THE TRAINING EXTRACT

The enclosed Training Extract has been compiled to assist you in making training decisions. It is comprised of a series of computer printouts which show data collected from your specialty. By learning to understand this document and how it applies to training programs, you will find it to be a valuable source of information.

READING THE TRAINING EXTRACT

TABLE OF CONTENTS: The first page of the Training Extract lists a Table of Contents. The Table of Contents reports five things:

1. Report Number - shows the number and sequence of computer products in the Training Extract.
2. Element - shows the report ID of each computer product in the Training Extract. These numbers are of use only to OMSQ personnel.
3. Program - shows the types of computer products included in the Training Extract. Usually there will be three types listed: (1) PRTMOD, (2) VARSUM, and (3) PRTFAC. Each type of printout will be discussed in more detail below.
4. Report Title - describes the general contents of each computer product included in the Training Extract.
5. Page Number - shows the page on which the respective products begin. These numbers are located at the bottom center of the page.

TYPES OF COMPUTER PRODUCTS:

PRTMOD: This computer product can display occupational survey data in a variety of ways. Primary displays included in most Training Extracts are:

- (1) in job inventory order (by duty)
- (2) in STS order
- (3) in POI order

The first page of each PRTMOD contains information which is useful primarily to OMSQ Analysts. Of primary interest to the user is the "Description of Reported Task Factors" section at the bottom of the page. This section lists the full titles and the number of members in each data group represented across the various columns of the printout. The actual data display begins on page 2 of the individual printout. This page begins with an introductory paragraph which describes the type of data contained in the product. The actual data follows the introductory paragraph. For information on groups or task factors displayed in the column headings, refer to the listing on page 1. When a column heading describes a group of incumbents, the numbers listed below represent the percent of group members who are performing the task listed at the left-hand side of the page. Where the column heading describes a task factor such as Training Emphasis, Task Difficulty, or Automated Training Indicator (ATI), the numbers below represent the value of that task factor for the given task.

Training emphasis refers to the importance of providing training of the given task in some type of formal structured training program, such as resident technical training schools, field training, or formal OJT. It only applies to recommended training for first-enlistment personnel (those with 1-48 months TAFMS) or, in the case of lateral career ladders, first-assignment or first-job personnel (those with 1-48 months TICF). It does not apply when examining advanced courses for a career ladder. Tasks which senior career ladder personnel believe should be trained for first-enlistment personnel have high training emphasis values, while those tasks which they believe do not require formal training have low training emphasis values.

Task difficulty refers to the length of time required for the average job incumbent to learn to perform a task. Task difficulty ratings are always standardized so that tasks having average task difficulty have a mean of 5.0. Tasks with values above 5.0 are considered more difficult to learn than those with values below 5.0.

VARSUM: While the PRTMOD product provides data on the various tasks being performed, the VARSUM product presents information concerning the responses of career ladder incumbents to the various background questions in the job inventory. Page 1 of the VARSUM lists the groups which are displayed on the product, showing a group ID number, group title, and number of people in the group. These group identities define the groups which comprise the column headings on each page of the VARSUM product. Along the left-hand side of each page, you will see a series of variable numbers, followed by their respective descriptions (i.e. V0000 Equip Used - Automatic Film Processors). Each variable represents a response to a background question. For background questions which allow multiple responses, each response is given below the variable number. In most cases, only the "yes" responses will be displayed. The numbers to the right of each response represent the percentage of the given group (as identified on the first page of the product) who gave that particular response to the question.

PRTFAC: This product is very similar to the PRTMOD in that it displays percentages of people performing tasks, as well as Training Emphasis, Task Difficulty, and Automated Training Indicator (ATI) data. The PRTFAC product however, is used to display task data in descending order of some task factor, such as training emphasis. The two primary PRTFAC products included in the Training Extract display inventory tasks in descending order of Training Emphasis value, and inventory tasks in descending order of the computed Automated Training Indicator (ATI) value.

