PREFACE

RAND's National Defense Research Institute was asked to assess the degree to which women are represented in occupations open to them, and to determine whether there are factors that inappropriately hinder or preclude their opportunities to work within their military specialties. Specifically, this work addresses whether women and men are receiving equal opportunities to work in selected occupations. Second, this analysis considers whether the number of women who can enter the selected occupations is limited, despite the occupation being open to women. This research included statistical analysis of all military occupations, and detailed analysis of selected occupations.

This report contains the detailed statistical analysis and serves as a companion volume to the primary report, *The Status of Gender Integration in the Military: Analysis of Selected Occupations*.

This study was sponsored by the Under Secretary of Defense for Personnel and Readiness, and it was carried out in the Forces and Resources Policy Center of RAND's National Defense Research Institute, a federally funded research and development center sponsored by the Office of the Secretary of Defense, the Joint Staff, and the defense agencies. This work should be of interest to military service members, military policy makers, Congress and any media interested in the status of gender integration in the United States military as well as to academics and researchers interested in gender and work or gender and organizations.

1. INTRODUCTION

BACKGROUND[1]

Women's participation in the military has been restricted since gender integration began. About 33,000 women served in World War I - 20,000 of them in the Army and Navy Nurse Corps, which were separate from the regular Army and Navy. In World War II, manpower shortages and reports of valuable performance by women in other countries' armed forces led the United States to utilize approximately 350,000 women for its own military effort. The attack on Pearl Harbor resulted in the creation of the Women's Army Auxiliary Corps (WAAC) and Women Accepted for Volunteer Emergency Service (WAVES). Women typically filled nursing and administrative jobs, which were consistent with civilian women's work, although they also served in all other noncombat jobs. These 350,000 women who served in World War II were regarded as temporary support that would free more men for combat.

After the war, women's future role with the military was called into question. In 1948, the year when racial integration was mandated by President Truman, Congress passed the Women's Armed Services Integration Act, which placed highly specific limits on the women who would now be allowed to join the Army. Women could make up no more than 2 percent of the total enlisted ranks; the proportion of female officers could equal no more than 10 percent of enlisted women. No woman could serve in a command position, attain the rank of general, or hold permanent rank above lieutenant colonel. This Act specifically prohibited women from being assigned to aircraft or vessels engaged in combat missions. While these statutory provisions did not apply directly to the Army, the Secretary of the Army developed policies to exclude women from direct

---

combat, based upon the implied congressional intent of the Navy and Air Force statutes.[2]

The doors for women have been pried open slowly over the past four decades. In 1967 the 2 percent cap on enlisted women and some restrictions on promotions were lifted; in 1972 ROTC was opened to women; in 1976 the first women entered the service academies; in 1978 Navy women were assigned to non-combatant ships and the separate Women's Army Corps was dissolved; in 1989 two women led their units into combat in Panama; in 1990 the first female commanded a Navy ship; and in 1991, in the Persian Gulf War, large numbers of women moved forward with their units into combat zones, which they were officially forbidden to enter. The policy prohibiting women from such zones was a new limit placed on women's participation as late as 1988. A Department of Defense Task Force on Women in the Military created a "risk rule" to bar women from areas on the battlefield where the "risk of exposure to direct combat, hostile fire, or capture is equal to or greater than that experienced by associated combat units in the same theater of operations."

The years 1992-1994 saw considerable legislative and policy changes regarding the roles of women in the military. The National Defense Authorization Act for FY 1992 and 1993 repealed the combat exclusion law that had prohibited women from being permanently assigned to combat aircraft. In April 1993, Les Aspin, then Secretary of Defense, directed a memorandum to the services which stated "Two years ago, Congress repealed the law that prohibited women from being assigned to combat aircraft. It is now time to implement that mandate and address the remaining restrictions on the assignment of women." This memorandum directed the services to permit women the opportunity to compete for assignment to combat aircraft, and to open as many Navy ships to women as possible under the legal restrictions which still prevented women from being assigned to ships engaged in combat missions. The memorandum also directed the Army and the Marine Corps to study further opportunities for women, but did not prescribe further gender

---

[2]For a detailed history of women in the military, see Jeanne Holm, *Women in the Military: An Unfinished Revolution*, Navato, Calif.: Presidio Press, 1992.

integration in these two services. Instead it reasserted the continued restriction of women from units below the brigade level whose primary mission entailed direct combat on the ground.

Two critical changes in law and policy pertaining to the assignment of service women were implemented in FY 1994. First, the National Defense Authorization Act for FY 1994 repealed the legal restrictions which had prohibited women from being assigned to combatant vessels. This Act also established important guidelines for the integration of women into previously closed occupations when it also required the Secretary of Defense to:

- "Ensure that qualification for and continuance in occupational career fields is evaluated on the basis of a common, relevant performance standard and not on the basis of gender;"
- "Refrain from the use of gender quotas, goals, or ceilings, except as specifically authorized by Congress;" and
- "Refrain from changing occupational standards simply to increase or decrease the number of women in an occupational career field."[3]

Second, the Secretary of Defense distributed a January 13, 1994 memo which rescinded the risk rule. Instead of closing noncombatant positions or units based upon the risk to personnel in those units, the memorandum directed women to be assigned to all units except those "below the brigade level whose primary mission is to engage in direct combat on the ground."[4] Direct ground combat was defined as "engaging an enemy on the ground with individual or crew served weapons, while being exposed to hostile fire and to a high probability of direct physical contact with the hostile force's personnel. Direct ground combat takes place well forward on the battlefield while locating and closing with the enemy to defeat them by fire, maneuver, or shock effect."[5] The memorandum also directed that this guidance would be used only to expand opportunities to women, and would not be used to close units or positions which had previously been open to women.

