix, and other items that serve as references for software developers.

(Blank Page)

10.2 Control Segments

Overview

This chapter describes the Electronic Data Interchange (EDI) control segments (interchange control segments and functional group segments). The control segment information was derived from the ASC X12 Standards Draft Version 3 Release 2 (003020).

Purpose

This chapter identifies specific data requirement for formatting the EDI control segments when transmitting and receiving EDI transactions. The format and data content of the control segments is usually managed by EDI translation software. The data requirement described herein should be used to set control segment format when installing or initializing translation software for transmission and reception of EDI transaction.

Contents

Two items are included in this chapter.

- Table 10.2-1, Interchange Control Segment Hierarchy describes the control segments in their order of occurrence in an EDI communications interchange.
- Table 10.2-2, DoD Convention ASC X12 Control Segments is a detailed description of the Department of Defense data conventions for formatting EDI standard control segments. All segments identified in Table 10.2-1 are broken down and described by their discrete data elements.

(Blank Page)

TABLE 10.2-2

DoD Convention

ASC X12 Control Segments

(BLANK PAGE)

Segment: ISA Interchange Control Header
Usage: M

Purpose: To start and identify an interchange of one or more functional groups and interchange-related control segments. The actual values of the data element separator and the segment terminator for this interchange are by the interchange control header. For a particular interchange, the value at the fourth character position is the data element separator, and the value of the last character position is the value of the segment terminator.

Note: The interchange control number value in this header must match the value in the same data element in the corresponding interchange control trailer.

Data Element Summary

<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>Attributes</u>				
ISA01	I01	Authorization Information Qualifier Code to identify the type of information in the Authorization Information.	M ID 2/2				
<table><tr><th><u>Code</u></th><th><u>Definition</u></th></tr><tr><td>00</td><td>No Authorization Information Present</td></tr></table>				<u>Code</u>	<u>Definition</u>	00	No Authorization Information Present
<u>Code</u>	<u>Definition</u>						
00	No Authorization Information Present						
ISA02	I02	Authorization Information Information used for additional identification or authorization of the sender or the data in the interchange.	M AN10/10				
ISA03	I03	Security Information Qualifier Code to identify the type of information in the security information.	M ID 2/2				

Authorization Qualifier
[001]

Authorization Info
[002]

If no authorization information is
agreed to by trading partners, fill
field with zeroes.

Security Qualifier
[003]

Code Definition

00 No security information present.

Security Info
[004]

If no security information is
agreed to by trading partners, fill
field with zeroes.

ISA04 104 Security Information M AN10/10
This is used for identifying the security information
about the sender or the data in the interchange.

Sender Qualifier
[005]

Use authorized X12 code list.

ISA05 105 Interchange Id Qualifier M ID 2/2
Qualifier to designate the system/method of code
structure used to designate the sender ID element
being qualified.

Sender Id
[006]

DoD activities use Department of
Defense Activity Address
Code (DoDAAC) or other code
coordinated with the Defense
Transportation EDI Administrator.
Non-DoD activities use identifica-
tion code qualified by ISA05 and
coordinated with the value-added
network (VAN).

ISA06 106 Interchange Sender's Id M AN15/15
Identification code published by the sender for other
parties to use as the receiver ID to route data to
them.

Interchange Qualifier
[007]

Use authorized X12 code list.

ISA07 105 Interchange Id Qualifier M ID 2/2
Code to identify the type of information in the
Authorization Information.

Receiver Id [008] For DoD activities, use Department of Defense Activity Address Code (DoDAAC) or other code coordinated with the Defense Transportation EDI Administrator. For Non-DoD activities, use identification code qualified by ISA07 and coordinated with the VAN.	ISA08 107 Interchange Receiver's Id M AN15/15 Identification code published by the receiver of the data.				
Date [009] Assigned by translation software.	ISA09 108 Interchange Date M DT 6/6 Date of the interchange.				
Time [010] Assigned by translation software.	ISA10 109 Interchange Time M TM 4/4 Time of the interchange.				
Standards Id [011]	ISA11 110 Interchange Control Standard M ID 1/1 Identifier Code to identify the agency responsible for the control standard used by the message that is enclosed by the interchange header and trailer. <table data-bbox="867 1333 1460 1438"> <thead> <tr> <th>Code</th><th>Definition</th></tr> </thead> <tbody> <tr> <td>U</td><td>U.S. EDI Community of ASC X12, TDCC, and UCS</td></tr> </tbody> </table> ISA12 111 Interchange Control Version M ID 5/5 This version number covers the interchange control segments and the functional group control segments.	Code	Definition	U	U.S. EDI Community of ASC X12, TDCC, and UCS
Code	Definition				
U	U.S. EDI Community of ASC X12, TDCC, and UCS				

Version Id
[012]

Version ID as defined or agreed upon by the trading partners.

