19. ABSTRACT (*Continue on reverse if necessary and identify by block number*)

This report presents detailed cost data for each of fourteen categories of Outpatient Nonavailability Statement (ONAS) CPT-4 procedures, grouped by inpatient and ambulatory professional services, performed within assigned and unassigned Army billable medical treatment facility catchment areas during the Fourth Quarter Fiscal Year (FY) 1993 and full year FY 1994. Ambulatory professional services have the OCHAMPUS-assigned procedures associated with each category's facility-related charges listed in separate groupings. Appendices A and C summarize by category of ONAS procedures and catchment area, the Fourth Quarter and annual FY costs respectively, for amounts billed by the provider for ONAS services (ABS), amounts allowed for the services by the fiscal intermediary (AAS), payments made by the patient and other sources (TPP), total government payments for the services (TGP), percentages of TGP to ABS and to AAS, and of TPP to TGP. All claims for unassigned catchment areas are combined into one group and analyzed like a catchment area. Appendices B and D correspondingly show the number of services and patient episodes, and averages of ABS, AAS, and TGP by service and by episode. Appendix E compares the unassigned and assigned catchment areas' inpatient, ambulatory, and total ONAS professional services totals over the Third and Fourth Quarters FY 1994. All appendices contain summaries combining data for all assigned and unassigned catchment areas.

E. Outpatient Nonavailability Statement (ONAS) Procedures, Third Quarter to Fourth Quarter FY 1994 Comparison . . E-1-40

Executive Summary

This report presents detailed cost data for each of fourteen categories of Outpatient Nonavailability Statement (ONAS) CPT-4 procedures, grouped by inpatient and ambulatory professional services, performed within assigned and unassigned Army billable medical treatment facility catchment areas during the Fourth Quarter Fiscal Year (FY) 1994 and full year FY 1994. Ambulatory professional services also have the OCHAMPUS-assigned procedures associated with each category's facility-related charges listed in separate groupings. Appendices A and C (pp. A-1-117, C-1-138) summarize by category of ONAS procedures and catchment area, the Fourth Quarter and annual FY costs respectively, for amounts billed by the provider for ONAS services (ABS), amounts allowed for the services by the fiscal intermediary (AAS), payments made by the patient and other sources (TPP), total government payments for the services (TGP), percentages of TGP to ABS and to AAS, and of TPP to TGP. All claims for unassigned catchment areas are combined into one group and analyzed like a catchment area. Appendices B and D (pp. B-1-117, D-1-138) correspondingly show the number of services and patient episodes, and averages of ABS, AAS, and TGP by service and by episode. Appendix E (pp. E-1-40) compares the unassigned and assigned catchment areas' inpatient, ambulatory, and total ONAS professional services totals over the Third and Fourth Quarters FY 1994. All appendices contain summaries combining data for all assigned and unassigned catchment areas.

Outpatient Nonavailability Statement professional workload is presented by both services and episodes. Episodes were computed by sorting claims by patient identification number, treatment ending date, and procedure. All claims for a unique patient/date/procedure level were counted as being one episode. Using the patient per episode logic effectively controls for service billings where, when applicable, the technical and professional components are billed separately.

Total government payments for the claims, amounts billed and allowed for the ONAS services (ABS, AAS), number of services, number of episodes, and additionally the total amount allowed for the claims were then grouped and summed by billable medical treatment facility catchment area, by type of professional service (inpatient, ambulatory non-facility services, or ambulatory facility-related charges), and by ONAS category of procedures. Government payment for each category of ONAS procedures was estimated by aggregating within each group the sum of the total amount allowed for the service, the total amount allowed for the entire claims, and the total government payments for the claims. Each group's amount allowed for services was then divided by its amount allowed for claims. This ratio was multiplied by the category's sum of government payments for the claims, thus obtaining the total government payment for the

category of ONAS services. Transactions having no government cost, no patient cost, and no total amount allowed were deleted prior to summation, as well as those where the fiscal intermediary denied the claim.

