### Summary

Varying media estimates of military forces in Iraq have raised concerns about the actual number of troops deployed in Operation Iraqi Freedom (OIF). This report provides solely Department of Defense (DOD) statistical information on U.S. forces serving in Iraq. As of June 1, 2006, according to DOD, the United States had 128,789 troops stationed in Iraq — 102,709 active component and 26,080 National Guard or Reserves. For security reasons, DOD does not routinely report the composition, size, or specific destination of military forces deployed to the Persian Gulf. This report will be updated upon receipt of new DOD data. For additional information on U.S. forces, see CRS Report RL31701, *Iraq: U.S. Military Operations*, by Steve Bowman.

### Force Levels

As of June 1, 2006, according to DOD, the United States had 128,789 military personnel deployed in Iraq. Of these, 102,709 were active component personnel and 26,080 were National Guard and Reserves. **Figures 1 and 2** provide the distribution by armed service of active component personnel. These totals do not include 16,500 military support personnel in Kuwait, nor naval personnel aboard ships patrolling through the Persian Gulf.<sup>1</sup>

Additional information is available from DOD's Directorate for Information Operations, which posts quarterly reports on casualties and worldwide active duty military personnel deployments by region and country.

**Comparative Operation Iraqi Freedom U.S. Force Levels.** Overall U.S. force levels in Iraq have been declining since 2005. Based on DOD statistics, **Figures 3, 4, and 5** provide comparative data on both active and reserve component force levels since November 2005. DOD officials have declined to project the timing or size of future force reductions, noting these will depend upon the security situation within Iraq.