Interchange Control Number
[013]

Assigned by translation software.

Acknowledgment Request
[014]

Code value agreed upon by trading partners.

Test Indicator
[015]

Code value agreed upon by trading partners.

Code Definition

00302 Draft Standard for Trial Use Approved for Publication by ASC X12 Procedures Review Board Through October 1991

ISA13 I12 Interchange Control Number M NO 9/9
This number uniquely identifies the interchange data to the sender.

ISA14 I13 Acknowledgment Requested M ID 1/1
Code sent by the sender to request an interchange acknowledgement.

Code Definition

0 No Acknowledgment Requested
1 Interchange Acknowledgement Requested

ISA15 I14 Test Indicator M ID 1/1
Code to indicate whether data enclosed by this interchange envelope is test or production.

Code Definition

P Production Data
T Test Data

ISA16 I15 Subelement Separator M AN 1/1
This is a field reserved for future expansion in separating data element subgroups.

Subelement Separator
[016]

Segment: GS Functional Group Header

Usage: M

Purpose: To indicate the beginning of a functional group and to provide control information

Comment: A. A functional group of related transaction sets, within the scope of X12 standards, consists of a collection of similar transaction sets enclosed by a functional group header and a functional group trailer.

Syntax Notes: 01 The data interchange control number (GS06) in this header must be identical to the same data element in the associated Functional Group Trailer (GE02).

Data Element Summary

Ref. Des.	Data Element	Name	Attributes
-----------	--------------	------	------------

GS01	479	Functional Id Code	M ID 2/2
------	-----	--------------------	----------

Code identifying a group of application related Transaction Sets.

Code Definition

IA	110 - Air Freight Details and Invoice
IM	210 - Freight Details and Invoice (Motor)
MI	213 - Carrier Shipment Status Inquiry
QM	214 - Shipment Status Message
IR	410 - Freight Details and Invoice (Rail)
RA	820 - Payment Order/Remittance Advice
SI	858 - Shipment Information
FB	859 - Freight Invoice (Generic Mode)
CG	994 - Administrative Message
FA	997 - Functional Acknowledgement

Functional Id
[020]

Choose the code value appropriate to the information content of the functional group. See X12 Dictionary for source code list.

GS02	142	Application Sender's Code	M AN 2/12
------	-----	---------------------------	-----------

Code identifying party sending transmission. Codes agreed to by trading partners.

Sender's Code
[021]

DoD activities use Department of Defense Activity Address Code (DoDAAC). Non-DoD activities use identification code assigned by DoD activity. Recommend for increased security that non-DoD code differ from that used in ISA06.

Receiver's Code
[022]

DoD activities use Department of Defense Activity Address Code (DoDAAC). Non-DoD activities use identification code assigned by DoD activity. Recommend for increased security that non-DoD code differ from that used in ISA08.

Date
[023]

Assigned by translation software.

Time
[024]

Assigned by translation software.

Group Control Number
[025]

Assigned by translation software.

GS03 124 Application Receiver's Code M AN 2/12
Code identifying party receiving transmission. Codes agreed to by trading partners.

GS04 29 Group Date M DT 6/6
Date sender generated a functional group of transaction sets.

GS05 30 Group Time M TM 4/4
Time (HHMM) when the sender generated a functional group of transaction sets (local time at sender's location).

GS06 28 Group Control Number M NO 1/9
Assigned number originated and maintained by the sender.

Agency Code
[026]

Indicates that an ANSI X12 standard is being transmitted.

Version/Release
[027]

Code value agreed to by trading partners. See X12 Dictionary for source code list.

GS07 455 Responsible Agency Code M ID 1/2
Code used in conjunction with Data Element 480 to identify the issuer of the standard.

