13. ABSTRACT (Maximum 200 words) This report identifies approved clinical research activities conducted at Walter Reed Army Medical Center through protocols approved by the Clinical Investigation Committee (CIC), the Human Use Committee/Institutional Review Board (HUC/IRB), and the Institutional Laboratory Animal Care and Use Committee (IACUC), as appropriate. This report includes a Detail Summary Sheet outlining the progress of each protocol during Fiscal Year 94. Also included is a list of all known presentations and publications related to approved studies, as well as an addendum listing presentations and publications not related to approved clinical investigations. All research was conducted under the provisions of AR 40-38 (Clinical Investigation Program), AR 40-7 (Use of Investigational Drugs in Humans and the Use of Schedule I Controlled Drug Substances), AR 70-25 (Use of Volunteers as Subjects of Research), HSC Regulation 40-23 (Management of Clinical Investigations, Protocols, and Reports), and AR 70-18 (The Use of Animals in DOD Programs).

FORWARD

The Annual Progress Report (APR) documents the continuing review during FY-94 of research approved by the Clinical Investigation Committee (CIC), the Institutional Laboratory Animal Care and Use Committee (IACUC), and the Human Use Committee/Institutional Review Board (HUC/IRB) of Walter Reed Army Medical Center (WRAMC). The review of each research protocol is initiated by the Department of Clinical Investigation (DCI) on the anniversary month of its approval. At that time, a request is sent to the principal investigator for submission of a progress report. The completed report consists of a detail summary sheet, a copy of the approved consent form, and a questionnaire regarding the continuing review of human subject participation or animal use. Members of the HUC/IRB or IACUC review the progress reports throughout the year, and one of the following recommendations is made: 1) approval, 2) request additional information, or 3) request termination of the protocol. The members' recommendations are presented monthly to the HUC/IRB or IACUC for final approval. The approved detail summary sheets of 556 protocols are included in this document.

The FY-94 APR process at WRAMC was administered by the Editorial Office, Research Administration Service, Department of Clinical Investigation.

I . UNIT SUMMARY

A. OBJECTIVE

To implement and manage the clinical investigation program at Walter Reed Army Medical Center (WRAMC) by promoting, supporting, coordinating, planning, conducting, and publishing ethical, scientific inquiry into clinical health problems of beneficiaries of the military health care system, to include studies in humans and animals.

B. TECHNICAL APPROACH

The clinical investigation program at WRAMC is conducted in accordance with the following:

AR 40-7	Use of Investigational Drugs in Humans and the Use of Schedule I Controlled Drug Substances
AR 40-38	Clinical Investigation Program
AR 70-18	The Use of Animals in DOD Programs
TB MED 525	Control of Hazards to Health from Ionizing Radiation Used by the Army Medical Department
HSC 40-23	Management of Clinical Investigation Protocols and Reports
WRAMC 70-1	Clinical Investigation Program, WRAMC Research Activities
45 CFR 46	Protection of Human Subjects
21 CFR A,D, & F	Food and Drug Administration

C. ORGANIZATION SCHEME

D. DCI STAFF [Positions as of 30 September 1994; suffix (G) reflects grant-funded employees]

Because of continuing severe budget constraints, the Department of Clinical Investigation was held to strict limitations on replacing civilian employees when positions were vacated. This resulted in a net decrease of one WRAMC-funded civilian employee, from 46 to 45. Within the administrative sections, the only addition was that of gaining an authorization to hire a Computer Specialist (Programmer) against an established requirement. One loss was replaced, that of the Secretary to the Chief. Grant-funded civilian employees decreased by two, from 17 to 15. The Specialty Support Section of the Clinical Studies Service, which was established during FY-93 as part of a reorganization of the Department's TDA to prepare for the downsizing, saw a reduction from 20 to 19 with the loss of a dietitian supporting the NIH-funded Polyp Prevention Trial. DCI had no gain in officer strength. In July 1994, the Department saw a change in command with the Chief, COL H. Linton Wray, MC, departing to report to the North Atlantic Health Service Support Area Headquarters as Chief of Health Systems Management. Replacing COL Wray as Chief is COL Maria H. Sjogren, MC, formerly a staff gastroenterologist and hepatologist at WRAMC. In May 1994, CPT Matthew Payne, Assistant Chief, Research Operations Service, departed to pursue a civilian career in industry. His replacement, MAJ Richard Borschel, arrived in July from long-term civilian training towards a doctorate in Immunology from Cornell University. The Army Medical Specialist Corps Clinical Investigation Service was transferred to the U.S. Army Research Institute of Environmental Medicine in Natick, Massachusetts. During the year the command reduced the enlisted authorizations from 12 to 6, and all OIH research technician (91KP9) positions were lost. The Department will feel the effect of these losses during late FY-94 and early FY-95. At the end of the fiscal year, the total assigned personnel was at 75, down from the all time high of 78 last year.

