DTIC QUALITY INSPECTED 1

FOREWORD

This document, DoD 5010.12-L, Acquisition Management System and Data Requirements: Control List (AMSDL), is authorized by DoD Instruction 5000.2-R, Defense Acquisition Management Policies and Procedures, 15 March 1996.

The AMSDL identifies the source documents and related Data Item Descriptions (DIDs) that have been cleared for use in defense contracts by the Office of Management and Budget (OMB) under the authority granted by Public Law 96-511, "Paperwork Reduction Act of 1980" and Public Law 104-13, "Paperwork Reduction Act of 1995". OMB Control Number 0704-0188 has been assigned to each of the source documents and DIDs listed herein.

The DoD AMSDL Clearance Officer is Mrs. Linda Fowble of:

ODUSD(L) CALS
5203 Leesburg Pike, Suite 1609
Falls Church, VA 22041-3466

In February 1997, the OUSD(L) CALS Office re delegated the approval of new or revised Data Item Descriptions to the Services and Government Agencies. The focal points for approval are noted in Section F.

Mrs. Fowble may be reached at the above address, or by electronic mail at "burghels@acq.osd.mil".

Mark Adams
Acting Director, CALS

ORDERING INFORMATION
See Section D for information about ordering the
AMSDL or documents listed therein.

Section A

DEPARTMENT OF DEFENSE ACQUISITION MANAGEMENT SYSTEM AND DATA REQUIREMENTS CONTROL LIST (AMSDL)

1. ABOUT THE AMSDL.

a. The AMSDL lists the data requirements (source documents and DIDs) that have been approved for use in Defense contracts. These documents should be not be used in DoD contracts unless Government Program/Project Managers, Acquisition Managers or Contracting Officers believe such data is essential to accomplishing the mission of the Department of Defense. The restrictions of public laws regarding information collection by the Federal Government applies to data acquired under DoD contracts. Office of Management and Budget (OMB) Control Number 0704-0188 has been assigned to all data requirements and source documents listed herein.

b. The AMSDL only lists data requirements cleared under the control number 0704-0188. It does not include other data requirements that may be required under other Public Laws, Federal Statutes, Executive Orders, etc., specified in Federal Acquisition Regulation (FAR) or Defense FAR Supplement (DFARS) clauses or covered by other OMB control numbers.

2. MANAGEMENT OF THE AMSDL.

The AMSDL is managed by the Office of the Deputy Under Secretary of Defense for Logistics under the DoD Technical Data Management Program. Mrs. Linda Fowble is the DoD AMSDL Clearance Officer and the focal point in the Office of the Secretary Defense for the Technical Data Management Program. You can contact her as follows:

Mrs. Linda Fowble
ODUSD(L) CALS
5203 Leesburgh Pike, Suite 1609
Falls Church, VA 22041-3466

FAX: (703) 681-5682 edress: burghels@acq.osd.mil

3. AMSDL/DODISS INTEGRATION.

The ASSIST data base maintained by the Defense Automated Printing Service in Philadelphia, PA is used to store information for both the AMSDL and the DoD Index of Standards and Specifications (DoDISS). Although Part I of the AMSDL lists current source documents, canceled source documents are listed in the DoDISS.

4. CLEARANCE PROCESS.

All new and revised DIDs and source documents must be reviewed and cleared by the DoD AMSDL Clearance Officer before being use in a contract. The term source document means any specification or standard that contains requirements causing the generation of data or resulting in the collection of data from the private sector. DIDs that will only be used one time may be approved as a One Time DID by the DoD Component data manager in accordance with DoD's Technical Data Management Program policies and procedures. One Time DIDs are not listed in the AMSDL.

5. CORRECTIONS TO THE AMSDL.

Errors in the AMSDL such as typographical errors, inaccurate listings, conflicts between entries, etc. should be brought to the attention of the DoD AMSDL Clearance Officer listed above. Each Office of Primary Responsibility (OPR) should review new issuances of the AMSDL to ensure their documents are listed correctly. Errors, omissions or inaccuracies in the DIDs or source documents should be brought to the attention of the OPR for the document.

