

M&S Leadership Summit

Highlight on Issues: Modeling & Simulation as a Critical Technology

Keith Seaman

Senior Advisor
Command and Control (C2) Modeling & Simulation
Air Force SAF/XC

Kenn Atkinson

Deputy Director
Modeling and Simulation Coordination Office

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.					
1. REPORT DATE 26 FEB 2006		2. REPORT TYPE		3. DATES COVERED 00-00-2006 to 00-00-2006	
4. TITLE AND SUBTITLE Highlight on Issues: Modeling & Simulation as a Critical Technology				5a. CONTRACT NUMBER

2006 Modeling & Simulation CAUCUS

FOCUS AREAS

- **NATIONAL CRITICAL TECHNOLOGIES**
- **BUSINESS CASE / MISSION THREAD**
- **RETURN ON INVESTMENT**
- **BARRIERS TO SUCCESS**
- **SKILLS**
- **RESOURCES**
- **CAPABILITIES**
- **FORCING FUNCTION**

Let's Not Forget...We Are At War

NATIONAL CRITICAL TECHNOLOGIES

- ENERGY
- ENVIRONMENTAL QUALITY
- INFORMATION / COMMUNICATION
- LIVING SYSTEMS
- MANUFACTURING
- MATERIALS
- TRANSPORTATION

CHANGE AGENTS

M&S Opportunities Abound

■ ***NATIONAL SECURITY STRATEGY***

■ ***BASE REALIGNMENT***

■ ***QUAD DEFENSE REVIEW***

■ ***JOINT PLANNING GUIDANCE***

■ ***PRESIDENT'S BUDGET***

■ ***DOD TECHNOLOGY PLAN***

COMMITTEES:
ARMED SERVICES

SUBCOMMITTEES:
READINESS
TACTICAL AIR AND LAND FORCES

JUDICIARY

SUBCOMMITTEES:
COURTS, THE INTERNET, AND INTELLECTUAL PROPERTY
CRIME, TERRORISM, AND HOMELAND SECURITY
COMMERCIAL AND ADMINISTRATIVE LAW

SCIENCE

SUBCOMMITTEE:
SPACE AND AERONAUTICS

The Honorable George W. Bush
The White House
Washington, D.C. 20500

Dear Mr. President:

I am writing to you to follow up on the discussion we had during our meeting on March 29, 2006 about Modeling and Simulation and the recent Modeling and Simulation Leadership Summit. Your declaration of Modeling and Simulation as a "National Critical Technology" essential to U.S. world economic leadership would be a significant step toward advancing your science and technology agenda.

THE WHITE HOUSE
PRESIDENT
GEORGE W. BUSH

For Immediate Release
Office of the Press Secretary
January 31, 2006

State of the Union: American Competitiveness Initiative

America's Economic Strength And Global Leadership Depend On Continued Technological Advances. Groundbreaking ideas generated by innovative minds have paid enormous dividends – improving the lives and livelihoods of generations of Americans. With more research in both the public and private sectors, we will improve our quality of life – and ensure that America will lead the world in opportunity and innovation for decades to come.

As The Global Economy Continues To Expand And Other Countries Become More Technologically Advanced, The United States Will Face New Challenges. To ensure our continued economic and technological leadership in the world, the American Competitiveness Initiative builds on the Administration's record of results with new investments, especially in the physical sciences and engineering. Investments in these areas will generate scientific and technological advances for decades to come and will help ensure that future generations have an even brighter future.

M&S&G DISRUPTIVE TECHNOLOGY

- Games are good at fulfilling training needs
 - *I hear and I forget*
I see and I remember
I do and I understand
- Game based training actively engages the learner
- Games are simulations with goals, missions, and objectives
- Game interfaces can be reused

M&S Multiple Activities/Disciplines –

In simulation there is a rerun button!

What is achieved from simulation?

