2010 WORKPLACE AND GENDER RELATIONS SURVEY OF ACTIVE DUTY MEMBERS: TABULATIONS OF RESPONSES

**Defense Manpower Data Center
Human Resources Strategic Assessment Program
1600 Wilson Boulevard, Suite 400, Arlington, VA 22209-2593**

Acknowledgments

Defense Manpower Data Center (DMDC) is indebted to numerous people for their assistance with the *2010 Workplace and Gender Relations Survey of Active Duty Members*, which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). The survey program is conducted under the leadership of Timothy Elig, Director, *Human Resources Strategic Assessment Program (HRSAP)*.

Policy officials contributing to the development of this survey include: Kaye Whitley and Catherine McNamee (ODUSD Sexual Assault Prevention and Response Office); and James Love. Other important contributors to survey development include researchers from the University of Illinois at Urbana-Champaign, including Louise Fitzgerald and Alayne Ormerod.

DMDC's Program Evaluation Branch, under the guidance of Kristin Williams, Branch Chief, is responsible for the development of questionnaires in the survey program. The lead survey design analysts were Lindsay Rock, Sociologist, and Rachel Lipari, Senior Scientist. They designed the unique presentation of complex items used in this tabulation volume. They were supported in these efforts Andrew Hale, Consortium Research Fellow.

DMDC's Personnel Survey Branch, under the guidance of David McGrath, Branch Chief, is responsible for developing the sampling and weighting methods used in the survey program. Laverne Wright, Chief of Survey Operations, is responsible for the survey database construction and archiving. The lead operations analyst on this survey was Lisa Davis supported by John Freimuth, Consortium Research Fellow. They used DMDC's Statistical Analysis Macros to calculate the estimates presented in this tabulation volume. The lead sampling analyst on this survey was Owen Hung, SRA International, Inc., supported by Fawzi Al Nassir, SRA International, Inc., who used the DMDC Sampling Tool to plan the sample and develop weights for this survey. Carole Massey and Sue Reinhold provided programming support for the sampling and weighting tasks. Data Recognition Corporation (DRC) performed data collection and editing.

DMDC's Survey Technology Branch, under the guidance of Frederick Licari, Branch Chief, is responsible for the distribution of datasets outside of DMDC and maintaining records on compliance with the Privacy Act and 32 CFR 219.

Jacqueline Malone, SRA International, Inc., formatted and assembled this tabulation volume using DMDC's Survey Reporting Tool. A team consisting of Rachel Lipari, Lindsay Rock, Suzette Tassin, Andrew Hale, and Chastity McFarlan completed quality control for this tabulation volume.

2010 WORKPLACE AND GENDER RELATIONS SURVEY OF ACTIVE DUTY MEMBERS: TABULATIONS OF RESPONSES

Introduction to the Survey

The *Human Resources Strategic Assessment Program* (HRSAP), Defense Manpower Data Center (DMDC), conducts both Web-based and paper-and-pencil surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness (USD[P&R]). These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community on a wide range of personnel issues. *Human Relations Surveys* are in-depth studies of topics and populations, often requiring both paper-and-pencil surveys and Web-based surveys.

This report contains tabulations of responses from the *2010 Workplace and Gender Relations Survey of Active Duty Members (2010 WGRA)*, conducted February 19 to June 3, 2010. This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,¹ and (4) provides details on how to use the tabulations. The tabulations and a copy of the survey items follow this introduction.²

Survey Content

The *2010 WGRA* continues a line of military sexual harassment research begun in 1988. DMDC conducted Joint Service surveys of active duty members on gender issues in 1988, 1995, 2002, and 2006. DMDC expanded this line of research to the Reserve/National Guard in 2005 and to the Service Academies in 2005. Since 1995, the questionnaire was designed to both estimate the level of sexual harassment in the Services and provide new information on a variety of consequences of harassment (Bastian, Lancaster, & Reyst, 1996). In 2006, the questionnaire was significantly revised to collect parallel information on sexual assault in the Services. The *2010 WGRA* is the fifth DMDC active duty survey of workplace and gender issues, and was modeled on its predecessors. The survey was subdivided into the following 12 topic areas:

1. *Background Information*—Active duty status, gender, and race/ethnicity.
2. *Military Life*—Deployment status in the past 12 months; deployment to a combat zone in the past 12 months; and safety during deployments from sexual assault.
3. *Your Military Workplace*—Gender mix of current workgroup; characteristics of immediate supervisor; qualities of supervisors and leadership; characteristics of military mentors; relationships with coworkers; individual

and unit preparedness; morale; retention intentions, satisfaction with military life; and workplace hostility.

4. *Stress, Health, and Well-Being*—Physical well-being; level of stress in work and personal life; perceived stress, experience of symptoms of post-traumatic stress disorder (PTSD) and depression, perceived connection of symptoms to personal traumatic events, and barriers to getting mental health care.
5. *Gender-Related Experiences in the Military in the Past 12 Months*—Experiences of discrimination; unwanted, gender-related behaviors, and sexual harassment in the 12 months prior to the survey.
6. *One Situation of Gender-Related Experiences*—Circumstances pertaining to experiences of unwanted gender-related behaviors, including characteristics of offenders, to whom behaviors were reported, members' satisfaction with the reporting process (if applicable), actions taken and consequences of reporting (if applicable), and/or reasons for not reporting.
7. *Unwanted Sexual Contact*—Experiences of sexual contact against members' will or without consent in the 12 months prior to the survey, frequency of experiences, specific behaviors experienced during one situation with the greatest effect, where the situation occurred, involvement of alcohol/drugs, characteristics of offenders, experiences of sexual harassment or stalking, to whom the behaviors were reported, members' satisfaction with the reporting process (if applicable), actions taken and consequences of reporting (if applicable), reasons for not reporting, and whether the respondent would make the same reporting decision.
8. *Personnel Policy and Practices*—Leadership's support to stop sexual assault and sexual harassment and views on current gender-related policies and leadership practices.
9. *Sexual Harassment Training*—Perceived effectiveness of training on sexual harassment.
10. *Sexual Assault Training*—Perceived effectiveness of training on sexual assault.
11. *Reaction to Sexual Assault and Sexual Harassment*—Duty to stop fellow Service members' harmful behaviors, bystander intervention, and knowledge about sexual assault reporting.
12. *How Are We Doing?*—Perceptions of gender relations within the military and in the nation, and how they have changed over the past four years.

Population and Reporting Categories

The population of interest for the survey consisted of active duty members of the Army, Navy, Marine Corps, Air Force and Coast Guard, excluding National Guard and Reserve members, who (1) have at least six months of service at the time the questionnaire is first fielded and (2) are below flag rank. Survey results are presented for the total DoD³ and Coast Guard populations and by a variety of reporting categories. To form the reporting categories for the tabulations, respondents are classified primarily by their responses to survey items. If the self-reported data are missing, then DMDC's *Active Duty Master Edit File* data, at the time of sampling, are used to impute the subgroup classification. Survey results are tabulated by: Service, paygrade, deployment, race/ethnicity, experienced behaviors, and gender. Definitions for reporting categories follow:

- *Total DoD*—The categories include all DoD active duty members.
- *Service*—The categories include *Army, Navy, Marine Corps, Air Force, and Coast Guard*.
- *Paygrade*—The *Enlisted* subgroup includes all enlisted paygrades (E1 – E9). The *Enlisted* subgroup is broken into: junior enlisted members (*E1 – E4, E1 – E3, and E4*) and senior enlisted members (*E5 – E9, E5 – E6, and E7 – E9*). The *Officers* subgroup includes commissioned officers (*O1 – O3 and O4 – O6*).
- *Deployment*—The categories include *Deployed Past 12 Months* and *Not Deployed Past 12 Months*.
- *Race/Ethnicity*—Respondents are classified based on self-reported categories consistent with requirements of the Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity (1997). *Total Minority* includes all persons marking one or more of the races other than White and/or marking that they are Spanish/Hispanic/Latino. *Non-Hispanic Black* includes persons marking only Black or African American and not reporting being Spanish/Hispanic/Latino. *Hispanic* includes anyone marking that they are Spanish/Hispanic/Latino, regardless of how they answered the question on race.
- *Experienced Behaviors*—The categories include *Experienced Unwanted Sexual Contact, Not Experienced Unwanted Sexual Contact, Experienced Sexual Harassment, and Not Experienced Sexual Harassment*.
- *Gender*—The categories include *Females* and *Males* overall and gender broken into the following categories: Service, paygrade, experienced behaviors, deployment, and Service by E1 – E4/Enlisted/Officers.

³ Total DoD reflects responses from members of the Army, Navy, Marine Corps, and Air Force. Responses from Coast Guard members are tabulated in a separate section.

- *Coast Guard*—Includes all Coast Guard members and this category is further broken down into the following subcategories: paygrade (*Enlisted* including *E1 – E4* and *E5 – E9*, and *Officers* including *O1 – O3* and *O4 – O6*), and gender by Enlisted/Officer paygrades.

Survey Methodology

The survey administration process began on February 19, 2010, with the mailout of notification letters to sample members. The notification letter explained why the survey was being conducted, how the survey information would be used, and why participation was important. Throughout the administration period, additional e-mail and postal reminders were sent to encourage survey participation. Data were collected between March 5 and June 3, 2010, with paper surveys mailed on April 2, 2010 to those who did not respond via the Web.

Single-stage, nonproportional, stratified random sampling⁴ procedures were used. The sample consisted of 90,391 individuals (85,614 for DoD and 4,777 for Coast Guard) drawn from the sample frame constructed from DMDC's *Active Duty Master Edit File*. Members of the sample became ineligible if they indicated in the survey or by other contact (e.g., telephone calls to the data collection contractor) that they were not on active duty as of the first day of the Web survey, March 5, 2010 (0.57% of sample).

Completed surveys (defined as 50% or more of the survey questions asked of all participants being answered, including the critical question, Q30) were received from 26,505 eligible respondents (24,029 from DoD and 2,476 from Coast Guard). The overall weighted response rate for eligibles, corrected for nonproportional sampling, was 32% (31% for DoD and 52% for Coast Guard).

Data were weighted using the industry standard three-stage process. This form of weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics. The three-stage process of weighting consists of the following steps:

- *Adjustment for selection probability*—Probability samples such as the sample for this survey are selected from lists and each member of the list has a known nonzero probability of selection. For example, if a list contained 10,000 members in a demographic subgroup and the desired sample size for the subgroup was 1,000, one in every tenth member of the

⁴In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, members might be grouped by gender and Service (e.g., all male Army personnel in one group, all female Navy personnel in another). Members are chosen at random within each group. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze. Weights are used so that groups are correctly represented in the analyses.

list would be selected. During weighting, this selection probability (1/10) is taken into account. The base, or first weight, used to adjust the sample is the reciprocal of the selection probability. In this example, the adjustment for selection probability (base weight) is 10 for members of this subgroup.