6. AMSDL STRUCTURE.

The AMSDL is composed of Sections A - F and four Parts:

Sections A - F: (This portion contains information about the AMSDL and DoD's management of data requirements.)

PART I Source Documents By Data Functional Area Assignment

PART II Numerical Listing of Data Item Descriptions

PART III Keyword Listing of Data Item Descriptions

PART IV Canceled/Superseded Data Item Descriptions

An exclamation point (!) in the left margin adjacent to an entry indicates that a change has been made for that item since the last edition of the AMSDL.

Section B

FORMAT OF THE AMSDL

PART I

SOURCE DOCUMENTS AND RELATED DIDs, BY DATA FUNCTIONAL AREA ASSIGNMENT

1. This part of the AMSDL list source documents and DIDs which have been cleared by OMB for contractual application. This listing is preceded by a "quick reference" source document index. The listing of source documents/DIDs is presented in the AMSDL data functional areas format. This format is broken out into 38 functional areas, (e.g., Reliability, Quality Control, Configuration Management) that equates to the 34 standardization areas in the SD-1, Standardization Directory. The AMSDL data functional areas include a more specific refinement of the "Miscellaneous Area" of the SD-1 which has been broken out in the data base to identify elements such as Financial, Administration, etc. The four (4) digit alpha symbols are the same as in the SD-1 wherever appropriate.
2. Each DID and its corresponding source document (as applicable) are assigned to the functional area that most nearly describes the use of the required data.

AMSDL DATA FUNCTIONAL AREA ASSIGNMENTS

ADMN Administrative Data

This area covers non-technical data required by contracting officers and other personnel for the Government administration of the overall provisions of the contract, excluding management and financial data. As a minimum, the following subjects are covered: (1) security system engineering; military history, responsibilities and policies and procedures for safeguarding classified material; (2) audio-visual data such as recorded information on photographic records; motion picture films and microfilm developed in support of a project; recorded information on view graphs, video tapes and slides; (3) documents describing meeting agendas and minutes.

ALSS Acquisition Logistics Standards and Specifications

This area includes standards, specifications, procedures, methods and techniques for analyzing, developing and defining supportability and support requirements for new DOD systems or system modification programs and for acquisition of the support elements required for initial fielding. Included in this area are the policies, procedures and support elements defined in Section 4.3.3 of DOD 5000.2-R and Section 2.7 of the DOD 5000.2R Deskbook.

ATTS Automatic Test Technology Standards

This area establishes standard methods, procedures, techniques, and design criteria for providing automatic test capability in defense systems and equipments.

CDNC Computer-Aided Design/Numerical Control

This area relates to all engineering design that may be enhanced with the aid of computer techniques, as well as all automated production techniques involving control of machine tools and manufacturing processes, whether directly by a computer or by means of computer-generated outputs and controls.

CMAN Configuration Management

This area relates to: (1) configuration change control procedures for military systems, equipments, and computer software and firmware; (2) identification documentation; (3) physical and functional configuration audits on systems, equipment, and computer programs; (4) technical reviews of the configuration item and its identification; (5) configuration item status accounting; (6) configuration management plans; and (7) procedures by which manufacturers, suppliers, contractors, and other agencies furnish the Federal Government with identification and supply data for items being supplied and for obtaining assignment or confirmation of nomenclature and identification marking for units, groups, sets, systems, assemblies, attachments and accessories designed under contract.

CMPS Composites Technology

This area encompasses standardization documents for materials and processing (M&P) technology that are pertinent to composites manufacturing and applications. This includes the M&P technology of fiber reinforcements and matrices used in composites, and standard test methods for determining the properties of composites and their constituent materials. This area includes the M&P technology of primary classes of composites materials including: polymer matrix composites (PMC), metal matrix composites (MMC), and ceramic matrix composites (CMC).

DCPS Data Communications Protocol Standards

This area establishes DoD protocol standards and reference protocol architectures necessary to support intranetwork and internetwork host-to-host data communications utilizing digital communication techniques. It involves standardization of internetwork, peer, and interlayer management protocols, including those protocols, including those that deal with end-to-end (host-to-host) communications across a network or a concatenated set of networks. The standardization of lower-layer protocols, those that deal with the physical, data-link, and network functions, do not fall within the DCPS area. However, the DCPS area actively coordinates with those standardization activities developing and coordinating those lower-layer protocols to ensure that the interfaces allow interoperability.