More than \$658,900 in extramural funding was obtained from the National Institutes of Health to support personnel costs for clinical and laboratory

research being conducted in the Hematology-Oncology Service, the Army Audiology and Speech Center, the Gastroenterology Service, and the Urology Service. These monies were used to fund personnel such as Ph.D.-level researchers, study nurses and coordinators, dietitians, and support staff.

Two civilian staff members received awards for their exceptional contributions to the Clinical Investigation mission. In recognition of his exemplary career, Mr. Mack Burton, Chief of the Research Administration Service, was awarded one of the highest civilian honors, the Meritorious Civilian Service Award. As a result of her many contributions to the Department over the past 6 years, Ms. Robin Howard, Biostatistician, Research Review Service, received the Commander's Award for Civilian Service.

E. DCI FINANCIAL SUPPORT

The Clinical Investigation Program maintained a high level of activity during 1994 with a record number of active protocols (764 compared to 717 last year) despite losing personnel, a hiring freeze for civilian personnel, and a decrease in financial support for CEEP requirements.

F. RESEARCH ACTIVITY

1. Accomplished in FY-94

With the mission to empower WRAMC researchers from planning to publication, the Department of Clinical Investigation (DCI) supported a record total of 764 active protocols this year (Table I). Twenty-seven percent (208) of these studies were newly approved during the fiscal year, leaving 556 ongoing for at least one year that are summarized in this report. Medical Corps activities accounted for 81% of the investigations, and less than 1% were conducted at Army Community Hospitals in the Walter Reed Health Service Region.

TABLE I. WRAMC Protocol Activity

PROTOCOLS	FY-90	FY-91	FY-92	FY-93	FY-94
ONGOING at the begining of FY	520	552	535	551	556
NEWLY APPROVED (+)	172	153	180	166	207
TOTAL ACTIVE During FY	692	705	715	717	764
COMPLETED (-)	128	164	153	148	197
TERMINATED (-)	12	6	11	13	15
ONGOING at the end of FY	552	535	551	556	551

Human studies accounted for 91% of the investigations, with 37% involving research therapies including investigational drugs or devices and cooperative oncology group studies (Table II). Animal studies accounted for 8%, and laboratory studies accounted for 1%.

TABLE II. WRAMC FY-94 Active Investigations by Subject

SUBJECT	ACTIVE STUDIES	
	#	(%)
Human	696	(91)
Investigational New Drug	59	(8%)
Investigational Device	4	(<1%)
Cooperative Oncology Group	206	(29%)
Descriptive - Expedited	168	(24%)
Greater Risk	259	(38%)
Animal	57	(8)
Laboratory	11	(1)
	764	(100)

Publication and presentation productivity by WRAMC staff included 363 published articles, 225 published abstracts, and 560 conference presentations (Table III).