1) Safer 2) WX 3) MX 4) Joint 5) Real 6) Greater Security 7) Interoperative

CHALLENGES DEMAND NEW CONSTRUCTS

**COLLABORATIVE
DEVELOPMENT**

**COMPETITIVE
SIMULATIONS**

NET CENTRIC OPS

INFORMATION-RICH VISUALIZATIONS

GLOBAL DECISION ENVIRONMENT

IMMERSIVE TRAINING

INTERACTIVE PLANNING

FUSED EXECUTION

DYNAMIC BATTLESPACE

Modeling & Simulation

Challenges For You

- Synthetic Network Warfare
- Constructive Cyber Space
- Advanced Simulators
- Global Interaction
- Human Factors/Behaviors
- Directed Energy
- Inter-Active Competitive Sims
- Virtual Testing/Training
- Nano ... Bio ... Quantum
- **Live-Virtual-Constructive Integration to Support All M&S Domains**

Modeling & Simulation

Live-Virtual-Constructive Integration

Interoperability Between C4I Systems

Live

Interoperability Between Simulations

- Increasing training realism
- Mitigating resource constraints
- Overcoming geographical constraints

- Enabling Joint interoperability
- Expanding the size of training audience
- Expand the battlespace

Nevada Test & Training Range

Virtual

Interoperability between C4I systems and simulations

Constructive

Live-Virtual-Constructive Integration

Remote Operations Vehicle Enhanced Receiver

ROVER provides actionable information at the tactical edge

Modeling & Simulation

Developing Future AMERICAN

Partnering to Define an End-to-End Perspective

Creating the Competitive Edge

Modeling & Simulation

Return On Investment *Through LVC Integration*

- Better Training *Through LVC*
 - More Joint Play
 - More use of HD/LD assets
 - Less TDY (*Play from Home Station*)
 - Less Wear & Tear (*Recapitalization*)
 - Test/Implement new tactics/doctrines
- Shorter Time Frame *Through LVC*
 - Mission Rehearsal
 - More Joint representation
- Value of Improvement *Through LVC*
 - Increased Effectiveness
 - Increased Proficiency
 - Reduced Risk
 - Opportunity Savings
 - Cost Avoidance
 - Eliminate Duplication
 - Streamline Processes

HUMAN BEHAVIOR

TOWER OF BABEL

Modeling & Simulation

Supporting the Warfighter

Operational Training

Warfighter Ready for the Fight

Mission Rehearsal

Dynamic, Live, Interactive

Decision Support

Compete, Challenge, Confront

***Empowering the Warfighter, Enhancing Judgment, Effecting Change,
Expediting C2 and Elevating Combat Readiness!***

An American flag is shown waving in the sky, with the stars and stripes clearly visible. The flag is positioned on the left side of the frame, and the sky is a light blue with some white clouds. The word "Questions?" is written in a bold, black, sans-serif font in the upper right quadrant of the image.

Questions?

CHALLENGES DRIVE OPPORTUNITIES

Existing Technology

Merged for New Capability

Unforeseen Consequences

First Information Age

Challenges in 1494

Control over standards – Different Size Type Sets

Distribution of books poorly organized

No transport systems for books

No "advertising" mechanisms

Low literacy rate in Europe – Need for literacy education

Second Information Age

Challenges Today 2006

Control over standards

Locating information difficult

Communication bandwidth problems

No "advertising" mechanisms

Lack of technology education

Types of Strategy Games

- Abstract strategy
- Simulation
- *Real-time strategy*
- War game
- Real-time tactics
- *Turn-based*
- City building

M&S as a Shared Capability

- M&S is no longer a resource that demands specialized computer hardware, expensive customized development, and dedicated engineers
 - Lower computational footprint of low to mid fidelity models and simulations make them accessible on a variety of hardware platforms (PDAs, laptops and desktops, supercomputers...)
 - Revolutionizes the applicability of M&S to a range of questions and issues focused on effects based outcomes
 - Allows selection of the proper level of M&S fidelity for current needs
- COTS tools allow common simulated worlds and scenarios to be shared across a range of hardware platforms without significant reinvestment in development
 - Use standard and common data formats as input and output
- M&S can be made accessible to individuals... TODAY!
 - Bring scenario creation tools to end-users and SMEs at the desktop

Low Fidelity

Medium Fidelity

High Fidelity

Ultra High Fidelity

Granular Fidelity

Availability of COTS Tools Changes Business Models

- Fill the gap between BOGSAT and complex models
 - Enhance GOTS models/simulations with COTS tools
 - Provide tools to SMEs to develop simulations at the desktop
 - Run exercises and training with local resources
- Enable scenario and world asset sharing through well defined interfaces using common data formats
- Recognizing the power of COTS tools:
 - Tools development funded by the corporations and offset by licensing lessens government investment in development
 - Use of standard data formats allows open choice of vendors not tying M&S success to a single contractor