<u>Code</u>	<u>Definition</u>
X	Accredited Standards Committee X12

GS08 480 Version/Release/Industry Id Code M ID 1/12
Code indicating the version, release, subrelease and industry identifier of the EDI standard being used. (See X12 Dictionary)

<u>Code</u>	<u>Definition</u>
003020	Draft Standards Approved By ASC X12 Through October 1991

Segment: GE Functional Group Trailer

Usage: M

Purpose: To indicate the end of a functional group and to provide control information

Comment: A. The use of identical data interchange control numbers in the associated functional group header and trailer is designed to maximize functional group integrity. The control number is the same as that used in the corresponding header.

Syntax Notes: 01 The data interchange control number (GE02) in this trailer must be identical to the same data element in the associated Functional Group Header (GS06).

Data Element Summary

Ref. Des.	Data Element	Name	Attributes
GE01	97	Number of Included Sets	M NO 1/6
		Total number of transaction sets included in the functional group or interchange (transmission) group terminated by the trailer containing this data element.	
GE02	28	Group Control Number	M NO 1/9
		Assigned number originated and maintained by the sender.	

Number of Segments
[028]

Assigned by the translation
software.

Group Control Number
[029]

Assigned by the translation
software. This control number
must match the control number of
the preceding GS06 control num-
ber.

Segment: IEA Interchange Control Trailer

Usage: M

Purpose: To define the end of an interchange of one or more functional groups and interchange related control segments.

Note: The interchange control number in this trailer must match the value in the same data element in the corresponding interchange header.

Data Element Summary

Ref. Des.	Data Element	Name	Attributes
IEA01	I16	Number of Included Functional Groups A count of the number of functional groups included in a transmission.	M N0 1/5
IEA02	I12	Interchange Control Number This number uniquely identifies the interchange data to the sender.	M N0 9/9

Functional Group Count
[040]

Assigned by translation software.

Interchange Control Number
[041]

Assigned by translation software.
This number must match the number that occurs in ISA13.

10.5 DATA ELEMENT CROSS-REFERENCE MATRIX

Overview

This chapter lists the data element cross-reference between the Department of Defense (DoD) ASC X12.104 Transaction Set 210 Motor Carrier Invoice (003020). We derived the cross-reference from the following:

- Examination of DoD transportation invoice information data requirements.
- Analysis of ASC X12.104 Transaction Set 210 Motor Carrier Invoice.
- Comments submitted by DoD activities and commercial carriers involved in the DoD electronic data interchange effort.

Purpose

This chapter identifies specific data in an application and their corresponding EDI mapping into the Transaction Set 210. Data elements from an existing application database can be identified with elements in this cross reference. If no application exists, the cross-reference provides enough information to develop a database design to automate the application. With an application in place, this cross-reference will expedite mapping of the database into a commercial EDI translation package. All trading partners who plan to exchange the 210 with DoD can use this document as a reference for the development of their database/EDI translator interface program.

Contents

One table is included in this chapter. Table 10.5-1, Data Element Cross-Reference lists all the discrete data elements of the DoD invoice data requirements and their corresponding segment and data element of the ASC X12.104 Transaction Set 210 Motor Carrier Invoice.

(BLANK PAGE)

TABLE 10.5-1

DATA ELEMENT CROSS-REFERENCE

DoD Transportation Invoice Data Using ASC X12.104 Transaction Set 210 Motor Carrier Invoice.

How To Read This Table

Table 10.5-1 cross-references discrete DoD invoice data requirements to the corresponding segment and data elements of the Transaction Set 210. The following definitions explain how table 10.5-1 is organized. Understanding the information in this table requires familiarity with EDI standards.

Government References

The first three columns on the left in Table 10.5-1 identify the specific invoice data element.

- **INVOICE DATA NAME:** Lists individual data elements required to send a transportation invoice. The user should identify these elements with a data name in their internal database system.
- **INDEX:** Three entries may appear in this column and represent various levels of indexing used to sort the data names in a data dictionary.
- **Q:** An asterisk (*) in this column identifies the data as a qualifier code.

EDI References

The remaining seven columns identify the detailed mapping of each data name into Transaction Set 210. Using these references is explained below in "How To Use This Table".

- **AREA:** The area of the transaction set where the data is mapped. A = header, B = detail, C = summary.
- **POS:** The sequential position of a specific segment within the area of the transaction set.
- **REF DES:** The first two or three alphanumeric characters identify a transaction set segment; the last two numeric characters in the column identify a data element position in the segment.
- **DE #:** The EDI data element number that appears at that position in the segment.

