Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.					
1. REPORT DATE 09 FEB 2010		2. REPORT TYPE		3. DATES COVERED 00-00-2010 to 00-00-2010	
4. TITLE AND SUBTITLE RDECOM Corrosion Prevention and Control (CPC) Research, Development, Test and Evaluation Strategy				5a. CONTRACT NUMBER	
				5b. GRANT NUMBER	
				5c. PROGRAM ELEMENT NUMBER	
6. AUTHOR(S)				5d. PROJECT NUMBER	
				5e. TASK NUMBER	
				5f. WORK UNIT NUMBER	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) U.S. Army Research, Development and Engineering Command, 5183 Blackhawk Rd, Aberdeen Proving Ground, MD, 21010-5424				8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)				10. SPONSOR/MONITOR'S ACRONYM(S)	
				11. SPONSOR/MONITOR'S REPORT NUMBER(S)	
12. DISTRIBUTION/AVAILABILITY STATEMENT Approved for public release; distribution unlimited					
13. SUPPLEMENTARY NOTES 2010 U.S. Army Corrosion Summit, Huntsville, AL, 9-11 Feb					
14. ABSTRACT					
15. SUBJECT TERMS					
16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT Same as Report (SAR)	18. NUMBER OF PAGES 14	19a. NAME OF RESPONSIBLE PERSON
a. REPORT unclassified	b. ABSTRACT unclassified	c. THIS PAGE unclassified			

RDECOM Environmental Acquisition & Logistics Sustainment Program (EALSP)

Environmental Program

- Mature, robust
- Coordination through AMC/ASA(ALT) Environmental Support Office
- Managed via enduring RDTE BA6 supplied by ASA(I&E) and ACSIM
- Efforts executed at RDECs via:
 - EQBR (BA1)
 - EQT (BA2-BA3)
 - SERDP (BA2-BA3)
 - ESTCP (BA3-BA4)
 - NDCEE (BA4)
 - RN08 MDEP Direct Funding (BA4)
 - VEQT MDEP Direct Funding (BA4, BA6)
 - Congressional and Customer Funding

Corrosion Program

- Less mature, largely unfunded
- Coordination through AMC G-4/7/9 and DASA(AP&L)
- Currently managed via unprogrammed OSD and Supplemental funding
- Efforts currently executed via:
 - Limited OSD funding (BA4, O&M)
 - Congressional and Customer Funding
- Need for more robust RDTE program

Leveraging/Integration

Paints	Coatings
Plating	Pre-treatments
Alloys	Composites

Weapons Systems Experts

PEO Ammunition
 PEO Aviation
*PEO Command, Control and Communications-Tactical**
 PEO Combat Support and Combat Service Support
 PEO Ground Combat Systems
 PEO Missiles and Space
 PEO Soldier
*JPEO Chemical and Biological Defense**
 PM Future Combat Systems
 Joint Munitions and Lethality LCMC
 Communications-Electronics Command LCMC

**Invited*

Corrosion Experts

Non-RDECOM Army civilians
 Other service RDT&E laboratories
 Support contractors

TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.

Corrosion RDT&E Capability Gaps

1. Prevention of corrosion through product improvements for fielded systems
2. Assessment and correction of corrosion through field-level maintenance
3. Prevention of corrosion through design for new acquisition
4. Prevention of corrosion during operation and operational storage
5. Prevention of corrosion during long term storage or warehousing
6. Prevention of corrosion during transportation or temporary storage
7. Fulfillment of data gaps to accelerate mature technology qualification

Funding Needs, in Then-Year Dollars (thousands \$)

	FY12	FY13	FY14	FY15	FY16	FY17
Total	5,824	12,941	20,859	21,235	21,617	22,007

Capability Gap 1: Prevention of corrosion through product improvements for fielded systems

Item No.	Supporting Capability
1.1	Improved corrosion preventive products such as paints, sealants, lubricants, etc.
1.2	Guidance for optimal application of corrosion preventive products for different systems and environments
1.3	Techniques for depot-level repair of new materials and processes introduced during new production
1.4	Passive methods for preventing corrosive contaminants from adhering to equipment surfaces

Capability Gap 2: Assessment and correction of corrosion through field-level maintenance

Item No.	Supporting Capability
2.1	Techniques for identifying under-paint corrosion of substrates
2.2	Techniques for monitoring corrosion of hidden/inaccessible components or compartments
2.3	Techniques for field-level repair and retouch of new materials and processes introduced during RESET
2.4	Field expedient removal of water from engine oil

Capability Gap 3: Prevention of corrosion through design for new acquisition

Item No.	Supporting Capability
3.1	Accelerated corrosion test methods for full systems, assemblies and components
3.2	Accelerated corrosion test methods for test panels
3.3	Guidance and tools for assessing corrosion prevention during prototype design reviews
3.4	Guidance and tools for assuring adherence of production items to prototype CPC plans
3.5	Guidance for corrosion prevention best practices on all known substrates
3.6	Guidance for corrosion prevention best practices developed in conjunction with new material development
3.7	Demonstration of the quantitative benefits of addressing corrosion through design vice corrective action
3.8	Analysis of how to establish and measure corrosion metrics in system requirements documents
3.9	Analysis of corrosion effects on conductivity of electrical connectors

Capability Gap 4: Prevention of corrosion during operation and operational storage

Item No.	Supporting Capability
4.1	Field expedient methods for keeping equipment clean and dry
4.2	Guidance for optimal washing/drying procedures for different systems and environments
4.3	Analysis of corrosion impacts caused by different basing strategies/locations

Capability Gap 5: Prevention of corrosion during long term storage or warehousing

Item No.	Supporting Capability
5.1	Guidance for optimal long term storage for different systems and environments
5.2	Alternative dehumidification techniques not based on air conditioning
5.3	Alternative preservation techniques not based on dehumidification

Capability Gap 6: Prevention of corrosion during transportation or temporary storage

Item No.	Supporting Capability
6.1	Improved packaging materials and techniques
6.2	Guidance for optimal packaging materials and techniques for different systems and environments
6.3	Secondary protection techniques after removal of items from primary packaging

Capability Gap 7: Fulfillment of data gaps to accelerate mature technology qualification

Item No.	Supporting Capability
7.1	Compilation of lessons learned during upgrades to fielded systems
7.2	Toolbox of available technologies and techniques for original equipment manufacturers
7.3	Identification of actual corrosion performance requirements for hexavalent chromium and cadmium alternatives in common applications
7.4	Data to support implementation decisions for mature hexavalent chromium and cadmium alternatives
7.5	Non-corrosive methods for individual unit identification marking