---

[3]Legislative History, House Report No. 103-200 Section 542-Gender Neutral Occupational Performance Standards.

[4]Secretary of Defense, January 13, 1994 memorandum, Direct Ground Combat Definition and Assignment Rule.

[5]Ibid.

Two kinds of opportunities resulted from these legislative and policy changes in the 1992-1994 period. First, new positions, or skills, opened to women. Second, new units that had been previously closed to women because of the risk rules, opened to women.

Given these changes, the House Report for the National Defense Authorization Act for Fiscal Year 1997 directed the Secretary of Defense

> to obtain an independent study by an FFRDC evaluating the performance of each military service in integrating women into military occupations previously closed. As part of this study, the FFRDC shall evaluate the effect on defense readiness and morale of integrating women into newly-opened occupations and positions as well as factors affecting the pace at which military services are integrating women.

RAND was asked by OSD to undertake this study. In addition to addressing issues of readiness, cohesion, and morale related to gender integration, this prior RAND study confirmed that, in response to the policy and legislative changes, the services have opened more occupations and organizations to women. Table 1.1 shows the change in the number of positions opened to women as a result of these changes.

Table 1.1

Positions Opened to Women Before and After Legislative and Policy Changes

Service	% Positions Open Before April 1993	% Positions Open After Law/Policy Changes
Army	61	67.2
Navy	61	94
Air Force	97	99.7
Marine Corps	33	62
DoD Total	67.4	80.2

NOTE: While 94% of all Navy positions are available to women, at the end of the current embarkation plan only approximately 13% of all shipboard bunks will be female berthing. Thus, the number of Navy positions that could be simultaneously filled with women is less than 94%.

Clearly, progress had occurred in all services. However, the study determined that the numbers of women in some newly opened occupations and positions were still disproportionately low.

There were several valid reasons for such underrepresentation, such as the training pipelines which feed the newly opened Air Force pilot and navigator positions. Some newly opened occupations lacked any female volunteers (although it is unclear the extent to which recruiters are encouraging young women to enter untraditional occupations), and many young women do not score well enough on the prerequisite tests to be eligible for the newly opened occupations that are technical in nature.

In some cases, the occupation or skill is open to women, but not all the positions coded with that occupation are open to women because, within that occupation, the women can only be assigned at certain organizational levels, e.g., brigade or higher. While this policy is valid within the guidelines established, the effect of these limitations upon both men and women in the career field is uncertain. The study also asserted that invalid limitations also exist, and some of them operate in complex ways. Some positions that are officially open to women may actually be closed because the position is coded to be filled by a skill closed to women, e.g., infantry. Unfortunately, there is no method other than by individually checking each position that is formally open to women to determine the MOS coding of each. Finally, some limitations that the research found were informal, e.g., the commander who will not have a driver or an aide of the opposite sex due to the concern of rumors or potential charges of sexual harassment. In other cases, a commander had a woman assigned to a nontraditional position, but she actually performed duty in another.

Following the publication of this previous RAND study, the GAO published a November 1998 report titled *Gender Issues: Information to Assess Servicemembers' Perceptions of Gender Inequities is Incomplete* in which the GAO recommended the Secretary of Defense direct the services to assess whether 1) requirements for skills or specialties that are presently closed to women are being used inappropriately as prerequisites for positions that are otherwise open to women, and 2) men or women are receiving an equal opportunity to work within the area of their military specialty. The Department concurred with this recommendation and agreed to assess the issues. An initial assessment conducted by OSD and the Services concluded that in order to obtain a thorough and fair assessment, an outside study should be conducted.

SCOPE AND METHODOLOGY OF THIS RESEARCH EFFORT

In this context, the Office of Officer and Enlisted Personnel Management, organized under the Assistant Secretary of Defense (Force Management Policy) has sponsored this effort to address the gender integration of positions Newly opened to women and of the positions that comprise the career paths which lead to these positions.

This effort includes two research tasks. The first task consists of statistical analysis to determine the extent to which women are assigned to positions open to them. This analysis places special emphasis upon the occupations which opened as a result of the legislative and policy changes in the early 1990s. The outcome of this analysis is two-fold. First, it provides an updated understanding of the distribution of women within newly opened military occupations. Second, it will highlight occupational areas with disproportionately low female representation for further investigation in the second task.

