[Go To Best Hit]

The RADFAG is a passive reflector range that uses **corner reflectors** and Luneberg lenses to test and evaluate forward-looking and side-looking radar systems. The South RADFAG is located on Buckhorn Lake approximately 6-miles southwest of the main base runway 04/22.

The south range includes 6 square arrays, each consisting of 16 **reflectors**, and 6 L-shaped arrays, each consisting of 9 **reflectors**. An assortment of other **corner reflectors** and Luneberg lenses is available for installation to simulate a tactical situation or to satisfy a wide variety of flight test requirements. Other than the **reflectors**, there are no metal parts to cause extraneous signal returns. Subsonic and supersonic runs can be permitted from ground level to unlimited altitudes over the entire range.

The North RADFAG Facility is a passive radar **reflector** array consisting of 80 trihedral **corner reflectors** enclosed in an area 6,000 feet square. Mounted directly in the array center, surveyed to first order and tied to the Contraves cinetheodolite survey network, is an omni-directional **quadrilateral reflectors** used to navigate on the array. The array is located in the northwest **corner** of the Edward's AFB reservation.

**Description:** An investments needs derivation process as practiced at the Air Force Flight Researcher (AFFTC), Edwards AFB, California. The proposed mission of the AFFTC Long Range Technology Planning Process is to: Develop, implement, and use an integrated, continuous process to technical requirements for long, medium, and short term strategic planning. Overall guidance from the AFFTC Strategic Action Plan 3-1, Technology Superiority in T&E.

**Purpose:** This model describes the AFFTC Long Range Technology Planning Process in terms

5000.2-R Change Three

# Department of Defense REGULATION

NUMBER 5000.2-R

**SUBJECT:** Mandatory Procedures for Major Defense Acquisition Programs (MDAPs) and Major Automated Information System (MAIS) Acquisition Programs

**REFERENCES**

- (a) DoD Directive 5000.1, "Defense Acquisition," 1996
- (b) Additional references, see endnotes

**A. REISSUANCE AND PURPOSE**

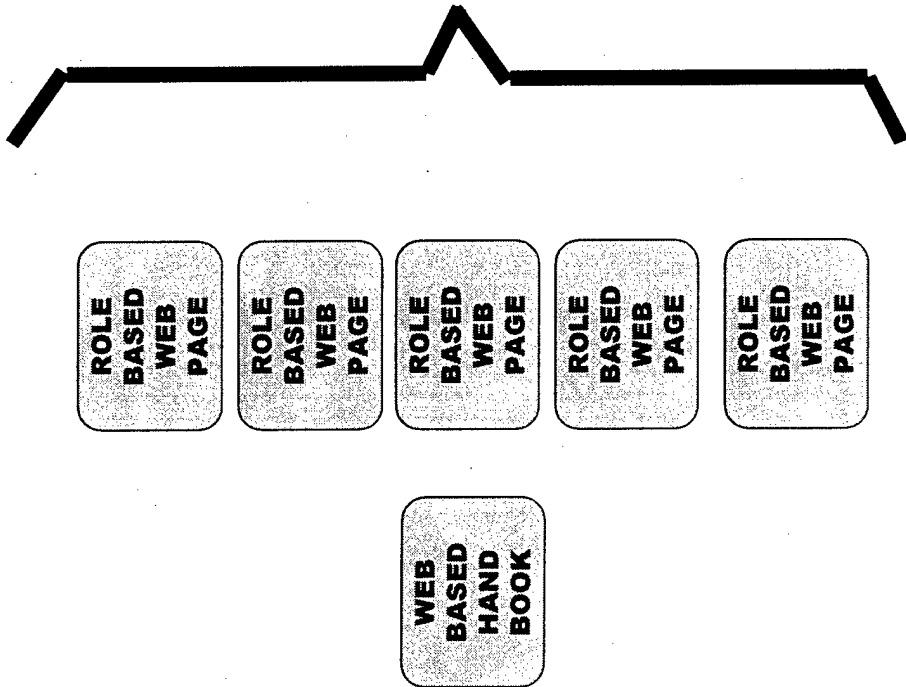

This Regulation:

- 1. Establishes a simplified and flexible management framework for translating mission needs into stable, affordable, and well-managed MDAPs and MAIS Acquisition Programs;
- 2. Sets forth mandatory procedures for MDAPs and MAISs and, specifically where stated, for other than MDAPs or MAISs

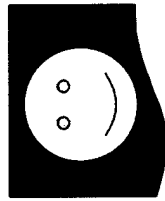

2. Same as a special model for other than MDAPs or MAISs.
