Comparison of FY 1995 Program requirements as Reflected
in the FY 1996 Budget with the FY 1995 Requirements
as shown in the FY 1997 Budget

Summary of Requirements (In millions of Dollars)

1. Ammunition (-\$2.1)

The Rockets, All Types line in the Procurement of Ammunition Navy and Marine Corps Appropriation (PANMC) had an excess of funds and was rescinded in section 8092 Ship Cost Adjustments (-\$2.1).

2. Weapons and Tracked Combat Vehicles (\$10.9)

All changes were the result of minor execution adjustments (\$10.9).

3. Guided Missiles and Equipment (-\$8.7)

All changes were the result of minor execution adjustments (-\$8.7).

4. Communications and Electronics Equipment (-\$9.7)

Funds were reduced from the Intelligence Support Equipment and Automated Data Processing Equipment Lines as part of approval of the Omnibus reprogramming (-\$12.4). The remainder was due to minor execution adjustments (\$2.7).

5. Support Vehicles (\$3.3)

All changes were the result of minor execution adjustments (\$3.3).

6. Engineer and Other Equipment (\$1.4)

All changes were the result of minor execution adjustments (\$1.4).

7. Spares and Repair Parts (-\$6.3)

All changes were the result of minor execution adjustments (-\$6.3).

UNCLASSIFIED

Comparison of FY 1995 Financing as Reflected
in the FY 1996 Budget with the FY 1995 Financing
as shown in the FY 1997 Budget

Summary of Requirements (In millions of Dollars)

Explanation of Changes

The decrease in program financing represents Congressional Action of the FY 1996 Presidents Budget. The following programs were affected: Rockets, All types, Intelligence Support Equipment, Automated Data Processing Equipment (ADPE), and the Drug Interdiction Program. The Rockets (-\$2.1) and ADPE Programs (-\$0.4) were reduced as a result of Congressional Action (sec 8092) (-\$2.5). The Intelligence Support Equipment (-\$9.0) and ADPE (-\$3.4) Programs were reduced due to Congressional approval of the Omnibus Reprogramming (-\$12.4). The Drug Interdiction Program received funds from the Procurement Defense-Wide Appropriation (\$0.8).

Comparison of FY 1996 Program requirements as Reflected
in the FY 1996 Budget with the FY 1996 Requirements
as shown in the FY 1997 Budget

Summary of Requirements (In millions of Dollars)

1. Ammunition (\$78.0)

Procurement of Ammunition Navy and Marine Corps received Congressional Increases. The following rounds received Congressional Increases: 7.62 MM, All Types; .50 Caliber, All Types; 81MM HE; 155mm Red Bag; Fuze, M762; Grenades, All Types; and Items Less than \$2 million (\$92.3). Decreases included prorated reductions for revised economic assumptions (-\$4.3) and a proposed fiscal year 1996 rescission resulted in a reduction to the 81MM HE round (-\$10.0).

2. Weapons and Tracked Combat Vehicles (\$12.9)

The Modification Kits (Tracked Vehicle) Program received a Congressional Increase (\$12.3). Revised economic assumptions reduced funds (-\$1.1) and minor execution adjustments increased funding (\$1.7).

3. Guided Missiles and Equipment (-\$6.8)

Revised economic assumptions resulting in a prorated reduction (-\$0.5). The remainder was due to minor execution adjustments (-\$6.3).

4. Communications and Electronics Equipment (\$52.1)

Communications and Electronics Equipment received Congressional Increases (\$38.0). Additionally, revised economic assumptions reduced funding (-\$4.5) and a fair share distribution of a Congressional ADP adjustment also reduced funds (-\$0.2). The remainder was due to minor execution adjustments (\$18.5).

5. Support Vehicles (-\$1.3)

The Trailer Program received Congressional Increases (\$5.5). Also, revised economic assumptions reduced funding (-\$0.6). The remainder was due to minor execution adjustments (\$6.2).

6. Engineer and Other Equipment (\$30.8)

The Training Devices Program received Congressional Increases (\$38.6). Also, revised economic assumptions resulted in prorated reductions (-\$1.8) and a transfer from O&M, MC increased funding for expense/investment limitations (\$0.9). The remainder was due to minor execution adjustments (-\$6.9).

7. Spares and Repair Parts (-\$1.1) Revised economic assumptions reduced funding for Spares and Repair parts (-\$1.1).

UNCLASSIFIED

Comparison of FY 1996 Financing as Reflected
in the FY 1996 Budget with the FY 1996 Financing
as shown in the FY 1997 Budget

Summary of Requirements (In millions of Dollars)

Explanation of Changes

The increase in program financing represents Congressional Action of the FY 1996 President's Budget. Congressional Increases to high priority Marine Corps Programs resulted in increases totaling \$188.0 million.

Additionally, other Congressional Action of the FY 1996 President's Budget had the following impacts: the Automated Data Processing Equipment Program was reduced due to Section 8101 of the fiscal year 1996 DoD appropriations Act (-\$0.2). The Command Support Equipment Program had funds transferred from O&MMC due to expense\investment threshold limitations (\$0.9). Reductions totaling \$14.0 million were prorated against all procurement programs due to section 8125 revised economic assumptions (-\$14.0).

Lastly, the 81 MM HE Round was partially recommended for rescission (-\$10.0).

The AN/PSC-5 is a lightweight, manportable UHF satellite communications (SATCOM) terminal that will provide long-range single channel communications. The AN/PSC-5 incorporates the Demand Assigned Multiple Access (DAMA) protocol mandated by the Joint Chiefs of Staff; non-DAMA will not be allowed to communicate by satellite after 30 Sep 96. The AN/PSC-5 provides embedded Communications Security (COMSEC) and encrypted voice and data capabilities, ensuring multi-service interoperability with most existing and planned communications systems. In addition to voice and data, the AN/PSC-5 interfaces with facsimile, teletype, NET radio Interface (NRI), and Frequency Modulation FM retransmission media, such as SINGARS. The AN/TSC-96A is an Ultra-High Frequency (UHF) Satellite Communications Central used at the Marine Expeditionary Force, Wing, Division, and Force Service Support Group Headquarters which provides record message traffic and secure voice communications out of and within the Amphibious Objective Area and within the Naval Telecommunications System. It receives the Fleet Broadcast subsystem and provides access to the Navy's Common User Digital Information Exchange Subsystem (CUDIXS) and the Fleet Secure Voice Communications Network on a world-wide, terrain independent basis. It provides standard termination in the Defense Communications System. This program will replace Secure Voice with Advanced Narrowband Digital Voice Terminal (ANDVT), upgrade Communication Security equipment and add Demand Assigned Multiple Access (DAMA) to CUDIXS -- all required for interoperability. Also, it will replace the current computer system with one that adds increased data processing and data storage capability and supportability, add a PC computer LAN for message distribution and refit the current two shelter configuration into a single, improved S-280c/G shelter. This item is Code A. The Acquisition Objective is 10. INDIVIDUAL MODIFICATION

MODIFICATION TITLE: AN/TSC-96A SATELLITE COMMUNICATIONS CENTRAL

MODELS OF SYSTEMS AFFECTED: AN/TSC-96A SATELLITE COMMUNICATIONS CENTRAL

DESCRIPTION/JUSTIFICATION:

The AN/TSC-96A will complete the JCS-mandated DAMA modification to the system, add the capability to interface with the MSC-63A's TCC/SSCC, provide interface with a LAN, upgrade all computer and security equipment, and reduce the system configuration from two shelters to a single S-280C/G shelter.