TABLE III. WRAMC Publications and Presentations

	FY-90	FY-91	FY-92	FY-93	FY-94
Published Articles*	276*	285*	369*	334*	363*
Abstracts	67	75	97 [#]	214 [#]	225 [#]
Presentations	106	110	232	312	560 [◇]

* Fully referenced publications (e.g., journal articles, book chapters)

+ Publications related to approved clinical investigations: FY-90 = 62; FY-91 = 71; FY-92 = 114; FY-93 = 138; FY-94 = 116

Abstracts related to approved clinical investigations: FY-92 = 91; FY-93 = 56; FY-94 = 148

◇ Presentations related to approved clinical investigations: FY-94 = 254

During the past fiscal year, major changes were seen as a result of the DCI Strategic Planning process that was initiated in August 1991. Reorganization of the Department's TDA continues to be implemented and will be completed with the abolishment of the Kyle Metabolic Unit Nursing Service during early FY-95. A \$1,000,000 contract was awarded, and work began on the renovation of the laboratory animal facility, with an expected completion date of March 1995. The effect of this renovation will elevate the facility's standards to a level eligible for accreditation by the American Association for Accreditation of Laboratory Animal Care (AAALAC). Lastly, execution of the DCI Master Plan is proceeding, with Building 7 designated to house research laboratory space.

Plans continued throughout the year for the relocation of the Department to the Base Realignment and Closure (BRAC) Building (Bldg. 6) currently under construction. The expected move should take place in the spring or early summer of 1995. Over \$300,000 was received this year in funds through the Base Realignment Program to purchase equipment and furnishings for the new offices.

Under the auspices of the WRAMC Professional Education and Training Committee, the second WRAMC Research Course was completed in the fall. Attending the 14-hour course were 98 investigators, both physicians in training and WRAMC staff. Course evaluations were extremely favorable, and a third course is being developed for the fall of 1995. Arrangements are being made to move the course to an off-site location to provide attendees with an environment to devote themselves to the entire program.

The prestigious Bailey K. Ashford Clinical Research Award is bestowed annually on a member of the year's graduating class whose research accomplishments excelled during training. Seventeen graduating trainees, representing 13 training programs, were nominated for the 1994 award. A selection committee named five semi-finalists and five finalists. The finalists presented their results at a symposium on 25 May 1994 sponsored by the Department of Clinical Investigation. The 1994 finalists were: MAJ Gregory J. Argyros, Fellow, Pulmonary and Critical Care Medicine Service, Department of Medicine, "The Refractory Period After Eucapnic Voluntary Hyperventilation and its Effect on Challenge Technique"; MAJ John K. Hamelink, Fellow, Vascular Surgery Service, Department of Surgery, "Inhibition of Platelet Accumulation by Hirulog™ and Aspirin in a Carotid

Endarterectomy Model"; MAJ Jose A. Stoute, Fellow, Infectious Disease Service, Department of Medicine, "The Phage Epitope Library: A New Tool for Vaccine Development"; CPT Catherine A. Welch, Resident, Pediatric Endocrinology Service, Department of Pediatrics, "Evidence to Suggest Nitric Oxide is a Previously Unrecognized Regulator of Leydig Cell Steroidogenesis"; and CPT Andrew R. Wiesen, Resident, Internal Medicine Service, Department of Medicine, "Equilibration of Hemoglobin Concentration Following Transfusion of Packed Red Blood Cells." Recipient of the 1994 Bailey K. Ashford Clinical Research Award, MAJ Jose A. Stoute, was announced at graduation in June.

The Research Review Service continued to be busy with an ever-increasing number of protocols being submitted. The Service worked with the Clinical Investigation Regulatory Office to further facilitate the process of approval of protocols and the procedure for requesting and reporting the one-time use of an investigational new drug. To better assist investigators and to expedite their protocols through the approval process, a weekly pre-review meeting was established to review new submissions. Participating in this function are the Chief of the Service, the Protocol Coordinator, and the Biostatisticians. The meeting results in written comments being provided to the investigator to improve the medical/scientific content or to correct administrative deficiencies of the protocol, as needed, before going to committee(s). This method of pre-review has proven to expedite the protocol through the Clinical Investigation Committee, the Institutional Laboratory Animal Care and Use Committee, and/or the Human Use Committee/Institutional Review Board, as applicable. Because of personnel constraints, the Clinical Investigation Recognition Seminars were terminated during the past year; however, plans are being made to sponsor a "Research Day" for presentation of research results.

