OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist the Longhorn Army Ammunition Plant (LAAP) in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for the LAAP began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Texas Archaeological Research Laboratory (TARL) at the University of Texas, and at the Texas Historical Commission, both located in Austin, Texas. The records search was performed in March 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 Summary letters are enclosed for each of these tribes (Appendix I), as well as a listing of the current tribal chairperson (Appendix II).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT LAAP

Archaeological investigations on lands currently occupied by the LAAP started in 1935. These investigations have been continued by various individuals or institutions up through the present. This report, however, will only address those investigations which occurred after the U.S. Army took possession of the land in 1941 (a brief summary of prior investigations has been included in Appendix VI). Beginning in 1968, four groups performed archaeological investigations that included the collecting of artifacts:

Geo-Marine Inc., Plano, Texas
Southern Methodist University, Dallas, Texas
Texas Archaeological Research Laboratory (TARL), University of Texas,
Austin, Texas, and
U.S. Army Corps of Engineers, Fort Worth, Texas.

A fifth investigator, Archaeological Assessments, Inc. of Nashville, Arkansas, made no artifact collections, but produced a sizeable amount of documentation resulting from a historic cemetery survey.

Investigations consisted of systematic surveys, test excavations, and excavations to mitigate adverse effects on sites where necessary for the installation's mission.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

At present, an unknown volume of boxed artifactual materials and associated documentation has been identified for the LAAP. The artifacts recovered include historic materials such as glass, ceramics, metal, cement, brick, animal bones, seeds, wood, and foundation stones. Prehistoric artifacts included stone waste flakes, stone tools, fire-cracked rock, ceramics, and animal bone.

The attached *Summary of Current Locations of Archaeological Collections from Longhorn Army Ammunition Plant* (Appendix III) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have

been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well. Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

As of the date of this report, Longhorn AAP collections have been identified at a single repository: TARL, University of Texas, Austin, Texas. An unknown quantity of recently submitted Army-owned collections from Geo-Marine Inc. have not yet been processed by TARL, and until these objects have been officially inventoried and accepted for curation, the volume of materials is unknown.

Collections Not Located

Archaeological Assessments Inc. has not yet been able to locate the documentation resulting from a historic cemetery survey conducted on the LAAP in 1984, although the records are believed to be at their office in Nashville, Arkansas. The repository listed on the official archaeological site forms, Northwestern State University, Natchitoches, Louisiana, has no record of ever receiving the materials in question.

Additionally, Southern Methodist University (SMU) conducted an investigation in 1968 at the LAAP (cited by Heartfield and Dieste 1985). Current staff at SMU could find no records or collections related to this survey and there are no site forms on file at the official records centers at TARL or at the Texas Historical Society. Sue Linder-Lindsey, the collections manager at SMU, stated that prior to 1970, it was not an uncommon practice for the investigating archaeologist to retain survey results, including any artifacts collected (telephone conversation 14 August 1995).

NAGPRA Related Materials

No human remains, funerary objects, sacred objects or objects of cultural patrimony have been identified in the records for these collections. The final determination of sacred objects or objects of cultural patrimony may be established by the associated Native American tribes (if determined to be culturally affiliated and the objects meet the definitions and restrictions specified in NAGPRA) upon further deliberation.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Three sets of references regarding archaeological work conducted on the LAAP are attached: Appendix IV contains the list of references reviewed by the MCX during its archival research; Appendix V is the list of references contained in the National Archeological Data Base (NADB). Appendix VI also contains a brief summary of work conducted on LAAP land prior to its purchase by the U.S. Army.

NATIVE AMERICAN TRIBES ASSOCIATED WITH LAAP

According to Waldman (1988:33-34), the Caddo exclusively inhabited the area presently occupied by the Longhorn AAP. He defines the Caddo territory as stretching from the Red River Valley in Louisiana to the Brazos River in Texas and Arkansas. This information is further verified by Hudson (1976:5-6, Map 1), and the Indian Land Areas Judicially Established 1978 map (U.S.G.S. n.d.).

The Caddo are a federally recognized tribe.

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed is a draft NAGPRA Section 6 Summary letter (Appendix I) and a list of the tribal chairpersons from the federally recognized tribes which may be culturally affiliated with the collections (Appendix II).

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER FOR LONGHORN ARMY AMMUNITION PLANT, TEXAS

[Installation Header]

Noah Frank, Chairperson
Caddo Tribal Council
P.O. Box 487
Binger, OK 73009

Dear Mr. Frank:

I am writing to inform you of collections held by Longhorn Army Ammunition Plant (LAAP) that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Caddo. LAAP has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

LAAP is responsible for collections generated from surveys and/or excavations conducted from 1968 to the present. The collections consisted of both historic and prehistoric materials. Historic collections included glass, ceramics, metal, seeds, wood, brick, cement, and foundation stones. Prehistoric collections included a variety of stone tools, stone waste flakes, ceramics, and animal bone. No human skeletal remains or associated funerary objects were identified in our review of the collections documentation.

We are notifying the Caddo because some of these materials were found in the area thought to be part of the territory occupied or used aboriginally by the Caddo. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC] regarding any of these issues at [telephone number, address].

To facilitate discussions between the LAAP and the Caddo on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM LONGHORN ARMY AMMUNITION PLANT, TEXAS

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

- REPOSITORY:** The current location in which the collection is stored, as of the date of this report.
- REPOSITORY POC:** The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
- TELEPHONE:** The telephone number for the repository POC.
- COLLECTION ID:** The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
- SITE NUMBERS:** The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
- FIELDWORK DATES:** The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.
- EXCAVATOR/COLLECTOR:** The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

Summary of Current Location of Archaeological Collections F:

As of July 1995

Repository	Repository POC	Telephone	Collection ID	Site Numbers	Fieldwork Dates	Excavator
Northwestern State University, Natchitoches, Louisiana or at Archaeological Assessments, Inc., Nashville, Arkansas	Dr. Gregory	(318) 357-4364	Historic Cemetary Survey LAAP	41HS270	Mar 7, 1984	Jack Benn

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.

APPENDIX VI

PRE-ARMY SUMMARY OF INVESTIGATIONS FOR LONGHORN ARMY AMMUNITIONS PLANT, TEXAS

Two pre-army cultural resource surveys were conducted on land currently occupied by Longhorn AAP that included the collecting of artifacts. These investigations were conducted by:

1. Edward F. Neild of Shreveport, Louisiana, in 1935, and
2. Ford, at the Mississippi Department of Archives, Bureau of American Ethnology, Smithsonian Institution, Washington, D.C., in 1936.

Mr. Neild has the 1935 collections in his possession, and the 1936 collections made by Ford are at the Louisiana State University, Baton Rouge, Louisiana (Heartfield & Dieste 1985). The contents of these collections are unknown.