DEVELOPMENTAL STATUS/

MAJOR DEVELOPMENT MILESTONES:

Single shelter configuration is in full scale development. Integration of new/existing equipment continues.

FINANCIAL PLAN: (\$ in Millions)

COST (IN MILLIONS)	\$ 5.0	\$ 6.9	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0

THIS IS A ROLL-UP LINE FOR THE JOINT TACTICAL INFORMATION DISTRIBUTION SYSTEM (JTIDS).

THE JTIDS TERMINAL PROVIDES A HIGH-CAPACITY, JAM RESISTANT, SECURE, DIGITAL COMMUNICATIONS CAPABILITY FOR THE TACTICAL COMMAND AND CONTROL (C2) PLATFORMS.

THIS PROJECT PROCURES JTIDS CLASS 2/2H TERMINALS FOR THE FOLLOWING USMC HOST PLATFORMS: TACTICAL AIR OPERATIONS MODULE (TAOM), ADVANCED TACTICAL AIR COMMAND CENTRAL (ATACC), AND AIR DEFENSE COMMUNICATIONS PLATFORM (ADCP). THIS PROJECT ALSO PROCURES HARDWARE (INCLUDING GOVERNMENT FURNISHED PROPERTY (GFP)) REQUIRED TO INTEGRATE THE JTIDS CAPABILITY INTO THE TAOM AND THE ATACC.

ACQUISITION OBJECTIVE (A/O): CLASS 2 TERMINALS = 25

FY 95: 9 = 36% OF AO
FY 96: 19 = 76% OF AO (INCLUDES 2 PRODUCTION UPGRADE KITS)
FY 97: 24 = 96% OF AO (INCLUDES 3 PRODUCTION UPGRADE KITS)
FY98-01: 25 = 100% OF AO (INCLUDES 1 PRODUCTION UPGRADE KIT)

FY 97-01 PROCUREMENT IN BLI 463200.

Funds allocated under this line are used to procure General Purpose Electronic Test, Measurement, and Diagnostic Equipment to support major items of electronic equipment. Funds sustain modernization and standardization efforts in addition to meeting new requirements.

All of the items are Code A.

This is a roll-up line that consists of many different items and separate acquisitions.

All of these items are required to support other Marine Corps systems already fielded or in the acquisition pipeline.

The SINGGARS radio will replace all AN/PRC-77 manpack, Bancroft, and AN/VRC-12 family of vehicular radios currently in the Marine Corps inventory. The SINGGARS radio will be used as the primary means of communication for command and control as well as fire support on the battlefield. SINGGARS will be highly reliable with over 1250 hours mean time between failure and built-in test equipment will ease the workload. Frequency hopping capability offers low probability of intercept, while integrated COMSEC deletes the requirement for external communications security equipment. The SINGGARS radio is Code A. Acquisition Objective (AO) = 25390 Prior Years 13460 = 53% of AO FY95 17716 = 70% of AO FY96 21519 = 85% of AO FY97-01 25390 = 100% of AO FY 97-99 PROCUREMENT IN BLI 463300.

REMARKS: UNIT COSTS DO NOT INCLUDE NAVY COMSEC FUNDING. MODIFICATION TO FY-94 CONTRACT REFLECTS UNIT COST SAVINGS. FUNDS WERE APPLIED TO THE FY95 CONTRACT TO PROCURE AN ADDITIONAL 1000 PRC-119 RADIOS. THIS WILL RESULT IN A COMMENSURATE REDUCTION IN THE NUMBER OF RADIOS BOUGHT IN FY 97. COMBINED BUYS WILL NOT EXCEED THE 25,390 ACQUISITION OBJECTIVE. UNIT COST IS AN AVERAGE OF THE UNIT COST FOR VARIOUS CONFIGURATIONS OF THE SINGGARS RADIO.

COST (IN MILLIONS)	\$ 2.2	\$ 1.4	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0			

This is a roll-up line which contains many different and unrelated items of equipment for which the annual procurement is less than \$2 Million each. The only thing these different items have in common is that they all are related to the Telecommunications (TEL) mission area. The funds included in this budget line allow procurement of the following items:

- * Marine Corps Automatic Test Equipment System (MCATES) funding provides for integration and fielding of the AN/USM-631 Test Station.
- * Power Supply equipment which provides direct current (DC) voltage from an alternating Voltage (AC) power source. This enables communication equipment to operate without using batteries. It also provides DC voltage to aid in the maintenance of electronic equipment.
- * Tools, Sets, Kits, & Chests (TSK&C) are general purpose tools and support items used to support the installation, operation, and maintenance of communications equipment.
- * Joint Communications Support Element (JCSE) equipment modernization. This effort funds the Marine Corps share of efforts to keep the JCSE equipped with the latest state-of-the-art equipment to accomplish its Joint Staff Mission.

All of these items are Code A

1. The AN/TYQ-23 (V)1, Tactical Air Operations Module, is an electronic tactical data system which, when supported with sensors, power sources, support equipment, and personnel, provides the US Marine Corps with the capabilities of integrated air defense, supplemental enroute traffic control management, and data link to external agencies for real time exchange of tactical air data. Four Tactical Air Operations Modules constitute one system. 2. This is a collection of efforts and an evolutionary acquisition strategy, encompassing ECPs and incorporation of COTS equipment into the existing TAOC platform. This initiative will upgrade the system to include Joint Tactical Data Links (TADIL-J), Sector Anti-Air Warfare Facility (SAAWF), operator console units, and the TPS-59 radar interface, representing four major elements. 3. These upgrades will open up the system architecture, provide an automated air tasking order capability, tactical missile defense, and a battle management facility. The open architecture facilitates TADIL-J upgrade.

COST (IN MILLIONS)		\$ 0.0	\$ 9.1	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0

The Advanced Tactical Air Command Central (ATACC) is a transportable command, control, and communications system designed to provide the Aviation Combat Element (ACE) Commander with the capability to plan, coordinate, and direct Marine Air Ground Task Force (MAGTF) tactical air operations. ATACC provides computer assistance to Marine Corps planners and operators to facilitate coordination of air battle planning and execution. ATACC provides automated data exchange and processing of tactical information; automated generation of Air Tasking Orders (ATOs) by integrating Contingency Theater Automated Planning System (CTAPS) and computer assistance in maintaining status information. Planners and operators have access to information from a shared database which is automatically updated by messages received from TADIL-A, TADIL-B, NATO Link-1, TADIL-J, and JICS/MTF.

ATACC will maximize use of non-developmental hardware and software items. ATACC hardware is 95 percent NDI or modified NDI. Software is 65 percent NDI. Developed software will be written in Ada as directed by DOD. The MS III decision in March 1994, redefined the program to a three phase evolutionary acquisition. Phase I provides the initial capability and uses the existing prototype four shelter per MEF system reconfigured and upgraded to a one shelter per MEF system, plus software fixes required by the operational test, purchase of CTAPS, and a replacement for the current bubble shelter. Two additional non-deployable systems are required for training and software integration. Subsequent year funding provides for a common voice communications distribution system - the Mobile Enhanced Communications Distribution System (MECDS), upgrades the common hardware, upgrades software to Global Command and Control System (GCCS) mid-term concept of employment (COE), adds TADIL-J integration and Joint Tactical Interface Distribution System (JTIDS) connectivity, and provides improvements in supportability. The program received Milestone Decision Authority MS II approval for Phase II on 14 April 1995. The ATACC will replace the 1960s technology of the AN/TYQ-1 and AN/TYQ-3A.

