

DEPARTMENT OF THE AIR FORCE

FY 1998/1999 BUDGET ESTIMATES
SUBMITTED TO CONGRESS MARCH 1997

19970314 033

DISSEMINATION STATEMENT A
Approved for public release
Distribution Unlimited

Operation and Maintenance, Air Force
Volume III

DRIG QUALITY INSPECTED 1

19970314033

PLEASE CHECK THE APPROPRIATE BLOCK BELOW:

- ☐ _____ copies are being forwarded. Indicate whether Statement A, B, C, D, E, F, or X applies.
- ☒ DISTRIBUTION STATEMENT A: *Per Policy Section*
APPROVED FOR PUBLIC RELEASE: DISTRIBUTION IS UNLIMITED
- ☐ DISTRIBUTION STATEMENT B:
DISTRIBUTION AUTHORIZED TO U.S. GOVERNMENT AGENCIES ONLY; (Indicate Reason and Date). OTHER REQUESTS FOR THIS DOCUMENT SHALL BE REFERRED TO (Indicate Controlling DoD Office).
- ☐ DISTRIBUTION STATEMENT C:
DISTRIBUTION AUTHORIZED TO U.S. GOVERNMENT AGENCIES AND THEIR CONTRACTORS; (Indicate Reason and Date). OTHER REQUESTS FOR THIS DOCUMENT SHALL BE REFERRED TO (Indicate Controlling DoD Office).
- ☐ DISTRIBUTION STATEMENT D:
DISTRIBUTION AUTHORIZED TO DOD AND U.S. DOD CONTRACTORS ONLY; (Indicate Reason and Date). OTHER REQUESTS SHALL BE REFERRED TO (Indicate Controlling DoD Office).
- ☐ DISTRIBUTION STATEMENT E:
DISTRIBUTION AUTHORIZED TO DOD COMPONENTS ONLY; (Indicate Reason and Date). OTHER REQUESTS SHALL BE REFERRED TO (Indicate Controlling DoD Office).
- ☐ DISTRIBUTION STATEMENT F:
FURTHER DISSEMINATION ONLY AS DIRECTED BY (Indicate Controlling DoD Office and Date) or HIGHER DOD AUTHORITY.
- ☐ DISTRIBUTION STATEMENT X:
DISTRIBUTION AUTHORIZED TO U.S. GOVERNMENT AGENCIES AND PRIVATE INDIVIDUALS OR ENTERPRISES ELIGIBLE TO OBTAIN EXPORT-CONTROLLED TECHNICAL DATA IN ACCORDANCE WITH DOD DIRECTIVE 5230.25, WITHHOLDING OF UNCLASSIFIED TECHNICAL DATA FROM PUBLIC DISCLOSURE, 6 Nov 1984 (Indicate date of determination). CONTROLLING DOD OFFICE IS (Indicate Controlling DoD Office).
- ☐ This document was previously forwarded to DTIC on _____ (date) and the AD number is _____.
- ☐ In accordance with the provisions of DoD instructions, the document requested is not supplied because:
- ☐ It is TOP SECRET.
- ☐ It is excepted in accordance with DoD instructions pertaining to communications and electronic intelligence.
- ☐ It is a registered publication.
- ☐ It is a contract or grant proposal, or an order.
- ☐ It will be published at a later date. (Enter approximate date, if known.)
- ☐ Other. (Give Reason.)

Backlog of Maintenance and Repair (BMAR) of Real Property
(\$ in Thousands)

In FY 1996, the Air Force began using the Commanders' Facility Assessment (CFA) to determine the Backlog of Maintenance and Repair (BMAR) of Real Property Maintenance (RPM). CFA links facility condition to mission accomplishment and ensures resources for maintenance, repair, and minor construction are allocated to the most critical mission needs of field commanders. CFA requires field commanders to identify RPM requirements in two categories.

First is Preservation Maintenance Level (PML), or "must pay" requirements, which identifies resources necessary to accomplish day-to-day maintenance required to continue the existing life cycle of the real property facilities and infrastructure. PML includes the sustainment of the in-house work force, covering items such as civilian pay, supplies, training costs, and equipment rentals. PML also includes real property maintenance accomplished by contract for maintenance projects, painting or pavement maintenance. PML mainly consists of service call and recurring maintenance work.

Second, commanders identify and prioritize their remaining facility requirements to best accomplish their mission.

Normalized for inflation, current FY 1998 funding is at the lowest level in over 17 years and provides for only PML, causing BMAR to grow at an accelerated rate. Current funding will result in the deferral of mission critical facility projects, creating frequent mission interruptions and a severely degraded quality of life at Air Force installations. Repair costs will increase significantly if these facility projects are deferred or ignored for an extended length of time.

REAL PROPERTY MAINTENANCE ACTIVITIES
FY 1998/FY 1999 PRESIDENT'S BUDGET SUBMISSION
FY 1998 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	(<u>\$000</u>) <u>Cost</u>
AK	CLEAR AIR STATION	REPAIR ROOF, BASE SUPPLY	887
		Project replaces base supply roof with new rigid standing seam roof system. Present roof shows major signs of failed hypalon coating and urethane surface. Roof is over 15 years old and major maintenance and repair efforts are required every two years at significant cost. If this project is not accomplished, damage to supplies and equipment stored inside will continue, causing resultant replacement costs and potential mission impacts.	
AK	EIELSON AIR FORCE BASE	OVERHAUL TURBINE-GENERATOR	550
		Project overhauls turbine-generator #3 at the Central Heat & Power Plant. If this project is not accomplished, turbine-generator will fail, causing more extensive repairs and impacts throughout the heat and power systems.	
AK	ELMENDORF AIR FORCE BASE	REPAIR BASE ROOFS	2,353
		Project repairs severely deteriorating built-up roofing on various facilities. Existing roofing is failing and threatens to expose interior finishes and equipment to damaging water intrusion. If this project is not accomplished, moisture problems and leaking conditions will accelerate leading to more costly repairs.	