The Biometrics Section continues to provide a wide range of statistical support to investigators, to include research design, sample size estimation, data analysis, and general troubleshooting. The two Biostatisticians consulted on more than 200 protocols during the past fiscal year. Additionally, they contributed significantly as co-authors or consultants on an increasing number of research manuscripts published in refereed, peer reviewed journals. Both Biostatisticians play key roles in the workshops and research courses sponsored by the Department, as well as offering one-on-one teaching to investigators almost daily. The Section remains vital in facilitating and enhancing the functions and capabilities of data analysis.

Many powerful and user-friendly statistical software tools for data analysis are available to researchers in the DCI Computer Lab or through network connection. Software includes STATISTICS 4.0, SPSS 6.01 WINDOWS, BMDP, and SOLO Power Analysis and Cohen's Power Analysis programs for sample size estimation. Other customized programs include Fisher Exact Test, 95% Confidence Intervals for Proportions, Odds Ratio test, T-Test, and Randomization.

The Research Administration Service provided support for the Department and all WRAMC investigators, managing intra- and extramural monies totalling over \$7.3 million. Of this amount, \$763,506 was received by the Department in MEDCASE funds, which was a increase of just under \$100,000. Extramural funding continued to expand, up \$8,200 from 1994, and includes support from the National Institutes of Health (NIH), the U.S. Army Medical Research and Materiel Command (MRMC), and the Tri-Service Military Nursing Research Program.

During the past year, there was continued development of the Extramural Funding Office. All extramural protocols are processed through this office for adherence to guidelines and regulations and for scientific/medical editorial review. For the purposes of this office, extramural is defined as providing support to this institution; be it money, consumable supplies, personnel, equipment, etc., to conduct research. Through the use of e-mail, WRAMC staff members were notified of extramural funding opportunities as they were identified. Investigators submitted 16 proposals to the Defense Women's Health Research [Intramural] Program, implemented by the MRMC, with 10 (62.5%) proposals approved for FY-95 funding. Additionally, there are several collaborative efforts between WRAMC and the private sector that are pending funding through the Defense Women's Health Research [Extramural] Program. During the fiscal year, approval was obtained to begin utilizing the Cooperative Research and Development Agreement (CRDA) to transfer research resources between the government and the private sector. The first CRDA with WRAMC was written late in the fiscal year and is currently being processed for approval. Six others are in the formulative stage. A workshop is being planned for early FY-95 that will offer staff an opportunity to learn more about how to conduct extramurally supported research at WRAMC. Insight will be provided on how DCI can assist investigators with extramural resources, and representatives from the Henry M. Jackson Foundation for the Advancement of Military Medicine and the Facilitators of Applied Clinical

Trials will participate in the program. Due to the loss of two Editorial Assistants, the Editorial Office no longer provides services to investigators/authors in composing research protocols and manuscripts. The compilation of the Annual Progress Report continues to closely monitor the progress of ongoing research projects. All reports are submitted within 30 days of the anniversary date of approval, or the protocol is administratively terminated. Additionally, the Editorial Office continues to update the "Clinical Investigator's Guide," explaining the research review process and research resources at WRAMC and providing checklists, formats, and guidelines. To assist principal investigators further, a program continues whereby the routine forms and instructions required to compile a protocol are available to researchers on user-friendly computer diskettes.

The Computer Operations Section continued expanding and optimizing support applications for staff and investigators in both the computer lab and on the WRAMC-wide research network, DCINET. Improvements included PC and MAC workstation upgrades, incorporation of DDN/INTERNET services, and network server upgrades that allowed expansion and optimization of the centralized database services. The Section worked with the Directorate of Information Management to contract the initiation of a new LAN infrastructure for the WRAMC campus.

