Figure 2 – Nytech Camera Core

Some Examples

Figure 3 – Sofradir Microbolometer

- Uncooled B-Kit is a light weight, infrared module, that interfaces to the optics and electronics of various systems.
- Presently no standard exists for the lightweight thermal detector in industry. These thermal detectors are different from each other and can only be used with specific optics and electronics.
- The development of a lightweight thermal detector B-Kit standard will encourage competition and reduce costs.

Hand Held Sense through the Wall (STTW) Scanner

- Hand Held STTW Scanner is a light weight, stand alone, STTW device that provides infantry the capability of detecting people through building walls, ceilings, and floors.
- Hand Held STTW Scanner is the first in a series of STTW devices leveraging technologies assembled in National Institute of Justice coordinated research.
- Follow on STTW devices will provide enhanced capabilities on vehicular and unmanned platforms through HTI.