ACQUISITION OBJECTIVE (A/O): 6

FY 94 and prior: 6 = 100% of Phase I A/O plus initiation of the Phase I improvements
 FY 96: Continuation of Phase I improvements

The DASC PIP is primarily a non-developmental effort which repackages the capabilities of two systems that comprise the existing DASC equipment (the AN/TSQ-155(V) Improved Direct Air Support Central (IDASC) and the OE-334 Antenna Coupler Group) into a lightweight, highly mobile, modular system. This effort will incorporate existing hardware, COTS/modified-COTS and selected automation hardware and software into a single, five shelter, HMMWV mounted system (3 Ops and 2 Comm), which will allow for DASC task organization as required to support any level of MAGTF/operation. The IDASC PIP is a GCCS migration system, that will utilize both the Marine Corps common hardware automation hardware, as well as the MAGTF C4I software baseline. Improved capabilities include automated interfaces to the Digital Communications Terminal (DCT), Advanced Tactical Air Command Central (ATACC), Position Location Reporting System (PLRS), Advanced Field Artillery Tactical Data System (AFATDS), and Tactical Combat operations (TCO). NSWC Crane, the Principal Development Agent, is responsible for both the downsizing and the automation efforts.

INDIVIDUAL MODIFICATION

MODIFICATION TITLE: IMPROVED DIRECT AIR SUPPORT CENTRAL (IDASC) PRODUCT IMPROVEMENT PROGRAM (PIP)

MODELS OF SYSTEMS AFFECTED: AN/TSQ-155V IMPROVED DASC (IDASC) OE-334 ANTENNA COUPLER GROUP

DESCRIPTION/JUSTIFICATION: Equipment procured under this effort will be modular and allow the system to be task organized and operated internal or external to the downsized AN/TSQ-155(V) and OE-334 Antenna Coupler Group shelters, or external to the DASC operations shelters. Improved capabilities include automated interfaces to the DCT, ATACC, PLRS, AFATDS, and TCO.

DEVELOPMENTAL STATUS/ MAJOR DEVELOPMENT MILESTONES: Prototype hardware and software will undergo analysis and modification at Marine Corps Tactical Systems Support Activity and NSWC, Crane IN

Tactical Combat Operations (TCO) will be the Marine Air Ground Task Force (MAGTF) commanders' workstation within the Marine Tactical Command and Control System (MTACCS). TCO will provide senior and subordinate commanders with the automation to receive, fuse, display, and disseminate select information from other component systems of MTACCS. Additional TCO attributes include: automated message management, mission planning, development and dissemination of operations orders and overlays, display of current friendly/enemy situation, display of fire support and maneuver control measures, and interfaces with local and wide area networks. FY96 funding is budgeted in the TCO line (BLI 461300). FY98-01 funding is budgeted in the Command Post Systems line. Advanced Field Artillery Tactical Data System (AFATDS) will provide digital fire support Command Control (C2) automation to Marine Air Ground Task Force (MAGTF) Fire Support Coordination Centers, Fire Direction Centers, and Supporting Arms Coordination Centers (Afloat). This line procures the hardware only. A hardware suite will consist of ruggedized general purpose computers, tactical modems, printers, displays, electrical power distribution units and integration rack/shelter kits. Initial fielding will include Marine Corps Fire Support Command and Control System, similar to the Army's Initial Fire Support Automation System, to provide an initial capability. The system will work with existing and planned tactical communication equipment. The hardware suite is changing in FY-96 in order to support the system migration to the DoD Common Operating Environment. ACQUISITION OBJECTIVE (A/O): 782 FY 1994: 271 = 35% of AO FY 1995: 408 = 52% of AO FY 1996: 618 = 79% of AO FY 1997-01: 782 = 100% of AO APPROVAL FOR SERVICE USE: FY-96 = CODE A FY-96 UNIT COST: \$55,419 FY-99 PROCUREMENT IN BLI 463100.

This procurement covers the microcomputer needs of the TCO program. This program provides digital mapping, messaging, overlay, and related capabilities to Marine commanders and their staffs at the battalion level and above. TCO enables Marines to share a common picture of the battlefield throughout the Marine Air Ground Task Force (MAGTF), thereby allowing commanders to make more timely and effective decisions. This system uses the common core software of the Joint Maritime Command Information System and will allow Marines to share their views of the battlespace not only with each other, but their Navy and Coast Guard counterparts as well. THIS ITEM IS CODE A TCO ACQUISITION OBJECTIVE (A/O): 880 FY95&PRIOR 98 = 11% OF A/O FY96: 334 = 38% OF A/O FY97: 564 = 64% OF A/O FY98: 780 = 89% OF A/O FY99-01: 880 = 100% OF A/O The TCO line begins in FY 96, the MTACCS line ends in FY 95, Command Post Systems line starts in FY 97. The AN/TPQ-36 FIREFINDER RADAR is used to locate hostile indirect fire against friendly forces. After location, coordinates are passed to friendly fire support assets to engage the enemy. The AN/TPQ-36 was first fielding in the Marine Corps in 1985. The block upgrades will result in significant reduction in size from five ton trucks to HMMWV configuration to improve mobility and transportability, and incorporation of new/more capable electronics components. The results of the modification program will be a highly mobile and greatly enhanced locating capability.

INDIVIDUAL MODIFICATION

MODIFICATION TITLE: AN/TPQ-36 (V) 7 UPGRADE (DOWNSIZE TO HMMWV)

MODELS OF SYSTEMS AFFECTED: AN/TPQ-36 FIREFINDER RADAR UPGRADES

DESCRIPTION/JUSTIFICATION: This upgrade provides for a downsizing of the current system from five ton trucks to HMMWV's to improve mobility and transportability. The upgrade includes the incorporation of the Modular Azimuth Positioning System (MAPS) which is a self-survey capability that greatly enhances the speed with which the system can be emplaced and reduces the survey support requirements to employ the system.

INDIVIDUAL MODIFICATION

MODIFICATION TITLE: AN/TPQ-36 (V) 8 UPGRADE (ELECTRONICS ENHANCEMENT)

MODELS OF SYSTEMS AFFECTED: AN/TPQ-36 FIREFINDER RADAR UPGRADES

DESCRIPTION/JUSTIFICATION: This upgrade provides a new RADAR processor and improved software to enhance the RADARS capabilities by increasing its range and location accuracy. These improvements overcome deficiencies identified during Operation DESERT STORM.

METEOROLOGICAL SYS AN/TMO-41, MET MEASURING SET (MMS)
RCN: 142556

QUANTITY	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001
	21	0	0	0	0	0	0
COST (IN MILLIONS)	\$ 9.4	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0

The meteorological measuring set (MMS) is a mobile, fully automated, non-radiating artillery meteorological (MET) system that measures atmospheric parameters of temperature, pressure, relative humidity and wind (speed and direction) from the earth's surface to an altitude of 30km. The data is provided to artillery fire direction centers to correct MET effects upon weapons system ballistic trajectories. The system consists of a processor, UHF antenna, a NAVAID antenna, a lightweight radio direction finding (RDF) antenna, a printer, and a power supply unit.

The MMS is designed to provide up to 18 soundings in any 24 hour period. It can be emplaced in 20 min (RDF); 15 min (NAVAID) and displaced in 15 min (RDF); 10 min (NAVAID). A total of 47 systems are being procured by the Army (7 version A; 40 version B) with First Unit Equipped with a version A MMS in March 92.