DRPR Drawing Practices

This area relates to engineering practices for defining, recording, and communicating concepts and design and production requirements in a concise, graphic form with standard symbols, abbreviations, and text on drawings and associated lists.

EDRS DoD Engineering Data Reproduction Systems

This area covers reproduction systems required for recording, reproducing, storing, retrieving, and distributing engineering documents and related information by electronic, optical, or microform methods, or by combinations thereof.

EGDS Engineering Data Systems

This area relates to the automated processing of engineering data documentation used in support of research and development, design and engineering, procurement and supply, and maintenance of defense materiel.

EMCS Electromagnetic Compatibility

This area covers requirements and procedures for achieving electromagnetic compatibility within all frequency ranges of platforms, facilities, electrical, and electronic systems/equipment, circuits, and components. Included are: (1) standards for predicting, measuring, and validating for electromagnetic compatibility; (2) standards for techniques and procedures relating to grounding, bonding, and shielding; (3) standards for preventing and controlling electromagnetic radiation to personnel and equipment (including hazardous materiel and substances); and (4) standards relating to the prevention of deleterious electro-magnetic effects resulting from nuclear detonations (e.g., EMI and EMP).

ENVR Environmental Requirements and Related Test Methods

This area encompasses environmental definitions, environmental design criteria (both natural and induced) and related test and evaluation methods. It also covers documents in support of testing and evaluation of systems, subsystems, and components. Tests include sea tests, flight tests, and operational tests. Evaluation usually concerns the early steps of the conceptual phase. The electromagnetic environment is excluded since it is covered under EMCS.

FACR Facility Construction Design Requirements

This area covers standard general facilities engineering and design criteria, practices, guidelines, and related requirements. Specifications and standards related to specific building products and materials are not covered by this area but in the appropriate Federal Supply Class/Federal Supply Group.

FNCL Financial Data

This area covers all financial or dollar data, actual or estimated, for expenditures, forecasts, status accounting, and any other record keeping or data required by contract provisions to be expressed in financial or dollar terms. Other items covered include:

- (1) Documents generated for contract cost reporting, such as the Contract Funds Status Report, Cost Summary Report, Cost/Schedule Status Report, and Cost/Schedule Control Description.
- (2) Documentation associated with the breakdown of contractor tasks into tracking elements, such as work breakdown elements used for contract schedule and cost reporting.
- (3) Documents associated with Design-to-Cost, where cost is a key design parameter, and Life Cycle Cost, which encompasses the cost of development, acquisition, operation, support and where applicable, disposal. Documents include the Design-to-Cost Plan, Life Cycle Cost Report, and Target Price versus Actual Forecast.
- (4) Documents generated as a result of a value engineering program, including documents which set forth a change in contractual documents such as Value Engineering Data Report, Value Engineering Plan, and Task Change Proposal.

FORG Forgings

This area relates to metal forging processes, procedures, and technology.

GDRQ General Design Requirements

This area covers parts control items, design requirements, and interface characteristics for a range of equipment types. Other documents covered are those relating to weight and balance, including mass and properties. Types of documents would be the Mass Properties Control and Management Plan, Status Weight and Balance, Mass Properties Data for Missiles and Aircraft, and Weight Estimates and Reports for Surface Ships.

HFAC Human Factors

This area relates to: (1) the human-interface design and test criteria (space, weight, size, shape, color, texture, visibility, surface temperature, energy emission, etc.) used for the design of military equipments, systems, components and facilities; (2) the human factor engineering program requirements and plans; and (3) human comfort factors for operational environments (sound, light, heat-cold, space, radiation density, force, vibration, acceleration, velocity, stability, etc.).

IPSC Information Processing Standards for Computers

This area relates to computers and data processing devices, equipments, and systems including, but not limited to, character recognition types; input/output media, formats, and labels; programming languages; computer documentation; flow-charts and terminology; character codes; data communications; and input/output interfaces. Also included are documents concerning digital computer components and systems, computer programs, and software and maintenance/user manuals associated with these systems.

