**2000 SURVEY OF SPOUSES OF RESERVE
COMPONENT PERSONNEL:
TABULATIONS OF RESPONSES**

**Defense Manpower Data Center
Survey & Program Evaluation Division
1600 Wilson Boulevard, Suite 400, Arlington, VA 22209-2593**

Acknowledgments

The Defense Manpower Center (DMDC) is indebted to many people for their assistance with the 2000 Surveys of Reserve Component Personnel, also known as the Reserve Component Surveys (RCS).

DMDC is indebted to the staff within the Office of the Deputy Assistant Secretary of Defense for Reserve Affairs (Manpower and Personnel) who contributed their subject matter expertise. Richard Krimmer, in particular, provided valuable guidance throughout all phases of the project.

Under the leadership of Anita Lancaster, Assistant Director for Program Management, and Timothy Elig, Chief of the Survey and Program Evaluation Division, a number of DMDC staff contributed to this effort. Dennis Kelly and Jacquelyn Randolph managed and oversaw the early stages of the RCS project, including design of the questionnaire for spouses of Reserve component members. Robert Simmons oversaw the survey administration and the beginning of data preparation. Brian Lappin worked on data quality control.

DMDC staff who contributed to the initial planning of the spouse tabulation volume include Marcus Strother and Regan Klein (Consortium Research Fellow). Elizabeth Hoover produced the final version of the plan.

Elizabeth Willis advised on data issues throughout the project, produced the final analytic dataset and tabulations, and performed quality control for the tabulation volume. Richard Riemer developed the SAS[®] macros to produce analyses that support the production of the tabulation volume. Bob Hamilton, Chief of the Programming Branch, and Carole Massey and Susan Reinhold, from his staff, supported the sampling. The final tabulation volume was generated by a survey-reporting tool created by Mary Padilla and others from Systems Research and Applications (SRA) Corporation.

2000 SURVEY OF SPOUSES OF RESERVE COMPONENT PERSONNEL: TABULATIONS OF RESPONSES

Introduction to the Survey

The 2000 Surveys of Reserve Component Personnel, also known as the Reserve Component Surveys (RCS), are a follow-on to the 1986 and 1992 Reserve Components Surveys (Rizzo et al., 1995). The Department of Defense (DoD) also conducted a large-scale Reserve component survey in 1991 (Wilson and Hubbell, 1996) and a smaller-scale Reserve component survey in 1994 (Westat, 1995a). Together with the 1999 Active Duty Surveys of Members and Spouses (Gaines, Deak, Helba, & Wright, 2000a, 2000b), the 2000 RCS provides a comprehensive picture of the Total Force. The 2000 RCS were sponsored by the Office of the Assistant Secretary of Defense for Reserve Affairs (OASD[RA]), with particular interest in analysis by the Office of the Deputy Assistant Secretary of Defense for Reserve Affairs (Manpower and Personnel) (ODASD[RA][M&P]).

There are two 2000 RCS instruments: the *2000 Survey of Reserve Component Personnel (Form M)*, and the *2000 Survey of Spouses of Reserve Component Personnel (Form S)*. Members' responses to *Form M* are provided in five volumes (Deak et al., 2002a, 2002b, 2002c, 2002d, 2002e). Tabulation volumes were also done for the surveys in 1986 (LaVange et al., 1987a, 1987b) and 1992 (Westat, 1995b, 1995c).

This report contains tabulations of responses from the *2000 Survey of Spouses of Reserve Component Personnel*, conducted August through December 2000. This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,¹ and (4) provides details on how to use the tabulations. The tabulations and a copy of the survey follow this introduction.

Survey Content

Both *Form M* (Members) and *Form S* (Spouses) were constructed around a core of questions similar to those used in previous surveys of Reserve component members and spouses, particularly those in 1992. The questionnaires focus on experiences, attitudes, and demographics. The 2000 RCS, like their predecessors, were designed to provide policy-relevant information. These surveys provide information on the impact of military policies on members' families, readiness, and career intent, among other topics.

¹ Details on survey methodology are reported by Simmons and George (2003) and DMDC (2003).