MANPACK SECONDARY IMAGERY DISSEMINATION SYSTEM

RCN: 140726

		FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001
QUANTITY		0	10	45	0	0	0	0
COST (IN MILLIONS)	\$	0.0 \$	2.1 \$	7.1 \$	0.0 \$	0.0 \$	0.0 \$	0.0 \$

Manpack Secondary Imagery Dissemination System provides the MAGTF commander with the capability to collect, store, display, and transmit high priority reconnaissance imagery over organic MAGTF communications assets in near-real-time. This will give the MAGTF commander access to time sensitive reconnaissance imagery. The system will be fielded to ground reconnaissance units within the MAGTF.

AO is 86 systems. A system consists of a base station and 3 out stations. Previous submissions accounted for individual components. Consequently, the unit cost of the system is significantly larger than the unit cost of the individual components.

Approval for service use: FY 95 = CODE B

FY 1996: 13 = 15% OF AO

FY 1997: 58 = 67% OF AO

NARRATIVE: The Intelligence Analysis System (IAS) will provide finished intelligence data to the commander in near-real-time, allowing him to act on intelligence, rather than react to events. The IAS consists of three subsystems: IAS (Suites), IAS (MEF) and IAS (Workstations). The IAS will utilize the Integrated Database (IDB) developed by DIA, and will utilize commercial and government developed software. MEF IAS consists of two HMMWV-mounted shelters per system. Each shelter contains a ruggedized file server, communications server, communications interfaces (modems, crypto) and peripherals (CD ROM, tape drives, hard disk drives, plotter, dot matrix and laser printers). The servers will be connected to six workstations on a Local Area Network (LAN). MEF IAS AO = 9 FY 93 & PRIOR: 2 22% OF AO FY 1997: 5 56% OF AO FY 1998: 9 100% OF AO Approval for Service Use: FY 95 = Code B

Remote sensor equipment detects the presence of physical disturbances caused by movements within a pre-designated area of surveillance. Coded signals are transmitted or stored/relayed to a monitoring station. The monitoring station provides for analysis of the data to determine type, location, direction of travel, speed, number, and size of detected activity. This information is then forwarded to an intelligence center. The remote sensor equipment includes: hand and air emplaced remote sensors, transmitters, relays, data storage devices, and read-out equipment. This is a roll-up line of various end-items of a set that provides fully-funded units for a sustained capability to the Sensor Control Management Platoon (SCAMP) of the Marine Expeditionary Force (MEF).

REMARKS: *Thermal Imagers are part of a LRIP buy. The FY 1996 procurement completes 22 TRSS systems (less Imagers). Naval Air Weapons Center - Aircraft Division, Indianapolis, IN (NAWC-ADI) is the procurement agent for the Marine Corps. For most components, NAWC-ADI orders subassemblies through various C/FFP contracts with industry, then assembles/integrates the end item in house.

Team Portable Communications Intelligence (COMINT) System (TPCS) is a Semi-automated, man/team transportable signals intelligence system providing intercept, radio direction finding, analysis, reporting and collection management support to the Marine Air Ground Task Force Commander. TPCS is comprised of non-developmental items (NDI) and considered extremely low risk. The first three systems are currently being produced. The AN/PSQ-9 TPCS will replace the AN/PRD-10 and the AN/GRR-8 as well as add new capability. Acquisition Objective (AO): 11 FY 1994: 3 Systems = 27% OF AO FY 1995: 3 Systems = 27% OF AO FY 1996: 8 Systems = 72% OF AO APPROVAL FOR SERVICE USE FY 95 = Code A

TROJAN SPECIAL PURPOSE INTEGRATED REMOTE INTELLIGENCE TERMINAL (SPIRIT) II will provide the MAGTF commander with a mobile, high-throughput, secure, dedicated intelligence satellite communications system which will provide direct, near-real-time connectivity to national agencies via the US Army's TROJAN Switching Center at Fort Belvoir, VA. TROJAN SPIRIT II will utilize commercial satellites to exchange bulk data, voice and imagery products between deployed Marine forces and theater or CONUS-based agencies.

TROJAN SPIRIT II consists of two HMMWV-mounted shelters and a single, towed antenna trailer. The Primary HMMWV Shelter (PHS) contains voice and data processing equipment, modulation equipment, RF electronics and an under-the-hood power generator. The Spare Equipment and Maintenance (SEM) vehicle shall provide maintenance facility workspace and a storage area for communications spare capabilities in support of the TROJAN SPIRIT II. The Power Generation Equipment and Mobile Antenna Platform (MAP) will reside in a single High Mobility Trailer, and will be towed by either the PHS or SEM.

The CTT comes in two variations, the HYBRID Three-Channel (CTT/H3), AN/USC-55 and the HYBRID Receive Only Three-Channel. These Tactical Intelligence Disseminations Systems receive, decrypt, and process real-time intelligence reports received simultaneously from multiple sources. This will provide near real-time intelligence data to the command, control, and (C2I) elements of the Marine Air Ground Task Force (MAGTF). In addition, the CTT/H3 provides full duplex data and handles communications with an anti-jam capability between the guardrail intelligence processing facility and tactical units. The CTT/H3 systems are being procured by the U.S. Army (PM JSTARS) via a contract with E-Systems. The CTT provides the Marine Corps with a multiservice intelligence dissemination interoperability into the next century meeting criteria by the multi-service intelligence dissemination architecture panel. ACQUISITION OBJECTIVE (AO): 53 FY 97: 26 = 49% OF A/O

P-1 ITEM NOMENCLATURE: JOINT SURVEILLANCE TARGET ATTACK RADAR SYSTEM (JSTARS)

PROCUREMENT, MARINE CORPS/BUDGET ACTIVITY

4

RCN: 148239

QUANTITY	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001
	0	0	0	0	0	0	0
COST (IN MILLIONS)	\$ 0.0	\$ 16.4	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0

The Joint Surveillance Target Attack Radar System (JSTARS) provides near real time targeting data in the form of moving target indicator and synthetic aperture radar (SAR) imagery. JSTARS Common Ground Station (CGS) provides JSTARS imagery reception, processing and connectivity to other CGSs, UAV systems, TACFIRE, AFATDS, Army all Source Analysis System (ASAS) and Trojan Spirit, and ensures MAGTF connectivity and commonality with USA and USAF.

Total AO is to be determined. At a minimum, two JSTARS CGSs will be procured and fielded in accordance with Congress' direction (see report 104-261).

MODIFICATION TITLE:

Intelligence Analysis System (IAS)

MODELS OF SYSTEMS AFFECTED:

IAS MODIFICATION

DESCRIPTION/JUSTIFICATION:

The IAS is the fusion center for the Marine Air-Ground Intelligence System (MACIS). The IAS fuses intelligence information from sensors, signals and communications intelligence, and human sources, and provides this intelligence to the commander and his staff. The IAS is required to interface with a number of tactical and national systems, and must be upgraded in order to maintain these capabilities and to continue functioning as new systems are developed.

