NOTICES

This report was prepared as an account of work sponsored by an agency of the United States Government. Neither the United States Government nor any agency thereof, nor any employees, nor any of their contractors, subcontractors, or their employees, make any warranty, expressed or implied, or assume any legal liability or responsibility for the accuracy, completeness, or usefulness of any privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise, does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or any agency, contractor, or subcontractor thereof. The views and opinions of the authors expressed herein do not necessarily state or reflect those of the United States Government or any agency, contractor, or subcontractor thereof.

When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely Government-related procurement, the United States Government incurs no responsibility or any obligation whatsoever. The fact that the Government may have formulated or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication, or otherwise in any manner construed, as licensing the holder or any other person or corporation; or as conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

The following commercial products (requiring Trademark®) are mentioned in this report. Because of the frequency of usage, the Trademark was not indicated. If it becomes necessary to reproduce any segment of this document containing any of these names, this notice must be included as part of that reproduction.

19. ABSTRACT (Continue on reverse if necessary and identify by block number) A prototype Laser-Induced Fluorescence-Electric Cone Penetrometer Test (LIF-CPT) system was demonstrated at Tinker Air Force Base (Tinker AFB), Oklahoma as an innovative technology for delineating soil contamination resulting from fuel spills. Applied Research Associates, Inc. (ARA) and the North Dakota State University (NDSU) conducted the development program for the Air Force using LIF-CPT components developed within the Triservice Site Characterization and Analysis Penetrometer System (SCAPS) effort. Major components of the system consisted of ARA's cone penetrometer system coupled with NDSU's tunable laser fluorimeter. To enable rapid, efficient and minimally invasive site characterization, the LIF-CPT probe data output was linked to ARA's real-time analysis system with three-dimensional modeling and scientific visualization capabilities. Field testing at Tinker AFB was conducted to evaluate the LIF-CPT probe. During the testing program, 112 soundings at eight contaminated sites were conducted. At select locations, soil and water samples were obtained with CPT or drilling technologies, and tested using analytical procedures to confirm the presence of fuel contamination This volume presents the LIF-CPT profiles that were generated along with boring logs from the drilling program, gas chromatograph results from the field analytical testing, and the work plans for the demonstration program.

PREFACE

This report was prepared by Applied Research Associates, Inc. (ARA), Waterman Road, South Royalton, VT 05068, under contract FO8635-88-C-0067, SETA SSG Subtask 8.00, for the Air Force Civil Engineering Support Agency, Engineering and Services Laboratory, Tyndall Air Force Base, Florida 32403-6001. North Dakota State University was a subcontractor to ARA and fabricated and assisted in demonstrating the laser spectrometry technology.

This work was sponsored by the Oklahoma City Air Logistics Command, Directorate of Environmental Management (OC-ALC/EM) and the U.S. Air Force Civil Engineering Support Agency (AFCESA). Ms. Beverly Allen of OC-ALC/EM and Mr. Bruce Nielsen of AFCESA/RAVW were the Government technical program managers.

APPENDIX I

BORING LOGS FROM ALL SITES

APPLIED RESEARCH ASSOCIATES, INC.

BORING LOG		BORING/WELL NO.: NTA-B01		Page 1 of 1	
Project and Location: AFSCAPS, Tinker AFB				Boring Location:	
Project No.: 5735		Client: Air Force			
Contractor:		Driller Contractor: AW Pool		Driller: Andy	
Date Start: 9/17/92 (11:00)		Date End: (12:30)		Logged by: JPJ	
Driller Method/Rig Type: CME Continuous Sampler HSA				Surface Elevation (ft):	
Depth to Groundwater:		10.6			
Date/Time:		9/8 AM			

Depth	Sample				Soil Description	Graph/ NOTE
	No.	Depth/Rec	Blow/6"	Vapor		
					0-0.6' Concrete	
0	1	0.6-2.6 100%			Fill: Sandy Clay & sand, disturbed zone from prior CPT work	
2	2	2.6-7.6 60%			Sandy Clay; mostly silt and clay little sand, brown to red from 2 to 3', dark gray 3' to 7-6'.	
	3	7.6-12.6 50%			Same as above but olive to brown	
10				none	Sandstone; mostly endurated fine sand, moist to very moist, red	
	4	12.6-17.6 100%			Sandstone; friable to endurated zone, mostly fine sand, red; gypsum mineralization zone common below 14 ft	

REMARKS:
 Warm & sunny weather.
 Fill could be related to buried sewer line.
 Slow drilling from 12 to 17'.
 Sample SS-1 from 13 to 14'.
 Water sample taken 9/18.

APPLIED RESEARCH ASSOCIATES, INC.

[illegible]

REMARKS:

9/17/92 16:30 Sample 12-14' 1 qt.
water sample 9/18

APPLIED RESEARCH ASSOCIATES, INC.

