FOREWORD

Educational and Other Nonprofit Institutions Receiving DoD Prime Awards of Contracts, Grants, and Agreements for Research, Development, Test, and Evaluation is published annually. This report provides information on Department of Defense prime awards of contracts, grants, and agreements with educational and other nonprofit institutions for research, development, test, and evaluation (RDT&E). The awards are further categorized by type of RDT&E funding and displayed within two major RDT&E budget categories: (1) Technology Base and (2) Development. This information is shown in three tables, organized by awards to:

1. U.S. Educational and Other Nonprofit Institutions Receiving DoD Prime Awards of Contracts, Grants, and Agreements for Technology Base;
2. U.S. Educational and Other Nonprofit Institutions Receiving DoD Prime Awards of Contracts, Grants, and Agreements for Development; and
3. U.S. Federal, State, and Local Government Agencies Receiving DoD Prime Awards of Contracts, Grants, and Agreements for RDT&E.

INTRODUCTION

This report presents information on Department of Defense (DoD) prime awards of contracts, grants, and agreements for research, development, test, and evaluation (RDT&E) made to educational and other nonprofit institutions, including Federal, state, and local government agencies, during fiscal year (FY) 1996. Only those awards of contracts over \$25,000 and all grants and agreements made to educational and other nonprofit institutions are included. The information is presented under the Technology Base and Development budget categories in order to differentiate between institutions receiving each type of RDT&E funding. Discussion of differences between the two major categories follows:

TECHNOLOGY BASE

- Comprised of two RDT&E research categories: (1) Basic Research; and (2) Applied Research.
- Technology base funding is generally for programs performed by the academic departments of universities and colleges.

DEVELOPMENT

- Comprised of five of the seven RDT&E research categories: (1) Advanced Technology Development; (2) Demonstration and Validation; (3) Engineering and Manufacturing Development; (4) Management Support; and (5) Operational System Development.
- Programs involve engineering design of specific military systems, subsystems, or processes; construction and testing of prototypes; and other kinds of work.
- Development funding awarded to institutions of higher education is generally for programs performed by large laboratories administered by or affiliated with institutions of higher education, but organizationally separate and qualitatively distinct from academic departments of the universities.

The three tables of DoD RDT&E information, presented alphabetically by recipient, show net value of awards for each recipient and locations of where the work was to be performed. This report only includes awards made to nonprofit, educational, and government institutions. Awards to commercial entities are excluded.

The locations shown in the tables are those reported as where the work was to be performed. Normally, this is a facility of the institution awarded the contract, grant, or agreement. However, if the work was scheduled to be performed at a Defense facility, such as an Air Force base, the location shown may be that of the Defense facility rather than the institution.

DATA RELATING TO RECIPIENTS IN THIS PUBLICATION ARE SUBJECT TO THE ACCURACY OF THE FEDERAL PROCUREMENT DATA SYSTEM CONTRACTOR ESTABLISHMENT CODE AND ITS ABILITY TO DESCRIBE RELATIONSHIPS OF COMPANIES.

HIGHLIGHTS

The following tables show the number of U.S. institutions receiving prime awards for all research and development categories and the net value of the awards, by type of institution, for FY 1996 and FY 1995. The Federal, state, and local government agencies receiving awards (Table 3) are excluded from the following tables.