Task Two will investigate selected careers, based upon the output of the first task, to determine whether there are systemic reasons for gender underrepresentation or systemic hindrances to military women's career development. This task will also re-address the findings in the previous RAND report, to the extent that the services have officially implemented policies and practices addressing problems discovered.[6]

INTENT AND ORGANIZATION OF THIS PROJECT MEMORANDUM

This Project Memorandum provides an informal record of the results of Task One. The next section describes the data sources used to examine the distribution of women (and men) across military occupations and units and the statistical methodology used to identify service occupations with higher than average, about average, and below average representation of women. In the second section, we provide the results by service and summarize these results across services. Section three concludes this Project Memorandum with conclusions and the occupations selected for investigation in Task Two. The Appendix, the bulk of this Project Memorandum, provides extensive and detailed information on the distribution of women across occupations and units available in the data.

DATA AND METHODOLOGY

We use data from the third quarter 1998 PERSTEMPO file, the most recent data available at the start of this analysis. The Perstempo file contains data from the last month of every quarter from December 1987 to

[6] Because the existence of local policies and practices cannot be explored without an extensive fieldwork exercise, this effort will instead determine whether the services have implemented official regulations or policies to address identified negative practices. In

December 1992 and monthly data from January 1993 onwards. It provides information for the last month of each quarter on the MOS, unit, grade, and includes initial characteristics such as gender, for all enlisted personnel and officers in the services (Army, Navy, Marine Corps, and Air Force). The source of this file is the Active Duty Master Files. The file is structured such that each observation corresponds to an individual who is then followed longitudinally.

Labels for MOS for the Army and Air Force are from the DoD Occupational Conversion Index that is part of the Occupational Data Base (ODB) maintained by DMDC. This index includes the DoD occupational grouping, service, MOS, and service occupational title. We used the MOS labels provided by the Marine Corps representative. A Navy representative confirmed the information provided in the previous report and, in some cases, provided updated information, about Newly opened ratings, NECs and designators (the Navy equivalent of enlisted and officer MOSs, respectively). For the Navy more than in the other services, occupations that are open are unit specific. For the present memorandum, we restrict analyses just to those occupations that are not unit specific.[7]

The Unit Identification Code (UIC) is a six-character alphanumeric code that uniquely identifies each Active, Reserve, and National Guard unit of the Armed Forces. Labels and addresses for the Unit Identification Codes (UIC) for each service were obtained from a file

---

the absence of official proactive policies, this work will assume that such and informal practices and policies still exist.

[7] We were not able to identify the following occupations that are closed when they co-occur with specific units: (1) Surface Warfare Officer, 111X Special Boat Units (OIC Combat Billet); (2) Support personnel assigned to navy Special Warfare Dev. Group; and (3) support personnel assigned to Joint Communications Unit. On the positive side,

maintained by DMDC. The Marine Corps base assignment according to the Reporting Unit Code (RUC), which is the reporting unit for each of the UIC's under it. Accordingly, we grouped UICs according to the Reporting Unit Code (RUC) for this service.

The services provided information on the status of individual occupations and units. When possible, service representatives confirmed that the status of individual occupations listed in the earlier RAND report *New Opportunities for Military Women: Effects on Readiness, Cohesion, and Morale* is still current. Because the RAND report did not include information on the status of units at the level of detail we use in the current Project Memorandum, we relied on service representatives to gather this information. In one case, the decentralized nature of the services' information system made this prohibitively burdensome and time consuming: we were not able to obtain a list of previously closed units from the Army. In instances such as this, we classify units according to the information we did receive. For the Army, previously closed units will be included with open units.

Navy representatives confirmed the status of ratings, designators, NECs, and ship types presented in the previous publication. Unfortunately, the tight integration of occupations and units made it difficult for Navy representatives to provide information about the status of spaces at the UIC level (just at the level of ship types). In addition to not being able to examine the representation of women by UICs, we were also unable to distinguish open and closed occupations that depend on ship or unit type. For example, all support personnel assigned to naval special warfare dev. group are classified as being in open positions (unless the particular NEC or rating is always closed

---

in the mid-1990's, there were very few such billets (60, 24, and 24,

regardless of group or ship type) because we can not distinguish naval special warfare dev. groups from other types of units.

The Marine Corps provided us with current information on status of occupations and units. Air Force and Navy representatives confirmed the status of MOS and UIC's presented in previous publications.

Our methodological approach is as follows:

1. We calculated a subgroup mean (or percentage female) and standard error for each MOS and unit subgroup (by service and enlisted/officer status);
2. Next, we calculated an adjusted overall mean that subtracted from the total sample the people in the particular MOS/unit being compared to the overall mean. If we allowed these people to be doublecounted in the subgroup and overall mean, the resulting standard errors would be too large.
3. We also corrected for the subgroup standard errors by taking the square root of the sum of the squares of the overall standard error and subgroup standard error. The uncorrected standard errors are smaller than the corrected standard errors and hence provided a more liberal test of the significance of differences between overall and subgroup means.
4. We constructed the 95% confidence interval for each adjusted overall mean (corresponding to a particular MOS/unit) by multiplying the corrected subgroup standard error by +/- 1.96.

---

respectively).

5. We evaluated whether each subgroup mean falls within the corresponding confidence interval for the adjusted overall mean. If the subgroup is below the 95% confidence interval, we conclude that women are underrepresented relative to their overall representation. If the MOS/UIC percentage is above the 95% confidence interval, we conclude that women are overrepresented relative to their overall service representation.