The 2000 spouse questionnaire has 117 questions (some with multiple items) on 16 pages. A copy of the *Form S* questionnaire is in Appendix B. This survey instrument has five sections:

1. *Family Military Experience* – The member's National Guard/Reserve component, paygrade, and whether the member's decision to join took place before or after marriage; and where applicable, the spouse's own military experience, including component and program, paygrade, actual or expected years of service, and most important reason for leaving the military.
2. *Individual and Family Characteristics* – Spouse gender, age, years married, education, distance learning, family military background, US citizenship, race and Hispanic ethnicity; English as main language at home; proximity to military installation; dependents; childcare arrangements and expenses and caregiver responsibilities for elderly family members.
3. *Family Work Experience* – Spouse employment and other major activity; spouse earnings; contribution of member's military income; conflict between spouse job and member's National Guard/Reserve job; agreement on spouse's career plans and member's civilian and military career plans; the nature of the member's employment or other non-military activity; member's military status as a member of the National Guard/Reserve in a full-time active duty program, or IRR or ING, or other type of National Guard/Reserve member.
4. *National Guard/Reserve Programs* – Availability and usage of various National Guard/Reserve programs and activities for family members, and military on-installation and civilian off-installation programs, facilities, or services; usage and factors influencing use of commissaries and exchanges; usage of a personal computer and access to the Internet; medical and dental insurance coverage; volunteer work; interest in new information materials from the National Guard/Reserve; feelings about the amount of time the member spends on types of on- and off-job activities; extent to which various aspects of the member's National Guard/Reserve duty cause problems for the family; nights away from home on official military duties; the member's mobilization/deployment history, including whether the mobilization was voluntary, and the location and length of deployment for specific operations; and during the member's most recent mobilization/deployment, the spouse's access to and need for family support services, health insurance and assistance with medical claims, the supportiveness of various groups/individuals, and changes in expenses and income.
5. *Family Issues* – Likelihood the member will be mobilized or deployed; in the event of mobilization or deployment, problems and arrangements the member would need to take care of before leaving, family preparations in

place, and the likelihood of family use of types of military services; recent use of various social services by family; feelings about time spent on types of activities; satisfaction with features of the National Guard/Reserve; factors influencing the member's decision to stay in the National Guard/Reserve; and attitude of spouse and various others toward the member's participation.

Population and Reporting Categories

The population of interest consists of the spouses of members who are in Selected Reserve programs (i.e., Drilling Unit, Active Guard/Reserve (AGR/TAR/AR)²; Title 10 and Title 32), Military Technician (MILTECH), and Individual Mobilization Augmentee (IMA)) from the Army National Guard (ARNG), Army Reserve (USAR), Naval Reserve (USNR), Marine Corps Reserve (USMCR), Air National Guard (ANG), Air Force Reserve (USAFR), and Coast Guard Reserve (USCGR). The target population was limited to the spouses of those members in paygrades up to and including O6, with at least 7 months service at the time the questionnaire was first mailed and made available on the web, and who were on the Reserve Component Common Personnel Data System (RCCPDS) in both March and August 2000.

Results are presented for the total population, and also by a variety of reporting categories. Respondents (spouses) are classified by self-reported gender and by member military characteristics (as reported by spouse). If survey data were missing, record data from the August 2000 RCCPDS were used to impute subgroup classifications. Exceptions to imputation are: 1) deployment status, for which no record data were available; and 2) member Reserve program, which was determined exclusively from record data rather than from survey data. Definitions for the reporting categories follow:

- *Member Paygrade* – Respondents (spouses) are classified by the paygrade of the Reserve member. Enlisted paygrades are reported as E1-E4 and E5-E9. Officer paygrades include warrant officers and commissioned officers from paygrades WO1 to O6. Officer ranks are grouped into three paygrade categories (WO1-WO5, O1-O3, and O4-O6).
- *Member Reserve Program* – Record data on members from the August 2000 RCCPDS were used to classify respondents (spouses) into four Reserve programs. The first group, Reserve Unit, is comprised of members from each Reserve Component who attend weekend drills with Reserve units. The second group, AGR/TAR/AR, is comprised of members in full-time service from all Reserve Components except USCGR. This category is further divided into those in Title 10 and Title 32 programs. The third group is comprised of Military Technicians from the ARNG, USAR, ANG, and USAFR. The fourth group is Individual Mobilization Augmentees (IMAs)

² Names for this program vary among Reserve components: AGR/TAR/AR is a combination of Active Guard/Reserve (AGR), Training and Administration of the Reserve (TAR), and Active Reserve (AR).

from the USAR, USNR, USAFR, and the USMCR. IMAs who are also Military Technicians are coded as Military Technician, not IMA.

