

REPORT DOCUMENTATION PAGE

Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

1. AGENCY USE ONLY (Leave blank)		2. REPORT DATE 10/25/95	3. REPORT TYPE AND DATES COVERED Interim Progress 6/1/95 - 10/31/95	
4. TITLE AND SUBTITLE Advanced Signal Processing Techniques for Wireless Communications			5. FUNDING NUMBERS N00014-95-1-0834	
6. AUTHOR(S) Prof. Gregory W. Wornell			1313148	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) Research Laboratory of Electronics Massachusetts Institute of Technology 77 Massachusetts Avenue Cambridge, MA 02139			8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES) Office of Naval Research Ballston Tower One 800 North Quincy Street Arlington, VA 22217-5660			10. SPONSORING/MONITORING AGENCY REPORT NUMBER	
11. SUPPLEMENTARY NOTES The view, opinions and/or findings contained in this report are those of the author(s) and should not be construed as an official Department of the Army position, policy, or decision, unless so designated by other documentation.				
12a. DISTRIBUTION/AVAILABILITY STATEMENT Approved for public release; distribution unlimited.			12b. DISTRIBUTION CODE	
13. ABSTRACT (Maximum 200 words) Work by Prof. Wornell and his collaborators is summarized here  19951101 146				
14. SUBJECT TERMS			15. NUMBER OF PAGES

Interim Progress Report for
ONR Grant No. N0014-95-1-0834

Advanced Signal Processing Techniques
for Wireless Communications

for the period

June 1, 1995 through October 31, 1995

Principal Investigator: Prof. Gregory W. Wornell

Research Laboratory of Electronics
Massachusetts Institute of Technology
Cambridge, MA 02139-4307

Early this summer an outstanding graduate student in the department was recruited to participate in the project, and work on the proposed research is well underway. As we are in the start-up phase of the research, expenditures against the grant are only now beginning to accumulate. The substantial initial summer effort of the Principal Investigator on the project was funded entirely through a career development chair appointment, while the initial summer effort of the graduate student was funded through a fellowship. The student is now being (and will continue to be) fully supported by this grant.

There are several components to the extensive research underway. In one component, we are developing new and extremely promising bandwidth-efficient temporal diversity strategies for single- and multi-user wireless communication in time-selective multipath fading environments. Both frequency selective and frequency nonselective channels are being considered. Another component of the research in progress is exploring the use of nonlinear dynamics and chaos in the design of error-correcting codes for communications applications. Finally, we are exploring the potential (and limitations) of advanced blind equalization techniques in current and next-generation communication systems.

Already, we have had a number of exciting preliminary results from the project. These are described in detail in the following publications.

1. G. W. Wornell, "Spread-Signature CDMA: Efficient Multiuser Communication in the Presence of Fading," *IEEE Trans. Inform. Theory*, vol. 41, no. 5, pp. 1418-1438, Sept. 1995.
2. S. H. Isabelle and G. W. Wornell, "Statistical Analysis and Spectral Estimation Techniques for One-Dimensional Chaotic Signals," submitted to *IEEE Trans. Signal Processing*, Aug. 1995.
3. O. Shalvi and G. W. Wornell, "Sufficient Conditions for Blind Equalization with Trellis Coding," submitted to *IEEE Trans. Inform. Theory*, July 1995.
4. G. W. Wornell, "Efficient Multiuser Communication in the Presence of Fading," in *Proc. IEEE Int. Sympo. Inform. Theory*, (Whistler, Canada), Sept. 1995. (long presentation)
5. B. Chen and G. W. Wornell, "Efficient Channel Coding for Analog Sources using Chaotic Systems" submitted Aug. 1995 to *Proc. Int. Conf. Communications*, (Dallas).

Summary of Expenditures since June 1, 1995

Category	As of 9/30/95	As of 10/30/95
Personnel	3,427	10,991
Employee Benefits	1,525	4,891
Other direct costs	99	797
Indirect costs	2,004	7,932
Total	7,455	24,611

ATTACHMENT NUMBER 1REPORTS AND REPORT DISTRIBUTIONREPORT TYPES

- (a) Performance (Technical) Report(s) (Include letter report(s))
Frequency: Semiannual
- (b) Final Technical Report, issued at completion of Grant.
- (c) Final Financial Status Report (SF 269)
- (d) Final Patent Report (DD882)