- *Adjustments for nonresponse*—Some sampled members do not respond to the survey. Continuing the previous example, suppose only half of sample members, 500, completed and returned a survey. Because the unweighted sample size would only be 500, weights are needed to project the sample up to the subgroup population total (10,000). In this case, the base-weighted respondents would sum to only 5,000 weighted respondents. To adjust for nonresponse, the base weights are multiplied by the reciprocal of the nonresponse rate. In this example, the base weight (10) is multiplied by the reciprocal of the nonresponse rate (2) to create a new weight of 20. The weighted sample sums to the subgroup population total of 10,000.
- *Adjustment to known population values*—The first of the two previous weighting adjustments are applied according to the demographic groupings used in designing the subgroups for the sample. The second is based on population characteristics that are known to be related to whether a sample person responds to the survey. Because the sample design and adjustments for nonresponse cannot take into account all demographic differences related to who responds to a survey and how they respond, auxiliary information is used to increase the precision of survey estimates. For this reason, a final weighting adjustment is computed that reproduces population totals for important demographic groupings related to who responds to a survey and how they might answer the survey. Suppose in our example the population for the subgroup was 8,500 men and 1,500 women but the nonresponse-adjusted weighted estimates from the respondents was 7,000 men and 3,000 women. To dampen this possible bias and reproduce known population totals, the weights would be adjusted by 1.21 for men and 0.5 for women so that the final weights for men and women would be 24.3 and 10 which would give unbiased estimates of the total and of women and men in the subgroup.

Table 1 (pages 6-7) shows the number of respondents and the portion of respondents in each reporting category. Also shown are the estimated number of members and the portion of total members in each reporting category. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number sampled, as well as differences in response rates.

Tabulation Procedures

Tabulations⁵ for each question in the survey are shown on a set of facing pages. The text of the questions and response options are shown at the top of the even-numbered pages with only the question number repeated on the odd-numbered pages. To compress the width of columns in the tables, the response options are shown with a number or letter; then that number or letter is used as the column heading for the responses. The central feature of the tabulations is the percentage of members choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding error.

Where an item can be presented as an average, that average is shown as a number estimate and in a bar chart. The averages can be quickly scanned for reporting groups differing from other similarly defined groups. Averages of numeric scales are presented with the response options. Where there is a simple binomial response (e.g., yes/no), only one percentage is presented. In this case, the bar chart represents that percentage.

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, *Percent Responding*, lists the portion of the reporting group represented in the estimates in that row. In most cases, if this percentage is not 100, it reflects item nonresponse, and the table note indicates that “Percent responding are active duty members who answered the question.”

Not all questions will apply to every respondent. Respondents to the paper version of the survey are instructed to skip questions that do not apply to them (based on their answers to previous questions). Where possible, the Web survey is programmed to skip respondents over questions that do not apply to them. For example, Q13 (Was your most supportive mentor in the past 12 months...) does not apply to those who marked in Q12 that they did not have a mentor who had advised them on their military career in the past 12 months. The table note for this question indicates, “Percent responding are active duty members who answered the question and who had a mentor in the past 12 months (Q12).”

Because the survey contains open-ended questions, not all responses are tabulated. For example, members were asked in Q30s if they experienced any unwanted, gender-related behaviors in the past 12 months other than those listed. Since it is not feasible to tabulate the wide range of responses, the open-ended responses for Q30s are not tabulated.

Paper and Web Survey Comparability

On occasion, the paper and Web versions of the survey differ. These differences result from the technological advantages and requirements available in a Web-based survey. The survey response options differ at times. The use of *Does not apply* response options in the paper version are unnecessary in the Web version due

to “smart skip” technology. For example, Q6 on the paper version (In the past 12 months, have you been deployed to a combat zone or to an area where you drew imminent danger pay or hostile fire pay?) has a response option of *Does not apply, I have not been deployed in the past 12 months*. For the Web version, respondents who had previously indicated in Q5 that they had not been deployed for any operation in the past 12 months were automatically skipped over Q6.

In constructing the dataset that combines the paper and Web respondents, questions from the Web version were typically used. The responses to the paper-and-pencil version of the questions were recoded to comply with the Web version. Exceptions may occur when the tabulation of a survey item would benefit from presenting responses in a manner representative of the total population, as opposed to only the applicable population, by coding respondents who were skipped over the question to force their inclusion.

Combining Information From Multiple Items

Tabulations in this volume generally present data for individual survey questions. There are four types of exceptions. The first type of exception is where the results for multiple subitems are presented on a single set of pages.