MCCR Mission Critical Computer Resources

This area encompasses standards used in mission critical defense computer systems, related software (development environments, support software, application programs, firmware, and data bases), and associated documentation.

MECA Metal Castings

This area covers metal castings produced by a variety of processes and techniques such as: green and dry mold, shell, core, permanent and ceramic mold; expandable pattern; centrifugal, continuous, and iron die casting.

MFFP Metal Finishes and Finishing Processes and Procedures

This area relates to metal finishes and/or processes such as metallic coatings, toxic coatings, and chemical treatments and coatings. It also covers corrosion and corrosion control of metals.

MGMT Management

This area covers data required by the Government to manage, provide visibility, and enforce contractual requirements in the form of record keeping or deliverable products concerning project management milestones, technique, status (excluding financial and technical), milestones, problems, plans, and other data not technically or financially oriented. Documents related to management policies and concepts for particular programs or projects include Master Plan, Procedures for Determining Responsibility of Prospective Contractors, and various progress Status Reports, planning documents, and Program Management Plan. This area also includes documents related to the establishment and maintenance of Government property, i.e., status of condition, deficiency, and inventory. Examples of related documents are GFI Deficiency Report, Support Equipment Delivery, Schedule/Delinquency Report, and Defective Material Report.

MISC Miscellaneous

This area is reserved for those source documents and data item descriptions that cannot, by definition, be assigned to another currently established data functional area.

MNTY Maintainability

This area covers equipment design characteristics related to the ease, economy, and speed of maintenance and repair. Design criteria, analysis methods, prediction, verification, demonstration, and evaluation are subdivisions.

NDTI Nondestructive Testing and Inspection

This area relates to nondestructive testing (NDT) methods of inspection, qualification of NDT equipment and personnel, and reference standards for acceptance inspection. It excludes NDT equipment and accessories.

NUOR Nuclear Ordnance

This area includes standardization documents covering engineering criteria, practices, requirements and items unique to nuclear ordnance due to design, security, quality, storage, safety, or transportability requirements.

PACK Packing, Packaging, Preservation, and Transportability

This area includes packaging, packing, and preservation of defense materiel. Transportability is included whenever transportation requirements are a part of a packaging systems document.

QCIC Quality Control/Assurance and Inspection

This area covers general methods and techniques intended to provide assurance that material, data, supplies, and services conform to established technical requirements and achieve satisfactory performance. This area also covers documents associated with calibration, which controls the accuracy of measuring and test equipment used to assure that supplies and services presented to the Government for acceptance are in conformance with prescribed technical requirements.

RELI Reliability

This area relates to reliability program requirements, reliability analysis and prediction, reliability testing/sampling, and reliability/design application.

SAFT Safety

This area relates to: (1) safety design, test, and demonstration requirements for military systems, equipments, facilities and personnel interfaces; (2) system safety procedures; (3) joint area safety requirements; (4) test range safety; (5) environmental safety; (6) safety equipment; (7) systems safety engineering program requirements and plans; (8) personnel safety procedures; (9) explosive and fuse safety requirements; and (10) occupational safety procedures.

SDMP Standardization and Data Management

This area includes defense standardization and data management program documentation relative to the preparation of military specifications, standards, and data item descriptions. Covers the required programs to control the proliferation of equipment and materials used by DoD standardization to limit item inventories

SLHC Long-Haul Communications

This area establishes uniform engineering criteria in the National Military Command System (NMCS) and in the field of long-haul and point-to-point communications in support of the Defense Communications System (DCS). It also provides the necessary interface with non-DCS equipments that provide technical support for the NMCS, as well as standards for the interface of non-DCS equipments and facilities with the DCS. The SLHC area participates in related military, national, federal, and international standardization activities, as well as TCTS, IPSC, EMCS, and other areas. SLHC standards are published in the MIL-STD-187 and MIL-STD-188-300 series, and common long-haul/tactical (SLHC/TCTS) standards are published in the MIL-STD-188-100 series.