DoD Component: Air Force
Appropriation: O&M (3400)

REAL PROPERTY MAINTENANCE ACTIVITIES
FY 1998/FY 1999 PRESIDENT'S BUDGET SUBMISSION
FY 1998 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	(<u>\$000</u>) <u>Cost</u>
AL	MAXWELL AIR FORCE BASE	REPAIR UTILITY SYSTEMS, PH II Project replaces deteriorating electrical, gas, water, storm sewer, sanitary sewer distribution systems. The existing utility systems are over 60 years old. If this project is not accomplished, the existing utility lines will continue to be inadequate causing more extensive repairs.	5,500
AR	LITTLE ROCK AIR FORCE BASE	REPAIR HANGAR FIRE PROTECTION Project replaces deluge system with an aqueous film forming foam (AFFF) system in accordance with National Fire Protection Association guidelines. If this project is deferred, the hangar will continue to be protected with an antiquated fire protection system.	1,900
AZ	DAVIS-MONTHAN AIR FORCE BASE	REPAIR OVERHEAD DISTRIBUTION Project replaces failing, deteriorated electrical distribution lines, transformers, and associated equipment. The system has experienced frequent outages and is unreliable. It is over 35 years old and no major repairs have been accomplished. Project is required to provide a viable electrical system for base power consumption. This is the final phase of a three phase project begun in FY93.	500

DoD Component: Air Force
 Appropriation: O&M (3400)

REAL PROPERTY MAINTENANCE ACTIVITIES
 FY 1998/FY 1999 PRESIDENT'S BUDGET SUBMISSION
 FY 1998 Major Repair/Major Repair With Concurrent Minor Construction Projects
 (Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	(<u>\$000</u>) <u>Cost</u>
AZ	LUKE AIR FORCE BASE	REPAIR HANGAR FIRE PROTECTION	800
	Project installs an aqueous film forming foam (AFFF) system in accordance with National Fire Protection Association guidelines. This hangar, which houses F-16 aircraft, has no installed fire suppression system. If this project is deferred, the hangar will not provide protection of these multi-million dollar aircraft.		
CA	BEALE AIR FORCE BASE	REPLACE WATER LINES	1,000
	Project replaces the cantonment water mains and associated valves and hydrants. Continuous breaks are experienced when operating the hydrants. The steel pipe is original well casing which has deteriorated, making repairs difficult and very expensive and time consuming, possibly shutting down base water supply. If this project is not accomplished, the water mains will require constant repair which negatively affects the mission.		
CA	LOS ANGELES AIR FORCE BASE	REPAIR AIR HANDLERS	1,300
	This project replaces outdated low pressure, constant volume systems with variable air volume systems to meet modern efficiency and energy standards. These current systems consume excessive energy and require continuous maintenance. If this project is not accomplished, the systems will continue to be inadequate, impacting the mission as well as increasing operating costs.		

DoD Component: Air Force
Appropriation: O&M (3400)

REAL PROPERTY MAINTENANCE ACTIVITIES
FY 1998/FY 1999 PRESIDENT'S BUDGET SUBMISSION
FY 1998 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>Cost</u> (\$000)
CA	TRAVIS AIR FORCE BASE	REPAIR RUNWAY	1,000
	Project repairs spalled areas and deteriorated joints and cracks in Runway 21R-03L. The slabs are spalled and cracked, extending into several slabs in a row. Daily airfield inspections yield buckets with rocks and broken asphalt from temporary repair material which has broken loose. If this project is not accomplished, deterioration will continue causing more extensive repairs.		
CA	VANDENBERG AIR FORCE BASE	REPAIR WATER DISTRIBUTION	1,345
	Project replaces water distribution system which serves numerous space launch centers. The existing water distribution system is over 45 years old, has deteriorated beyond repair, and is subject to frequent breaks. If this project is not accomplished, interruption in water service could delay the Atlas and Titan launch programs.		
CO	UNITED STATES AIR FORCE ACADEMY	REPAIR CADET GYM	2,135
	Project repairs inadequate gymnasium lights, deteriorated natatorium diving tower, poor ventilation systems in four locker areas, and failing water circulation lines. If this project is not accomplished, the athletic program will be unable to accomplish the requirements warranted for cadet training.

(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>(\$000) Cost</u>
DE	DOVER AIR FORCE BASE	REPAIR PERSONNEL FACILITY	1,000
		Project repairs the roof, replaces the HVAC system, and upgrades the interior finishes of the base personnel building. Additional work installs an elevator and makes the entire facility handicapped accessible to conform to American Disabilities Act standards. Project is required to provide adequate systems for a proper working environment for assigned personnel.	
FL	CAPE CANAVERAL AIR FORCE STATION	REPLACE TRANSFORMERS	674
		Project replaces old, deteriorated transformers, oil switch, primary and secondary conductors, switchboard, panelboards and disconnect with new state-of-the-art equipment. The existing system has deteriorated to the point that the system cannot provide reliable power to mission critical facilities	
FL	HURLBURT FIELD	REPAIR FIRE SUPPRESSION SYSTEM	2,070
		Project replaces existing fire suppression system in Eason Hangar with aqueous film forming foam (AFFF) systems in accordance with National Fire Protection Association guidelines. If this project is not accomplished, personnel will continue to work without an adequate fire suppression system.	

DoD Component: Air Force
Appropriation: O&M (3400)

REAL PROPERTY MAINTENANCE ACTIVITIES
FY 1998/FY 1999 PRESIDENT'S BUDGET SUBMISSION
FY 1998 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	(\$000) <u>Cost</u>
FL	MACDILL AIR FORCE BASE	REPAIR DORMITORIES	5,000

Project repairs two dormitories to provide quality of life improvements. New HVAC replaces an antiquated system, providing better ventilation to prevent mildew. Electrical and mechanical systems repairs will eliminate safety hazards. Roof repairs and exterior paint are required to counteract deterioration from the Florida sun and salt water corrosion. If this project is not accomplished, unsatisfactory and inadequate living quarters will impact the quality of life for our enlisted personnel.

FL	PATRICK AIR FORCE BASE	REPAIR HEATING SYSTEMS	550
----	------------------------	------------------------	-----

Project removes heating-fuel underground storage tanks (USTs). Tanks will be replaced with either new above ground tanks with secondary spill containment or the oil-fired heating systems will be replaced with an alternative heating system (gas or electric). If this projects is not accomplished, the potential for soil and groundwater pollution remains resulting in expensive clean-up operations

FL	TYNDALL AIR FORCE BASE	REPLACE TAXIWAY D	1,000
----	------------------------	-------------------	-------

Project repairs cracked slabs and seals joints on the taxiway. Joint material is deteriorated and must be replaced to keep water from entering joints and damaging the concrete. Damaged concrete greatly increases the potential for foreign object damage to aircraft engines. If this project is not accomplished, more extensive repairs will be required.

DoD Component: Air Force
Appropriation: O&M (3400)

(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>(\$000) Cost</u>
GA	MOODY AIR FORCE BASE	REPAIR WATER DISTRIBUTION	1,800
		Project replaces existing water mains, gate valves, fire hydrants, lateral and piping connections which have deteriorated. Existing water distribution system is over 50 years old. Without this project the water distribution supply throughout the base for domestic use and fire demand will be inadequate.	
GA	ROBINS AIR FORCE BASE	REPAIR STORM DRAINAGE SYSTEM	2,800
		Project repairs existing drainage system. Currently, heavy rainfall floods streets, delaying vital equipment, personnel, and materials between major production centers and aircraft hangars. If this project is not accomplished, the overall productivity of Depot Maintenance Operations will suffer.	
GU	ANDERSEN AIR FORCE BASE	REPAIR LIGHTS TAXIWAY C	750
		Project replaces lighting cables, fixtures, transformers and voltage regulators. Taxiway "C" lighting system and components are outdated and deteriorated to the point of failure. If this project is not accomplished, deterioration will continue directly impacting the mission.	

DoD Component: Air Force
Appropriation: O&M (3400)

REAL PROPERTY MAINTENANCE ACTIVITIES

FY 1998 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	(<u>\$000</u>) <u>Cost</u>
HI	HICKAM AIR FORCE BASE	REPAIR AIRCRAFT PARKING APRON	605
Project reseals row 11 of parking apron. Work includes milling , regrading the surface, and installing a jet fuel seal over the entire area. Existing pavement is cracked, spalled and deteriorated due to fuel and oil spills. If this project is not accomplished, continuing deterioration will negatively impact airfield use and cause more extensive repairs.			
ID	MOUNTAIN HOME AIR FORCE BASE	REPAIR ELECTRICAL DISTRIBUTION	500
Project repairs primary power to two outlying facilities, the billeting area, and 1300 series hangars. Forty-year old above ground system is beginning to show its age. Wooden poles are deteriorating and primary wiring at insulators is corroding. If project is not accomplished, severe power outages and increased repair work will result.			
IL	SCOTT AIR FORCE BASE	REPAIR WATER MAIN	1,350
Project replaces a 10-inch water main that feeds the Cardinal Creek area from Hangar Road and crosses the taxiway and runway. This water main is old and has had several major breaks in the past. If project is not accomplished, the line will continue to deteriorate with increased maintenance requirements. Since it extends across the runway, a serious break in that location could disrupt mission capability.

 (Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	(<u>\$000</u>) <u>Cost</u>
KS	MCCONNELL AIR FORCE BASE	REPAIR ROOF, BASE SUPPLY	1,179
	Project replaces existing built-up roof with a 1/4" per foot sloped standing seam metal roof and installs exterior insulation/finish system. Existing roof leaks have already caused damage to structural components of this facility. The existing exterior finish on this facility is painted concrete masonry unit which requires excessive maintenance and repair. If project is not accomplished, further damage to, and failure of, structural components of this facility will occur.		
LA	BARKSDALE AIR FORCE BASE	REPAIR HANGAR 1	2,955
	Project corrects safety discrepancies associated with fire doors and converts the deluge fire suppression system to an aqueous film forming foam (AFFF) system in accordance with National Fire Protection Association guidelines, replaces the roof, removes asbestos, and repairs the HVAC system. If project is not accomplished, further damage to, and failure of, structural components of this facility will occur.		
MA	HANSCOM AIR FORCE BASE	REPAIR HVAC SYSTEM	1,980
	Project replaces old, deteriorated HVAC system in the Electronic Research Laboratory. The system is energy inefficient and does not provide an adequate working environment. Project is required to provide adequate systems for a proper working environment for assigned personnel.		

