13. ABSTRACT *(Maximum 200 words)*

This publication is the second of two volumes of an alphabetically arranged, compilation of corporate author names used by the Defense Technical Information Center in the DTIC database system. Each source name is assigned a 6-digit numeric code for computer input and retrieval purposes plus a 4-digit alphanumeric geopolitical code and an alphanumeric type code. Source names displayed are included as data elements in the Technical Report, Technical Effect and Management System and Independent research and Development databases maintained by DTIC.

PREFACE

The Source Header List provides the corporate author names used by the Defense Technical Information Center (DTIC) in its Technical Report (TR), Technical Effect and Management System (TEAMS), and Independent Research and Development (IR&D) databases as of 1 July 1998. It is arranged in two alphabetical volumes (A-K and L-Z), with subordinate divisions or organizations listed alphabetically under the primary organization's name.

The *Source, Geopolitical* and *Type* Codes are listed in tabular format to the right of the *Source Name*. A brief explanation of their format is:

- *Source Code* - an unique six-digit number generated by DTIC that represents the corporate name for input and retrieval in automated systems.
- *Geopolitical Code* - a two or four-digit alpha or numeric code that represents the geographical location of the Source. The first two characters represent the country, state or geographical area location; the last two, if present, the U.S. Congressional District.
- *Type Code* - a one-digit alpha or numeric code that represents the type of the Source responsible for the report (code list provided on the following page).

For further information on, or comments about, this publication, please contact the Information Support Branch.

Prepared under the Direction of:

GOPALAKRISHNAN G. NAIR
Chief, Information Support Branch

Approved by:
