Section I
FEDERAL SUPPLY CLASS
OR SERVICE CODES
(Item B8A)

SECTION I
FEDERAL SUPPLY CLASS OR SERVICE CODE
(Item B8A)

General

A four-digit code shall be entered in Item B8A for every procurement action reported on DD Form 350. Only one code number should be entered. If more than one code is applicable, enter the code which describes the predominant product or service procured (see also DoD FAR Supplement 4.671-5(b)(8)(i)).

This section is divided into three parts: Research, development, test, and evaluation (RDT&E) codes are contained in Part A; other services and construction codes are in Part B; and supply and equipment codes are in Part C.

RDT&E

If the action is for research, development, test, or evaluation, enter a code from Part A of this section. (RDT&E is defined in FAR 35.001.) Do *not* assign an RDT&E code to housekeeping services or supplies purchased in support of "in-house" research or development work; such services are coded in accordance with Part B of Section I and the supplies in accordance with Part C. Procurement personnel responsible for coding RDT&E actions should obtain sufficient information from requisitioning personnel to permit accurate classification in accordance with Part A.

Other Services and Construction

If the action is for other services and construction, enter a code from Part B of this section. This four-position code consists of a letter identifying one of 20 major categories and three numeric digits identifying a specific service within each category.

Supplies and Equipment

If the action is for supplies and equipment, enter a code from Part C of this section. The classifications used here are those contained in the H-2 series of cataloging handbooks, except for the items contained in Federal Supply Group (FSG) category 19, "Ships, Small Craft, pontoons, & Floating Docks."

PART A

Research, Development, Test, and Evaluation (RDT&E)

The RDT&E codes in Part A have been developed in accordance with guidelines established by the Federal Procurement Data Center. To ensure that the contract is for RDT&E, check the appropriation symbol. (Do not include housekeeping supplies or services in support of in-house RDT&E even though a RDT&E appropriation symbol is cited.) The following symbols are currently applicable:

ARMY	21X2040	AIR FORCE	57X3600
NAVY	17X1319	DARPA	97X0400.13
NASA	80X0108		

Description and use of code

The RDT&E code is composed of two alphabetical and two numeric digits. The first position is always the letter "A" to identify RDT&E; the second position is a letter from "A" to "Z", used to identify the major category; the third digit is a number from "0" to "9", used to identify a subdivision of the major category. The fourth digit is a number from "1" to "6", used to identify the type of RDT&E. This fourth digit should be *assigned by the contracting officer* in accordance with FAR 35.001 as follows:

First Two Positions of Program Element	FAR 35.001	Fourth Digit of Item B8A Code on DD Form 350 To Be:
61	(1)	1. Research
62	(2)	2. Exploratory Development
63	(3)	3. Advanced Development
64	(4)	4. Engineering Development
All Other	(5)	5. Operational Systems Development
65	(6)	6. Management & Support

When the program element number appears on the purchase document, the first two digits of this number determine the number to be used in the fourth position.

For Army procurements, the third digit of an Army budget activity code *beginning with 6* identifies the appropriate code for use in the fourth position. Code 5 will be entered in the fourth position for all Army budget activity codes beginning with a number other than 6.

When completing this item, the precise service being purchased shall be coded. For example, a contract for research on noise pollution for aircraft should be shown under category AH4*, "Environment, Noise Pollution," and not under aircraft.

PART B

OTHER SERVICES AND CONSTRUCTION

All services and construction work, except RDT&E work, should be coded in accordance with the codes listed in Part B. Each category has been assigned a four-position code for a specific type of service or construction. The code consists of a letter identifying one of 20 major categories and three numeric digits identifying a specific service within each category.

The 20 major categories are:

- E. Purchases of Structures & Facilities
- F. Natural Resources Management
- G. Social Services
- H. Quality Control, Testing, & Inspection Services
- J. Maintenance, Repair, & Rebuilding of Equipment
- K. Modification of Equipment
- L. Technical Representative Services
- M. Operation of Government-Owned Facility
- N. Installation of Equipment
- P. Salvage Services
- Q. Medical Services
- R. Professional, Technical, & Management Services
- S. Utilities & Housekeeping Services
- T. Photographic, Mapping, Printing, & Publication Services
- U. Training Services
- V. Transportation & Travel
- W. Lease or Rental of Equipment
- X. Lease or Rental of Facilities
- Y. Construction of Structures & Facilities
- Z. Maintenance, Repair, or Alteration of Real Property

Due to the diversified nature of the services being purchased by the Department of Defense, it is very often difficult to identify the appropriate service or construction code that applies to a procurement action. If the appropriate code for Item B8A cannot be easily determined, the procuring activity should select a code that best fits the description of the service involved and submit a copy of the DD Form 350 in question (with an exact description of the type of service or construction being procured) to:

Washington Headquarters Services
Directorate for Information Operations and Reports
Room 1C535, The Pentagon
Attn: PEID
Washington, D.C. 20301-1155

This will serve as a basis for determining the need for the assignment of new codes or the revision of existing codes.