DoD Component: Air Force
Appropriation: O&M(3400)

REAL PROPERTY MAINTENANCE ACTIVITIES

(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>Cost</u> (\$000)
MD	ANDREWS AIR FORCE BASE	REPAIR TAXIWAY	2,160

Project removes existing asphalt pavement and replaces taxiway surface with concrete and the shoulders with asphalt. This taxiway supports special mission and Air National Guard Operations. The pavement is not structurally adequate for today's aircraft and is deteriorating, creating potential foreign object damage material. If project is not accomplished, portions of the taxiway will be unstable in 2 years.

MO	WHITEMAN AIR FORCE BASE	REPAIR APPROACH LIGHTS	732
----	-------------------------	------------------------	-----

Project replaces high intensity flashing lights, center line lights and back-up power, inter-connecting power distribution and other necessary support of the existing approach lighting system. The existing approach lighting system is old and is increasingly difficult to keep operational. If this project is not accomplished, failure of this system could endanger flight operations.

MS	COLUMBUS AIR FORCE BASE	REPLACE SWITCHING STATION	1,500
----	-------------------------	---------------------------	-------

Replace obsolete oil circuit breakers with walk-in switch gear house, air circuit breakers and underground risers. The existing oil circuit breakers are over 30 years old and require excessive maintenance. These oil type breakers are also near the end of their useful life. If this project is not accomplished, extensive outages for large areas of the base could occur along with the increased potential of fire with oil type breakers than with the air circuit breakers.

DoD Component: Air Force
Appropriation: O&M (3400)

(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>(\$000) Cost</u>
MT	MALMSTROM AIR FORCE BASE	REPAIR HOT WATER SYSTEM	1,300
		Project replaces insulation on high-temperature lines, valves and manholes. Valves cannot be efficiently repaired due to parts availability. Manholes are inadequate and must be replaced. Lack of trench insulation causes vegetation to die directly above the trench due to extreme temperatures. If this project is not accomplished, loss of energy and vegetation with excessive maintenance costs will continue.	
NC	POPE AIR FORCE BASE	REPAIR TAXIWAYS	675
		Project repairs several miscellaneous taxiways (D, H, J, K, L). The broken concrete slabs and badly spalled areas create a potential for foreign object damage to aircraft engines. If this project is not accomplished, deterioration will continue causing more extensive repairs.	
NC	SEYMOUR JOHNSON AIR FORCE BASE	REPAIR SANITARY SEWER SYSTEM	500
		Project replaces major segments of a system installed in the early 1960's. The current system is not adequate due to deterioration, settling, and collapse. These blockages result in excessive maintenance costs and potentially could endanger public health. If project is not accomplished, the system will continue to deteriorate with increased maintenance requirements.

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	(<u>\$000</u>) <u>Cost</u>
ND	GRAND FORKS AIR FORCE BASE	REPAIR BASE ROOFS	2,000
	Project will replace existing built-up leaking roofs on nine facilities. Existing roofs are failing and threaten to expose building occupants and equipment to damaging water intrusion. Sloped, standing seam metal roofs will be used whenever possible. If this project is not accomplished, moisture problems and leaking conditions will accelerate and ultimately require more extensive repairs.		
ND	MINOT AIR FORCE BASE	REPLACE PUMPS (POL PUMPHOUSE)	520
	Project replaces 12 deepwell turbine pumps and electric motors. It will also include modifications in piping, flanges, adapters and electrical components. The present equipment was manufactured in 1957/58 and is virtually impossible to get parts and replacement items. If this project is not accomplished, pumps and motors will eventually have to be shut down, impacting mission readiness.		
NE	OFFUTT AIR FORCE BASE	REPAIR FLOOR, MARTIN BOMBER BLDG	550
	Project replaces deteriorating floors. Nonrelocatable mission critical operations and equipment experience water leaks due to snow and water from vehicles and heavy equipment stored above their areas. If this project is not accomplished, damage to equipment may occur, causing resultant replacement costs and potential mission impacts.		

DoD Component: Air Force

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>(\$000) Cost</u>
NJ	MCGUIRE AIR FORCE BASE	REPAIR APPROACH LIGHTS	975
Project repairs runway approach lighting. The existing system does not meet Federal Aviation Administration (FAA) standards or configuration. If this project is not accomplished, the integrity of the airfield lighting system will be jeopardized.			
NM	HOLLOMAN AIR FORCE BASE	REPAIR BASE ROOFS	750
Project repairs severely deteriorating built-up roofing on various facilities. Existing roofing is failing and threatens to expose interior finishes and equipment to damaging water intrusion. If this project is not accomplished, moisture problems and leaking conditions will accelerate leading to more expensive repairs.			
NM	KIRTLAND AIR FORCE BASE	REPAIR AIRFIELDS, PARKING APRONS	750
Project repairs concrete aprons which have deteriorated due to a reaction between the soil and the concrete. The reaction is continuously eroding the pavement. Increased risks of foreign object damage to engines and structural systems of the aircraft occur due to pavement deterioration. If this project is not accomplished, deterioration and eventual failure of the pavement will result in closing those portions of the aprons, reducing mission capability.

