MISSION

The Small Business Innovation Research (SBIR) and Small Business Technology Transfer Program (STTR) programs allow small, high-tech U.S. businesses (less than 500 employees) and academia the opportunity to provide innovative research and development solutions in response to critical Army needs. By capturing the tremendous and agile talents of the U.S. small business community, the SBIR and STTR Programs benefit the Department of Defense (DoD), the private sector, and our national economy.

This portal provides all the information necessary to participate in these programs.

The DoD SBIR & STTR Programs

The Department of Defense (DoD) SBIR and STTR programs fund a billion dollars each year in early-stage R&D projects at small technology companies -- projects that serve a DoD need and have commercial applications.

- The **SBIR Program** provides up to \$850,000 in early-stage R&D funding directly to small technology companies (or individual entrepreneurs who form a company).
- The **STTR Program** provides up to \$850,000 in early-stage R&D funding directly to small companies working cooperatively with researchers at universities and other research institutions.

- Small companies retain the intellectual property rights to technologies they develop under these programs.
- Funding is awarded competitively, but the process is streamlined and user-friendly.
- Learn more by going to [Overview](#) and other sections. Also visit our Resource Center at www.dodsbir.net.
