DEPARTMENT OF DEFENSE  
UNITED STATES SPECIAL OPERATIONS COMMAND  
EXECUTIVE SUMMARY  
FY 1996/97 Biennial Estimates

**UNITED STATES SPECIAL OPERATIONS COMMAND (USSOCOM) INFORMATION TECHNOLOGY ACTIVITIES**

This data represents the consolidation of USSOCOM's Headquarters and Component funded Information Technology requirements. USSOCOM is the only operational command within the Department of Defense directly responsible for determining its own force structure and related material requirements, to include information technology resources.

**MAJOR INITIATIVES INFLUENCING THE BUDGET ESTIMATE**

The USSOCOM Information Technology funding provides for:

- The installation of Army Special Operations Command Network (ASOCNet). ASOCNet is the automated network that links the Major Command headquarters with its Major Subordinate Commands. ASOCNet supports the United States Army Special Operations Command's requirements for an automated information management system supported by a communications network to improve and facilitate the command and control, readiness, and management of its mission.
- Development and modernization of the United States Special Operations Command Headquarter's Command, Control, Communications, and Intelligence (C3I) network called SCAMPI. SCAMPI provides secure voice and data communications between Commander-in-Chief components, operational sites and other Government agencies.
- Upgrade of the Local Area Network (LAN)/Wide Area Network (WAN) C3I. The LAN/WAN provides electronic mail, word processing, spreadsheets, general office automation, database sharing, desktop publishing and graphics applications to headquarters and remotely housed users, interfaces with the Commander-in-Chief's aircraft and the Defense Data Network.

**CHANGES BETWEEN FY 95 PRESIDENT'S BUDGET ESTIMATE AND FY 96/97 BIENNIAL BUDGET ESTIMATES SUBMISSION BY CATEGORY (30% OR MORE)**

This submission does not exceed the 30% variance threshold for any required comparison.