- **VALUE:** The recommended code value(s) that should be used.
- **DoD CONVENTIONS:** Additional information about the data as they apply to Department of Defense use.

How To Use This Table

This table maps a data element to a specific data element in an EDI transaction set.

1. Select any data element from the INVOICE DATA NAME list,
2. Identify the AREA, POS, and REF DES for that DATA NAME,
3. Go to Table 10.7-2 DoD Segment Hierarchy,
4. Find the AREA (Table A = header, etc.) in the hierarchy,
5. Locate the segment that corresponds to the POS and the REF DES. NOTE: The POS may not appear in some hierarchy tables. In this case, use the segment id identified by the first 2-3 characters in the REF DES,
6. In the left-hand column, identify the page number of the segment Id,
7. Turn to that page number in Table 10.7-3,
8. Now in the convention table 10.7-3, find the REF DES from step, 2 under the Ref. Des. column on the right hand side of the page,
9. You have now mapped a data element from table 10.5-1 into the convention table 10.7-3.

The INVOICE DATA NAME from Table 10.5-1 appears in the right hand column along with its INDEX and the DoD CONVENTION. The EDI standard definition of the data element appears in the right hand column of the page.

Each INVOICE DATA NAME from Table 10.5-1 can be mapped into the transaction set in this manner.

[057]		3	20	SE02	329		This data element ends the transaction set and should match the number that appears in the ST02 that begins the transaction set.
Transaction Set Control Number							

10.7 DoD CONVENTIONS

Overview

This chapter is the convention for the ASC X12.104 Transaction Set 210 (Version 003020) as used by the Department of Defense for accepting a transportation invoice. It was derived from:

- Table 10.5-1, Data Element Cross-Reference Matrix that describes the discrete DoD data requirements for invoices.
- ASC X12.104 Transaction Set 210 Motor Carrier Invoice.

A relational database management system was used to merge the Data Element Cross-Reference Matrix and a Transaction Set 210 database into the subset of 210 segments described in table 10.7-3 of this chapter.

Purpose

This chapter contains all necessary information for a DoD trading partner to map and translate a Transaction Set 210. All trading partners who plan to exchange the Transaction Set 210 can use this document as a reference for the development of their EDI database/translator interface program.

Contents

Three tables are included in this chapter.

- Table 10.7-1, ASC X12.104 Transaction Set 210 Segment Hierarchy describes the 210 segments as they appear in the ASC X12 Standards Dictionary.
- Table 10.7-2, DoD Model Transaction Set 210 Segment Hierarchy describes the subset of 210 segments used for sending transportation invoices.
- Table 10.7-3, Conventions is a detailed description of the Department of Defense conventions for transmitting Transaction Set 210. All segments identified in Table 10.7-2 are detailed in Table 10.7-3 by segment, position, and code value.

TABLE 10.7-3

DoD 210 CONVENTION

How To Read This Table

This table contains two sets of references. ASC X12 references are contained in the right-hand column. Government references are contained in the left-hand column except for codes lists which are included in the right-hand column.

Government References

The left-hand and middle columns in Table 10.7-3 describe Department of Defense conventions.

- Left-hand column contains two general references.
 - > INDEX: is enclosed in brackets and corresponds to a specific INDEX from Table 10.5-1.
 - > INVOICE DATA NAME: Appears above the INDEX and corresponds to a specific DATA NAME from Table 10.5-1.
- Middle column: Contains a less-than sign to indicate where Department of Defense conventions vary from the ASC X12 convention.

To help the user determine the source data, the INDEX can be used to trace data elements back to Table 10.5-1.

ASC X12 References

The right-hand column describes the ASC X12 conventions. The information included at the beginning of a segment description is standard ASC X12 information. The subheadings listed under Data Element Summary describe conventions for each data element in the segment.

- > Ref Des, Data Element, Attributes: Three subheadings describe the format of the segment as prescribed by ASC X12.
- > Name: Describes the ASC X12 data element and offers the standard definition. It also lists the specific code values the Department of Defense prescribes and may provide other Department of Defense information.

How To Use This Table

This table can be used to identify the data contained in populated Transaction Set 210.

