U.S. ARMY RESEARCH INSTITUTE FOR THE BEHAVIORAL AND SOCIAL SCIENCES

**A Field Operating Agency Under the Jurisdiction
of the Deputy Chief of Staff for Personnel**

EDGAR M. JOHNSON
Director

NOTICES

DISTRIBUTION: This report has been cleared for release to the Defense Technical Information Center (DTIC) to comply with regulatory requirements. It has been given no primary distribution other than to DTIC and will be available only through DTIC or the National Technical Information Service (NTIS).

FINAL DISPOSITION: This report may be destroyed when it is no longer needed. Please do not return it to the U.S. Army Research Institute for the Behavioral and Social Sciences.

NOTE: The views, opinions, and findings in this report are those of the author(s) and should not be construed as an official Department of the Army position, policy, or decision, unless so designated by other authorized documents.

REPORT DOCUMENTATION PAGE			Form Approved OMB No. 0704-0188	
Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

13. ABSTRACT (Maximum 200 words) The objective of this contract was to provide technical and analytical support for the conduct of U.S. Army Research Institute for the Behavioral and Social Sciences (ARI) inhouse research. Area universities, through their membership in the Consortium of Universities, contributed to a wide variety of research projects and provided various technical and analytical support services. The majority of the support services were provided by Consortium Research Fellows (CRFs), graduate students in the social sciences employed by the Consortium to act as research assistants to the scientists at ARI. Other services provided included sharing the Consortium's faculty expertise database, which allows ARI to search on-line and identify persons with particular expertise, experience, or capabilities necessary to provide assistance on a given research task. ARI was given access to faculty expertise and laboratory facilities at Consortium institutions to cooperate in research projects directed by ARI scientists, and Senior Consortium Research Fellows (SCRFs) provided assistance to ARI. The impact of the Consortium's assistance to ARI has been felt in the increased number of CRFs and SCRFs over the 3-year period, in the increased (Continued)

Technical and Analytical Support
for the
U.S. Army Research Institute

I. SCIENTIFIC OBJECTIVE

The overall objective of this contract was to provide technical and analytical support for the conduct of ARI in-house research. Area universities, through their membership in the Consortium of Universities, contributed to a wide variety of research projects and provided various technical and analytical support services.

II. APPROACH

The Consortium provided technical and analytical support through four primary mechanisms as described below. By far the majority of support services were provided by the Consortium Research Fellows.

A. Consortium Research Fellows

Graduate students in the social sciences were employed by the Consortium to act as research assistants to the scientists at ARI. The Consortium identified these students through graduate departments of computer science, economics, information systems, psychology and sociology at member institutions. The students were screened by the Consortium and matched to appropriate positions at ARI. Known as Consortium Research Fellows (CRFs), they were supervised in their research by scientists at ARI and given overall guidance by the Consortium's Project Director.

CRFs worked in BRO, MPRL, PP&O, SRL, TRL, USAISC and with the TD. Over 40 scientists were mentors to CRFs during the contract period. CRFs undertook such tasks as data collection (some went on TDY to collect data at ARI field units), literature reviews, data analysis, technical writing, and so forth.

The following graduate students worked as Consortium Research Fellows during the course of this contract. Some CRFs worked in more than one area -- their most recent assignments are listed here.

Sharon Ardison (MPRL)	Catholic University
Roya Bauman (MPRL)	George Washington University
Kevin Beares (SRL)	University of Maryland
Andrea Birnbaum (MPRL)	George Washington University
Frances Carter (SRL)	George Mason University
Lee Colan (MPRL)	George Washington University
Robert Dacanay (SRL)	American University
Diane DeMarco (TRL)	American University

Debby Deme (MPRL)	American University
Eleana Edens (MPRL)	George Mason University
Robert Epps (SRL)	Howard University
Cassi Fields (TRL)	George Washington University
Ilene Gast (MPRL)	George Washington University
Carol Geer (SRL)	Howard University
José Guerrier (SRL)	Howard University
Leonard B. Hearne (USAISC)	George Mason University
Patricia Heiber (MPRL)	American University
D. Kristen Herrington (SRL)	Georgetown University
Reginald Hopkins (TRL)	Howard University
Jeffrey Horey (MPRL)	George Washington University
Tracye D. Julien (TRL)	American University
C. Ed Kearl (MPRL)	University of Maryland
Steven Kronheim (BRO)	American University
Julia (Linton) Leaman (MPRL)	George Washington University
Christina Lynn (MPRL)	George Washington University
Jeanne K. Mason (MPRL)	George Washington University
Carolyn Meiers (TRL)	George Mason University
Carmen Moten (MPRL)	Howard University
Eric Neiderman (TRL)	George Mason University
Chavis Patterson (TRL)	American University
Victoria Peacock (MPRL)	Georgetown University
Carol Pollack Nelson (TRL)	George Washington University
Dan Ragland (BRO & TD)	American University
Virginia Rappold (SRL)	George Washington University
Connie Schroyer (MPRL)	George Washington University
Ludger Schuknecht (MPRL)	George Mason University
Daria Sneed (TRL)	Howard University
Jocelyn Turner (MPRL)	Howard University
Patricia Watson (TRL)	Catholic University
Suellen Weaver (MPRL)	George Washington University
Delores Westerman (TRL)	Catholic University
Cheri Wiggs (TRL)	Georgetown University