During FY-94, MAJ Richard Borschel reported as the new Assistant Chief of the Research Operations Service. Renovation of the laboratory animal facility began in February 1994 and is expected to be completed in March 1995. Construction on the new Infectious Disease Laboratory was completed at a cost of \$250,000, and the lab opened in March 1994. As a result of the decreased number of enlisted personnel to support the Service, a number of laboratory consolidations were initiated to reduce duplication of effort and improve laboratory efficiency. Mr. Maged Abdel-Rahim was instrumental in implementing the use of the mass spectrometer in the Analytical Chemistry Laboratory.

The DCI Flow Cytometry Laboratory provided support for 13 fellows and a number of staff from departments around the medical center, including the Allergy-Immunology Service, Rheumatology Service, Pediatric Hematology-Oncology Service, Department of Pathology and Area Laboratories, and Pediatric Endocrinology Service, with 11 protocols initiated and/or supported during the fiscal year. The DCI Immunogenetics Laboratory was instrumental

in the successful application of several grants from industry and federal sources, which will fund approximately \$200,000 in research during FY-95. The lab provided support for five fellows and initiated and/or supported eight protocols during the fiscal year. Several of these protocols are studies dealing with Hepatitis B and C. Additionally, the laboratory has established and developed a new method of reverse transcriptase polymerase chain reaction (RT PCR) for Hepatitis C.

The Kyle Metabolic Unit Nursing Service supports 16 beds that are utilized for the evaluation and treatment of endocrine and metabolic disorders. This unit will be abolished in the upcoming fiscal year, and the clinical function will revert to the Department of Medicine. Three clinical nurses will be incorporated into the Specialty Support Section, Clinical Studies Service, DCI, and will provide support for research efforts throughout the medical center.

The 7-year polyp prevention study (NIH grant), now in its fourth year, headed by COL James Kikendall, MC, Gastroenterology Service, Department of Medicine, completed the enrollment phase. A total of 202 subjects are enrolled at WRAMC in this multi-center study of patients who have undergone colonoscopic removal of adenomas. Subjects were randomized to no intervention or to a low fat, high fiber, high fruit and vegetable diet. Nutrition counselling for those in the dietary intervention group was ongoing during this past year. Repeat colonoscopy and follow-up data collection visits were ongoing during this past year for both intervention and control participants.

As in years past, principal investigators conducting research under the Clinical Investigation Program at WRAMC continued to receive national recognition during FY-94 for their outstanding research.

- MAJ Louis Guzzi, MC, Anesthesia-Operative Service, Department of Surgery, was awarded First Place, Resident Research Award, from the Maryland/ District of Columbia Society of Anesthesiology, for his paper entitled "Patterns of Ischemia: Holter Monitoring Following Non-Cardiac Surgery in Patients with Previous PTCA or CABG."

- The William Beaumont Clinical Research Award was bestowed on COL James W. Kikendall, MC, Director of Clinical Services, Gastroenterology Service,

Department of Medicine. He received the award at the 20th Annual William Beaumont Symposium, Army Regional American College of Physicians Meeting, Orlando, FL, in October 1993, for his work in the areas of prevention and early detection of colonic neoplasia and adenocarcinoma.

- In October 1993, MAJ Judd W. Moul, MC, Urology Service, Department of Surgery, received the Society of Government Service Urologists Uro-Oncology Award for the best presentation on a urologic cancer topic at the Annual Kimbrough Seminar in San Diego, CA.

- For his paper entitled "The Efficacy of Different Techniques for Disinfecting Contaminated Osteoarticular Fragments and Bone-Tendon Grafts," CPT James E.B. Stuart, MC, Orthopaedic Surgery Service, Department of Surgery, received the Norman T. Kirk Award. Dr. Stuart presented his work at the 35th Annual Meeting of the Society of Military Orthopaedic Surgeons, Bethesda, MD, in December 1993.

- CPT William DeVries, MC, Orthopaedic Surgery Service, Department of Surgery, was the recipient of the Founder's Award of the Society of Military Orthopaedic Surgeons for his study "Evaluation of the Lateral Ankle Ligaments and Effectiveness of Ankle Braces During Rotational Forces Across the Ankle Joint," which he presented in Bethesda, MD, in December 1993.