In the appendix tables, a "^" is used to denote that the percentage of women within a an MOS/UIC group is significantly higher than the overall percentage of women (i.e., women are overrepresented relative to their overall representation); a "*" denotes that the percentage of women within an MOS/UIC group is significantly lower than the overall percentage (i.e., women are underrepresented relative to their overall representation).

With the exception of the Army, we classify warrant officers with all other officers. In the Navy, Marines, and Air Force, there are too few warrant officers to merit a separate category for the purposes of examining representation of women across occupations and units.

SECTION 2: DATA ANALYSIS

This chapter compares the four services in terms of representation of women overall and across specific occupations and units. The tables in this section summarize the larger and more comprehensive tables provided in the Appendices.

GENDER REPRESENTATION ACROSS THE SERVICES

Table 2.1 shows the percentage of enlisted personnel, officers, and (for the Army) warrant officers in the Army, Marine Corps, Navy, and Air Force and for all four services combined. Overall, 14% of enlisted personnel and officers are women. The Marines have a significantly lower representation of women with the percentage female ranging from 4-6% of all enlisted personnel and officers. The other three services have about approximately the same percentage female, with the Air Force reporting the highest percentages (16% of enlisted personnel and 18% of officers). Across all services, there is very little difference in the representation of women according to enlisted versus officer status. The one exception are Army warrant officers (8%) where women are particularly underrepresented relative to enlisted personnel (14%) and general officers (15%). Interestingly, only the Navy has a higher percentage enlisted women (13.8%) than female officers (12.5%).

Table 2.1

Percent Women (Total Personnel), Third Quarter, 1998

Service	Officers	Enlisted	Warrant Officers
Army	14.1 (65,136)	15.3 (426,110)	8.0 (14,152)
Navy	13.8 (56,445)	12.5 (345,924)	[a]
Air Force	16.3 (73,329)	18.1 (305,768)	[a]
Marine Corps	4.5 (18,115)	5.6 (165,523)	[a]
Total	14.0	13.9	-

Source: 1998 (third quarter) Perstempo file.
[a] The small number of warrant officers in the Navy, Air Force, and Marine Corps, Warrant officers are classified with all officers.

Occupations and Units Closed to Women

Table 2.2 shows the number of positions in occupations that are closed to women. There is considerable variation in the percentage of occupations closed across services reflecting differences across services in the proportion of occupations that engage in direct combat or which involve collocation with direct combat units. Appendix tables D.1 to D.4 include the lists of all occupations closed to women (and appendix tables D.7 and D.8 indicate the units closed to women for the Army and Marines.[8])

[8] The following ship types remain closed to women in the Navy: submarines, mine-counter-measure ships, mine hunter craft, and patrol craft). Other ships remain functionally closed because of the costs associated with reconfiguring ships.

Table 2.2

Number of Positions in Occupations Closed to Women, Third Quarter, 1998

Service	Officers	Enlisted	Warrant Officers
Army	8,318	114,782	557
Navy	218	6,223	[a]
Air Force	61	1,623	[a]
Marine Corps	2,623	28,187	[a]

Source: 1998 (third quarter) Perstempo file.
[a] The small number of warrant officers in the Navy, Air Force, and Marine Corps, Warrant officers are classified with all officers.

Occupations Newly Opened to Women

The central objective of this PM is to evaluate the representation of women in Newly opened occupations and units. The Newly opened occupations for each of the services are indicated in Tables 2.3-2.6, which include the number of women in each newly opened occupation as of the end of 1998, the total number of personnel, and the percent female. Each of the tables note whether the newly opened occupations are enlisted, officer, warrant officer positions. Each table also characterizes the newly opened occupations by the DoD occupational groups (e.g., Tactical Operations Officers) and summarizes the representation in the newly opened occupations by these groupings.

In general, the newly opened occupations underrepresent women, as shown in Table 2.7 which provides the percentage of these newly opened occupations that underrepresent women compared to the service level of representation for officers and enlisted personnel. Women are underrepresented in most newly opened occupations regardless of service. Women are statistically significantly underrepresented in each of the three Newly opened enlisted MOS and each of the four Newly opened MOS for warrant officers in the Army. Likewise, women are underrepresented

in 10 of the 11 newly opened Navy enlisted ratings and each of the 18 Newly opened Air Force AFSC's for officers. Female Marine officers are underrepresented in about 80% of Newly opened MOS's and Marine enlisted women are underrepresented in about half of the Newly opened MOS for enlisted Marines.

However, there are two important issues to remember when observing this phenomenon. First, even if women entered these occupations at representative levels, it would take a full career cycle—as long as fifteen to twenty years in some instances—for representation in these careers to resemble that of the service overall.[9] Indeed, there is some evidence that women may still be in the training pipeline leading to some of these Newly opened officer positions, at least in the Marine Corps. Most of the Newly opened Marine officer positions are pilots. As of the 1998, about 4% of flight students (MOS 7599) were women, a percentage that does not differ statistically from the overall percentage of Marine officers who are female (5.6%). The absolute number of women in the Newly opened MOS among Marine pilot/naval flight officers has increased since 1996. In 1996, there were 25 women in Newly opened MOS in the 7500 series (Harrell and Miller, 1997: Table B.17), compared with 41 women as of third quarter 1998 (Table 2.6). The number of women in these positions is increasing each year and, if the representation of women in flight school reflects the future, may achieve parity across most of these positions in the coming years as women progress through the Marine pilot pipeline. We cannot say from

