## Preface

Information Resource Management: A Selected Bibliography was compiled to support one of the "special themes" for the U.S. Army War College's AY95 curriculum.

This listing of books, documents and periodical articles contains citations to items dealing with the issues of managing information as a resource, such as information warfare, corporate information management (CIM), and the information superhighway, including the Internet. Most of the items cited were published since 1990.

All the items included in this bibliography are readily available in the U.S. Army War College Library. For your convenience, we have added our call numbers at the end of each book and document entry (keep in mind that call numbers may vary from library to library).

For additional information, please contact the Research and Information Services Branch, U.S. Army War College Library by sending an e-mail message to [awcsl@carlisle-emh2.army.mil](mailto:awcsl@carlisle-emh2.army.mil), or phoning DSN 242-4260 or Commercial (717) 245-4260.