INDIVIDUAL MODIFICATION

MODIFICATION TITLE: AN/MLQ 36(A) (MEWSS) PIP

MODELS OF SYSTEMS AFFECTED: ALL MOBILE ELECTRONIC WARFARE SUPPORT SYSTEM (AN/MLQ 36)

DESCRIPTION/JUSTIFICATION: MEWSS PIP is an electronic warfare suite of equipment configured in the highly mobile, survivable Light Armored Vehicle (LAV). This program develops a material change for the current, outdated Electronic Warfare (EW) suite. Threat tactical communications have advanced to complex, modulations requiring computer-intensive, open architecture solutions. MEWSS fulfills the requirement to provide responsive EW support to maneuver commanders, enhanced the ability to defeat the enemy by isolating and suppressing opposing fire control and command and control nets at a critical point of time in the battle. MEWSS PIP will provide detection, location, demodulation of advanced tactical communications. MEWSS PIP incorporates Army Intelligence and Electronic Warfare Common Sensor (IEWCS) electronics.

This is a composite line which consists of several general purpose mechanical test equipment items and tool sets & kits.								
Funds are used to buy mechanical test equipment and tools to support the following principal end items: Automotive (e.g. Trucks & HMMWV's); Combat Engineers (e.g. Bulldozers); Ordnance (e.g. Tanks). The test equipment and tools are used by mechanics at all levels of maintenance (i.e. from operator to component rebuild) to restore deadlined items to operational condition. Items procured, range from individual mechanics tool kits to engine and transmission dynamometers.								
The funding sustains modernization and standardization plans, as well as new requirements identified in support of new principal end items. In some cases, new requirements will supersede planned procurements. The items bought with these funds are non-developmental, commercial-off-the-shelf items (consequently extremely low risk).								
All items are Code A.

AN/PVS-7B Night Vision Goggle. The latest Night Vision Goggle, significantly enhances operational capability over previous models. This is a 3rd Generation image intensifying system capable of detecting a man-size target at 250M in starlight and 350M in moonlight. It is 6oz lighter than the current AN/PVS-5 NVG and is three times as sensitive. The system incorporates an automatic high light shut off for protection from bright light and a low battery LED indicator in the display. This system is for ground use only. Acquisition Objective (AO) = 42,604 FY93 & Prior = 24835* = 63% AO FY94 = 28556 = 67% AO FY95 = 39724 = 93% AO * Includes NGREA Qty of 2721 Approval for Service Use = FY 94 = Code "A"

The Marine Corps ADP program is an aggregation of inter-related data processing disciplines. The overall objective is to achieve modernization and increase processing capacity, both of which are required to allow continued operation of existing automated information systems (AIS) and the implementation of new corporate information management (CIM) automated information systems to support all functional areas. The Marine Corps has a continuing need to upgrade its computer equipment and system software by replacement or augmentation in order to keep pace with user demands and changing technology.

1. REGIONAL COMPUTING CAPACITY PROGRAM. The Marine Corps regional ADP support is comprised of several components including small system computer equipment, proprietary system software products, the Marine Corps Local and Wide Area Exchange (LWX) network, and mainframe connectivity. This support environment was revamped. For the foreseeable future, legacy system ADP support will be provided to the Fleet Marine Forces and supporting establishments by the Defense Mega-Center (DMC) in St. Louis, Missouri, while future Marine Corps enterprise unique systems will be designed, developed, and fielded under a different support structure. This support structure emphasizes distributed computing capabilities in a client-server architecture. In addition, there is an ongoing requirement to maintain the Marine Corps enterprise network infrastructure (servers, routers, hubs, printers, workstations, network and workstation operating system software and end-user applications, network management tools, and security systems) to support DOD sponsored and Marine Corps unique client-server applications.

2. SYSTEM SOFTWARE		RCN: 144088						
In addition to the application software for pay, supply, manpower, and financial management, computer systems require system software. System software is used to execute and enhance the management of hardware and/or application software and is absolutely essential for data processing operations. Marine Corps Common Computer Resources (CCR) coordinates and manages all system software products within the Marine Corps to include the Banyan Network Operating System which supports the Marine Corps wide area network. These proprietary products are used in conjunction with operating system software to make the system run more efficiently. The products are used to fine tune the system and support a variety of management functions. This software is generally proprietary, requiring annual licensing fees and maintenance support contracts.

3. WORLD WIDE MILITARY COMMAND AND CONTROL SYSTEM (WWMCCS)/GLOBAL COMMAND AND CONTROL SYSTEM (GCCS) Consists of command and control subsystems which enable the National Command Authorities (NCA), the Joint Chiefs of Staff, and commanders at appropriate levels to direct and control the operation of U.S. military forces. These funds provide for the WWMCCS/GCCS computer (microcomputer workstation, terminals, printers) and communications support equipment (modems, multiplexors) to support Marine Corps participation in the WWMCCS/GCCS as directed by the Secretary of the Navy and Chairman, Joint Chiefs of Staff. 5. MANPOWER AND RESERVE AFFAIRS ADP This centrally managed program will replace outdated ADP equipment. This program will buy a computer to run manpower math models in-house. Currently manpower pays teleprocessing fees to a vendor to operate these models. This program will also purchase compact disk read-only memory players that will transform documents from paper to electronic formats by providing read capability to the field. FY 97-01 PROCUREMENT IN BLI 463500.

6. CONFLICT S

Provides the Marine Corps the ability to continue expanding the role of simulating and modeling decision making tools. In order for the Marine Corps to build and maintain a solid presence in the joint wargaming community and continue to provide realistic scenarios and tools, it is imperative to advance with technology. The purchase of hardware and software necessary for these models will allow the Marine Corps to keep pace with other government agencies and to interact in realistic wargaming scenarios.

7. ELECTRONIC DATA INTERCHANGE (EDI) Implementation of EDI in DoD calls for an aggressive program to implement EDI in the next five years. EDI is the automated exchange of electronic forms, instead of paper. Through EDI, the Marine Corps' basic business systems can be modernized, procedural bottlenecks corrected, and overhead costs reduced. This initiative would cover the costs of the computer and software necessary to transmit information electronically. FY 97-01 PROCUREMENT IN BLI 463500.

8. OPTICAL DIGITAL IMAGING (ODI-RMS) Provides the Marine Corps the ability to process, store and retrieve Official Military Personnel Files for all active and reserve Marines in an Optical Digital Imaging (ODI) format. The use of this advanced technology will reduce the current cost of maintaining these records, virtually eliminate their loss, and provide multiple users simultaneous access. An initial investment of \$5M in PMC (in addition to and increase of \$3M over the current O&MMC level of funding) in this ODI technology will save approximately \$46M in operating expenses over a 10-year life cycle. 9. DEFENSE MESSAGE SYSTEM (DMS)

DMS consists of all the hardware, software, procedures, standards, facilities, and personnel used to exchange messages electronically between organizations and individuals in the DoD. The vision of DMS is to provide secure, accountable and reliable message service. Using the Defense Information System Network (DISN) Infrastructure/Global Grid for worldwide connectivity, DMS provides value-added X.400 messaging and X.500 directory services for DoD organizations and individuals. DMS will replace the current AUTODIN system and implemented through the use of Marine Corps acquired computer hardware and local area networks/wide area networks (LANS/WANS) to distribute both organizational and individual electronic messages.

10. JOINT RECRUITING INFORMATION SUPPORT SYSTEMS (JRISS) JRISS will automate the entire recruiting business process from high level mission planning at the headquarters to prospecting at the canvassing recruiter level. Benefits of the system include one time data entry, forms generation, automated activity reporting, Delayed Entry Program (DEP) tracking, enlistment criteria expert system, electronic distribution of leads, and electronic interface with MEPS, other services and relevant outside agencies. JRISS will be a joint system with all services sharing standardized data definitions in a distributed database. JRISS service specific front-end user interfaces will support the unique recruiting practices of each armed service. FY 97-01 PROCUREMENT IN BLI 463500.