[9] For example, if an occupation includes 2000 people, who remain in the service for approximately 15 years each, only 133 access (and leave) from this occupation annually. If women enter at a rate of 15% of accessions (consistent with Army enlisted female representation), or 20 women a year, after ten years there are still a maximum of only 200 women, which equates to only ten percent of the total, still short of a representative level.

this limited analysis if women are differentially completing pilot training successfully are becoming pilots. Unfortunately, the limited scope of this project restricts our ability to identify comparable data trends in the other services for the Newly opened positions. However, Task 2 of this effort, discussed later in this Project Memorandum, will explore such issues for selected occupational areas.

It is not reasonable to expect that the newly opened occupations will have already reached representative levels. The rate at which they might do so is dependent upon the retention of the people already in the occupation, the rate at which women and men are entering the occupation, and the length of time the occupation has been open to women. For example, If there are 1000 people in a career field, and people stay for an average of fifteen years, then there is only 6.6% turnover each year, and only approximately 67 people enter that career field annually. If Army enlisted women are entering this field at a representative rate (15.3%), then approximately 11 women are entering this career field each year. If the occupation had opened to women in 1994, then not more than 77, or 7.7% of the total personnel in this occupation, would be female. For occupations with shorter average retention, the expected representation would be higher.

Without knowing the average retention of individuals in each career and exactly when each career field opened and , it is difficult to ascertain an expected representation level. However, many of the representation rates of the newly opened occupations, as indicated in Tables 2.3 through 2.6, appear low.

The reader must also recognize that that many of these careers are among classes of occupations that currently underrepresent women, even in those occupations that were previously open to women. This suggests that women may not be entering the occupation at representative rates.

The difference in levels of representation among previously open careers is apparent in Tables 2.8 through 2.11, which summarize the representation of all previously open occupations by major category. (The tables are restricted to occupations with at least 10 personnel). These tables indicate that women have tended towards careers in health care, administration, and intelligence, even when careers in other areas were available to them. (The full (open) occupational list is shown in Appendix Tables D.9 to D.17.)

It is important to note that this work is unable to determine the extent to which these career choices are a result of self-selection or systemic limitations. For example, recruiter attitudes and technical models may be an issue in career assignment. That is, if the manpower models which determine occupations available to new recruits do not permit female new recruits the same choices as male, or if recruiters do not encourage female recruits to accept non-traditional career areas, then the expected gender representation among non-traditional career areas would be low. This project cannot fully examine the career assignment processes and models for all four services, although there is separate ongoing RAND research of the Army system.

Tables 2.12 and 2.13 provide the statistical summary of gender representation by major occupational category. These tables indicate the percentage of newly opened occupations and the percentage of previously opened occupations in each class in which women are either over- or underrepresented, for each of the services. The important point to note from these tables is that the same classes of careers tend to be overrepresented or underrepresented, regardless of whether they are newly opened or had been previously opened.

Table 2.12

Differences in Representation Across Grades

One of the difficulties in assessing this data, as mentioned earlier, is understanding how much of gender representation is a produce of personal choice and how much is a product of either individual ability (such as technical scores) or systemic limitations (such as

career assignment models that limit opportunities for women). Nonetheless, it is still useful to capture the level of gender representation in the different career areas. The data analyzed in this study are all status quo, and thus it is difficult to capture trends in occupational assignment. However, Table 2.14 indicates the occupational breakdown for female junior officers compared to female senior officers. These data address the issue of whether female accessions are entering the same career areas today as they have in the past. In general, higher percentage of female junior officers are tactical operations officers and engineering and maintenance officers, and slightly fewer are in administrative jobs. The largest portion of female officers remain in the health care professions.

Table 2.15 portrays the comparable data for enlisted women. Although junior women in all the services are much less represented in the administrative careers, there are otherwise different stories for the different services. In the Army there have been increases in Service and Supply Handlers, Electrical/Mechanical Equipment Repairers, and Electronic Equipment Repairers. Navy enlisted women are now over-represented in combat-oriented careers and have also moved into electrical/mechanical equipment repair occupations. This data suggest that they have moved away from electronic equipment repair careers, communications and intelligence, and healthcare. Air Force enlisted women are even more highly represented in healthcare careers. Most of the increases among enlisted female Marines have been in Service and Supply Handlers, Electrical/Mechanical Equipment Repair, and Communications and Intelligence careers.

It is important to note some shortcomings of this static snapshot. We have used this data as a proxy for a longitudinal assessment to look at the different career areas of women who entered the service more

recently compared to those with longer tenure. However, we are unable to discern from this data whether female personnel in different occupations have different retention patterns, and thus whether it is problematic to make this kind of comparison. There may also be some career areas that have disproportionate numbers of positions at junior grades or at senior grades. Given these concerns, the grade distributions and the trends in accessions will be further addressed in Task Two for selected occupations.