BORING LOG		BORING/WELL NO.: NTA-B04		Page 1 of 1	
Project and Location: AFSCAPS, Tinker AFB, OK				Boring Location:	
Project No.: 5735		Client: Air Force			
Contractor:		Driller Contractor: AW Pool		Driller: Andy	
Date Start: 9/16/92 (13:30)		Date End: 9/16/92 (15:00)		Logged by: JPJ	
Driller Method/Rig Type: CME Continuous Sampler, HSA				Surface Elevation (ft):	
Depth to Groundwater: 13.0 ft		11.5'		some product	
Date/Time: 9/16/92 18:00		9/18 AM		<0.05' thick	

Depth (ft)	Sample				Soil Description	Graph/ NOTE
	No.	Depth/Rec	Blow/6"	Vapor		
0	1	0-2' 100%			Fill; sandy clay, mostly silt and clay, some sand	
					red to brown, firm; slightly moist, few gravel	
	2	2-7' 100%			Same as above to 6.5'.	
6.5					Silty clay; mostly clay, some silt, little sand;	
					olive changing to yellow with increasing depth	
	3	7-12' 100%		yes	Same as above to 11.5'.	
11.5					Silty fine sand; most fine sand	
					little silt, red strong hydrocarbon odor.	
	4	12-17' 20%			Little recovery of sample.	

REMARKS:

Hit pipe at 5 ft., abandoned metal. Moved 2 ft NNE for this hole.
 Approx. 2 ft from NTA-04
 Hard drilling at 11', not in exact location as NTA-04 CPT push
 Nearby hole indicates sandstone for portion at 19 to 23'
 Dan Hunt reports leak was near base of tank at this location
 Water sample 9/18

APPLIED RESEARCH ASSOCIATES, INC.

BORING LOG		BORING/WELL NO.: NTA-B05		Page 1 of 1	
Project and Location: AFSCAPS, Tinker AFB, OK				Boring Location:	
Project No.: 5735		Client: USAF			
Contractor:		Driller Contractor: AW Pool		Driller: Andy Zevasky	
Date Start: 9/16/92 (11:15)		Date End: 9/16/92 (12:30)		Logged by: JPJ	
Driller Method/Rig Type: CME Continuous Sampler - 2 inch				Surface Elevation (ft):	
Depth to Groundwater:		12.6' BGS		11.3' some product	
Date/Time:		9/16/92 15:00		9/18/92 AM <0.05'	

Depth (ft)	Sample				Soil Description	Graph/ NOTE
	No.	Depth/Rec	Blow/6"	Vapor		
0	1	0-2' 100%			Fill: Sandy Clay; mostly silt and clay with some sand, red, moist, mottled lt. brown/black/white rootlets	
	2	2-7' 70%			Same as above; very moist zone at 7'.	
	3	7-12' 20%			Same as above, but very moist at 8'	
8					Silty fine sand; very moist to wet	
					Loss on recovery ?, red	
	4	12-14 80%			Same as above (silty fine sand)	
14.5					Sandstone: Red silty sand	
					Cementation or gypsum dense formation.	
17.0	5	14.5-17			End of boring.	

REMARKS:

Take sample at 13.0 - 14.0' NTA-B05-SS1 1 qt
 AW Pool leave augers in till 14:45, water enter to 12.6'
 after 15 min., permeable zone located above 17' with
 augers in water at 16.3 ft, not recharging quickly
 Water sample hot, 2 sets of duplicates for GC & GC/MS taken 9/18

APPLIED RESEARCH ASSOCIATES, INC.

[illegible]

REMARKS:

Product on auger from 14 to 17 ft

Sample from 12-17 is probably from 12-13 ft interval

Dan Hunt reports leak in tank near NTA-06 was at 10 ft on sidewall.

Water sample 9/18, soil sample 13-14'.

APPLIED RESEARCH ASSOCIATES, INC.

[illegible]

REMARKS:

Harder drilling at 11', similar to CPT refusal
Sample taken at 13-16'. Water sample 9/17

APPLIED RESEARCH ASSOCIATES, INC.

Depth to Groundwater: 17.7'(21'TD)		17.8' (19.8'TD)			
Date/Time: 9/25/92 15:53		9/26 11:30			

Depth (ft)	Sample				Soil Description	Graph/ NOTE
	No.	Depth/Rec	Blow/6"	Vapor		
0					Asphalt Pavement	
0.4	1	0.4-2.4 100%			Fill: Clay Sand mixture, with gravel, red, moist.	
	2	2.4-7.4' 100%		no	Same as above.	
3.5					Silty fine sand: mostly fine sand, some silt and clay, moist, dk. gray at 3.5' to light brown.	
6.5					Sandy Clay: mostly clay and silt, little sand, lt. brown, moist.	
	3	7.4-12.4' 100%		no	Same as above.	
	4	12.4-17.4' 100%		no	Same as above grading to red with black mottling (occasional).	
	5	17.4-22.4 100%		no	Same as above, occasional fine sand lenses, very moist at 18 ft.	

REMARKS:

Soil sample SS-1 at 16', water sample taken on 9/20/92.
Hole drilled deeper than other WTP sites to ensure sater sample is taken.

APPLIED RESEARCH ASSOCIATES, INC.