PART C

SUPPLIES AND EQUIPMENT

All supply and equipment items should be coded in accordance with the codes listed in Part C. Except for the items in Federal Supply Group (FSG) category 19, "Ships, Small Craft, Pontoons, & Floating Docks," the classifications used here are those contained in the H-2 series of cataloging handbooks, covering the Federal Supply Classification system and personnel should refer to these handbooks for a more complete description of the codes. In the case of ships, a more detailed code is provided here than is shown in the H-2 handbooks.

The FSG codes are provided below:

<u>DESCRIPTION</u>	<u>FEDERAL SUPPLY GROUP</u>
Weapons	10
Nuclear Ordnance	11
Fire Control Equipment	12
Ammunition & Explosives	13

Section II
SYSTEM OR EQUIPMENT CODES
OR SERVICE COES
(Item B8C)

SECTION II

SYSTEM OR EQUIPMENT CODES

(Item B8C)

Purpose

The DD Form 350 codes in this section have been developed to facilitate an analysis of DOD procurement by major weapon system,* equipment, or item. Only production items are covered by this coding system; RDT&E work is excluded since it is covered by Section I, Part A, of this manual. In addition to RDT&E, codes in this section also exclude construction, subsistence, clothing/textiles, or petroleum.

Codes generally have been assigned to all production items for which annual programmed procurement is \$2 million or more. However, if an end item or a component identifiable to an end item cannot be identified by a specific code, a request for a code, together with the applicable DD Form 350, should be addressed to the appropriate organization specified in DoD FAR Supplement 4.671-4(d). Submission of the DD Form 350 will not be delayed pending resolution of the inquiry.

If a system or equipment code is not applicable to a DD Form 350 transaction, or if the system or equipment bears a security classification prohibiting unclassified disclosure of the code title in combination with other DD Form 350 items, the code "000" (three zeroes) shall be assigned.

Description and Use of Code

The code for Item B8C consists of three alphabetical positions. The first position identifies one of the following major categories of equipment:

A	Aircraft	F	Ammunition
B	Aircraft Engines	G	Electronics
C	Missiles and Rockets	H	Other Equipment
D	Vehicles	S	Ships
E	Weapons		

The second position identifies a subdivision of the major category, e.g., fighter aircraft, while the third position identifies the specific item, e.g., an F-111.

Normally, each system or equipment code includes all subsystems, components, repair parts, modifications, repairs, and related supplies and services (other than RDT&E and construction) which are procured specifically for the system or equipment. Exceptions to this rule are those instances where a specific equipment item or a major component has been assigned a separate code, e.g., J-52 Turbojet Aircraft Engines.

When a procurement is for components, parts, or services covering more than one system or equipment and 75 percent or more of the dollar amount is allocable to a single system or equipment, the code for that system or equipment shall be assigned. Otherwise, multi-system procurement shall not be assigned a specific code.

Each department should use only that part of Section II designated for its use, e.g., Part A for Army, Part B for Navy, and Part C for Air Force. The arrangement of systems or equipment by major category is as follows:

* The definition of weapons system as provided by the *DoD Dictionary of Weapons and Military Terms* is "An instrument of combat with all the related equipment, operating skills, and direct supporting facilities and services required to enable the instrument of combat to operate as a single unit of striking power."

1. Aircraft are arranged by design number within each basic mission symbol, e.g., A-4, A-5, A-6, F-4.
2. Aircraft engines are arranged by design number within type of engine.
3. Missiles and rockets are arranged by design number.
4. Air Force electronics and communications items are arranged numerically by system number.
5. All other categories are arranged alphabetically by key word or words and by caliber size.

If an aircraft, missile, or rocket reported on DD Form 350 does not have a mission symbol or letter prefix listed in this manual but does have a design number that is listed, the code applicable to that design number should be assigned. For example, an RB-52 aircraft would be assigned the code for a B-52. In addition, the series symbol for an item is not used, e.g., F-111 is used, rather than F-111A or F-111B.