Units Newly Opened to Women

Information on the representation of women in Newly opened units is spottier. All Air Force units were opened to women prior to the 1992-94 legislative and policy changes. The Marine Corps is currently reassessing those units that are open to women, with the likelihood of

changes. Some of the Army units Newly opened to women are as small as platoons, and data is not readily available to assess the assignment of women to such units. This effort attempted to analyze gender assignment to Army and Marine Corps units by six digit UIC, but was stymied by data complications suggesting that UIC coding is not reliable. Thus, Task Two of this effort will attempt to address patterns of unit assignment of women in selected occupations, to the extent that the services track such data.

An additional issue related to newly opened units is the degree to which policies dictate the assignment practices by gender. The prior RAND study (Harrell and Miller 1997) highlighted a Navy policy to only assign junior enlisted women to newly opened combatant ships once senior enlisted women or female officers were assigned. The Navy personnel interviewed stressed the success of this policy in that it provided female mentors for junior women, and permitted senior women to assist their male peers in learning how to lead and command junior women. Our current research indicates that in each of the services, there is a nontrivial number of junior enlisted women (ranks E-1 to E-4) assigned to units that lack senior enlisted women or female officers, as shown in Table 2.17. In the case of Marines and Navy junior women, it is possible that some of these junior women are in units with senior women from a different service whom they may be able to turn to, but such junior women still lack access to a same-sex mentor in the same service to help in service-specific socialization process. It is also of note that some of these units are located OCONUS, potentially increasing perceived isolation experienced by these women.

Table 2.17

Number of Junior Women Assigned to Units without Senior Women, Third Quarter, 1998

Service	E-1 to E-4 Women
Army	67
Air Force	155
Marine Corps	155

Restricted to units with at least 10 enlisted personnel or 10 officers.

SECTION 3: CONCLUSION AND NEXT STEPS

CONCLUSION

Our data indicate that women are not represented in newly opened occupations at a level comparable to the service overall. While this may not be unreasonable, given the limited time elapsed, many of the newly opened occupations do not appear to include women at levels that would indicate representative inflow to that occupation. Career length patterns are necessary in order to calculate such expected levels of representation, and this will be further addressed in Task Two, as discussed below. It is also worthy of note that women have not been well-represented in many similar careers even when they were previously open to women. Thus, it is not clear the extent to which gender representation is reflective of personal choice or of systemic hindrances to women interested in less traditional career areas. On the other hand, our snapshot of the representation of junior and senior women in the services suggests that junior women may be entering previously opened occupations that have traditionally underrepresented women. We cannot say if this reflects greater entrance of younger women into these occupations, differential attrition rates by sex, or simply reflects the greater representation of women in the services in general over time, but will attempt to tease out some of these possible explanations in Task Two.

NEXT STEPS

Task Two will address the gender representation of selected Newly opened occupations in order to assess whether there are systemic hindrances to their career development. The text below describes the issues or questions to be addressed for each selected occupation and

then proposes occupations for inclusion in Task Two. This list will be finalized with the sponsor office.

Issues for Task Two

Task two will address the following for each of the selected occupations.

- A description of the occupation, to include the main tasks performed, the level of technical or other expertise required, and the perceived status of this career field
- The circumstances surrounding the opening of that career area (by law or by policy)
- Whether there are similar occupations (in any service)
- How individuals are accessed, to include prerequisites or other selection restrictions
- The degree to which recruiters and the models they use encourage or preclude female assignment to these occupations (to be determined through recruiting and manpower policy professionals)
- Retention rates, by gender, and usual length of time in this occupation
- Training requirements and attrition information, by gender, for the training period
- Typical assignment patterns throughout the career, and the degree to which typical assignments include units closed to women or are otherwise problematic by gender
- Gender representation over time in this career
- Gender representation by grade in this career area

This information will be sought from career area managers and other appropriate individuals in the services, and thus successful completion of this task depends heavily upon the accessibility of the

individuals and quality of information available, to include whether data such as training attrition data is kept by gender.

Selected Occupations for Task Two

Task Two depends upon selection of appropriate occupations for further assessment. The intent of this project memorandum is to recommend approximately two occupations for each of the four services. Where occupations are closely related to one another it may be possible to include additional occupations in the analysis, for a total of approximately ten occupations. Such decisions will depend upon a number of factors, to include the extent of further data analysis from Task One. Table 3.1 indicates the occupations suggested for inclusion in Task Two. These are all newly opened occupations, and thus both officers and enlisted personnel are not included for each of the services. Should the researchers and sponsor office determine together that this effort should include occupations that were previously open, such as an Air Force enlisted positions, these might be selected from Appendix Tables D.9 to D.17.

Table 3.1

Newly Opened Occupations Nominated for Further Examination in Task Two

SERVICE	Enlisted or Officer	Occupation Code and Description	Occupation Class	% Women	Total Personnel
Army	Enlisted	12C Bridge Crewmember	Infantry, Gun Crews, and Seamanship Specialists	5.3%	756
Army	Enlisted	12Z Combat Engineering Senior Sergeant	Infantry, Gun Crews, and Seamanship Specialists	0.6%	352
Army	Warrant Officer	152F AH-64 Pilot	Tactical Operations Officers	1.1%	826

Air Force	Officer	Fighter Pilot, F-16	Tactical Operations	0.5%	1,350
Marine Corps	Enlisted	1371 Combat Engineering Senior Sergeant	Infantry, Gun Crews, and Seamanship Specialists	1.5%	2136
Marine Corps	Enlisted	6112 Helicopter Mechanic, CH-46	Electrical/Mechanical Equipment Repairers	2.1%	520
Marine Corps	Officer	7523 Pilot VMFA F/A 18	Tactical Operations Officers	0.0%	402

Source: 1998 (third quarter) Perstempo file.