1. Identify a segment from a populated transaction set (See Appendix 10.C for examples of the 210).
2. Look up the segment in table 10.7-3.
3. Read the right-hand column to identify the Reference Designator (Ref.Des.). The Reference Designator combines the segment id and the data element position to form a single identifier.
4. Read the left-hand column immediately adjacent to the Reference Designator to find the discrete DATA NAME, INDEX, and DoD CONVENTION from Tale 10.5-1 that is mapped to that Reference Designator. When multiple DATA NAMES appear for a single Reference Designator, there is usually a code qualifier somewhere in the same segment that identifies the data.

Segment: ST Transaction Set Header
Level: 1
Sequence: 10
Usage: M
Max Use: 1
Loop:
Purpose: To indicate the start of a transaction set and to assign a control number
Comment: 01 The transaction set identifier (ST01) is intended for use by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Data Element Summary

Ref. Des.	Data Element	Name	Attributes
-----------	--------------	------	------------

ST01	143	Transaction Set Identifier Code	M ID 3/3
------	-----	---------------------------------	----------

Code uniquely identifying a Transaction Set.

Code	Definition
210	X12.104 Motor Carrier Freight Details and Invoice

ST02	329	Transaction Set Control Number	M AN 4/9
------	-----	--------------------------------	----------

Identifying control number assigned by the originator for a transaction set.

Transaction Set Id
[001 *]

Transaction Set Control
Number
[002]

The application and structure of the control number must be agreed upon between DoD and its trading partners. The first five digits will indicate the interchange control number. The last four digits represent the sequence of the transaction within the functional group.

Segment: B3 Beginning Segment for Carrier's Invoice

Level: 1

Sequence: 20

Usage: O

Max Use: 1

Loop:

Purpose: To transmit basic data relating to carrier's invoice.

Comment: 06 B306 is the Billing Date.

Syntax Notes: 09 P0910 - If either B309 or B310 is present, then the other is required.

Data Element Summary

Ref. Des.	Data Element	Name	Attributes
B301	147	Shipment Qualifier	O ID 1/1
B302	76	Invoice Number Identifying number assigned by issuer.	M AN 1/22
B303	145	Shipment Identification Number Identification number assigned to the shipment by the shipper that uniquely identifies the shipment from origin to ultimate destination and is not subject to modification. (Does not contain blanks or special characters.)	O AN 1/30
B304	146	Shipment Method of Payment Code identifying payment terms for transportation charges.	M ID 2/2

Invoice Number
[003]

Transportation service provider's unique invoice number.

GBL Number
[004]

DoD unique number representing a shipment. The number is made up of one or two alpha characters followed by six or seven numbers. Do not use any punctuation or special characters.

Shipment Method of
Payment
[005]

Code	Definition
PP	Prepaid

B305 188 Weight Unit Qualifier O ID 1/1

B306 373 Date M DT 6/6
Date (YYMMDD).

Invoice Date
[006]

Date the invoice is issued. Use for-
mat YYMMDD.

B307 193 Net Amount Due M N2 1/9
Total charges to be paid by the receiver of this trans-
action set expressed in the standard monetary
denomination for the currency specified.

Total Charges
[007]

Total shipment charge including
linehaul, accessorial, special, and
fuel surcharge charges. Implied
decimal at second position from
right.

B308 202 Correction Indicator O ID 2/2
Code used to indicate that the transaction set con-
tains information which corrects a previous billing.

Correction Indicator
[008 *]

If the invoice is submitted for the
first time (original invoice), this op-
tional data field is not used.

Code	Definition
AD	Supplemental
CA	Cancel

B309 32 Delivery Date C DT 6/6
Date for delivery of cargo to final consignee or to
next mode.

Delivery Date
[009]

Date shipment is delivered to consignee. Not required for submission of supplemental invoices. Use format YYMMDD. Qualify in B310. Required for freight shipments only.

Delivery Date Qualifier:
[010 *]

Billing Carrier SCAC
[011]

Use the SCAC of the carrier that issues the invoice.

B310 374 Date/Time Qualifier C ID 3/3

Code specifying type of date or time, or both date and time.

Code	Definition
035	Delivered

B311 140 Standard Carrier Alpha Code M ID 2/4
Standard Carrier Alpha Code

B312 373 Date O DT 6/6

Segment: ITD Terms of Sale/Deferred Terms
of Sale

Level: 1

Sequence: 50

Usage: O

Max Use: 1

Loop:

Purpose: To specify terms of sale.

