SUMMARY

The entry into force of the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction (referred to as the Chemical Weapons Convention, or CWC) on 29 April 1997 is the most significant arms control event of 1997. From a total of 168 signatory states, a total of 106 instruments of ratification have been deposited with the Secretary-General of the United Nations as of January 3, 1998. In accordance with the provisions of paragraph 2 of Article XXI, the Convention will enter into force for a state party 30 days after the date of deposit of its instrument of ratification.

The Conference of the States Parties is composed of all members of the Organization for the Prohibition of Chemical Weapons (OPCW) and is the principal organ of the Organization. The First Session of the Conference was opened by the Secretary-General of the United Nations, in his capacity as Depositary of the Convention, on 6 May 1997. A total of 80 States Parties participated in the Conference. The Conference established the following subsidiary organs: Committee of the Whole; General Committee; Credentials Committee; and Commission on the Settlement of Disputes Relating to Confidentiality.

The Second Session of the Conference took place in The Hague, the Netherlands, from 1-5 December 1997. A total of 82 States Parties, for two of which the Convention entered into force during the Second Session of the Conference (Islamic Republic of Iran and the Russian Federation), participated in this session. In accordance with Rule 30 of the Rules of Procedure of the Conference, representatives of the following non-signatory States were granted observer status: Botswana, and Libyan Arab Jamahiriya. The International Atomic Energy Agency, the International Bureau of the Permanent Court of Arbitration, the International Narcotics Control Board, and the United Nations Development Programme attended the Conference in accordance with a decision dated 1 December 1997. Eight non-governmental organizations (NGOs) and research institutes attended this session of the Conference in accordance with that same decision.

In the decades of negotiations, final completion, signature, ratification, and entry into force of the CWC, official and unofficial publications have been generated by US government; other governments of the States Parties; US and foreign military agencies; domestic and international technical, scientific, political, and humanities experts; and the OPCW. The type of publications range from formal and informal technical research, development, test and engineering (RDT&E) reports to open literature papers, articles, and fact sheets. The Chemical Warfare/Chemical and Biological Defense Information Analysis Center (CBIAC) has been collecting this treaty-related information for the past nine years.

It is impossible to gather every scrap of written, videographic, and audiographic information that has been produced during the long negotiating, signature, and ratification period for the CWC, however, the CBIAC strives to compile, review, catalog, abstract, and keyword a large quantity of chemical weapons treaty documentation. The focus of this annual supplement to the primary two-volume publication dated March 1994 entitled Chemical Weapons Treaty Technologies Reference Collection. Volume 1: Bibliography, and Volume 2: Keyword Index (DNA-TR-94-144-V1 and DNA-TR-94-144-V2), are the publications resulting from entry into force of the CWC; and the continuing RDT&E for verification technology, inspection equipment and instrumentation, implementation legislation, inspection methods and costs, monitoring of treaty compliance, and identification/detection of non-compliant behavior.

PREFACE

This report was prepared for the Defense Special Weapons Agency (DSWA) under contract number SPO900-94-D-0002, Task 27, under the auspices of the Chemical Warfare/Chemical and Biological Defense Information Analysis Center (CBIAC). The principal investigator for this effort was Ms. Jeanne M. Rosser.

The CBIAC continually collects, reviews, indexes abstracts analyzes and catalogs chemical weapons treaty technologies references as part of the scope of its operations. In the future, new editions and additional supplements to this reference collection will be available.

SECTION 1

INTRODUCTION

The Chemical Weapons Convention entered into force on 29 April 1997, 180 days after the deposit of the 65th instrument of ratification. At that time, the Organisation for the Prohibition of Chemical Weapons (OPCW) was established in The Hague to be responsible for the implementation of the Chemical Weapons Convention. The OPCW initially employed more than 300 staff of whom more than 100 will be members of the Inspectorate. A considerable increase in staff strength was realized approximately six months after the effective date of the Convention.

The Conference of the States Parties (CSP) is the principal body of the Organisation. It is composed of all members of the OPCW, i.e., of all the States Parties. The CSP meets in regular sessions on an annual basis. Special sessions can also be convened. The First Session was on 6 May 1997 in The Hague, Netherlands. During the sixth and eleventh years after entry into force of the Convention, the Conference of the States Parties will review the operation of the Convention.

The Executive Council has the day-to-day responsibility for supervising the activities of the OPCW. It consists of 41 representatives elected for two-year terms selected from among the Member States. The allocation of seats is based on geographical quotas to ensure an equitable geographical distribution. The importance of the chemical industry and political and security interests will be given meaningful attention.

The Technical Secretariat has the primary responsibility for carrying out the activities mandated by the Convention. These responsibilities include: carrying out the verification activities the Convention mandates; providing assistance if chemical weapons are used; supporting the Conference and the Executive Council; and communicating on behalf of the OPCW.

The Director-General is the head and chief administrative officer of the Technical Secretariat. He or she will be appointed by the Conference of the States Parties for a term of four years, renewable once only. The Director-General will establish a Scientific Advisory Board, consisting of independent experts. This Board will provide specialized advice in areas of science and technology of importance for the Convention.