SOLD Soldering

This area covers the processes for making metallic junctions in which the surfaces are joined under elevated temperatures by the surface wetting and subsequent coalescence of liquid solder having a much lower melting point than any of the metals being joined (generally below 426°C; 800°F). Requirements, procedures, and inspection criteria for soldering processes ranging from general fabrication of non-electrical assemblies to soldering electrical and electronic connections are included.

TCSP Technical Support

This area includes technical documentation not encompassed by the MGMT area relating to facilities, cataloging, property control, contractor engineering technical services, and acquisition.

TCTS Tactical Communications Systems Technical Standards

This area establishes engineering criteria for tactical communications; provides a baseline of standards for achieving the objectives of DoDD 4630.5, Compatibility and Commonality of Equipment for Tactical Command, Control and Communications; and assures the necessary interface with Defense Communications Systems equipment.

THDS Screw Threads

This area establishes standards for screw threads and other items associated with the purchase and/or use of interchangeable threaded parts, including basic requirements for the assembly, interchangeability, strengths, and installation/removal torques.

THJM Thermal Joining of Metals

This area is concerned with the thermal joining of metals processes (welding and brazing) but excludes soft (low temperature) soldering (see SOLD area). It includes low temperature brazing (also known as hard soldering or silver soldering). It does not include equipment or accessories.

TMSS Technical Manual Specifications and Standards

This area covers the technical content and format of weapon systems, weapon system components, and support equipment technical manuals used for operation, maintenance, and repair of systems and equipments; training of personnel involved in these activities, as well as administrative and management data such as status reports, validation plans, and schedules relating to technical manuals.

3. Part I of the AMSDL is formatted as follows:

Column 1 - DOCUMENT NR

The number (including changes, revisions, modifications, etc.) assigned as the identification number. DIDs associated with a source document are indented and listed below the document numbers. For source documents of the Navy's Strategic Systems Project Office (SSPO) that contain data requirements but have no approved DIDs, the data requirements will be indicated by an asterisk (*) and limited to SSPO use only until such time as DIDs are prepared.

NOTE: Numbers within parentheses at the end of specification document numbers are amendments. Notice numbers are given at the end of standard document numbers. The document's date, title and OPR are those of the indicated amendment or notice. A notation of (C) or (S) in the left margin next to the document number indicates that the document is classified Confidential or Secret.

Column 2 - TITLE

Self-explanatory.

Column 3 - OPR

This identifies the DoD component functioning as Office of Primary Responsibility for the source document and/or DID.

Column 4 - APPROVAL AMSC

The AMSC number is a five-digit, alpha-numeric control number assigned to a source document and to DIDs. The first digit represents the DoD component originating the source document or DID as follows:

| | |
|---------------|----------|
| A - Army | K - DCA |
| B - DMA | L - DLA |
| D - OSD | M - USMC |
| F - Air Force | N - NAVY |
| G - NSA | S - DLA |
| H - DNA | |

Column 5 - DOCDATE

Approval date of the document.

PART II
NUMERICAL LISTING OF DATA ITEM DESCRIPTIONS

1. This part of the AMSDL contains a numerical listing of DIDs, and is formatted as follows:

Column 1 - DID NUMBER

See Section C for explanation.

Column 2 - TITLE

Self-explanatory

Column 3 - OPR

Same as in Part I, Column 3.

Column 4 - APVL AMSC

Same as in Part I, Column 4.

Column 5 - APVL DATE

The date the DID was approved
(cleared) for use in contracts.

Column 6 - SOURCE DOCUMENT NUMBER

Same as in Part I, Column 1 (Document
Number) (NOTE: Some DIDs have multiple-
source documents; however, only
the first document entered in the data
base will be noted in this column.)

PART III
KEYWORD INDEX OF DATA ITEM DESCRIPTIONS

1. This part of the AMSDL contains a listing of DID titles sorted by keywords within the titles. The keyword for each line item can be found near the center of the page. In order to assist in the identification of DIDs, this part purposely contains duplication of titles, for example:

PLAN, CONFIGURATION AUDIT
PLAN, CONFIGURATION AUDIT
PLAN, CONFIGURATION AUDIT

NOTE: The AMSDL data base contains an exception word list to eliminate what are considered to be "non-keywords" (e.g., acronyms and such words as "and" and "for").