Comment: 01 If the code in ITD01 is 04, then ITD09
is required and either ITD10 or ITD11
is required. If the code in ITD01 equals
05, then ITD06 or ITD07 is required.

15 ITD15 is the percentage applied to a
base amount used to determine a late
payment charge.

Syntax Notes: 03 L03040513 - If ITD03 is present, at
least one of ITD04,ITD05 or ITD13 are
required.

08 L08040513 - If ITD08 is present, at
least one of ITD04,ITD05 or ITD13 are
required.

09 L091011 - If ITD09 is present, at least
one of ITD10 or ITD11 are required.

Data Element Summary

Ref. Des.	Data Element	Name	Attributes
ITD01	336	Terms Type Code	O ID 2/2
ITD02	333	Terms Basis Date Code	O ID 1/2
ITD03	338	Terms Discount Percent	O R 1/6
		Terms discount percentage, expressed as a percent, available to the purchaser if an invoice is paid on or before the Terms Discount Due Date.	

Discount Percent
[012]

Discount terms, expressed as a
percent, available to the purchaser
if an invoice is paid on or before
the number of discount days has
expired. Explicit decimal required.
Express accuracy to tenths of a
percent (i.e. 10 percent is ex-
pressed as 10.0).

Discount Days
[013]

The number of days in the terms discount period by which payment is due if terms discount is earned.

ITD04	370	Terms Discount Due Date	C DT 6/6
ITD05	351	Terms Discount Days Due Number of days in the terms discount period by which payment is due if terms discount is earned.	C N0 1/3
ITD06	446	Terms Net Due Date	O DT 6/6
ITD07	386	Terms Net Days	O N0 1/3
ITD08	362	Terms Discount Amount	O N2 1/10
ITD09	388	Terms Deferred Due Date	O DT 6/6

[049 015]

Use 2 character state code (FIPS-PUB-5-1) of location of extra pickup/delivery where additional service occurred. Use only for personal property shipments with DoD accessorial item codes of 101 or any item that uses rates for item 101, 112, and 502, or any item that uses rates for item 502. Qualify in N901. Not required for freight shipments.

N905 337 Time

O TM 4/6

Segment: L0 Line Item - Quantity and Weight
Level: 2
Sequence: 170
Usage: O
Max Use: 10
Loop:

Purpose: To specify quantity, weight, volume and type of service for a line item including applicable "quantity/rate-as" data.

Syntax Notes: 02 P0203 - If either L002 or L003 is present, then the other is required.
04 P0405 - If either L004 or L005 is present, then the other is required.
06 P0607 - If either L006 or L007 is present, then the other is required.
08 P0809 - If either L008 or L009 is present, then the other is required.
11 C1104 - If L011 is present, then 04 is required.

Data Element Summary

Ref. Des.	Data Element	Name	Attributes
L001	213	Lading Line Item Number	O N0 1/3
L002	220	Billed/Rated-as Quantity Basis for rating (miles, value, volume, etc.). Note: Weight may be defined by either data element 220 or 81.	C R 1/11
L003	221	Billed/Rated-as Qualifier Code identifying the type of quantity or value on which the rate or item pricing is based.	C ID 2/2

Number of Units Performed
[050]

Number of units of service performed. Qualified in L003. Not required for freight shipments.

Number of Units Performed
Qualifier
[050 010 *]

See Appendix 10.F for application.

Weight
[050 015]

The weight of the personal property if L112 is 112A, 112B, 112C, 130D, 145B, 152D, 518A, 518C, or 534A. Qualified in L005. Not required for freight shipments.

Weight Qualifier
[050 020 *]

Weight Unit Qualifier
[050 025 *]

L004 81 Weight C R 1/8
Numeric value of weight.

L005 187 Weight Qualifier C ID 1/2
Code defining the type of weight.

Code	Definition
B	Billed Weight

L006 183 Volume C R 1/8

L007 184 Volume Unit Qualifier C ID 1/1

L008 80 Lading Quantity C NO 1/7

L009 211 Packaging Form Code C ID 3/3

L010 458 Dunnage Description O AN 2/25

L011 188 Weight Unit Qualifier O ID 1/1
Code specifying the weight unit.