- Nine WRAMC internal medicine residents received awards for their research from the American College of Physicians (ACP) and were asked to present or display their work at the ACP's scientific meeting held at the Uniformed Services University of the Health Sciences, Bethesda, MD, in January 1994. The awardees and their work were:

- CPT Kevin I. Glass, MC, presented his work entitled "Pulse Oximetry Correction for Smoking Exposure."

- CPT Jennifer Thompson, MC, presented her work entitled "Curative Radiation Therapy in Hodgkin's Disease: Long-Term Followup."

- CPT Andrew R. Wiesen, MC, presented his study entitled "Equilibration of Hemoglobin Following Transfusion."

- CPT Barry Aaronson, MC, displayed his poster entitled "Severe Hemolytic Anemia After Hepatitis B Vaccination."

- CPT J. C. Byrd, MC, displayed a poster entitled "Fludarabine Therapy in Lymphoid Malignancies is Associated with a High Number of Opportunistic Infections."

- CPT W. Jeffrey Endenfield, MC, displayed his poster entitled "Anti-JO-I Associated Polymyositis as a Cause of Fever of Unknown Origin."

- CPT Michael Gordon, MC, displayed his poster entitled "The Effect of Anti-Rho(D) in Adult Patients with Immune Thrombocytopenic Purpura."

- CPT Duane Hospenthal, MC, displayed his poster entitled "Trends in Fungi Recovered from Urine Following the Introduction of Fluconazole."

- CPT Patrick O'Malley, MC, displayed his poster entitled "The Value of Screening for Psychiatric Disorders Prior to Upper Endoscopy."

- CPT Jennifer Thompson, MC, displayed her poster entitled "Dyspnea on Exertion and Abnormal Cardiopulmonary Testing in Addison's Disease."

• The Kershnik Award of Excellence, Best Research Paper Presentation, was bestowed on CPT Katherine A. Ward, MC, Orthopaedic Surgery Service, Department of Surgery, in March 1994. The award was given for her research "Intraosseous Calcaneal Lipoma: Review of the Literature with a Case Report."

• CPT Jeffrey J. Meter, MC, Orthopaedic Surgery Service, Department of Surgery, received the Resident Research Award, Third Place, from the Washington Orthopaedic Society Residents Competition, in April 1994 for his work entitled "A Method for Radiographic Evaluation of Pedicle Screw Violation of the Vertebral Endplate."

• The Resident/Fellow Research Award, the Eastern Orthopaedic Association, was awarded in May 1994 to MAJ Patrick St. Pierre, MC, Orthopaedic Surgery Service, Department of Surgery, for his study entitled "Tendon Healing to Cortical Bone Versus a Cancellous Trough: A Biomechanical and Histological Evaluation in the Goat."

• In June 1994, COL Cynthia A. Gurney, AN, Nursing Research Service, received the Phyllis J. Verhonick Nursing Research Award for recognition of her research "Adaptation of Medical Personnel to Combat." The award was presented at The Army Nurse Corps Phyllis J. Verhonick Biennial Research Symposium, Denver, CO.

2. Planned for FY-95

The Department of Clinical Investigation hopes to maintain the essence of the Clinical Investigation Program despite severe budget restrictions in FY-95. The Bailey K. Ashford Research Symposium and the

WRAMC Research Course will be continued. Areas of particular interest for the upcoming year include the following:

a. Continue close coordination and oversight of the renovation of the laboratory animal facility and the departmental space in the BRAC Building; both of which are due for completion during FY-95.

b. Develop a winter DCI course to inform staff on how to enhance their research efforts through extramural support.

c. Inaugurate a "Research Day" where investigators will be invited to present posters and oral presentations of their research.

d. Major modernization of the computer operations services, to include: (1) operation of DCINET over the new WRAMC LAN fiber infrastructure; (2) relocation of the computer lab and the hub of operations to new facilities; (3) implementation of a new WRAMC-wide client-server database/mail central workflow that will completely automate DCI business; (4) implementation of new laboratory automation features; and (5) planning of new multi-media teaching aids for research and computer automation instruction.