2. This part of the AMSDL is formatted as follows:

Column 1 - TITLE

Column 2 - DID NR

The DID number, explained in Section C, or asterisk (*), as explained in Part I, Column 1.

Column 3 - SOURCE DOCUMENT NR

Same as in Part II; however, if there are two or more source documents for a DID, the entry shall read "MULTIPLE."

**PART IV
CANCELLED/SUPERSEDED LIST**

1. This part contains a numerical listing of DIDs which have been cancelled or superseded. This section is formatted as follows:

Column 1 - DID NUMBER

Column 2 - OPR

Column 3 - STATUS

Reflects current document that has superseded the document listed in column 1. The entry "CANCELLED" is used when there is no replacement document.

Section C

DATA ITEM DESCRIPTION NUMBERING SYSTEM

1. DIDs Cleared and Listed Prior to 1 July 1985.

DIDs cleared and listed in the AMSDL prior to 1 July 1985 were assigned to a Functional Category as follows:

A---Administrative/Management
E---Engineering and Configuration Documentation
F---Financial
H---Human Factors
L---Logistics Support
M---Technical Publications
P---Procurement/Production
R---Related Design Requirements
S---System/Subsystem Analysis
T---Test
V---Provisioning

The single alpha character following "DI" represents the Functional Category. Following the alpha character is a four- or five-digit number. Revisions are indicated by an alpha character suffix, e.g., DI-M-1514A. Upon revision of a DID on or after 1 July 1985, a new number will be assigned to each revised DID using the functional area assignments identified in Section B, per paragraph 2 below.

2. DIDs Cleared and Listed* on or after 1 July 1985

Beginning 1 July 1985, DIDs have been assigned identification numbers by the Chief, Plans and Policy Division as follows: "DI," followed by a four-letter designator representing the functional area assignment identified in Section B, followed by a five-digit number. Revisions are followed by an alpha character suffix, e.g., DI-MISC-80000A. Revisions are also assigned by the Chief, Plans and Policy Division.

* One-Time DIDs: Numbers for one-time DIDs shall be assigned by the data management focal points of the individual DoD Services and Agencies. These documents will not be listed in the AMSDL, nor will they be printed and maintained by DODSSP, PA. One time DID numbers are assigned as follows: "OT" followed by the last two digits of the current year "93", followed by a 5 digit number assigned to your Service or Agency, e.g., OT-93-75000.

Section D

AVAILABILITY OF AMSDL AND DID'S LISTED THERIN

1. HOW TO ORDER THE AMSDL OR INDIVIDUAL DID'S

All orders for documents must be made by FAX or Mail at this time. Fax your credit card orders to : (215) 697-1462. Check or money orders must be drawn on a US bank and mailed to:

DODSSP
Building 4/Section D
700 Robbins Avenue
Philadelphia, PA 19111-5094

Please be sure to include payment with every mail order, checks and money orders should be made payable to :
DAPS, Philadelphia

2. PRICING POLICY

All of our DODSSP customers in the federal sector, State, municipal and foreign customers, all of our commercial customers in the private sector, may purchase DODSSP products at the prices published on our current order forms, in any quantity you desire.

Although prices are subject to change, advance notice of any impending price changes will appear on our product order form (DAPS-Phila 5270/5 - 1/97) is provided at the end of this publication and on our DODSSP Website (<http://www.dodssp.daps.mil>).

Cost for all active and inactive paper documents is \$.09 per page (one side). The minimum DODSSP order is \$5.00 (for any order up to 55 pages). The current DODSSP Specification and Standards or DID's Order form (DAPS-Phila 1425/7 - 1/97 is provided at the end of this publication.

3. PAYMENT OPTIONS

The DODSSP accepts payment by check, money order, Visa and Master Card (including the Governmentwide Visa Purchase Card). If you choose to make payment by credit card, you must include your credit card number and expiration date with every order.