Each ONAS procedure record in a quarter's data in FY 1994 was extracted from the TCSDP main database based upon a processing date during that quarter. Full year FY 1994 data are the concatenation of First through Fourth Quarter data in the fiscal year. Amounts in these tables may reflect an unstable condition due to part of a claim payment being processed outside the time interval (i.e., for the Fourth Quarter FY 1994, the Third Quarter FY 1994 and First Quarter FY 1995 would not fall in the interval; for the full year FY 1994, the Fourth Quarter FY 1993 and First Quarter FY 1995 would be outside). Whenever possible, obvious unstable conditions were marked with an asterisk (*). Sometimes under these unstable conditions, some equations were not computed. In such cases, a decimal point (.) was used to fill space for answers not computed. Decimal point notation was also used to fill space when a variable had no data for a grouping. In addition, on several occasions the number of episodes for a procedure is greater than the number of services. This occurred when one of the services was an adjustment and no workload credit was given.

Along with costs and workload for inpatient and ambulatory professional services, related facility charges for each ONAS ambulatory professional services category are reported in Appendices A-D. Each ONAS ambulatory procedure category has an OCHAMPUS assigned CHAMPUS-unique procedure code used by fiscal intermediaries to collapse all facility-related charges submitted for each ONAS procedure within a category. These appendices summarize and segregate, for the unassigned and assigned catchment areas, all reported facility-related charges for each ONAS ambulatory surgery category. Appendix E however, which compares Third and Fourth Quarter FY 1994 inpatient and ambulatory professional services procedures costs, includes no facility-related charges (p. E-1-40).

Thirty-one medical treatment facility catchment areas and the unassigned area were credited with some ONAS ambulatory facility-related charges during the Fourth Quarter of FY 1994, and in total, all fourteen ONAS categories showed activity of this kind. Seven catchment areas had no reported facility charges, which included the new catchment area Carlisle Barracks. This number of areas having no reported facility charges was up from four the previous quarter. Total government payments for all Fourth Quarter ambulatory facility-related charges were $0.78 million, with ABS, AAS, and TPP at $0.91, $0.85, $0.07 million respectively, for a total of 3,646 services and 507 episodes (pp. A-116-117, B-116-117). The highest in government payments for facility costs in any one ONAS category during the quarter was $203,599 in the #67 Tonsillectomy/Adenoidectomy category with

$230,530 in billings, $211,852 allowed, $8,252 paid by the patient and other sources, 1,248 services, and 103 patient episodes. The category with the lowest government cost for this type of charge was the #61 GYN Laparoscopy category at $8,388, $10,523 billed, $8,928 allowed, $540 paid by patient sources, 123 services and 5 episodes (pp. A-116-117, B-116-117). Average amounts billed per episode for an ONAS facility-related ambulatory category ranged from $1,035 to $3,515 during the quarter, while correspondingly, the average amounts allowed per episode for these two categories were $927 to $3,206 and average government payments per episode were $764 to $3,117 (pp. B-116-117). Note that the remaining statistics presented in this Summary are applicable only to ONAS inpatient and ambulatory professional services procedure categories, exclusive of facility-related charges.

Professional claims submitted while the patient was either an inpatient at a hospital, or when a hospital submitted institutional billings for an ambulatory episode in conjunction with ONAS professional billings are services labeled Inpatient Professional Services in Appendices A-E. From Appendix E, TGP for all inpatient and ambulatory professional services procedures in a catchment area for the Fourth Quarter FY 1994 ranged from a low of $3,837 to a high of $180,918, with the corresponding ABS from $11,920 to $591,972, AAS from $5,736 to $300,820, TPP from $3,877 to $123,991, number of services from 16 to 990, and number of episodes from 15 to 840 (pp. E-39, E-29). Total government payments for all ONAS procedures, whether inpatient or ambulatory, in all catchment areas for the quarter were $4.79 million, while ABS, AAS and TPP for the identical services/ episodes were $13.43, $6.96 and $3.48 million respectively (p. E-40). The number of services for ONAS procedures in total across all assigned and unassigned catchment areas was 21,934 with 16,756 patient episodes (p. E-40). In the Fourth Quarter, 25.3% of TGP for all ONAS professional service procedures, 22.9% of the corresponding number of services, and 23.1% of the episodes were for inpatient professional services (p. E-40). System-wide, the professional services ABS per episode ranged from $410.81 to $1,734.12 for ambulatory professional services depending on the category of ONAS procedure (pp. B-115-116).