3. Ongoing and Future Issues

It is probable that WRAMC activities in patient care, training, and research will change substantively in the future. The major ongoing and future issue is the same as in years past, funding of the WRAMC Clinical Investigation Program in this new environment. Envisioned is a need for personnel to assist in heavily utilized research areas; such as, Pharmacy, Extramural Funding Office, Biometrics Section, and Computer Operations. In order to generate adequate funding for this growth, a 5% access fee will be instituted on all extramurally supported protocols.

TABLE IV: Human Use Committee/Institutional Review Board Members

Kenneth Burman, COL MC	Co-Chairman Chief, Endocrine-Metabolic Service Representing Deputy Commander
Stephen Sihelnik, LTC MC	Co-Chairman Assistant Chief, Urology Service Representing Deputy Commander
George Tsokos, MAJ, MC	Acting Co-Chairman Assistant Chief, DCI
Dominic Solimando, LTC MS	OIC, Hematology-Oncology Pharmacy Representing Chief, Pharmacy Service
David DeDonato, LTC CH	Chief, Dept of Ministry and Pastoral Care
Cheryl Hostetler, DAC	Clinical Instructor, Dietetic Internship Education and Research Nutrition Care Directorate Representing Ch, Nutrition Care Dir
Eric Marks, MD*	Associate Professor Dept of Medicine, USUHS
Laurel Meaney, DAC	Patients' Rights Representative, WRAMC
Frederick Miller, MD PhD*	Medical Officer U. S. Food and Drug Administration
Scott Murdoch, JD	Chief, Claims Office Representing Center Judge Advocate
Jean Reeder, COL AN	Chief, Nursing Research Service Representing Chief, Dept of Nursing
Robert Smallridge, COL MC*	Chief, Dept of Clinical Physiology Division of Medicine, WRAIR Representing Director, WRAIR
Estelle Coleman-Fraser, DAC	Research Review Coordinator Department of Clinical Investigation

*Non-affiliated

TABLE V: Clinical Investigation Committee Members

George Tsokos, MAJ MC	Acting Chairman Assistant Chief, DCI
Ana Rodriguez, COL MC	Chief, Nuclear Medicine Representing Radiation Control Comm
Audrey Chang, PhD	Supervisory Statistician, DCI
Paul Welch, MAJ MC	Chief, Nephrology Service Representing Chief, Dept of Medicine
Scott Murdoch, JD	Chief, Claims Office Representing Center Judge Advocate
Jean Reeder, COL AN	Chief, Nursing Research Service
Douglas Hale, MAJ MC	Staff, General Surgery Service Representing Chief, Dept of Surgery

TABLE VI: Rotating Senior Investigators, Clinical Investigation Committee

Majorie Leek, PhD	Army Audiology & Speech Center
Barbara Schenok, MD	Neurology Service
Normund Wong, COL MC	Department of Psychiatry
Roy Wong, COL MC	Gastroenterology Service
Gary Carpenter, COL MC	Allergy-Immunology Service
Russell Moores, MAJ MC	Department of Pediatrics

**TABLE VII: Institutional Laboratory Animal Care
and Use Committee Members**

George Tsokos, MAJ MC	Acting Chairman Assistant Chief, DCI
Judith Davis, MAJ VC	Attending Veterinarian Chief, Animal Resource Department, Div of Veterinary Medicine, WRAIR
Daryl Kelly, LTC MS	Ch, Research Operations Service Dept of Clinical Investigation, WRAMC
Hernando Mena, LTC MC*	Asst Chairman, Dept of Neuropathology Armed Forces Institute of Pathology
Ted Hadfield, LtCol BSC*	Chief, Division of Microbiology Armed Forces Institute of Pathology
Lynn Bailey, DAC	Laboratory Animal Technician Dept of Clinical Investigation
*Non-affiliated	

TABLE VIII: HIV Research/Clinical Investigation Committee Member

Jeffrey Lennox, MAJ MC	Staff, Infectious Disease Service Representing Program Director, HIV Research, Jackson Foundation