OK	TINKER AIR FORCE BASE	REPAIR ELECTRICAL SYSTEM	

Project will replace and upgrade the building's electrical distribution system. The current system is incapable of providing sufficient, reliable power for the base support functions housed in this facility. If this project is not accomplished, the system will continue to deteriorate.

OK	VANCE AIR FORCE BASE	REPAIR HANGAR DELUGE FIRE SYSTEMS	655
----	----------------------	-----------------------------------	-----

Project replaces deluge low pressure pneumatic control systems and valves with electrical detection systems and state of the art electrically activated deluge valves in Hangars 141 and 195. Project also replaces diesel driven deluge pumps, all associated piping and valves with modern equipment. Project is required to comply with USAF Hangar Fire Protection Program, dated 20 February 1991, and it will upgrade and retrofit existing 30 year old systems.

SC	CHARLESTON AIR FORCE BASE	REPAIRS STEAM PLANT	570
----	---------------------------	---------------------	-----

Project repairs steam plant, including replacement of all pumps, piping, boiler tubes, firebrick, and boiler controls. This project is required to upgrade the facility to current modern standards and conform the filtration, emission, and treatment systems to local, state, and federal laws and regulations. If this project is not accomplished, the base will be subject to fines and a degraded workplace quality.

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>Cost</u> (\$000)
SC	SHAW AIR FORCE BASE	REPLACE TAXIWAY F	850
	Project replaces existing 6" concrete slabs and asphalt overlay with 14" concrete slabs. Taxiway F is the primary taxi route to the hot cargo apron and is failing to the point that replacement is required. If this project is not accomplished, the taxiway will become unavailable, directly affecting the mission.		
SD	ELLSWORTH AIR FORCE BASE	REPAIR WATER WELL #5	850
	Project replaces failing, deteriorated wells and distribution lines. All existing water comes through a 14 mile long, 16-inch main from Rapid City. Existing main is unable to meet peak demand causing drawdown of base storage. If this project is not accomplished, there will be periods when water availability is below that required for base fire protection.		
TX	DYESS AIR FORCE BASE	REPAIR HANGAR	1,800
	Project calls for repair of electrical lighting, installation of an aqueous film forming foam (AFFF) fire suppression system, and repairs to the plumbing system. If project is not accomplished, further damage to, and failure of, structural components of this facility will occur.		

DoD Component: Air Force
 Appropriation: O&M (3400)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>Cost</u> (\$000)
TX	GOODFELLOW AIR FORCE BASE	REPAIR HVAC SYSTEM	687
Project replaces an obsolete HVAC unit which does not allow for consistent temperature control. Replacement will include controls, ductwork, piping, and variable speed drives. Due to on going technical training in this building reliable temperature control is a necessity. If this project is not accomplished, energy and repair dollars will continue to be spent on this antiquated system.			
TX	LAUGHLIN AIR FORCE BASE	REPAIR TAXIWAY A	1,900
Project repairs taxiway damage due to spills and breaking pavement. Taxiway A is heavily used and experiencing excessive wear. Water ponds on this taxiway to the point of becoming a safety problem. If this project is not accomplished, the taxiway will continue to deteriorate causing more extensive repairs.			
TX	RANDOLPH AIR FORCE BASE	REPLACE WATER LINES	580
Project repairs deteriorated cast iron lines in the West Industrial Area. The existing water lines were installed as part of the original base infrastructure and have deteriorated with corrosion, lime build-up, root penetration, and misalignment. If this project is not accomplished, the distribution system will continue to deteriorate.

TX	SHEPPARD AIR FORCE BASE	AIRFIELD DRAINAGE CORRECTIONS	600
		Project removes headwalls and installs an underground drainage system on the runway. Runway requires airfield drainage corrections to comply with airfield construction criteria. If this project is not accomplished, the runway will be out of compliance, directly impacting the mission.	
UT	HILL AIR FORCE BASE	REPAIR BOILERS, MISSILE STORAGE AREA	540
		Project replaces two boilers at the central steam plant for the missile storage area (Minuteman and Peacekeeper programs). Existing boilers are over 35 years old, have reached the end of their economic life, and require excessive maintenance. If this project is not accomplished, the boilers will continue to deteriorate, resulting in high maintenance and utility costs. Steam plant reliability will be jeopardized resulting in damage to stored missile motors.	
VA	LANGLEY AIR FORCE BASE	REPAIR BASE HVAC SYSTEMS	500
		Project repairs and replaces numerous substandard air handlers, condensers, chillers, and HVAC-related equipment. Old systems throughout the base have caused a substantial amount of maintenance. The renovations of old buildings into modern offices have overtaxed antiquated systems and created numerous isolated hot/cold spots. Current steam plant systems and piping are degraded and have numerous leaks. If this project is not accomplished, conditions will degrade until systems fail.

WA	FAIRCHILD AIR FORCE BASE	REPAIR HEAVY MAINTENANCE RAMP	1,450
WY	F E WARREN AIR FORCE BASE	REPLACE HOT WATER LINES	543

Project repairs approximately one third of this concrete heavy maintenance ramp. The joint seal on this ramp has failed allowing intrusion into the joints. This intrusion, in conjunction with daily/seasonal temperature cycles, has produced edge spalling and additional joint seal failure. If this project is not accomplished, the joint seal will continue to fail at an accelerating rate.