This procurement covers the microcomputer needs of the TCO program. This program provides digital mapping, messaging, overlay, and related capabilities to Marine commanders and their staffs at the battalion level and above. TCO enables Marines to share a common picture of the battlefield throughout the Marine Air Ground Task Force (MAGTF), thereby allowing commanders to make more timely and effective decisions. This system uses the common core software of the Joint Maritime Command Information System and will allow Marines to share their views of the battlespace not only with each other, but their Navy and Coast Guard counterparts as well.

THIS ITEM IS CODE A
TCO ACQUISITION OBJECTIVE (A/O): 880

FY95&PRIOR: 98 = 11% OF A/O (See BLI 461000)
FY96: 334 = 38% OF A/O
FY97: 564 = 64% OF A/O
FY98: 750 = 85% OF A/O
FY99-01: 874 = 99% OF A/O

The TCO line ends in FY96 and then falls under the Command Post Systems line in FY97.

1. Global Command and Control System (GCCS). Consists of command and control subsystems which enable the National Command Authorities (NCA), the Joint Staff, and commanders at appropriate levels to direct and control the operations of U.S. military forces. These funds provide for the GCCS hardware (servers, workstations, printers) and communications support equipment (hubs, routers, net encryption devices, modems, and cabling) to support Marine Corps participation in the GCCS as directed by the Secretary of the Navy and Chairman, Joint Staff.

THIS IS A ROLL-UP LINE FOR THE JOINT TACTICAL INFORMATION DISTRIBUTION SYSTEM (JTIDS). THE JTIDS TERMINAL PROVIDES A HIGH-CAPACITY, JAM RESISTANT, SECURE, DIGITAL COMMUNICATIONS CAPABILITY FOR THE TACTICAL COMMAND AND CONTROL (C2) PLATFORMS. THIS PROJECT PROCURES JTIDS CLASS 2/2H TERMINALS FOR THE FOLLOWING USMC HOST PLATFORMS: TACTICAL AIR OPERATIONS MODULE (TAOM), ADVANCED TACTICAL AIR COMMAND CENTRAL (ATAACC), AND AIR DEFENSE COMMUNICATIONS PLATFORM (ADCP). THIS PROJECT ALSO PROCURES HARDWARE (INCLUDING GOVERNMENT FURNISHED PROPERTY (GFP)) REQUIRED TO INTEGRATE THE JTIDS CAPABILITY INTO THE TAOM AND THE ATACC. ACQUISITION OBJECTIVE (A/O): CLASS 2 TERMINALS = 25 FY 95: 9 = 36% OF AO FY 96: 19 = 76% OF AO (INCLUDES 2 PRODUCTION UPGRADE KITS) FY 97: 24 = 96% OF AO (INCLUDES 3 PRODUCTION UPGRADE KITS) FY 98-01: 25 = 100% OF AO (INCLUDES 1 PRODUCTION UPGRADE KIT) FY 95-96 PROCUREMENT IN BLI 421300.

The Data Automated Communications Terminal (DACT) program provides digital mapping, messaging, overlay, and related capabilities to Marine commanders and their staffs at all levels of command. They enable Marines to share a common picture of the battlefield throughout the task force, thereby allowing commanders to make more timely and effective decisions. This system uses the common core software of the Joint Maritime Command Information System and will allow Marines to share their views of the battlespace not only with each other, but their Navy and Coast Guard counterparts as well.

The AN/PSC-5 is a lightweight, manportable UHF satellite communications (SATCOM) terminal that will provide long-range single channel communications. The AN/PSC-5 incorporates the Demand Assigned Multiple Access (DAMA) protocol mandated by the Joint Staff; non-DAMA will not be allowed to communicate by satellite after 30 Sep 96. The AN/PSC-5 provides embedded Communications Security (COMSEC) and encrypted voice and data capabilities, ensuring multi-service interoperability with most existing and planned communications systems. In addition to voice and data, the AN/PSC-5 interfaces facsimile, teletype, NET radio Interface (NRI), and SINGGARS. ACQUISITION OBJECTIVE: 645 FY 97: 645 = 100% OF AO

The SINGGARS radio will replace all AN/PRC-77 manpack, Bancroft, and AN/VRC-12 family of vehicular radios currently in the Marine Corps inventory.										
The SINGGARS radio will be used as the primary means of communication for command and control as well as fire support on the battlefield. SINGGARS will be highly reliable with over 1250 hours mean time between failure (MTBF) and built-in test equipment will ease the workload. Frequency hopping capability offers low probability of intercept, while integrated COMSEC deletes the requirement for external communications security equipment.										
The SINGGARS radio is Code A. Acquisition Objective (AO) = 25390										
Prior Years 21519 = 85% of AO										
FY 97-01: 25390 = 100%

The Unit Level Circuit Switch (ULCS) System is a family of Tri-Service Tactical Communications digital voice and data switching equipment consisting of AN/TTC-42 (280 Line), and various digital telephones and multiplexers that provide an automatic secure telephone capability to the field. The ULCS system replaced the analog switching and terminal equipment including AN/TTC-38 and SB-3082.

The ULCS Product Improvement Program (ULCS PIP) will begin in FY-97. The ULCS PIP adds a variety of interoperability enhancements that improve the general usefulness and flexibility when employed in joint networks. These improvements include a line termination interface with the secure terminal unit (STU-III), the addition of a highly stable atomic timing standard to improve joint interoperability, increasing the capacity of the inter-nodal buffer to correct satellite delay problem, and a commercial office interface for the SB-3865.

INDIVIDUAL MODIFICATION

MODIFICATION TITLE:

Unit Level Circuit Switch Product Improvement Program (ULCS PIP)

MODELS OF SYSTEMS AFFECTED:

AN/TTC-42 Automatic Central Office Telephone

DESCRIPTION/JUSTIFICATION:

The ULCS PIP will add a range of capabilities to the ULCS family of circuit switches that provide improved joint/strategic interoperability and greater network flexibility. Included are a STU-III telephone interface, an atomic timing standard, and an increased number of commercial interfaces. The modification kits will consist of circuit card assemblies and a new revision of software.

DEVELOPMENTAL STATUS/

MAJOR DEVELOPMENT MILESTONES:

A contractor will be competitively selected to produce the modification components based on Government furnished prototypes and drawings.

FINANCIAL PLAN: (\$ in Millions)

The Defense Message System (DMS) consists of all hardware, software, procedures, and standards necessary to exchange messages electronically between organizations and individuals in the DoD. The vision of DMS is to provide secure, accountable and reliable messaging service. Using the Defense Information System Network (DISN) Infrastructure/Global Grid for worldwide connectivity, DMS provides value-added X.400 Messaging and X.500 Directory services for DoD organizations and individuals. DMS will be interoperable across multiple vendor platforms and centrally managed by DISA. DMS will replace the current AUTODIN system and will be implemented through the use of Marine Corps acquired computer hardware and software. Local area networks and wide area networks (LANS/WANS) will distribute both organizational and individual electronic messages.

The Marine Corps ADP program is an aggregation of inter-related data processing disciplines. The overall objective is to achieve modernization and increase processing capacity, both of which are required to allow continued operation of existing automated information systems (AIS) and the implementation of new corporate information management (CIM) automated information systems to support all functional areas. The Marine Corps has a continuing need to upgrade its computer equipment and system software by replacement or augmentation in order to keep pace with user demands and changing technology.