To help in interpreting Training Emphasis ratings shown on several of the data products, standardized abbreviations are used. These abbreviations are as follows:

MEAN = Average Training Emphasis Rating
1 SD = 1 Standard Deviation above Mean Training Emphasis Rating
2 SD = 2 Standard Deviations above Mean Training Emphasis Rating

ABOVE AVG = "ABOVE AVERAGE" in Training Emphasis; Tasks that fall between the Mean and 1 SD
HIGH = "HIGH" in Training Emphasis; Tasks that fall between 1 SD and 2 SD
VERY HIGH = "VERY HIGH" in Training Emphasis; Tasks that fall above 2 SD

This document has been designed and prepared as a final summary document containing data printouts which were used in analyzing the occupational survey data collected on this AFSC. We hope this brief summary assists you in utilizing the data presented in this Training Extract. If you need additional information that is not contained in this Extract, please feel free to contact one of our analysts at DSN 487-6811 for assistance.

AFSC 2M0X2 tasks are presented in USAF Job Inventory order under Duty headings.

The percent of AD TAFMS/DAFSC group members performing each task are presented to the right of each task.

Note that tasks are listed in alphabetical order under each Duty heading so that tasks may be easily located and cross-referenced. Differences between groups may be highlighted where there are large differences in percent members performing each task across the various groups.

STS 2M0X2, Missile & Space Systems Maintenance, dated 5 March 2002, is presented below with matched job inventory tasks and occupational survey data.

STS items are listed below the dotted line, followed by a listing of matched tasks. Pertinent survey data are printed to the right of each task. This printout is extremely useful during utilization and training workshops (U&TWs) to validate STS content and in determining appropriate training codes for STS items. In addition, tasks which were not matched to any STS item are listed in a "Tasks Not Referenced" section at the end of the printout. These unreferenced tasks should be carefully reviewed to identify new areas which may warrant inclusion in the STS.

For assistance in interpretation of this printout, contact AFOMS/OAE, at DSN 487-6811, ext 3011.

POI V3ABR2M032-001, Missile & Space Systems Maintenance, dated 9 September 2002, is presented below with matched job inventory tasks and occupational survey data.

POI behavioral learning objectives are listed below the dotted line, followed by a listing of matched tasks which are taught in the basic resident training course. Pertinent survey data are displayed to the right of each task. Behavioral learning objectives should be reviewed using the percent performing data for each task (see Course Training Decision Logic Table in AETCI 36-2601, Attachment 1). Behavioral learning objectives which are not supported by the criteria listed in AETCI 36-2601 should be considered for deletion from the course.

Tasks which were not matched to a POI behavioral learning objective are listed in a "Tasks Not Referenced" section at the end of the printout. These unreferenced tasks should be carefully reviewed to identify tasks which may warrant inclusion in formal training programs.

For assistance in interpretation of this printout, contact AFOMS/OAE at DSN 487-6811, ext 3011.

0073	VIII.1. Launch Facility Penetration and Exit 26.5		
0074	VIII.1.a. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member; enter Launcher Support Building (LSB) with no more than five deviations. STS: 20a(2) Meas: PC and W (6)		
A0038	Penetrate or exit LFs, such as launch equipment buildings (LEBs), launch equipment rooms (LERs), launch tubes (LTs), or launch support buildings (LSBs)	51	55
0075	VIII.1.b. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member; enter Launcher Equipment Room (LER) with no more than five deviations. STS: 20a(1) Meas: PC and W (8)		
A0038	Penetrate or exit LFs, such as launch equipment buildings (LEBs), launch equipment rooms (LERs), launch tubes (LTs), or launch support buildings (LSBs)	51	55

D T Tsk Y Nbr	Task Title	1ST ENL	3- LVL
0076	VIII.1.c. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member; exit Launcher Support Building (LSB) with no more than five deviations. STS: 20a(5) Meas: PC and W	(5.5)	
A0038	Penetrate or exit LFs, such as launch equipment buildings (LEBs), launch equipment rooms (LERs), launch tubes (LTs), or launch support buildings (LSBs)	51	55
0077	VIII.1.d. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member; exit Launcher Equipment Room (LER) with no more than five deviations. STS: 20a(4) Meas: PC and W	(7)	
A0038	Penetrate or exit LFs, such as launch equipment buildings (LEBs), launch equipment rooms (LERs), launch tubes (LTs), or launch support buildings (LSBs)	51	55
0078	VIII.2. Raise and Lower Equipment	2	
0079	VIII.2.a. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member, raise and lower equipment with no more than five deviations. STS: 10 Meas: PC and W	(2)	
A0038	Penetrate or exit LFs, such as launch equipment buildings (LEBs), launch equipment rooms (LERs), launch tubes (LTs), or launch support buildings (LSBs)	51	55
0080	VIII.3. Launch Facility Emergency Procedures	8	