Project replaces high-temperature hot water lines. The distribution system has many and frequent leaks, the insulation is deteriorated, and the system requires frequent maintenance. The efficiency of the system will continue to deteriorate resulting in wasted energy. If this project is not accomplished, mission essential facilities could be unusable for extended periods of time while repairs are made.

AK	CLEAR AIR STATION	REPLACE ROOF	657
Project replaces over 30,000 square feet of foam/hypalon roofing with insulated standing seam metal roofing system. Existing roof is over 30 years old and requires continual maintenance and repair. System suffers from excessive heat loss and new insulation is required to meet arctic design standards. If this project is not accomplished, increased maintenance and energy loss will continue.			
AK	EIELSON AIR FORCE BASE	REPAIR MECHANICAL SYSTEMS	1,998
Project replaces old, deteriorated HVAC system in an aircraft component repair facility. The system is energy inefficient and requires frequent maintenance. Project is required to provide adequate systems for a proper working environment for assigned personnel. If this project is not accomplished, the degraded work environment will impact the mission.			
AK	EIELSON AIR FORCE BASE	REPAIR STOKERS AND GRATES	1,263
Project replaces stokers and grates for Boilers #5 and #6 at the Central Heat and Power Plant to include associated equipment. The stokers and grates on Boilers #5 and #6 are over 40 years old and are wearing out. Each year requires increased maintenance to continue heating operations. Additionally, some of the existing equipment is no longer manufactured and spare parts are becoming scarce. If this project is not accomplished, the continued use of the boilers is questionable.

AZ	DAVIS-MONTHAN AIR FORCE BASE	REPAIR TAXIWAY	2,500

Project replaces the asphalt pavement with a seventy-five foot wide concrete center strip. The remaining side strips will be replaced with new load-bearing asphaltic concrete. Damaged asphalt greatly increases the potential for foreign object damage to aircraft engines. If this project is not accomplished, more extensive repairs will be required.

AZ	LUKE AIR FORCE BASE	REPAIR THRESHOLD LIGHTING	900
----	---------------------	---------------------------	-----

Project repairs by replacing the existing runway threshold lighting. Existing system contains antiquated electrical wiring and fixtures making repairs virtually impossible due to nonavailability of parts. If this project is not accomplished, the reliability of the airfield lighting system will be jeopardized.

CA	BEALE AIR FORCE BASE	REPAIR TAXIWAY	500
----	----------------------	----------------	-----

Project repairs spalls and any broken slabs on parallel taxiway, and includes joint resealing. Spalling concrete creates a potential for foreign object damage to aircraft engines. Water seeping through joints and cracks can deteriorate the subgrade, which can accelerate failure of the concrete taxiway. If this project is not accomplished, the condition of this taxiway will continue to deteriorate affecting the flying mission.

GU	ANDERSEN AIR FORCE BASE	REPAIR SOUTH RAMP	1,000
	Project replaces deteriorated concrete ramp slabs. Existing pavement is cracked due to high usage and severe weather. Work is needed to maintain pavement in a usable condition. The cracked pavement presents a safety hazard as it increases the potential for foreign object damage to aircraft engines. If this project is not accomplished, deterioration will continue causing more extensive future repairs.		
HI	HICKAM AIR FORCE BASE	REPLACE AIR CONDITIONING PLANT	800
	Project replaces two deteriorated 200-ton chillers. These chillers require constant repair and maintenance and utilize banned chlorofluocarbons (CFC). If this project is not accomplished, the system will continue to require extensive maintenance.		
ID	MOUNTAIN HOME AIR FORCE BASE	REPAIR SLABS, ALPHA RAMP	2,000
	Project replaces selected concrete slabs on Alpha ramp. Over 20% of slabs are broken in four or more places. 78% of slabs have severe cracks. If this project is not accomplished, deterioration will adversely affect the operations, and increase the risk to, the base's F-15Es.

FY 1999 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>(\$000) Cost</u>
LA	BARKSDALE AIR FORCE BASE	REPAIR WATER MAINS - AIRFIELD	810
	Project replaces existing water mains, gate valves, fire hydrants, lateral and piping connections which have deteriorated on the east side of the runway. Existing water distribution system in this area is worn and deteriorated. Without this project, the water distribution supply to support the airfield and fire demand will be inadequate.		
MD	ANDREWS AIR FORCE BASE	REPLACE ELECTRICAL UTILITIES	1,500
	Project buries overhead primary and secondary electrical conductors, telephone wires, and cable television wires. The feeder cables will be encased in concrete and all poles removed. Project targets deteriorated powerlines and lines that present a safety hazard. If this project is not accomplished, the existing overhead distribution system will continue to deteriorate causing more extensive repairs.		
MD	ANDREWS AIR FORCE BASE	REPAIR WEST APRON	3,000
	Project replaces existing concrete and base course with new concrete and base course on the center of the west apron. The existing concrete is 35-40 years old and deteriorating rapidly. This is the area where CSAF/CC and other VIP's park their aircraft and is near the Air Force One operational area. If this project is not accomplished, deterioration will continue causing more extensive future repairs and increase potential for aircraft damage.

