AOA Process Flow

Performance Measures & Alternatives: Notional Screening of Alternatives

Why is the TDD so important?

- Ensures the technical data for each alternative is consistent across the working groups
- Provides a centralized data source
 - Promotes data consistency across working groups
 - Eliminates duplication of effort
 - Provides a venue for configuration control
 - Increases accessibility to data
- Influences the outcome of the cost/effectiveness analysis

How does the TDD Influence the Cost Effectiveness Analysis?

Problem Statement

- **Develop a methodology and format to help standardize the development of a Technical Description Document (TDD) for AoA efforts**
 - **Currently no formal process or format for collecting or documenting TDD data exists**
 - **Recent programs have struggled with identifying and collecting the necessary data to perform effectiveness and cost analysis for AoAs**
 - **Creating a standard approach across Services for collecting TDD data would be productive**
- **Looking for input from MORSS participants to assist in improving the process**

What is the Best Approach in Developing a TDD?

- **Level I: concept overview slide (Quad chart)**
- **Level II: high-level concept description**
 - **Facilitates first order screening and analysis**
 - **Provides a mechanism for the TAWG to summarize technical data from the RFIs**
 - **Level of detail appropriate to wide range of potential solutions**
- **Level III: detailed alternative description should facilitate detailed effectiveness and cost analysis**
 - **It is an expansion of Phase Two information to include technical details for modeling**
 - **Will be much more focused to the proposed analysis approach (i.e. cost and effectiveness models)**

Cost and Effectiveness Model Specific Data

Benefits of a Three-Level TDD Approach

- **Each level provides increasing detail about the AoA concepts and alternatives**
- **Provides a common set of expectations about what alternative information and level of detail will be provided at each stage of the process**
- **Extends understanding to the contractors who are responding to Requests For Information (RFI)**
- **Allows the contractors to respond in a common form and format**
- **Provides continuity with change of leadership**
- **Fits within the continuum of analysis from FSA through AoA**
