Foreword

Administered annually, the Navy-wide Personnel Survey (NPS), is a major product of the Navy Survey Resource Center (NSRC) at the Navy Personnel Research and Development Center (NPRDC). The 1996 NPS examined the perceptions of enlisted personnel in a variety of areas including detailing and the assignment process, quality of life programs, organizational climate, and health issues. This information is valuable to managers and policy makers in program formulation and evaluation.

NPS 1996 was conducted under the sponsorship of the Chief of Naval Personnel (PERS-00) within reimbursable Work Unit 96WRPS500. Data collection concluded in mid-November 1996, and the results of the survey were briefed to the Chief of Naval Personnel, his staff, and sponsors in February 1997.

This technical note presents statistical results for enlisted personnel. NPRDC-TN-97-5 provides statistical results for officers. Any questions regarding this report should be directed to Dr. John Kantor, (619) 553-7651 or DSN 553-7651.

Summary

The seventh annual Navy-wide Personnel Survey (NPS) was mailed in August 1996 to a random sample of 15,213 active duty enlisted personnel and officers. Completed questionnaires were accepted through mid-November 1996. The adjusted return rate was 45 percent. Survey topics included detailing and the assignment process, quality of life programs, organizational climate, and health issues. Responses were weighted by paygrade to allow generalization of sample results to the Navy population. Responses of enlisted personnel are broken out by paygrade and other important demographic variables.

Introduction

Problem

The morale and job performance of Navy personnel take on added importance in an era of downsizing, where each individual must contribute to the increased efficiency required of a reduced force in a still-hostile world. Navy personnel attitudes and opinions represent input vital to the development and continuous improvement of Navy policies and programs. Therefore, such opinions must be measured in a systematic and timely fashion, and furnish an accurate reflection of the views of the Navy's diverse and widespread membership.

Purpose

The annual Navy-wide Personnel Survey (NPS) was designed to collect opinion data on a systematic basis and to provide timely information on issues of importance to policy makers. The annual sampling, representative of the entire Navy population, allows the identification and analysis of trends in opinions and attitudes toward plans, programs, and policies that materially affect the performance and morale of Navy personnel. The survey was also designed to accommodate the study of topics of compelling interest on a one-time basis. This technical note provides enlisted results of the NPS 1996.

Approach

NPS questionnaires were mailed in August 1996 to a random sample of 15213 enlisted personnel and officers with a projected rotation date of January 1997 or later. Personnel who received the 1995 survey were not eligible for inclusion in the sample. The sampling represented approximately 3.1 percent of the total enlisted population and 7.6 percent of the total officer population. Of the original sample, approximately 970 surveys could not be delivered. Reminder/thank you postcards were mailed to the entire sample four weeks after the surveys. The adjusted return rate was 45 percent. Unadjusted return rates for paygrade groups, total enlisted, and total officer groups are displayed in Table 1.

Table 1
Return Rates for Paygrade Groups

Paygrade Group	Population <i>N</i> ^a	Surveys Sent	Surveys Returned	% Return ^b

O-4 and above	23,066	1,611	950	59
Total	59,452	4,505	2,463	45

^aPopulation *N* = all personnel in the Navy eligible for participation in the survey. Many individuals were excluded because they were on TAD or their PRD was scheduled soon.

^bPercent return was calculated without adjustment for surveys that could not be delivered.

^cIncludes O-1E through O-3E.

The statistical tables are based on weighted data. Responses were weighted by paygrade to reflect each paygrade's actual proportion in the Navy, thereby allowing generalization of sample results to the entire Navy. Separate weighting schemes were employed for enlisted and officer personnel; i.e., within the enlisted/officer groups, each paygrade was weighted separately.

For statistical analyses, enlisted personnel were grouped together according to paygrade: (1) E-2 and E-3, (2) E-4 through E-6, and (3) E-7 through E-9. Personnel in paygrade E-1 were excluded because of their limited time in the Navy. Officers were assigned to one of three groups: (1) W-1 through W-4, (2) O-1E through O-3E and O-1 through O-3, and (3) O-4 and above.

