13. ABSTRACT *(Maximum 200 words)*

Historically, decompression sickness (DCS) has been considered a binomial event. Throughout the development of decompression tables and mathematical models that predict DCS risk, investigators who have followed a data-based approach employed DCS as a "yes" or "no" event. Although DCS manifestations have been documented for decades, there has been no quantified effort to examine the relationship between the dive profile and the signs and symptoms of the disease itself. We have compiled the descriptions of DCS cases that occurred after prospective air or nitrogen-oxygen research dives conducted by the military. The detailed dive profiles associated with each case are also described. This comprehensive collection of more than 8000 exposures and more than 400 DCS cases will allow analysis of the relationship between the dive profile and manifestations of DCS.

NOTICE

The opinions and assertions contained herein are the private ones of the writer and are not to be construed as official or reflecting the views of the naval service at large.

When U. S. Government drawings, specifications, or other data are used for any purpose other than a definitely related Government procurement operation, the Government thereby incurs no responsibility, nor any obligation whatsoever, and the fact that the Government may have formulated, furnished or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise, as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

Please do not request copies of this report from the Naval Medical Research Center.

Federal Government agencies and their contractors registered with the Defense Technical Information Center (DTIC) direct requests for copies of this report to:

Office of the Under Secretary of Defense (Acquisition & Technology)
Defense Technical Information Center
8725 John J. Kingman Road, Suite 0944
Ft. Belvoir, VA 22060-6218

Additional copies may be purchased from DTIC.

TECHNICAL REVIEW AND APPROVAL

NMRC 99-02 (Vol. II)

The experiments reported herein were conducted according to the principles set forth in the current edition of the "Guide for the Care and Use of Laboratory Animals," Institute of Laboratory Animal Resources, National Institutes of Health .

This technical report has been reviewed by the NMRC scientific and public affairs staff and is approved for publication. It is releasable to the National Technical Information Service where it will be available to the general public, including foreign nations.

THOMAS J. CONTRERAS
CAPT, MSC, USN
Commanding Officer
Naval Medical Research Center