Table 3.1 indicates two Army enlisted and one Army warrant officer occupation. Both of the enlisted careers are appealing because they represent an occupational class that, as was shown in Table 2.12, traditionally underrepresents women. Additionally, as the Combat Engineering Senior Sergeant is clearly a more senior position, it would

have different accession issues. Comparing the findings pertaining to the Army Combat Engineering Senior Sergeant with those of the same Marine Corps occupation, also indicated in Table 3.1 would be potentially interesting. The Army Warrant Officer occupation suggested is the largest of the newly opened warrant officer pilot occupations. The Navy occupations suggested are both relatively large enlisted occupations in career areas that are not traditional choices for women. There are no newly opened Navy occupations for Navy officers. The Air Force occupation represents one of the most prestigious occupations in the Air Force as well as the largest career field among the newly opened occupations. The Marine Corps officer occupation is associated with another prestigious aircraft, and one to which zero women are currently assigned. The remaining Marine Corps enlisted occupation is a helicopter mechanic position, which is within a career area that generally underrepresents women.

APPENDIX

This appendix contains additional data regarding the representation of women in occupations and units, by service.

Tables D.1 to D.4 presents a list of closed occupations for the Army, Navy, Marines, and Air Force.

Table D.5 shows the list of newly opened UIC's for the Marines (the only service for which we were able to obtain UIC-specific information about newly opened units). Table D.6 provides a snapshot of the representation of junior and senior enlisted women in these newly opened Marine units. Junior women are defined as those in ranks E-1 to E-4 and senior women are in ranks E-5 and higher. The intent of this table is to show the extent to which the enlisted women populating these newly opened units are primarily drawn from the junior ranks and how much it appears that junior women are being placed along with at least one senior enlisted women.

Tables D.7 and D.8 show closed Army and Marine units and the number of personnel in these units. Tables D.9 through D.11 provide information on previously opened occupations Army officers, enlisted personnel, and warrant officers. Tables D.12 through D.17 provide the same information for the Navy, Marines, and Air Force.

Tables D.18 to D.20 show the representation of Army women in previously opened units. These tables give the percentage of enlisted personnel who are female; the number of female enlisted; the total number of enlisted personnel; the percent of officers who are female; the number of female officers; and the total number of officers. A symbol is used to denote if the percentage female in each MOS is

statistically significantly above or below the overall percentage female among all officer or enlisted personnel in the particular service (see text for a description about testing of statistical significance used in these tables). Tables D.21 to D.24 give the representation of women among junior (O-1 to O-3) and senior officers (O-4 to O-6) in the Army, Navy, Marines, and Air Force. Tables D.25 to D.28 show the representation of women among junior (E-1 to E-4) and senior (E-5 to E-9) enlisted personnel.

Tables D.29 to D.31 list the units in which there is at least one junior woman (E-1 to E-4) without any senior women (officers or E-5's or higher enlisted rank). Caution needs to be taken in interpreting these numbers become in some units, such as the Marines (J9M 06050) Aviation A&C School, junior personnel (students) may be assigned to one unit which is a training school while senior personnel who are instructors are assigned to a different unit. Thus, this table overestimates to some extent the number of junior women without female mentors.

The remaining tables represent rare occupations (defined as less than 10 personnel) (Tables D.32 to D.35), small units (defined as less than 10 enlisted personnel and less than 10 officers) (Tables D.36 to D.39), occupations and units with missing labels (Tables D.40 to D.43), and one table showing the Army occupations about which we were unable to confirm the status of occupations with the service (Table D.44).

ET 1654	Intelligence Center Maintenance Technician
ET 9602	Amphibious Air Traffice Control (AATC) Technician (AN/SPN-43C)
ET 9610	Radar (AN/SPS-49A(V) Technician
FR	Fireman Recruit
IC 4720	Gyro Compass Maintenance
IC 4731	Auxiliary Electrician
IC 4749	Physical Security Equipment Maintenance Technician
IM	Instrumentman
IS 3912	Naval Special Warfare (NSW) Intelligence Specialist
MU 3802	Oboe Instrumentalist
MU 3804	Bassoon Instrumentalist
OM	Opticalman
OS 0303	ACDS Block 1 Operator
OS 0325	AN/SSN-2 (V) 4 Operator
PH 8193	Electronic Imaging System Specialist
QM 0215	Harbor/Docking Pilot
RM 2306	Computer Based Training Technician
RM 23MZ	Submarine Radioman Communications Combined Maintenance Technician