1. NETWORKING INFRASTRUCTURE

The Marine Corps ADP support is comprised of several components including small system computer equipment, proprietary system software products, the Marine Corps-wide Standard Network Operating System, and mainframe connectivity. This support environment was revamped. For the foreseeable future, legacy system ADP support will be provided to the Fleet Marine Forces and supporting establishments by the Defense Mega-Center (DMC) in St. Louis, Missouri. This support structure emphasizes distributed computing capabilities in a client-server architecture. In addition, there is an ongoing requirement to maintain the Marine Corps enterprise network infrastructure to support DOD sponsored and Marine Corps unique client-server applications. Types of equipment purchased include routers for NIPRNET, SIPRNET, and DOD migration systems, high level security software (fire walls), network management software tools, file servers, and enterprise backup-restore software. This line was formerly identified as two separate lines (Regional Computing and System Software); the lines were consolidated to better accommodate emerging technology.

3. MANPOWER AND RESERVE AFFAIRS ADP This centrally managed program will replace outdaed ADP equipment. This program will buy a computer to run manpower math models in-house. Currently manpower pays teleprocessing fees to a vendor to operate these models. This program will also purchase compact disk read-only memory players that will transform documents from paper to electronic formats by providing read capability to the field FY 94-96 PROCUREMENT IN BLI 494200.

4. ELECTRONIC DATA INTERCHANGE (EDI) "Implementation of EDI in DoD" calls for an aggressive program to implement EDI in the next five years. EDI is the automated exchange of electronic forms, instead of paper. Through EDI, the Marine Corps' basic business systems can be modernized, procedural bottlenecks corrected, and overhead costs reduced. This initiative would cover the costs of the computer and software necessary to transmit information electronically. FY 94-96 PROCUREMENT IN BLI 494200.

5. OPTICAL DIGITAL IMAGING (ODI-RMS) Provides the Marine Corps the ability to process, store, and retrieve official military personnel files for all active and reserve Marines in an Optical Digital Imaging (ODI) format. The use of this advanced technology will reduce the current cost of maintaining these records, virtually eliminate their loss, and provide multiple users simultaneous access. An initial investment of \$5M in PMC (in addition to an increase of \$3M over the current O&MMC level of funding) in this ODI technology will save approximately \$46M in operating expenses over a 10-year life cycle. FY 94-96 PROCUREMENT IN BLI 494200.

6. JOINT RECRUITING INFORMATION SUPPORT SYSTEMS (JRISS) JRISS will automate all business processes associated with recruiting from high level mission planning at the headquarters to prospecting at the canvassing recruiter level. Some of the benefits include one-time data entry, forms generation, automated activity reporting, Delayed Entry Program (DEP) tracking, enlistment criteria expert system, electronic distribution of leads, and electronic interface with MEPS, other services, and relevant outside agencies. JRISS will be a joint system with all services sharing standardized data definitions in a distributed database. JRISS service specific front-end user interfaces will support the unique recruiting practices of each armed service. FY 94-96 PROCUREMENT IN BLI 494200.

Modifications programmed and budgeted under this line are for the purpose of correcting equipment deficiencies noted after new items are fielded or to increase operational capabilities of non-telecommunications end items previously fielded. This funding profile includes radar modifications which improve mean time between failure rates and enhance performance characteristics. The Direct Air Support Central (DASC) Product Improvement Program (PIP) is a non-developmental effort which will incorporate selected automation and existing hardware from the AN/TSQ-155(V), Improved Direct Air Support Central (IDASC), and the OE-334 Antenna Coupler Group into lightweight, highly mobile shelters. Improved capabilities include automated interfaces to the Digital Communications Terminal (DCT), Advanced Tactical Air Command Central (ATACC), Position Location Reporting System (PLRS), Advanced Field Artillery Tactical Data System (AFATDS), and Tactical Combat Operations (TCO). The COMSEC Cable line is in support of various security systems being fielded including the KY-99 MINTERM, the Electronic Key Management System, the Data Transfer Device, and the STU-III. COMSEC cables will interface with various communications devices to include radios, switches, and computers and will provide secure transmissions at all times.

INDIVIDUAL MODIFICATION

MODIFICATION TITLE:

TOW SIGHT MODIFICATIONS FOR THE UAS-12 SERIES OF SIGHTS

MODELS OF SYSTEMS AFFECTED:

AN/UAS-12A, AN/UAS-12C, AND AN/UAS-12D NIGHT VISION EQUIPMENT SETS

DESCRIPTION/JUSTIFICATION:

THIS MODIFICATION PROGRAM BRINGS EXISTING NIGHT SIGHTS INTO A SINGLE CONFIGURATION WHICH IS COMPATIBLE WITH NEW PRODUCTION SIGHTS. THE PROGRAM CONSISTS OF TWO MOD KITS: THE OPERATOR SELECTABLE FILTER (OSF) KIT AND THE OPTICAL IMPROVEMENT/OPERATOR SELECTABLE FILTER (OI/OSF) KIT. THE OSF KIT PROVIDES COUNTER-MEASURE PROTECTION BY MEANS OF A FILTER WHEEL AND MULTIPLE FILTERS. THE OI/OSF KIT UPGRADES THE ORIGINAL SIGHTS INTO THE MOST CURRENT CONFIGURATION WITH IMPROVED MIRRORS, PRISMS, LENSES, AND DETECTORS, AS WELL AS THE OSF MOD.

COST (IN MILLIONS)	\$ 0.0	\$ 0.0	\$ 2.6	\$ 2.8	\$ 2.6	\$ 3.1	\$ 3.0

This is a roll-up line which contains many different items of equipment for which the annual procurement is less than \$2 million each. These items are required to support the telecommunications mission area and to support the General Purpose Electronic Test Equipment (GPETE), Special Purpose Test Equipment (SPTTE), General Purpose Mechanical Test Equipment (GPMTE), and infantry weapons gauges used to maintain Marine Corps weapons systems.

The funds included in this budget line procure the following items:

- Power supply equipment which provides direct current (DC) voltage from an alternating voltage (AC) power source. This enables communication equipment to operate without using batteries. It also provides DC voltage to aid in the maintenance of electronic equipment.
- Tools, sets, kits, and chests (TSK&C) include general purpose tools and support items used for the installation, operation, and maintenance of communication equipment.
- Electronic Test, Measurement, and Diagnostic Equipment (TMDE) Repair Facility.
- Test, Calibration, and Maintenance support.

All of these items are Code A

1. The AN/TYQ-23 (V)1, Tactical Air Operations Module, is an electronic tactical data system which, when supported with sensors, power sources, support equipment, and personnel, provides the US Marine Corps with the capabilities of integrated air defense, supplemental enroute traffic control management, and data link to external agencies for real time exchange of tactical air data. Four Tactical Air Operations Modules constitute one system. 2. This is a collection of efforts and an evolutionary acquisition strategy, encompassing ECPs and incorporation of COTS equipment into the existing TAOC platform. This initiative will upgrade the system to include Joint Tactical Data Links (TADIL-J), Sector Anti-Air Warfare Facility (SAAWF), operator console units, and the TPS-59 radar interface, representing four major elements. 3. These upgrades will open up the system architecture, provide an automated air tasking order capability, tactical missile defense, and a battle management facility. The open open architecture facilitates TADIL-J upgrade.