How to Read Statistical Tables

The information contained in each statistical table is described in Figure 1.

1. Question number and description of question.
2. Number of question from which respondent groups are derived.

3. Respondent groups.
4. Respondent options.
5. (Weighted) number of responses.
6. Column percent: For a given (weighted) respondent group, the column provides a distribution of responses across response options.
7. Total number of respondents (weighted) selecting option.
8. Percent of all respondents (weighted) selecting option.
9. Total number (weighted) of respondents.
10. Total number (weighted) of respondents in group.
11. Percent of all respondents (weighted) in group.
12. Number of respondents (weighted) who omitted question.

Note. The weighting procedure followed by rounding to whole numbers may sometimes produce a zero frequency combined with a non-zero percentage for a cell. For all practical purposes, such results may be ignored.

Figure 1. Statistical table for Question 10.

Organization

The sequence of statistical tables in this report corresponds to the sequence of questions in the NPS 1996. A copy of the NPS 1996 appears in Appendix A. In the first analysis for each question, all response options were included. A second analysis was conducted in which the "Does Not Apply" option was omitted. Also, in the second analysis, response options were collapsed for agree/disagree questions, with "Strongly Disagree" and "Disagree" as one category and "Strongly Agree" and "Agree" as another. All questions were broken out by paygrade and at times by other important demographic variables.

Margin of Error

Tabulated results are accurate at the 95 percent level of confidence within the margins of error displayed in Table B-2. (See Appendix B for a discussion of margin of error in estimation of percentages.) In general, the error for the aggregated enlisted group would not exceed ± 1 percent and would not exceed ± 2 percent for the aggregated officer group.

Navy-wide Personnel Survey: 1996

Appendix B

Margin of Error

Margin of Error

Tables B-1 and B-2 are used to estimate confidence intervals, or "margins of error", around the survey percentage results presented in this report. Table B-1 displays the unweighted sample sizes, and Table B-2 provides the margin of error around the estimated population percentages represented by obtained survey results. Obtained results are accurate at the 95 percent level of confidence within the margins of error displayed in Table B-2.

To find the margin of error for a given survey percentage result, first consult Table B-1 to determine sample size, then look up the margin or error in Table B-2. The margin or error from Table B-2 is added to and subtracted from the survey percentage result. In this way, one determines the interval within which one would expect the percentage for the entire Navy to fall.

For example, consider the survey question, "I enjoy my career in the Navy." Ninety-three (92.7) percent of warrant officers agreed, 69.8 percent of O-1s through O-3s, and 87.4 percent of O-4s and above.. Total officer sample agreement was 78 percent. To find the margin of error for these percentages, first find the unweighted sample sizes from Table B-1. For all officers, total sample size was 2,463; for warrant officers, 429; for O-1s through O-3s, 1,084; and for O-4s and above, 950. Then, consult Table B-2, locate the closest percentage split at the top of the table, and the sample size in the first column. For the total sample, 80/20 represents the closest split; for warrant officers, 90/10, the closest split; for O-1s through O-3s, 70/30; and for O-4s and above, 90/10.

The intersection of sample size and split provides the margin of error for the survey result. For the total officer group, the error would be approximately ± 2 percent; thus, the true population percentage would probably fall within the interval of 75.4 percent to 79.4 percent. For warrant officers, the interval would be 89.7 percent to 95.7 percent; for O-1s through O-3s, 66.8 percent to 72.8 percent; and for O-4s and above, 85.4 percent to 89.4 percent.

Note that the margin of error increases as sample size decreases and the percentage split approaches 50/50. Thus, the margin of error can vary from 14 points (sample size of 50 and a percentage split of 50/50) to zero points (sample size of 6,000 and a percentage split of 98/2). *Extreme caution* must be used for survey results with a large margin of error.