- *Member Ever Mobilized* – Respondents (spouses) reported whether the member had ever been mobilized or deployed as a member of the National Guard/Reserve (see Question 89).

Survey Methodology

The survey administration process began in August 2000, with the mailout of notification letters to sample spouses at the beginning of the month. This notification letter explained why the survey was being conducted, how the survey information would be used, and why participation was important. Three weeks later, copies of the survey accompanied by a cover letter were mailed to the spouses. They were given the option of completing either the paper form of the survey or a Web version. Throughout the administration period, additional postal reminders were sent to encourage survey participation. The survey field was closed December 29, 2000.

Single stage, nonproportional stratified random sampling³ procedures were employed to ensure adequate sample sizes for the reporting categories. The spouses were sampled through the married members. The sample consisted of 43,047 individuals drawn from the sampling frame constructed from DMDC's March 2000 Reserve Component Common Personnel Data System (RCCPDS). The March frame included all married members or members whose marital status was unknown. An updated sampling frame was constructed from the August 2000 RCCPDS data to determine eligibility. The spouses of those members who were not present in both the March and updated August frames, or who were not married in both frames or did not have an unknown marital status in both frames, were not eligible for the survey (8.3% of the drawn sample). Spouses were also flagged as ineligible if it was determined, through self-report on the survey or contact with the data collection contractor by the spouse or a proxy, that the member had left the Reserves, or was separated or no longer married (2.9% of the drawn sample).

Completed surveys (defined as at least 50% of the questions answered) were received from 19,555 eligible respondents. The overall weighted response rate for eligibles, corrected for nonproportional sampling, was 53%. Data were weighted to reflect the population of interest. These weights reflect (1) the probability of selection, (2) a nonresponse adjustment factor to minimize bias arising from differential response rates among demographic subgroups, and (3) a poststratification factor to force the response-adjusted weights to sum to the counts of the target population from the

³ In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, members might be grouped by gender and Reserve component (all male Army Reserve personnel in one group, all female Naval Reserve personnel in another, etc.). Members are chosen at random within each group. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze. Weights are used so that groups are correctly represented in the analyses.

updated August frame, compensating for changes in the population occurring between the time of sample selection and data collection.

Table 1 shows the number of respondents and the portion of total respondents in each reporting group. Also shown are the estimated number of members and the portion of total members in each reporting group. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number sampled as well as differences in response rates.

Tabulation Procedures

The tabulations for each question from the survey are generally shown on individual pages. The text of the question and response options are shown at the top of the page. To compress the width of columns in the tables, each response option is shown with a number and then that number is used as the column heading for the responses. The central feature of the tabulations is the percentage of members choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding.

Two questions, Q6 (In which component are/were you?) and Q9 (If you previously served in the military and you are not currently serving, why did you leave the military?) have a large number of response options, which are continued onto a second page. The response option percentages sum to 100% across the two pages. For Q6, the response options were organized so that the Reserve components appear together on the first page, followed by the active-duty components on the second, and the question text at the top of the pages was altered to reflect this organization.

Where an item lends itself to presentation as an average, that average is shown as a number estimate and may also be shown in a histogram. The averages lend themselves to a quick scan for reporting groups that differ from other similarly defined groups. Where a true response continuum is available (e.g., number of months mobilized or deployed), the mean of that continuum is presented; in other cases, the responses are averages of the numeric scales presented with the response options. Where there is a simple binomial response like yes/no, only one percentage is presented. In this case, the histogram represents that percentage.

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, Percent Responding, lists the portion of the reporting group represented in the estimates in that row. In most cases, if this percentage is not 100, it is reflecting item nonresponse, and the table notes that "Percent responding are Service members who answered the question."

Not all questions will apply to every respondent. For example, Q80 (Which of the following dental coverage(s) do you have?) does not apply to those who do not have dental coverage. The notation for this question indicates that the "Percent responding are spouses of Reserve members who answered the question and who have dental coverage (Q79)."

Combining Information From Multiple Items

Tabulations in this volume generally present data for individual survey questions. There are a few exceptions. Multiple Items are presented on a single set of pages for dependents in different age categories and for numbers of elderly family members receiving care. Different items were also combined to construct a single measure of race and ethnicity.