4. DODSSP SPECIAL ASSISTANCE/CUSTOMER SERVICE

We encourage you to call our Customer Service staff with your questions or concerns, or simply to provide you with accurate document page-counts for your orders. The DODSSP Special Assistance/Customer Service Desk number is: (215) 697-2667/2179.

5. AUTOMATIC DISTRIBUTION/SUBSCRIPTION SERVICE DESK

All new and revised issuances of DID's and the AMSDL will automatically be distributed to all DOD/Military activities appearing on the automatic distribution list maintained by the DODSSP. Any changes to requirements or addresses should be directed to the Subscription Service Desk. Private sector or other Government agencies must submit payment for DID's (\$25.00) or complete sets (\$150.00) when ordering. Anyone subscribing to update will not receive documents printed previous to their effective subscription date. Request for DID's prior to subscription must be requested in accordance with the information provided in note number 2 above.

6. COMPLETE SETS OF DID'S

Complete sets will only be printed two times a year according to the following schedule. Orders will be accepted and held until the next printing date.

1 April

1 October

Questions regarding automatic distribution can be directed to the Subscription Service Desk (215) 697-2569 or fax your comments to (215) 697-1462.

Visit our new site for late breaking DODSSP news, new product announcements, downloadable order forms... and soon, on-line ordering!

DODSSP Website: <http://www.dodssp.daps.mil>

All our customer service representatives are available between 7:30AM and 4:00PM (EST) Monday thru Friday.

Section E

MAINTAINING THE AMSDL

1. ISSUANCE.

The AMSDL is issued twice a year, in April and October. Each issue supersedes the previous issuance in its entirety. Section D contains information regarding ordering or subscribing to the AMSDL and the documents listed therein.

2. MANAGEMENT OF THE AMSDL.

The AMSDL is managed by the Office of the Deputy Under Secretary of Defense for Logistics under the DoD Technical Data Management Program. Mrs. Linda Fowble is focal point in the Office of the Secretary Defense for the Technical Data Management Program. She is also the DoD AMSDL Clearance Officer. You can contact Mrs. Fowble as follows:

Mrs. Linda Fowble
ODUSD(L) CALS
5203 Leesburgh Pike, Suite 1609
Falls Church, VA 22041-3466

FAX: (703) 681-5682 edress: burghels@acq.osd.mil

Section F

DATA MANAGEMENT FOCAL POINTS

Each military service and agency has designated one or more data management focal points to oversee and implement DoD data management policies and procedures applicable to their organization. Questions related to data policies and procedures should be addressed to the following data management focal points, as appropriate.

Army Activities

Policy and DID Approval

Headquarters
U. S. Army Materiel Command
Office of the Deputy Chief of Staff
for Research, Development and Acquisition
5001 Eisenhower Avenue
Attn: Jack R. Millett
Alexandria, VA 22333-0001

Phone: (703) 617-5136
DSN: 767-5136
FAX: (703) 617-8256
Edress: jmillett@alexandria-emhl.army.mil

Navy Activities

Policy and Final DID Approval:

Commander
Naval Inventory Control Point - Philadelphia
CODE-0713.12, Mr. Gary Gaines, Jr.
700 Robbins Avenue
Philadelphia, PA 19111

Phone: (215) 697-3231
DSN: 442-3231
FAX: (215) 697-5047
Edress: herman_gaines@icpphil.navy.mil

Navy DID Processing:

Commander
Naval Air Systems Command
AIR 1.3.3A, Ms. Jackie Mercer
1421 Jefferson Davis Highway
Arlington, VA 22243-5201

Phone: (703) 604-2525 ext. 8802
DSN: 664-2525 ext. 8802
FAX: (703) 604-2973
Edress: mercerjy.ntrprs@navair.navy.mil

Commander
Naval Facilities Engineering Command
Code: 151, Mr. Ford Chinworth
200 Stovall Street
Alexandria, VA 22332

Phone: (703) 325-8943
DSN: 221-8943
FAX: (703) 325-4450
Edress: fechinworth@hq.navfac.navy.mil

Commander
Naval Sea Systems Command
Code: 04322, Ms. Donna Johnson