FY 1999 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	(<u>\$000</u>) <u>Cost</u>
MO	WHITEMAN AIR FORCE BASE	REPAIR BASE ROOFS	583
		Project repairs severely deteriorating built-up roofing on various facilities. Existing roofing is failing and threatens to expose interior finishes and equipment to damaging water intrusion. If this project is not accomplished, moisture problems and leaking conditions will increase causing more expensive repairs.	
MO	WHITEMAN AIR FORCE BASE	REPAIR ELECTRICAL DISTRIBUTION	922
		Project relocates transformers, and switches from over underground vaults to separate pads. Presently, vaults contain water which evaporates and condenses in above ground mounted equipment. If this project is not accomplished, electrical system will continue to be plagued by random electrical power outages.	
MS	COLUMBUS AIR FORCE BASE	REPAIR BASE STREETS	700
		Project repairs streets throughout the base. Pavement conditions range from areas which have failed to those which are near failure. If this project is not accomplished, deterioration will continue causing more extensive future repairs and increase potential for vehicle damage.	

DoD Component: Air Force
Appropriation: O&M (3400)

REAL PROPERTY MAINTENANCE ACTIVITIES
FY 1998/FY 1999 PRESIDENT'S BUDGET SUBMISSION
FY 1999 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>(\$000) Cost</u>
MS	KEESLER AIR FORCE BASE	REPAIR AIRFIELD LIGHTING	844
Project upgrades the airfield lighting system for safety, proper operation, and compliance with Air Force regulations. Project modifies threshold lights and replaces isolation transformers, constant current regulators, power transformers, and vault panel boards. If this project is not accomplished, the reliability of the airfield lighting system will be jeopardized.			
MT	MALMSTROM AIR FORCE BASE	REPLACE BUILT-UP ROOF	580
Project replaces roof and flashing systems. Roofing system is seriously deteriorated and it has become difficult to adequately maintain. Failure to do the work will result in accelerated deterioration of the facility structure and potential water damage to interior finishes and equipment.			
NC	SEYMOUR JOHNSON AIR FORCE BASE	REPAIR BUILT-UP ROOFS	800
Project replaces existing leaking roofs on various facilities. Existing roofs are failing and threaten to expose building occupants and equipment to damaging water intrusion. If not repaired, moisture problems and leak conditions will accelerate and ultimately require more extensive repairs.

Appropriation: O&M (3400)

REAL PROPERTY MAINTENANCE ACTIVITIES
FY 1998/FY 1999 PRESIDENT'S BUDGET SUBMISSION
FY 1999 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>((\$000) Cost</u>
NC	SEYMOUR JOHNSON AIR FORCE BASE	REPAIR F-15E APRON	800
	Project repairs apron including resealing joints, patching cracks and replacing shattered slabs. Work is needed to maintain pavement in usable condition. The cracked pavement presents a safety hazard as it increases the potential for foreign object damage to aircraft engines. If this project is not accomplished, deterioration will continue endangering flying operations.		
ND	GRAND FORKS AIR FORCE BASE	REPAIR PARALLEL TAXIWAY	3,100
	Project repairs parallel taxiway by replacing joint seals and repairing/replacing slabs as necessary. The taxiway has deteriorated beyond normal maintenance capabilities and has become a major foreign object damage problem for aircraft. If this project is not accomplished, the taxiway pavement will continue to deteriorate, increasing the potential for damage to aircraft.		
NE	OFFUTT AIR FORCE BASE	REPAIR TAXIWAY/APRON	1,442
	Project replaces broken concrete slabs and old joint sealing on the taxiway and apron. The broken concrete slabs and badly spalled areas create a potential for foreign object damage to aircraft engines. If this project is not accomplished, deterioration will continue causing more extensive repairs.		

DoD Component: Air Force
 Appropriation: O&M (3400)

REAL PROPERTY MAINTENANCE ACTIVITIES
 FY 1998/FY 1999 PRESIDENT'S BUDGET SUBMISSION
 FY 1999 Major Repair/Major Repair With Concurrent Minor Construction Projects
 (Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>Cost</u> (\$000)
NJ	MCGUIRE AIR FORCE BASE	REPAIR HTHW SYSTEM	1,000
Project replaces portions of the underground high temperature hot water (HTHW) system that provides heat and energy for domestic hot water to numerous base facilities. The underground high temperature hot water lines are extremely deteriorated with frequent leaks and with over 30 percent of the system valves not operable, causing minor repairs to be dangerous, expensive major shutdowns. If this project is not accomplished, potential loss of heat and hot water to facilities could occur.			
NM	CANNON AIR FORCE BASE	REPAIR ASPHALT RUNWAY	1,125
Project replaces asphalt with concrete on the runway touchdown. The current touchdown is concrete for only 300 feet, 700 feet short of the regulation requirements. Replacing the asphalt with concrete will reduce the foreign object damage hazard. If this project is not accomplished, deterioration will continue endangering safe flying operations.			
NM	HOLLOMAN AIR FORCE BASE	REPAIR CRU FLOORS (F-117 HANGARS)	1,500
Chemically resistant urethane (CRU) floor finish is required in forty hangars housing the F-117A. This flooring type is required to protect the concrete resulting from normal daily operations on the hangar floor. If this project is not accomplished, deterioration from maintenance operations will continue imperiling personnel and equipment.