- In Q24, spouses are asked how many dependents they have in each of seven age ranges. For this question, the tabulations show the percentage of the reporting category with children in that age range.
- In Q40, spouses are asked the number of elderly family members for whom they have caregiver responsibilities. Those who reported not having caregiver responsibilities for an elderly family member in Q39 are assigned to a created response option of “None” for Q40.
- Q14 and Q15 on race and ethnicity were combined and are reported in a single set of non-overlapping categories.

Margins of Error

The complex sample design required weighting to produce population estimates such as percentages.⁴ This also means that the typical rules of thumb for interpreting how good an estimate is, such as the number of respondents, will overstate the reliability of the estimate. For this report, variance estimates were calculated using SAS[®] PROC SURVEYMEANS.

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the variance around population parameters such as percentages or means and are used to construct margins of error (i.e., confidence interval half-widths). Percentages and means in these tabulations are reported with margins of error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (Max ME) for the percentages in the row is shown. That is, the margin of error is calculated for each response option percentage and the largest of these is printed. For each average shown in these tabulations, its margin of error is printed.

Estimates may be unstable based on a small number of observations or relatively large variance in the data or weights. Particularly unstable estimates are suppressed or annotated in these tabulations. The following rules are used:

- “0” indicates that no one in any reporting group selected the response option,

⁴ This differential weighting means that only certain statistical software procedures, such as PROC SURVEYMEANS, correctly calculate standard errors, variances, or tests of statistical significance.

- “NR” indicates the estimate is Not Reportable because it was based on fewer than 30 respondents or the relative standard error was high,
- “NA” indicates the response option was Not Applicable for the reporting category because it was not selected by any respondent in that category,
- no Max ME is printed when all percentages in the row are shown as “NR,”
- no margin of error is printed for an average when it is shown as “NR.”

ABOUT THIS QUESTIONNAIRE

WHAT IS THE PURPOSE OF THIS SURVEY?

This survey asks about your attitudes and opinions on a wide range of personnel issues in the Reserve components such as family well being and use of family programs and services. This survey will be used to assess programs, policies, and issues affecting Reserve component members and their families. While no decisions about you alone will be made based on this survey, survey results will influence policy discussions and may result in changes that affect Reserve component members and families. If you don't respond, your views and the views of other spouses like you will not be considered in personnel policy reviews and changes.

WHY ME?

You have been scientifically selected to be part of a sample of people who represent members of the Reserve components. Based on your responses and the responses of others, conclusions may be drawn about the views and experiences of Reserve component spouses overall, and those of demographic subgroups. The validity of these conclusions depends, in part, on receiving enough completed surveys from individuals like you. The survey results will not be valid if you allow someone else to fill out the survey for you.

WILL MY SURVEY RESPONSES BE KEPT PRIVATE?

Yes. Under no circumstances will any information about identifiable individuals be released. Your responses will be combined with information from many other spouses to represent the views and experiences of groups of spouses. Do not use any personal, unit, or place names anywhere on this survey.

PRIVACY NOTICE

In accordance with the Privacy Act of 1974 (Public Law 93-579), this notice informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: 10 United States Code, Sections 136, 1782, and 2358.

PRINCIPAL PURPOSE: Information collected in this survey will be used to assess the attitudes and perceptions of Department of Defense and Department of Transportation personnel about programs and policies. This information will help formulate policies that may be needed to improve the working environment for members and programs for families.

ROUTINE USES: Reports may be provided to the Secretaries of Defense, Transportation, and the Military Departments, and to the Joint Chiefs of Staff. Findings may be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or professional journals, or reported in manuscripts presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individual(s).

DISCLOSURE: Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey instrument will be treated as confidential. Identifying information will be used only by persons engaged in, and for the purposes of, the survey. Only group statistics will be reported.

14. ABSTRACT The 2000 Survey of Spouses of Reserve Component Personnel gathered information on the spouses of members who were in Selected Reserve programs of the Army National Guard, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard, Air Force Reserve, and Coast Guard Reserve. Information included member and spouse military experience; spouse and family characteristics and dependent care; family work experience and career plans; medical and dental coverage; the availability and usage of military and civilian programs, services, and facilities; the member's mobilization/deployment history and the family needs, available services and support, and financial changes associated with mobilization/deployment; spouse attitude toward time spent on military duties; spouse satisfaction with the National Guard/Reserve; and factors influencing the member's decision to stay in the National Guard/Reserve. Results are tabulated by the member's component, paygrade, and Reserve program, by whether or not the member had ever been mobilized or deployed, and by spouse gender.
