CREATING THE FUTURE FOR MILITARY MEDICINE

Report Documentation Page

Form Approved
OMB No. 0704-0188

1. REPORT DATE	2. REPORT TYPE	3. DATES COVERED
05 APR 2008		**00-00-2008 to 00-00-2008**

4. TITLE AND SUBTITLE	5a. CONTRACT NUMBER
Setting the Stage: TATRC's Portfolio	5b. GRANT NUMBER
	5c. PROGRAM ELEMENT NUMBER
6. AUTHOR(S)	5d. PROJECT NUMBER
	5e. TASK NUMBER
	5f. WORK UNIT NUMBER
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) **U.S. Army Medical Research and Materiel Command ,Telemedicine and Advanced Technology Research Center (TATRC),Fort Detrick,MD,21702**	8. PERFORMING ORGANIZATION REPORT NUMBER
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)	10. SPONSOR/MONITOR'S ACRONYM(S)
	11. SPONSOR/MONITOR'S REPORT NUMBER(S)

12. DISTRIBUTION/AVAILABILITY STATEMENT
Approved for public release; distribution unlimited

13. SUPPLEMENTARY NOTES
Army Telemedicine Partnerships Series 2008: ?Personal Health Monitoring?, Seattle, WA, 5 Apr 2008

14. ABSTRACT

15. SUBJECT TERMS

16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT	18. NUMBER OF PAGES	19a. NAME OF RESPONSIBLE PERSON
a. REPORT **unclassified**	b. ABSTRACT **unclassified**	c. THIS PAGE **unclassified**	**Same as Report (SAR)**	**11**	

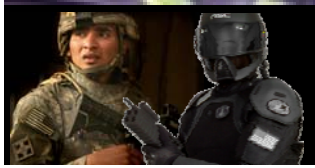
Telemedicine and Advanced Technology Research Center (TATRC)

Mission

Execute a congressional special interest program of medical science and engineering technology research that maximizes benefits to military medicine

Vision

Be the model of government enablement of technology transfer to use



TATRC

CREATING THE FUTURE FOR MILITARY MEDICINE

Key Objectives

Explore new science and engineering options
for the DoD in advance of core funded medical research programs

Lead and conduct DoD research in e-Health
in core competencies of computational biology and clinical informatics

Bridge gaps and help researchers find success
in starting innovative research; transition of discovery to applications; and integration of products, systems, and standards to DoD needs

TATRC
CREATING THE FUTURE FOR MILITARY MEDICINE

TATRC Product Lines & Core Competencies

TATRC CORE COMPETENCIES

Medical Robotics

Health Information Technologies

Medical Imaging Technologies

Advanced Prosthetics & Human Performance

- Neurosciences
- Biomaterials & Nanomedicine
- Regenerative Medicine
- Disease Models with Dual Use Applications
- Genomics/ Proteomics

Computational Biology

Biomonitoring Technologies

Simulation and Training Technology

CREATING THE FUTURE FOR MILITARY MEDICINE

Biomonitoring Technologies – Personal Health Monitoring

TATRC

CREATING THE FUTURE FOR MILITARY MEDICINE

Personal health monitoring enables

Continuity of health & medical situational awareness

- in the field for effective management/utilization of operational forces and resources to meet mission requirements for attacks or for medical evacuation
- at hospitals for improved medical care management of staff and resources
- at home to help patient resume normalcy without unnecessary delays, integrate back to family and community with knowledge and comfort that help is just minutes away

TATRC

CREATING THE FUTURE FOR MILITARY MEDICINE

Challenges

In the field, at hospitals, or at home

- know what variables to measure (e.g. vital signs, functions, or biomarkers)
  - modify / develop tools, know its limitations
  - analyze / translate data (e.g. making sense of the data) into useful tools (e.g. decision-making for preventions, countermeasures, or interventions)
- accuracy and reliability of measurement / data
- make it “invisible” (i.e. wireless, minimal, unobtrusive, comfortable)
- develop smart network for transmitting information to a central location / command; this includes device interoperability
- building a readily accessible comprehensive e-health/medical record
- continuous monitoring is key to averting crises

Strategies

Identify projects for transition

Work with TATRC research partners to help advance research / product with demonstrated results or proven concepts to move forward… commercial partners or other investment vehicles

Invest in high risk, high payoff projects, and fill gap

Provide opportunities to help investigators with great ideas to test highly innovative ideas as well as bring in investigators and/or relevant research areas to help bridge currently funded CSI programs

Integrate information for effective program management

Work with multiple organizations inside/outside DoD to exchange information, collaborate with the aim to create a more integrated program (i.e. TMIP-J, USARIEM, USAISR, TRADOC, VA, NIBIB, DARPA, NIST, etc.)

TATRC

CREATING THE FUTURE FOR MILITARY MEDICINE

Convergence of Effort

Army & Navy

- Infectious Disease
- Combat Casualty Care
- Military Operational Medicine
- Naval Health Research Center
- Health Facilities Planning Agency

Congressional Special Interest (CSI) Programs

SBIR/STTR

AMEDD Advanced Medical Technology Initiative (AAMTI)

Reimbursables and Grants

Other DOD Programs

- DARPA
- TMA
- TMIP

TATRC

Products & Systems for the Warfighter