Code	Definition
L	Pounds

L012 56 Type of Service Code O ID 2/2

Segment: L1 Rate and Charges
Level: 2
Sequence: 180
Usage: O
Max Use: 10
Loop:

Purpose: To specify rate and charges detail relative to a line item including freight charges, advances, special charges, and entitlements

Syntax Notes: 04 R040506 - At least one of L104, L105 or L106 is required.
14 P1415 - If either L114 or L115 is present, then the other is required.
17 P1718 - If either L117 or L118 is present, then the other is required.

Data Element Summary

<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>Attributes</u>
L101	213	Lading Line Item Number	O N0 1/3
L102	60	Freight Rate	O R 1/9
L103	122	Rate/Value Qualifier	O ID 2/2
L104	58	Charge For a line item: freight or special charge; for the total invoice: the total charges -- expressed in the standard monetary denomination for the currency specified.	C N2 1/9
L105	191	Advances	C N2 1/9
L106	117	Prepaid Amount	C N2 1/9
L107	120	Rate Combination Point Code	O AN 3/9

Service Charge
[051]

Charge for each service identified in L108. Implied decimal at second position from right.

Service Charge Code
[052 *]

Services regulated by the Military Traffic Management Command (MTMC). See Billing Instructions available from DoD Payment Center for more information. See Appendix 10.F for cross reference from DoD codes to ASC X12 codes.

Service Charge Description
[053 *]

Use a free form description of any third party or miscellaneous service code identified in L108. In addition, use DoD code that further describes a personal property service. See Appendix 10.F for application.

L108	150	Special Charge or Allowance Code Code identifying type of special charge or allowance.	O ID	3/3
L109	121	Rate Class Code	O ID	1/3
L110	39	Entitlement Code	O ID	1/1
L111	16	Charge Method of Payment	O ID	1/1
L112	276	Special Charge Description Identification of special charge. This data element is used whenever an applicable code cannot be found in data element 150.	O AN	2/25

Segment: L3 Total Weight and Charges

Level: 3

Sequence: 10

Usage: C

Max Use: 1

Loop:

Purpose: To specify the total shipment in terms of weight, volume, rates, charges, advances, and prepaid amounts applicable to one or more line items

Comment: 05 L305 is the total charges.

Syntax Notes: 01 P0102 - If either L301 or L302 is present, then the other is required.
03 P0304 - If either L303 or L304 is present, then the other is required.
09 P0910 - If either L309 or L310 is present, then the other is required.
14 P1415 - If either L314 or L315 is present, then the other is required.

Data Element Summary

Ref. Des.	Data Element	Name	Attributes
L301	81	Weight Numeric value of weight.	C R 1/8
L302	187	Weight Qualifier Code defining the type of weight.	C ID 1/2
		<u>Code</u> <u>Definition</u>	
		B Billed Weight	
L303	60	Freight Rate	C R 1/9
L304	122	Rate/Value Qualifier	C ID 2/2
L305	58	Charge	O N2 1/9

Total Billed Weight
[055 020]

Total billed weight in pounds,
rounded to whole number. If not
applicable to invoice, enter 0.

Total Billed Weight Qualifier
[055 025 *]

L306	191	Advances	O	N2	1/9

Segment: SE Transaction Set Trailer
Level: 3
Sequence: 20
Usage: M
Max Use: 1
Loop:
Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).
Comment: 00 SE is the last segment of each transaction set.

Data Element Summary

Ref. Des.	Data Element	Name	Attributes
SE01	96	Number of Included Segments	M NO 1/6
		Total number of segments included in a transaction set including ST and SE segments.	
SE02	329	Transaction Set Control Number	M AN 4/9
		Identifying control number assigned by the originator for a transaction set.	

Included Number of
Segments
[056]

Total segments in this transaction
set including the ST and SE seg-
ments.

Transaction Set Control
Number
[057]

This data element ends the trans-
action set and should match the
number that appears in the ST02
that begins the transaction set.

10.C Examples - X12.104 Transaction Set 210 Motor Carrier Invoice

This appendix contains an example of Transaction Set 210 as it is used for transmitting invoice information to a DoD payment center.

The example illustrates the use of a 210 to transmit invoice information to the Defense Finance and Accounting Service - Indianapolis Center (DFAS-IN).

(Blank Page)

Example - Invoice information from Carrier to DFAS-IN using ASC X12 210

ST*210*00001 n/l	Transaction set header
B3**7846-1112*B1562824*PP**910623*83490*