BUDGET ITEM JUSTIFICATION SHEET										DATE
APPROPRIATION/BUDGET ACTIVITY:		P-1 ITEM NOMENCLATURE:								
PROCUREMENT, MARINE CORPS/BUDGET ACTIVITY		Marine Enhancement Program (MEP)								
		RCN: 142596								
QUANTITY		FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001		
		0	0	0	0	0	0	0		
COST (IN MILLIONS)		\$ 0.0	\$ 3.3	\$ 7.7	\$ 3.3	\$ 11.9	\$ 11.9	\$ 4.9		
The Marine Enhancement Program is a Congressionally initiated program started in FY90 which provides funding for low visibility, low cost items. It focuses on equipment which will benefit the individual Marine by reducing the load, increasing survivability, enhancing safety and improving combat effectiveness. The emphasis of this program is on non-developmental items (NDI) and commercially available items which can be quickly evaluated and fielded. This program is coordinated with the Army's Soldier Enhancement Program and the Special Operations Command. Medium Machine Gun Tripod Lightweight (MMGT). A lightweight replacement for the M123 steel tripod and traversing and elevation (T&E) that have been in use since the days of the .30 caliber machine gun. Designed to lighten the load of the machine gun team by reducing the tripod and T&E mechanism by more than half. This item is "Code B" Acquisition Objective (AO): 5200 FY97: 3692 = 71% AO FY98-01: 5200 = 100% AO Heavy Machine Gun Lightweight Tripod (HMGT). A lightweight tripod to replace the M3 HMG tripod currently used by the M2 50 caliber Heavy Machine Gun (HMG) and the MK19 Grenade Machine Gun (GMG). Designed to lighten the load for the individual Marine by decreasing the weight at least 28lbs. Includes improving the machine gun Traverse & Elevation (T&E) mechanism. Will decrease gunner/crew response time and add service life by 20000 to 25000 rounds. The lighter tripod also enhances employment of the M2 and the MK19. This item is "Code B" Acquisition Objective (AO): 6088 for entire Marine Corps; AO for MEP (infantry only) is 1406 FY97: 704 = 50% AO FY98-01: 1406 = 100% AO MK93 Dual Mount. Improved mounting system for both the M2 50 caliber Heavy Machine Gun (HMG) and the MK19 Grenade Machine Gun (GMG). Will enhance the capabilities of the HMG platoon by giving them greater flexibility, accuracy, and lethality on the battlefield. Designed to attenuate recoil, improve accuracy, decrease gunner/crew response time, reduce logistical burden, and provide ammunition savings. Replaces the MK 64 cradle currently used to mount the M2 HMG and the MK 19 GMG. This item is "Code A" Acquisition Objective (AO): 6088 for entire Marine Corps; AO for MEP (infantry only) is 1406 FY96: 1406 = 100% AO

		RCN: 142596
Designated Marksman Rifle (DMR). Precision, semiautomatic, 7.62mm NATO weapon system (rifle, ammunition, sight mount, and optical device), that will complement the capabilities of the M40A1 Sniper Rifle (same caliber) better than the M16A2. Designed to extend the range capabilities, add flexibility, and enhance survivability of Designated Marksmen of the Fleet Anti-terrorist Security Teams (FAST) of the Security Battalion, military police Special Response Teams (SRT), and the second sniper of the Marine Corps two man Scout Sniper Team. This item is "Code B" Acquisition Objective (AO): 588 FY97: 197 = 34% AO FY98-01: 588 = 100% AO Joint Service Combat Shotgun. 12 gauge, semiautomatic, compact, lightweight weapon. It will be configured with low light level rifle-type sights and a surface which will mount current and developmental day and night sighting scopes. Will provide a common weapon for all the Services that will enhance the individual's combat effectiveness for use in the execution of special operations and security missions; substantial improvements in performance over existing shotguns in the area of supply, maintenance, and training support standardization; and increased levels of reliability and shooter confidence. This item is "Code B" Acquisition Objective (AO): 4815 FY97: 2557 = 53% AO FY98-01: 4815 = 100% AO

Modifications programmed and budgeted under this line are for the purpose of correcting equipment deficiencies noted after new items are fielded or to increase operational capabilities of non-telecommunications end items previously fielded. This funding profile includes radar modifications which improve mean time between failure rates and enhance performance characteristics. Also included are TOW Sight modifications required to bring various configurations of the UAS-12 series of sights into a single configuration and to provide countermeasure protection to gunners and equipment. The Direct Air Support Central (DASC) Product Improvement Program (PIP) is a non-developmental effort which will incorporate selected automation and existing hardware from the AN/TSQ-155(V), Improved Direct Air Support Central (IDASC), and the OE-334 Antenna Coupler Group into lightweight, highly mobile shelters. Improved capabilities include automated interfaces to the Digital Communications Terminal (DCT), Advanced Tactical Air Command Central (ATACC), Position Location Reporting System (PLRS), Advanced Field Artillery Tactical Data Systems (AFATDS), and Tactical Combat Operations (TCO).

INDIVIDUAL MODIFICATION

MODIFICATION TITLE: DIRECT AIR SUPPORT CENTRAL (DASC) PRODUCT IMPROVEMENT PROGRAM (PIP)

MODELS OF SYSTEMS AFFECTED: AN/TSQ-155V IMPROVED DASC (IDASC) OE-334 ANTENNA COUPLER GROUP

DESCRIPTION/JUSTIFICATION: Equipment procured under this effort will be modular and allow the system to be task organized and operated in the downsized AN/TSQ-155(V) and OE-334 Antenna Coupler Group shelters or external to the DASC operations shelters. Improved capabilities include automated interfaces to the DCT, ATACC, PLRS, AFATDS, and TCO.

DEVELOPMENTAL STATUS/
MAJOR DEVELOPMENT MILESTONES: Prototype hardware and software will undergo analysis and modification at Marine Corps Tactical Systems Support Activity and Naval Surface Warfare Center, Crane, Indiana.

THIS IS A ROLL UP LINE WHICH CONTAINS ITEMS FOR PROCUREMENT LESS THAN \$2 MILLION EACH. THE ITEMS INCLUDED IN THIS LINE ARE: ELECTRONIC TEST, MEASUREMENT, AND DIAGNOSTIC EQUIPMENT (TMDE) REPAIR FACILITY AND CALIBRATION AND TRANSFER STANDARDS. THESE ITEMS ARE REQUIRED FOR THE SUPPORT OF GENERAL PURPOSE ELECTRONIC TEST EQUIPMENT (GPETE), SPECIAL PURPOSE TEST EQUIPMENT (SPTE), GENERAL PURPOSE MECHANICAL TEST EQUIPMENT (GPMTE), AND INFANTRY WEAPONS GAUGES USED TO MAINTAIN MARINE CORPS WEAPONS SYSTEMS. GLOBAL POSITIONING INTERFACE UNITS (GPSIU) THAT ALLOW THE POSITION LOCATION REPORTING SYSTEM (PLRS) REFERENCE UNITS TO INTERFACE WITH A GPS RECEIVER, GREATLY INCREASING THE MOBILITY OF THE PLRS NETWORK. FY 97-01 PROCUREMENT FOR ELECTRONIC TEST, MEASUREMENT, AND DIAGNOSTIC EQUIPMENT REPAIR FACILITY AND TEST, CALIBRATION AND MAINTENANCE SUPPORT LINES ARE IN BLI 463900. FY 97-01 PROCUREMENT FOR AIR COMMUNICATIONS PLATFORM IS IN BLI 464000. FY 94/95/99 PROCUREMENT FOR POSITION LOCATION REPORTING SYSTEM (PLRS) IS IN BLI 458800.