FY 1999 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>(\$000) Cost</u>
NM	KIRTLAND AIR FORCE BASE	REPAIR MULTIPLE SUBSTATIONS	1,000
	Project replaces old, unreliable and overloaded electrical switchgear in four substations. Failure to accomplish this project will result in continued deterioration of electrical switchgear. Maintenance personnel are at risk during maintenance and switching procedures because of the old unreliable switchgear. If this project is not accomplished, eventual failure will result in complete and long term power outages.		
NV	NELLIS AIR FORCE BASE	REPAIR TAXIWAY E	1,950
	Project replaces broken concrete slabs and old joint sealing on the taxiway as well as increasing the thickness from 10 inch PCC to 14 inch PCC. The broken concrete slabs and badly spalled areas create a potential for foreign object damage to aircraft engines. If this project is not accomplished, deterioration will continue causing more extensive repairs.		
OK	ALTUS AIR FORCE BASE	REPAIR MECHANICAL SYSTEMS	1,000
	Project replaces motor control center and upgrades heating and exhaust system in fuel cell. Existing motor control center can no longer be repaired as parts are no longer available. Numerous water leaks have damaged equipment, controls, and circuits beyond economic repair. If this project is not accomplished, degeneration of the fuel cell will continue.

FY 1999 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>Cost</u> (\$000)
OK	VANCE AIR FORCE BASE	REPAIR ELAM ROAD	617
		Project replaces deteriorated concrete slabs on Elam Road. Work includes base course repairs, repair of drainage structures/appurtenances and application of new traffic markings. Project is required to repair Elam Road, correct drainage deficiencies and create a center left turn lane to restore operational serviceability and safely support using vehicles and traffic.	
SC	CHARLESTON AIR FORCE BASE	REPAIR BASE SANITARY SEWER	600
		Project replaces major segments of a system installed in the 1950's. The current system is not adequate due to deterioration, settling, and collapse. These blockages result in excessive maintenance costs and potentially could endanger public health. If project is not accomplished, the system will continue to deteriorate with increased maintenance requirements.	
SC	SHAW AIR FORCE BASE	REPAIR NORTH APRON	1,400
		Project replaces apron pavement which provides primary access to the maintenance areas for F-16 aircraft. Existing pavement is 44 years old and deteriorated. If this project is not accomplished, apron conditions will continue to deteriorate, causing possible foreign object damage and damage to multi-million dollar aircraft.	

DoD Component: Air Force
Appropriation: O&M (3400)

FY 1999 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	(<u>\$000</u>) <u>Cost</u>
SD	ELLSWORTH AIR FORCE BASE	REPAIR SEWAGE SYSTEM	1,260
	Project replaces aged and deteriorated base sewage lines and collection system which were installed in the 1940's. Existing sewage lines are leaking and leaching into the soil, and many pipe segments are now out of alignment or open at the joints. If this project is not accomplished, the risk of potential environmental violations and possible penalties exists.		
TX	DYESS AIR FORCE BASE	REPAIR ELECTRICAL DISTRIBUTION	850
	Project replaces the overhead primary distribution in area D with an underground system. Forty percent of the poles are over 30 years and many of the transformers and switches are in need of replacement. The existing system is vulnerable to lightning strikes, phase shorting from high winds, resulting in power outages. If this project is not accomplished, the electrical distribution system will continue to decline in reliability, with frequent outages to replace failed components.		
TX	DYESS AIR FORCE BASE	REPAIR RUNWAY TOUCHDOWN	1,750
	Project replaces 120 concrete slabs in the north touchdown area of the runway. Current ratings for this area are substandard for B-1B aircraft. If this project is not accomplished, the potential for pavement failure risks continued aircraft operations and mission accomplishment.

FY 1999 Major Repair/Major Repair With Concurrent Minor Construction Projects
(Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	(<u>\$000</u>) <u>Cost</u>
TX	GOODFELLOW AIR FORCE BASE	INSTALL SWITCHGEAR & FEEDERS	500
	Project repairs the base electrical system by modifying the electrical utility system to include a new 15KV switch/gear and new primary feeder. The project improves the operating versatility and reliability of the utility in support of current mission requirements. If this project is not accomplished, the existing overhead distribution system will continue to deteriorate causing more extensive repairs.		
TX	LACKLAND AIR FORCE BASE	REPAIR ELECTRICAL DISTRIBUTION	1,000
	Project replaces existing deteriorated overhead electrical lines with underground conductors. Existing electrical poles require frequent replacement and stand against the edge of the roadway due to limited space, posing a safety hazard due to close proximity with vehicular traffic. Power reliability to numerous mission essential facilities is threatened. If this project is not accomplished, safety and reliability of the electrical system will be compromised.		
TX	LAUGHLIN AIR FORCE BASE	REPAIR PARKING APRON	875
	Project replaces concrete slabs on aircraft parking apron, rows R and S. The parking apron is over 40 years old, cracked and failure is imminent. The cracked pavement presents a safety hazard as it increases the potential for foreign object damage to aircraft engines and personnel. If this project is not accomplished, deterioration will continue causing more extensive repairs.

WA	MCCORD AIR FORCE BASE	REPAIR C-130 PARKING PADS	530

Project overlays and strengthens existing C-130 parking pads. Current pads are not strong enough for unrestricted operations, requiring aircraft to taxi straight-in and straight-off the pads. Aircraft cannot do a turning movement on the parking pads, requiring aircraft to either back-out under power or be towed out, causing severe work arounds and increased manpower. If this project is not accomplished, delays to mission accomplishment will continue.

WY	FRANCIS E. WARREN AIR FORCE BASE	REPAIR HTHW SYSTEM	543
----	----------------------------------	--------------------	-----

Project replaces high temperature hot water (HTHW) lines. The distribution system has many and frequent leaks, the insulation is deteriorated, and the system requires frequent maintenance. A major leak or break could render mission essential facilities unusable for extended periods of time while repairs are made. If this project is not accomplished, the efficiency of the system will continue to deteriorate resulting in possible catastrophic failure.
