CAA Memorandum Reports are used for the convenience of the sponsors or the analysts to record substantive work done in quick reaction studies and major interactive technical support activities; to make available preliminary and tentative results of analyses or of working group and panel activities; or to make a record of conferences, meetings, or briefings, or of data developed in the course of an investigation. Memorandum Reports are reviewed to assure that they meet high standards of thoroughness, objectivity, and sound analytical methodology.

13. ABSTRACT (Maximum 200 words)				
This analysis provided wartime requirements for approximately 18 items of nuclear, biological, and chemical (NBC) defense equipment which were not included in the original WARREQ-03 equipment list of items that were considered in that study, conducted in late CY 95 and documented in the spring of 1996. The equipment list of line item numbers was updated, and the Equipment Loss Consolidator (ELCON) program portion of the CALAPER process was rerun to determine wartime attrition of those systems of interest.

**WARTIME REQUIREMENTS, FY 2003 - CHEMICAL DEFENSE EQUIPMENT
(WARREQ-03 CHEM)**

1. SPONSOR. Headquarters, Department of the Army (HQDA), Office of the Deputy Chief of Staff for Operations and Plans (ODCSOPS) (DAMO-FDB).

2. BACKGROUND. A recent review of the WARREQ-03 equipment requirements results, completed in early 1996, revealed that approximately two dozen items of nuclear, biological, and chemical (NBC) defense equipment were either missing from the study's master line item number (LIN) list, or were represented by older or obsolete LINs. An updated list of these items was provided by DAMO-FDB, the Chemical and NBC Defense Division, Program Requirements, Readiness, and Studies Team, for further analysis.

3. PURPOSE. To rerun the equipment attrition portion of the wartime requirements process (fiscal year (FY) 2003) in order to determine losses of appropriate NBC defense equipment for war reserve purposes.

4. OBJECTIVE. To determine projected wartime losses (PWL) for selected items of NBC defense equipment using the same scenario and campaign assumptions as were used for the recently completed WARREQ-03 studies.

5. ASSUMPTIONS. All force structure availability and other campaign assumptions used in support of the Support Force Requirements Analysis - 2003 (SRA-03) and WARREQ-03 studies will remain the same.

6. ESSENTIAL ELEMENTS OF ANALYSIS. What are the detailed war reserve requirements for the selected items of NBC defense equipment resulting from the simulated campaigns?

7. METHODOLOGY

a. Campaign results from the WARREQ-03 studies for both major regional contingencies (MRCs) (East and West) were used as the basis for running the Equipment Loss Consolidator (ELCON).

b. The master LIN list was revised to reflect the additions/deletions of NBC protective equipment as directed by DAMO-FDB point of contact (POC), LTC Leonard Izzo (703-614-8607) (see Appendix B).

8. ANALYSIS RESULTS. Projected wartime losses for the specified items of NBC protective equipment are shown in Appendix A.

9. QUICK REACTION ANALYSIS (QRA) PRODUCTS. PWL data pertaining to the selected NBC protective equipment were provided in tabular form to the DAMO-FDB POC on 21 November 1996. This memorandum report provides the documentation for that effort.

10. POINT OF CONTACT. Mr. Frank O. Gould, Operational Capability Assessments - Southwest Asia Division, US Army Concepts Analysis Agency (CAA), 8120 Woodmont Avenue, Bethesda, MD 20814-2797, (301) 295-6955.

11. ANALYSIS TEAM MEMBERS

Mr. Frank O. Gould, Team Leader
Mr. David E. Williams, CALAPER Analyst
Mr. Barry P. Groves, Data Management Analyst

Z93144*	Reconnaissance System, NBC: M93

POC: LTC Leonard Izzo, DAMO-FDB (703) 614-8607.

*These two LINs did not show up in the final requirements results in either theater. Either they were not in the current Total Army Equipment Deployment Plan (TAEDP), which provides time-phased densities of the equipment into the theater, or the densities were so few, i.e., less than six, and the percent attrition was so small, i.e., 0.001, that the attrition was insignificant. The third LIN, Z93144, did not show up in the MRC-W results, presumably for the same reason(s).

DAMO-FDB's Cross-reference LIN List*

		Z41179	Alarm Bio Agt Auto Integrated Detection System: M31
		Z42012	Mask, Chem/Bio, Aircrew: M45

*This list provides a cross-reference between old and replacement LINs. Since there is a mix of equipment issued to the field, some of these items will be existence at the same time, i.e., FY 2003. An example of this is the chemical agent alarm, M8A1 (A32355) and its replacement chemical agent alarm, M22 (Z04910).