B. Faculty Expertise Database

The Consortium developed a Faculty Expertise Database representing the faculty of its member institutions and also other schools in the D.C.-Virginia-Maryland region. Faculty were surveyed and asked to describe their education, areas of expertise and interest, and past research experience. The database was brought on-line in the early spring of 1988. It is still growing but now contains over 700 faculty records. ARI may search this database to identify persons with the particular expertise, experience or capabilities necessary to provide assistance on a given research task.

C. Senior Consortium Research Fellows

Senior Consortium personnel also provided assistance to ARI. The following is a list of Senior Consortium Research Fellows who were been involved on ARI projects during the term of the contract:

Mr. Paul Hawkins	Consultant to Consortium
Mr. Mark C. Paster	Consortium of Universities
Dr. Sherman Ross	Howard University
Dr. Robert Ruskin	Consortium of Universities
Dr. Elizabeth Vanderputten	Department of Education

D. Cooperation with Laboratories at Consortium Institutions

ARI was given access to faculty expertise and laboratory facilities at Consortium institutions in order to cooperate in research projects directed by ARI scientists. Two subtasks were completed at the Catholic University of America: Subtask 2A: "Research on Human-Computer Interaction" and Subtask 2B: "Effects of Training on Organization of Knowledge"

III. IMPACT

The technical and analytical assistance provided by the Consortium directly enhances ARI's effectiveness and therefore contributes to the larger Army mission.

Program impact is most pronounced in the following seven areas. These areas have been described and discussed at length through a number of quarterly contract reports and individual monthly CRF reports, already on file.

- A. The number of CRFs and SCRFs working with ARI has increased over the three year period to its current level of 29.
- B. The number of scientific disciplines represented by the CRFs has increased over the three years of the contract cycle. The original discipline of Psychology has been joined by representatives from Sociology, Computer Science, Information Systems, and Economics.
- C. The total number of hours worked by Consortium personnel has steadily increased over the contract, as shown in the graph in Section V. The approximate total of hours worked in year one was 12,000 hours, year two was 19,000 hours and year three will be 23,000 hours.
- D. The number of mentors and areas within ARI has been increasing over the contract cycle. As mentioned earlier, PP&O and USAISC have been added to the three major laboratories and the Office of Basic Research as areas utilizing CRF and SCRF services. The number of "official" ARI mentors has increased to 25 but the unofficial number of mentors,

due to a new emphasis on multiple supervision and split CRF appointments, approaches 40 ARI scientists.

- E. The number and quality of research publications resulting from the professional relationships between contract personnel and ARI scientists has been steadily growing. Section VI and VII of this report list the 31 publications of special importance emanating during the three years of the contract.
- F. The use of Consortium personnel for field research has shown dramatic increase over the past three years. CRFs have been used in data collection efforts at U.S. Army installations across the free world.
- G. The Project Director and other SCRFs have greatly increased the number and variety of outreach activities associated with the contract. The increase in requests for presentation and visits to other government agencies and local universities is another sign of the project's success.

IV. FUNDS EXPENDED

A draft final report showing expenditures on this project from 03 June 1985 through 30 June 1988 is attached.

Projection of funds to be expended
since last quarterly report: \$165,432.40

Projection of funds remaining: \$0

V. UTILIZATION OF PERSONNEL

The CRFs worked more than 54,000 hours in ARI labs during the course of the contract. The graph below shows the number of hours worked by CRFs during each month of the contract. Draft final reports showing hours worked by CRFs and wages paid to CRFs for the period 03 June 1985 through 30 June 1988 are attached.

The students' activity reports have been attached to past quarterly reports. Student reports for this quarter are attached to this final report.

VII. ARCHIVAL PUBLICATIONS:

Ruskin, R.S., & Ross, S. (Eds.) (1988). Report on the scientific symposium of the Consortium Research Fellows at the U.S. Army Research Institute. Journal of the Washington Academy of Sciences, 78, 69-86.

Wiggs, C. & Seidel, R.J. (1987). An overview of computer-based instruction in military environments. In R.J. Seidel and P.D. Weddle (Eds.) Computer-based instruction in military environments. New York, NY: Plenum Press.

VIII. GENERAL EFFECT

Overall, the project has proven to be a model cooperative arrangement between the Consortium of Universities and the Army Research Institute. It was designed to enhance the usefulness of university faculty and students as a source of technical assistance to ARI in its ongoing research efforts, and it has succeeded in achieving that goal. We are pleased that this relationship will continue over the next five years. During that period we hope to expand the CRF program into the field units of ARI and to support much more in-house research being undertaken at local university facilities by scientists from the Institute.
