THE SPECIAL TRAINING EXTRACT

The enclosed Special Training Extract has been compiled at the request of CMSgt Michael Jolly (AETC/DOFM) to assist in making training decisions for the newly merged 1A1X1B Flight Engineer Helicopter and 1A1X1C Flight Engineer Performance Qualified. This extract is comprised of a series of computer printouts which show data collected for the Occupational Survey Report (OSR) for 1A1X1C Flight Engineer Performance Qualified, June 2002.

The Air Force Occupational Measurement Squadron (AFOMS) was asked to match the OSR data to the training documentation for the major aircraft of the 1A1X1C specialty. The instructor(s) of the specific course performed the matching process (matching the job inventory survey task list to the course documentation). The following courses were matched:

- Flight Engineer Initial Qualification Syllabus C-130 FIQ Flying Training (Little Rock AFB AR)
- C-130 Flight Engineer Mission Qualification Syllabus C-130 FMQ Flying Training (Little Rock AFB AR)
- EC-130E/H Flight Engineer Battlefield Command and Control Center/Compass Call USAF Operational Training Course (Davis Monthan AFB AZ)
- E-3 Flight Crew Task List Flight Engineer (Tinker AFB OK)
- C-5 Flight Engineer Initial Qualification (Travis AFB CA)
- KC-10 Flight Engineer (Scott AFB IL)

This data may be used to evaluate training in various ways such as identifying tasks performed by the different aircraft flight engineers, distinguishing training requirements and providing data to aid in course development.

The data is organized to follow the training document or syllabus being matched. The instructor(s) selected the items matched to OSR data. The aircraft-specific syllabus may be a task list and academic, simulator and/or flying training. The formatting of the data is dependent on the type of training being matched. In order to facilitate easier understanding of the sequence of training, duplication of training items were not deleted.

READING THE TRAINING EXTRACT

TABLE OF CONTENTS: The first page of the Special Training Extract lists a Table of Contents. The Table of Contents reports five things:

1. Report Number - shows the number and sequence of computer products in the Special Training Extract.
2. Element - shows the report ID of each computer product in the Special Training Extract. These numbers are of use only to AFOMS personnel.
3. Program - shows the types of computer products included in the Special Training Extract. There will be three types listed: (1) PRTMOD, (2) VARSUM, and (3) PRTJOB. Each type of printout will be discussed in more detail below.
4. Report Title - describes the general contents of each computer product included in the Special Training Extract.
5. Page Number - shows the page on which the respective products begin. These numbers are located at the bottom center of the page.

TYPES OF COMPUTER PRODUCTS:

PRTMOD: This computer product can display occupational survey data in order of the syllabus or as directed by the aircraft-specific instructor(s).

The first page of each PRTMOD contains information which is useful primarily to AFOMS Analysts. Of primary interest to the user is the "Description of Reported Task Factors" section at the bottom of the first page. This section lists the full titles and the number of members in each aircraft data group represented across the various columns of the printout. The actual data display begins on page 2 of the individual printout. This page begins with an introductory paragraph which describes the type of data contained in the product. The actual data follows the introductory paragraph and shows the percent members performing (PMP) each task matched to the syllabus broken out by aircraft platforms. For information on aircraft groups displayed in the column headings, refer to the listing on page 1.

VARSUM: While the PRTMOD product provides data on the various tasks being performed, the VARSUM product presents information concerning the responses of career ladder incumbents to the various background questions. These aircraft groups are composed of members who responded to being qualified in that particular aircraft. Groups of two and less are not included in the report. Page 1 of the VARSUM lists the groups which are displayed on the product, showing a group ID number, group title and number of people in the group. These group identities the group which comprise the column headings on each page of the VARSUM product. Along the left-hand side of each page, you will see a series of variable numbers, followed by their respective descriptions (i.e., V0000 MAJCOM assigned AETC). Each variable represents a response to a background question. For background questions which allow multiple responses, each response is given below the variable numbers. In most cases only the "yes" responses will be displayed. The numbers to the right of each response represent the percentage of the given group (as identified on the first page of the product) who selected that particular response to the question.

PRTJOB: The PRTJOB printout display is simply a job description for a particular group (i.e., 5-skill-level personnel, specific aircraft qualified in, etc.). It reports the percent members performing each task and is presented in descending order of the relative time spent on each task. Tasks listed at the top of each job description are those tasks on which group members are spending the most time in their jobs and are performed by larger percentages of group members.

CTS 1A1X1C, C-130 Flight Engineer Mission Initial Qualification, dated February 2002, is presented below with matched job inventory tasks and occupational survey data.

CTS items are listed below the dotted line, followed by a listing of matched tasks. Pertinent survey data are printed to the right of each task. This printout is extremely useful during utilization and training workshops (U&TWs) to validate CTS content. In addition, tasks which were not matched to any CTS item are listed in a "Tasks Not Referenced" section at the end of the printout. These unreferenced tasks should be carefully reviewed to identify new areas which may warrant inclusion in the CTS. For assistance in interpretation of this printout, contact AFOMS/OAE, at DSN 487-6811.

CTS 1A1X1C, C-130 Flight Engineer Mission Qualification, dated February 2002, is presented below with matched job inventory tasks and occupational survey data.

CTS items are listed below the dotted line, followed by a listing of matched tasks. Pertinent survey data are printed to the right of each task. This printout is extremely useful during utilization and training workshops (U&TWs) to validate CTS content. In addition, tasks which were not matched to any CTS item are listed in a "Tasks Not Referenced" section at the end of the printout. These unreferenced tasks should be carefully reviewed to identify new areas which may warrant inclusion in the CTS. For assistance in interpretation of this printout, contact AFOMS/OAE, at DSN 487-6811.

CTS 1A1X1C, C-130 Flight Engineer Mission Initial Qualification, dated February 2002, is presented below with matched job inventory tasks and occupational survey data.

CTS items are listed below the dotted line, followed by a listing of matched tasks. Pertinent survey data are printed to the right of each task. This printout is extremely useful during utilization and training workshops (U&TWs) to validate CTS content. In addition, tasks which were not matched to any CTS item are listed in a "Tasks Not Referenced" section at the end of the printout. These unreferenced tasks should be carefully reviewed to identify new areas which may warrant inclusion in the CTS. For assistance in interpretation of this printout, contact AFOMS/OAE, at DSN 487-6811.

CTS 1A1X1C, C-130 Flight Engineer Mission Initial Qualification dated February 2002, is presented below with matched job inventory tasks and occupational survey data.

CTS items are listed below the dotted line, followed by a listing of matched tasks. Pertinent survey data are printed to the right of each task. This printout is extremely useful during utilization and training workshops (U&TWs) to validate CTS content. In addition, tasks which were not matched to any CTS item are listed in a "Tasks Not Referenced" section at the end of the printout. These unreferenced tasks should be carefully reviewed to identify new areas which may warrant inclusion in the CTS. For assistance in interpretation of this printout, contact AFOMS/OAE, at DSN 487-6811.
