DEPARTMENT OF DEFENSE BASE STRUCTURE REPORT

I. INTRODUCTION

America's security depends on quality defense installations and facilities being readily available and capable to support current and future military requirements. This mission essentiality dictates that our installations must be in the right location, be the right size and provide the right type of facilities to support a premier military force. While defense facilities provide the framework for our national defense, the military and civilian professionals who occupy these locations provide the backbone. We are committed to providing a base structure to enhance mission capability, morale, and quality of life, which in turn will enhance combat readiness. Critical to managing a base structure is knowledge of the specific details about the location, size and replacement cost of current facilities.

However, managing the data from an infrastructure as large as all of the Defense sites and properties can be complicated. The Defense Department is the world's largest "landlord," with a physical plant consisting of over 845,441 buildings, structures and utilities. These facilities sit on land either owned or leased to the Department covering over 30 million acres. Not all Defense Department sites are even similar in physical characteristics; they vary widely in the number of assigned personnel and the amount of property controlled. Sites range from small unmanned navigational aids sites of less than one-half acre to the Navy's multiple installations at Norfolk, Virginia with over 71,000 employees and the Army's White Sands Missile Range in New Mexico which encompasses over 3.6 million acres.

II. CONTENT AND ORGANIZATION

This Base Structure Report is not designed to detail every possible aspect of the DoD infrastructure, but rather provide a basic understanding of the scope of the DoD physical plant as it existed at a single point in time (as of September 30, 2000). **(NOTE: For this report only, all Army data is as of March 31, 2001, due to some important changes made after the September 2000 close-out date. Future versions of this report will align the Army with the same date as the other Services.)** For practicality of use, this report only includes specific information on those sites meeting predetermined size and value criteria. Each listed site must be larger than 10 acres **AND** have a Plant Replacement Value (PRV) greater than \$10 million. To ensure comprehensiveness, other sites are summarized as a total by Service and State. For the purpose of this report, each entry is defined as a site, in the United States or its territories. Since DoD sites extend beyond the United States or its territories, foreign locations are included in the report as well. However, since land is not typically owned by the United States in other countries, the **ONLY** criterion for inclusion of foreign sites is a PRV exceeding \$10 million. The overall report is organized by first Military Service, then broken out by State. The report includes

the site name, the component (Active, Guard or Reserves), the name of the nearest city, zip code, primary phone number (where possible), the number of buildings owned and leased, total acres owned by the Services and the total acres used, the PRV (in \$millions) and the authorized number of military, civilian, and other personnel. The PRV represents the reported cost of replacing the facility and its supporting infrastructure using today's construction cost (labor and material) and standards (methodologies and codes.) Other personnel include any non-appropriated employees, government contractors (if identified) or foreign nationals performing work on the base. At the end of each State list, there is a separate category titled "Other". This category includes the combined total for all other sites in the State occupying less than 10 acres and/or with a PRV of \$10 million or less.

CRITERIA FOR EACH SITE LISTED IN THE BASE STRUCTURE REPORT

SITES IN THE UNITED STATES OR ITS TERRITORIES MUST SATISFY BOTH OF THESE CRITERIA TO BE INCLUDED IN THE MAIN BODY OF THE REPORT:

- **CONSIST OF MORE THAN 10 ACRES, OWNED OR TOTAL**
- **HAVE A PLANT REPLACEMENT VALUE GREATER THAN \$10 MILLION**

FOREIGN SITES MUST ONLY SATISFY THE FOLLOWING CRITERION TO BE IN THE MAIN REPORT:

- **HAVE A PLANT REPLACEMENT VALUE GREATER THAN \$10 MILLION**

The information in this report contains a summary of the facility records from each Service's real property inventory on October 1, 2000. Adjustments were made to this information for use in the Facilities Sustainment and other forecasting models. The Service's real property inventories contain data on all owned and in-leased properties; therefore, this report includes information on properties no longer in use but awaiting permanent disposal.

III. DATA SOURCES AND DEFINITIONS

The facility data included in this report was directly extracted from the native Services' real property inventories; i.e., Army - HQ Army Integrated Facilities System (IFS), Navy - Navy Facilities Assets Database (NFAAD), and the Air Force's Real Property Asset (RPA) database. As mentioned above, this report does not intend to replicate the Services' databases by including every single data element or every single record included in those databases. Instead, this report provides a composite view of a percentage of the Department's installations, i.e., those meeting the criteria outlined in the previous paragraph. Anyone using this report needs to

understand that the level of detail provided here will not answer all questions pertaining to base structure. The Service databases contain a multitude of other data elements that are pertinent to facilities, but not directly related to this report. The data elements selected for inclusion in the Base Structure Report are common elements that should answer most ordinary questions. When using this report also be aware that the individual Service real property inventories will often contain a property record for a facility or site long after it may be thought to be transferred to another organization, due to legalities involved in officially transferring deeded property. Requirement models based on these records must account for these time lags.