D T Tsk Y Nbr	Task Title	1ST ENL	3- LVL
0081	VIII.3.a. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member, perform emergency shutdown with no more than three deviations. STS: 20a(6) Meas: PC and W	(2)	
A0047	Perform LF emergency or hostile securing shutdowns	47	51
0082	VIII.3.b. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member, evacuate Launch Facility (LF) for Emergency War Order (EW0) launch with no more than three deviations. STS: 20a(7) Meas: PC and W	(2)	
A0041	Perform emergency war order (EW0) LF evacuations	44	49
0083	VIII.3.c. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member, follow emergency procedures for electrical isolation of Launcher Support Building (LSB) with no more than one deviation. STS: 20a(8) Meas: PC and W	(2)	
A0046	Perform LEB or LSB emergency electrical isolation procedures	41	43
0084	VIII.3.d. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member, perform Launch Facility (LF) hostile securing with no more than three deviations. STS: 20a(9) Meas: PC and W	(2)	
A0047	Perform LF emergency or hostile securing shutdowns	47	51
0085	VIII.4. Colorimetric Gas Detector	2	

D T Tsk Y Nbr	Task Title	1ST ENL	3- LVL
0086	VIII.4.a. Using technical data operate the Colorimetric gas detector with no deviations. STS: 9a(3) Meas: PC and W (2)		
A0115	Perform self-tests on colormetric gas detectors	49	49
0087	IX. Work Cage Operations		
0088	IX.1. Work Cage Installation, Removal, and Operation 30.5		
0089	IX.1.a. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member, install and remove the elevator work cage with no more than four deviations. STS: 20a(3), 28c, 28d Meas: PC and W (22.5)		
A0038	Penetrate or exit LFs, such as launch equipment buildings (LEBs), launch equipment rooms (LERs), launch tubes (LTs), or launch support buildings (LSBs)	51	55
0090	IX.1.b. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member; operate the elevator work cage with no deviations. STS: 28e Meas: PC and W (8)		
A0034	Operate elevator workcages or Guided Missile Maintenance Platforms (GMMPs)	35	35
0091	X. Launcher Closure Operations		

D T Tsk Y Nbr	Task Title	1ST ENL	3- LVL
0092	X.1. Launcher Closure Equipment	2	
0093	X.1.a. Without reference, identify basic facts about the function and description of the Compressed Gas Cylinder/Valve Assembly with a minimum of 75% accuracy. STS: 33a Meas: PC and W	(1)	
A0033	Open or close launcher closures	43	46
0094	X.1.b. Without reference, identify basic principles of the Hydraulic Pusher Set with a minimum of 75% accuracy. STS: 32a Meas: PC and W	(1)	
A0033	Open or close launcher closures	43	46
0095	X.2. Launcher Closure Opening and Closing	36.5	
0096	X.2.a. Using technical data, hand tools, associated equipment, trainer, and working as a maintenance team member, perform procedures to open launcher closure with no more than four deviations. STS: 20a(13a), 32c, 33b Meas: PC and W	(12)	
A0016	Inspect launcher closure components	50	54
A0033	Open or close launcher closures	43	46

STS 2M0X2, Missile & Space Systems Maintenance, dated 5 March 2002, is presented below with matched job inventory tasks and occupational survey data.

STS items are listed below the dotted line, followed by a listing of matched tasks. Pertinent survey data are printed to the right of each task. This printout is extremely useful in identifying task differences across the various MAJCOMs. This information can be used during utilization and training workshops (U&TWs) to validate STS content and determine appropriate training codes for STS items. This printout can also be used to decide which tasks should be included in the STS or be placed in MAJCOM JPGs or MAJCOM-specific training packages. In addition, tasks which were not matched to any STS item are listed in a "Tasks Not Referenced" section at the end of the printout.

For assistance in interpretation of this printout, contact AFOMS/OAE, at DSN 487-6811, ext 3011.