Total government payments rendered for ONAS inpatient and ambulatory professional services over all catchment and non-catchment areas for the Fourth Quarter ranged from only 28.3% to 58.1% of what was actually billed by the provider (pp. A-114-116). Again, the government paid from only 64.1% to 98.7% of the amount allowed by the fiscal intermediary, when examining all catchment areas as a whole. Some tables in Appendices A or C may compute TGP as being 100% of AAS and/or ABS. This condition usually occurs when the patient is treated on an inpatient basis and there is no co-pay. The differences between what the government actually paid and what was either allowed or billed were a result of disallowed charges, patient co-pays and

deductibles, and coordination of benefits (other health insurance payments) which designated CHAMPUS as second payer. These "adjustments" to billed and allowed charges, as demonstrated above, are substantial. Depending on the category of ONAS inpatient and ambulatory professional services, the total amount paid by patients and other sources (TPP) over all catchment areas ranged from 11.2% to 112.6% of the total amount paid by the government (pp. A-114-116). Correspondingly, for the two ONAS categories comprising the endpoints of the range noted above, TPP varied from 6.5% to 33.8% of the amount billed by providers (ABS) and from 11.0% to 69.6% of the amount allowed by the fiscal intermediary (AAS) (pp. A-114-115).

Appendix E compares Third Quarter to Fourth Quarter FY 1994 summary totals by catchment area and type of professional service including an analysis for the unassigned area (pp. E-1-39). A summary table combining the unassigned and all assigned catchment areas is also presented (p. E-40). This recapitulation table points out that government payments for inpatient professional services decreased between the two quarters by -2.69% in addition to a decrease in number of episodes of -0.64%. However, all other measures of inpatient professional services increased between quarters, with ABS increasing by 9.93%, AAS by 3.33%, TPP by 32.98% and number of services by 12.15%. Over all areas, ambulatory professional services exhibited across the board quarterly increases of 6.53% in number of services, number of episodes by 4.57%, TGP by 3.86%, ABS by 11.20%, AAS by 5.38%, and TPP by 9.97%. Between the Third and Fourth Quarters, combined inpatient and ambulatory ONAS professional services for all areas, excluding facility-related charges, increased in TGP by $99,277 (2.12%), ABS by $1,318,585 (10.89%), AAS by $324,054 (4.88%), TPP by $435,749 (14.31%), number of services by 1,580 (7.76%), and episodes by 538 (3.32%) (p. E-40).

Appendices C and D, summaries for the complete fiscal year 1994, show that total government payments for all inpatient and ambulatory ONAS procedures, not including facility charges, in all catchment and non-catchment areas was $18.27 million for the fiscal year. ABS, AAS and TPP for the identical services/ episodes were $47.36, $26.29 and $12.50 million respectively (p. C-138). The number of services in total across all areas for ONAS inpatient and ambulatory professional services procedures was 83,158, with 63,823 patient episodes (p. D-138). Inpatient Professional Services accounted for 25.0% of TGP for all ONAS procedures, 21.4% of the corresponding number of services, and 23.2% of the episodes (pp. C-136-138, D-136-138). For the fiscal year, the government paid from only 31.4% to 57.1% of the amount billed by the provider for these services (pp. C-135-137) and total government payments rendered for ONAS inpatient and ambulatory professional services over all areas ranged from only 57.9% to 98.3% of what was actually allowed by the fiscal intermediary for the same services (pp. C-135-137). For ambulatory professional service ONAS procedures alone, TGP in

a catchment area ranged from a low of $18,044 to a high of $494,668, with the corresponding ABS from $74,040 to $1,635,201, AAS from $37,097 to $853,395, TPP from $61,797 to $381,472, number of services from 115 to 2,934, and number of episodes from 122 to 2,240 (pp. C-134, C-98, D-134, D-98). The incongruity of episodes more numerous than services (122 .vs. 115) occurring at the lowest TGP catchment area represented at the low end of the above ranges is due to negative claim adjustments submitted against these claims' number of services, which were probably accompanied by similar adjustments to TGP, ABS, AAS and/or TPP. However, because the calculation of an episode is not dependent upon whether the net claim adjustment is positive or negative, increases to episode tallies would have been made based on the unique patient/date/procedure level (see p. 1 of Summary). Thus, positive increases to number of episodes would result even when the net adjustment to number of services was negative. System-wide, the professional services ABS per episode ranged from $380.08 to $1,721.51 for ambulatory professional services depending on the category of ONAS procedure (pp. D-136-137).