An explanation of criteria used for each column is shown below to more accurately define the constraints applied to each category. However, it is also important to understand several other general criteria applied to this report. Personnel data broken down to the level of detail shown in this report was not readily available from a single source, so information was collected from multiple sources to include the Defense Manpower Data Center and the individual Services manpower or personnel databases. Since personnel totals reflected in this report are shown as they relate to individual sites or locations and attempt to show all personnel regardless of Service affiliation, totals should not be confused as necessarily representing individual Service total strength. Detailed personnel questions should be addressed to the appropriate Service manpower or personnel offices. For the purpose of this report, individual site location information for Air Force missile sites was rolled up to the appropriate one of seven parent installations (Davis-Monthan AFB, Ellsworth AFB, F.E. Warren AFB, Grand Forks AFB, Malmstrom AFB, Minot AFB and Whiteman AFB). In the case of F.E. Warren AFB, those missile sites located in Nebraska and Colorado were counted as part of the parent installation total for the state of Wyoming.

EXPLANATION OF COLUMNS

SITE: Indicates the installation or site name as depicted in the Services' databases. This is based on the Services' Installation Number (Army and Air Force) or Unit Identification Code (Navy and Marine Corps). The notation "multi-sites" shown after a site name indicates the parent unit is located in another state, so the data shown only reflects those facilities in the listed state.

COMPONENT: Designates the primary component owner/reporter of a site or installation, either Active, Guard or Reserve. **NOTE:** For the Navy, this column is also used to designate those sites in caretaker status pending some type of further action. This action may be a pending closure, realignment or remaining in a dormant state.

NAME NEAREST CITY: Identifies the name of the nearest city of reasonable size.

ZIP CODE: Identifies primary Postal Code associated with the site or installation. Many large installations may have multiple postal codes, though only one is shown for this report.

PHONE NUMBER: Identifies a local phone number when available. In some cases, a central locator number was used or, for others, the Public Affairs office number was listed instead.

BLDGS OWNED: Represents the number of facilities owned by the Service at that particular site or installation. This column only includes those facilities designated as “buildings” and does not count “structures” (which could be anything from tent pad sites to carpports) or utilities (which also generate records in the facilities table.) It *does not* include licensed or permitted facilities, State-owned National Guard facilities or facilities provided by other nations at foreign locations.

BLDGS OWNED SQFT: Reflects the building square footage for the facilities identified above as owned as stated in the Services’ databases.

BLDGS LEASED: Identifies the number of facilities leased by the Services. It does include only facilities designated as “buildings” and does not count “structures,” which could be anything from tent pad sites to carpports.

BLDGS LEASED SQFT: Reflects the building square footage for the facilities identified above as leased as stated in the Services’ databases.

TOTAL ACRES: Identifies the total number of acres owned, used by, or leased to the DoD. It includes public land, state land, land owned by other federal agencies, and acreage of foreign soil used by DoD sites.

ACRES OWNED: Reflects only those acres actually owned by the government for use by DoD.

PRV (\$M): Total Plant Replacement Value (PRV) for all facilities records (buildings, structures and utilities) used by the DoD, to include those facilities that are not owned by DoD, such as state, NATO or foreign owned, which show a PRV in the database. This value is calculated on the cost to replace the current physical plant (facilities and supporting infrastructure) using today’s construction cost (labor and materials) and standards (methodologies and codes).

MIL: Identifies all known military personnel authorized for the site or installation. Includes both active duty and Guard or Reserve personnel, regardless of Service affiliation.

CIV: Identifies all known DoD civilian personnel authorized for the site or installation, regardless of Service affiliation. Note: civilian numbers for the Navy represent assigned personnel not authorized.

OTHER: Identifies all known other civilian personnel authorized for the site or installation, including Non-appropriated Funds (NAF) personnel, Foreign Nationals (direct hire) at foreign locations, and, if available, any full-time contractor personnel, regardless of Service affiliation.

TOTAL: Sum of MIL, CIV, and OTHER personnel columns.

IV. CONCLUSION

The operation and maintenance of defense sites and facilities is a critical element in supporting our national military strategy. Given the vastness of the Defense Department base structure and the complexity of the physical plant, a document supporting the ability to quickly and concisely view the basic elements of our military support system is a valuable tool. In today's dynamic environment of changing force structures and wartime scenarios, the Department must continually reexamine its framework and evaluate the most efficient and effective base structure to support tomorrow's military forces. Readiness begins at home and the ability of our installations, sites, and facilities to support that mission will make a difference to our national defense.