ET 1473	Tactical Air Navigation (URN-20) Technician
ET 1480	AN/FAC-6(V) Intersite System Maintenance Technician
ET 1495	AN/SYQ-13 NAV/C2 Maintainer
ET 14BF	Project SSN 637 ESM Technician
ET 14BG	SSN 768-773 ESM Technician
ET 14CT	Submarine Conversion Technician
SH 3115	Resale Management Specialist
SK 2819	Personal Property Specialist
SN 9700	Seaman - Infantry, Gun Crews, and Seamanship Specialists
SN 9710	Seaman - Electronic Equipment Repairers
SN 9750	Seaman - Functional Support and Administration Specialists
SN 9760	Seaman - Electrical/Mechanical Equipment Repairers
SR	Seaman Recruit
RM 23TA	TRIDENT Radioman Exterior Comm Sub-Systems Operations and Maint Technician
RM 23TM	TRIDENT ECS Maintenance Technician
RM 2739	Information Center Supervisor
RM 2743	Computer Programmer (FORTRAN)
RM 2780	Network Security Vulnerability Technician
SA	Seaman Apprentice

Table D.34. Open Marine Corps Occupations with Fewer than 10 Personnel

Code	Description
Enlisted	
6177	Weapons and Tactics Chief Instructor
8112	Riverine Assault Craft Crewman
9952	SCUBA/UBA Marine
9953	Parachutist/SCUBA/UBA Marine
2826	AN/MSC-63A Maintenance Technician
2833	Fleet Satellite Terminal Technician
2842	PLRS Maintenance Technician
2867	AN/TSC-120 Radio Technician
2884	Ground Radar Repairer
5993	Electronics Maintenance Chief
6411	Aircraft Communications/Navigation Systems Technician Trainee, IMA
6422	Aircraft Cryptographic Systems Technician, IMA
2538	Fleet SATCOM Terminal Operator
2581	Radio Frequency Management Technician
2643	Cryptologic Linguist
2649	Cryptanalyst
7254	Radar Approach Controller
6093	Aircraft Intermediate Level Hydraulic/Pneumatic Mechanic Trainee
6125	Tiltrotor Power Plants Mechanic, T-406
6155	Tiltrotor Airframe Mechanic, MV-22
6162	Presidential Support Specialist
6043	Aircraft Welder
3372	Enlisted Aid
5814	Crime Prevention/Physical Security Specialist
5815	Special Reaction Team (SRT) Member
5819	Military Police Investigator
5832	Correctional Counselor
6051	Aircraft Airframe Mechanic-Trainee
6081	Aircraft Safety Equipment Mechanic-Trainee
6111	Helicopter/Tiltrotor Mechanic-Trainee
6151	Helicopter/Tiltrotor Airframe Mechanic-Trainee
6311	A/C Communications/Navigation Elec/Weapons Syst Tech-Trainee, OMA
6331	Aircraft Electrical Systems Technician-Trainee
7381	Airborne Radio Opr/Inflight Refueling Observer/Loadmaster (ARO/IRO/LM) Trainee
Officers	

8611 Interpreter (Designated Language)
8981 Military Affiliate Radio System Radio Operator
5526 Musician, Oboe/English Horn
8811 Firefighter

4068 Data Network Technician
4099 Data Processing Chief

9936 Substance Abuse Control Specialist
9982 Small Computer Systems Operator/Programmer
9991 Sergeant Major of The Marine Corps
1342 Small Craft Mechanic
2112 Rifle Team Equipment Repairer
3524 Fuel & Electrical Systems Mechanic
3525 Crash Fire Rescue Vehicle Mechanic
4616 Reproduction Equipment Repairer
6045 Aircraft Non-Destructive Inspection Operator

9631 Environmental Engineering Management Officer
9657 Systems Acquisition Management (SAM) Officer
9658 Command, Control, & Communications (C3) Systems Officer

9666 Space Operations Officer
9956 Ground Safety Specialist
9602 Education Officer
9670 Statistics Officer
9676 International Relations Officer
9678 Historian
9680 Human Resources Management Specialist
9684 Master of Environmental Law
9688 Master of Law (General)
3408 Financial Management Resource Officer

9662 Material Management Officer
9674 Public Affairs Management Officer
9802 Director/Assistant Director "The President's Own" U.S.M.C. Band
9803 Staff Officer, "The President's Own," U.S.M.C. Band
9805 U.S. Marine Drum and Bugle Corps Officer
9913 Special Services Officer
9950 Combat Artist Officer

9935 Special Technical Operations
5715 Nuclear & Chemical Weapons Employment Officer
7315 Mission Commander
7582 FRS Basic EA-6B Electronic Warfare Officer
7583 Qualified A-6E Bombadier/Navigator
7585 Qualified RF-4B Airborne Reconnaissance Officer
7587 F-4S Radar Intercept Officer
9930 Billet Designator-Air Control/Anti-Air Warfare Officer
9952 SCUBA/UBA Marine Officer
9962 Parachutist
205 Tactical Intelligence Officer
9941 Foreign Area Officer, Latin America
9946 Foreign Affairs Officer, Southwest Asia
9947 Foreign Affairs Officer, Western Europe
2125 Electro-Optic Instrument Repair Officer

9620 Aeronautical Engineer
9626 Ordnance System Engineer
9630 Industrial Engineer

9975 Information Computer Security Specialist
9701 Joint Specialty Officer Nominee
9702 Joint Specialty Officer
9905 Special Assignment Officer
9966 Billet Designator-Naval Flight Officer