SECTION 2

PURPOSE

The Chemical Weapons Treaty Technologies Reference Collection serves as a resource for government agencies and other investigators interested in CW treaty verification technologies. It includes an extensive array of documents (with classifications up to the level of Secret) from national and international sources including government research centers, laboratories, treaty organizations, universities, foundations, private industry, and the open literature.

The bibliography is a dynamic document. Updates and additions will continue to be published as documents are identified and acquired by CBIAC. These updates and additions will be published as supplements to the primary two-volume publications dated March 1994 entitled Chemical Weapons Treaty Technology Reference Collection, Volume 1: Bibliography, and Volume 2: Keyword Index (DNA-TR-94-144-V1 and DNA-TR-94-144-V2).

The nature of the treaty verification technology, that is, the constant search for more efficient and accurate means of compliance monitoring is the driver that produces new technology and documentation of that technology. It is the purpose of this Chemical Weapons Treaty Technologies Reference Collection to provide up-to-date references for this technology, as well as the establishment and implementation activity references related to the ratification, entry-into-force, and implementation of the CWC.

This supplement to the reference collection includes, in its focus, documentation from the OPCW and Conferences of the States Parties, commentary and reactions to entry-into-force of the CWC, lessons learned regarding various existing verification technologies, and new technologies found to be effective for treaty verification.

SECTION 3

SCOPE

In 1990, the Chemical Warfare/Chemical and Biological Defense Information Analysis Center (CBIAC) established a Chemical Weapons (CW) Treaty Verification Technologies Reference Collection under the sponsorship of the Office of the Assistant Secretary of Defense, Atomic Energy, Chemical Matters [OASD(AE)(CM)]. The initial collection, part of the CBIAC repository for pertinent references and documentation currently available on chemical and biological warfare, totaled over 850 distinct citations. Updates in 1991 and again in 1992 provided 163 additional citations, and expanded the total to 1,013 citations.

In 1994, under the sponsorship of the Defense Nuclear Agency (now Defense Special Weapons Agency), a major update to the collection raised the total citations to 1,470. The 1994 reference collection was divided into two volumes. Volume 1, Bibliography, contained an alphabetical (by author, and if no author by title) list of documents related to the chemical weapons treaty. Volume 2, Keyword Index, contained a list of keywords (in alphabetical order), and corresponding CBIAC document accession numbers for each individual keyword; and a list of bibliographic citations in CBIAC document accession number order.

A supplement in 1995 added 225 new citations to the bibliography for a total of 1,695 citations; and in the 1996 supplement added 362 new citations for a total of 2,057 citations. This 1997 supplement contains 684 new citations for a new total of 2,741. Each citation contains the title, author, corporate author, publication date, and report numbers of the document; these citations are listed in CBIAC Number order in Appendix A.

The usefulness of this collection depends on its currency and completeness. In order to ensure that the collection contains all available relevant material, agencies are urged to provide a copy of any reports they produce on the subject of CW treaty verification compliance to the CBIAC at the following address:

SECTION 4

INDEXING AND ABSTRACTING

The language of the CWC is complex and detailed. A broad new range of terminology has been spawned from this instrument. In an effort to categorize, sort, and assemble mini-reference collections within the treaty reference collection, extensive descriptive keywording was performed on all of the new acquisitions, and on many of the references collected in previous editions.

Each bibliographic reference in the Chemical Weapons Treaty Technologies Reference Collection corresponds to a full bibliographic citation in the CBIAC Bibliographic Database (BD). A CBIAC BD citation contains the title, personal authors, distribution statement and availability, date of publication, report numbers, level of classification, contract numbers, corporate author, number of pages, keywords, an abstract, and a CBIAC document accession number. Information on how to gain access to the CBIAC BD is provided in Section 5.

The comprehensive keyword index (Appendix B) lists the CBIAC document accession number of each reference that was assigned a specific keyword. The user of this bibliography may then look-up the specific bibliographic reference in Appendix A using the CBIAC accession number.

SECTION 5

CBIAC BIBLIOGRAPHIC DATABASE ACCESS

In addition to the 2,741 treaty citations, the CBIAC BD has over 50,000 document citations relating to all areas of chemical and biological warfare/defense including, but not limited to, the following: Chemical and Physical Properties; Chemical Identification; Environmental Fate and Effects; Medical Effects and Treatment; Toxicology; Warning and Identification; Individual and Collective Protection; Decontamination; NBC Survivability; Combat Effectiveness; Smoke and Obscurants; Demilitarization; International Technology, Proliferation and Control; Defense Conversion and Dual-Use Technology Transfer; and Analysis of Manufacturing Processes for NBC Defense Systems. About 30,000 of the documents cited in the CBIAC BD are located on the premises of the CBIAC.

Access to this on-line, menu driven, computerized database is available to US Government agencies and their contractors via the Internet (World Wide Web) and is free of charge. All that is needed to access the CBIAC BD is a personal computer with an encryption capable web browser (i.e., Internet Explorer 3.0™ or Netscape 3.0™), and a user name/password. Anyone wishing to gain access to the CBIAC BD should complete the interactive Application Form for Database Access which can be found on the Internet at the CBIAC Home Page. The URL for the CBIAC Home Page is:

<http://www.cbiac.apgea.army.mil/>

The form can be found under the heading "Interacting with the CBIAC", selection 1, "Request Forms". Upon receiving the completed form and verifying eligibility for access, the CBIAC will issue a user name and password.