- In Q76a-c, members were asked whether they were aware of the “My Strength is for Defending” campaign, the Sexual Assault Prevention Web site (www.myduty.mil), and their installation’s Sexual Assault Awareness Month programs. The tabulations for this question show percentages who answered Yes to Q76a, Q76b, and Q76c, respectively, on one set of pages, so as to allow comparison between the percentages.
- The second exception pertains to combining response options from a single item to present an aggregate number.
- In Q76, the bar chart shows the total percentage of those who indicated they were aware of any of the sexual assault prevention awareness resources (e.g., the campaign, the Web site, and their installation’s programs).

The third exception is where members can provide multiple answers to a single question (e.g., race).

- In Q4, members were asked to mark one or more races. The tabulations show the percentage who responded that they are White, Black, American Indian/Alaska Native, Asian, and/or Native Hawaiian/Other Pacific Islander. Respondents who indicated more than one race are also shown in the percentage of More than one race. For example, if a respondent indicated they were Asian and White, they were counted in the percentage as Asian, White, and More than one race.

The fourth exception pertains to constructed composite measures (e.g., scales, incident rates, summary variables), described below. For example, incident rates for unwanted, gender-related behaviors are constructed from multiple items. Typically, individual items from a composite measure are presented first, then the composite measure is presented. Where applicable, Cronbach's coefficient alpha, a measure of scale reliability, is provided in the table notes. For details of the psychometric analyses used to confirm the properties of the measures and more detailed discussion of the creation of composite measures, please see Omerod, Nye, Joseph, Fitzgerald, & Rock (2010).

- *Supervisor Satisfaction*—In Q10, members were asked about their satisfaction with their supervisor. The composite measure includes survey items on members' agreement that their supervisor can be trusted, treats all assigned people fairly, does not have conflict with people who report to him/her, gives satisfactory direction, evaluates performance fairly, and makes work assignments fair (Q10a-f). Higher scores on this measure indicate members strongly agreed with positive statements about their supervisor.
- *Leadership Satisfaction*—In Q11 members were asked about leadership satisfaction. The composite measure includes survey items pertaining to their satisfaction with their work group leadership's commitment to quality work, positive work environment, and Service member well-being (Q11b-d, f). For the purposes of this report, Q11b, d, and f were reverse-coded. Higher scores indicate members have higher degrees of satisfaction.
- *Careerism*—The composite measure includes survey items pertaining to the extent to which a member perceives that leaders put their personal interests above the organization's interests to further personal advancement (Q11a-d, f). For the purposes of this report, Q11a and c were reverse-coded. Higher scores indicate members have greater perceptions that their leaders exhibit careerism.
- *Coworker Satisfaction*—The composite measure includes survey items on members' agreement with statements about coworker relationships, coworker work efforts, work group compatibility, and the helpfulness of coworkers (Q14a-e). Higher scores on this measure indicate members strongly agreed with positive statements about their coworkers.
- *Work Satisfaction*—The composite measure includes survey items on sense of pride, use of skills, work enjoyment, and the opportunity to acquire valuable skills (Q15a-e). Higher scores on this measure indicate members strongly agreed with positive statements about their work.
- *Workplace Hostility*—The composite measure includes survey items on the degree to which people in the workplace act in an angry or hostile manner toward coworkers and subordinates (Q20a-i). Examples include

intentionally interfering with other's work performance; taking credit for other's work or ideas; and using insults, sarcasm, or gestures to humiliate others. A higher score indicates the member more frequently perceived hostile behaviors in their workplace.

- *General Health*—The General Health scale is designed to provide a self-assessment of overall physical well-being. The four scale items (Q21a-d) were taken from the general health perceptions subscale on the Short-Form Health Survey (SF-36) of the *Medical Outcomes Study* questionnaire (Ware & Sherbourne, 1992). For the purposes of this report, Q21b and c were reverse-coded. Higher scores on this measure indicate members have more positive perceptions of their health.
- *Perceived Stress*—The composite measure includes the evaluation of the member's personal stress levels, measured by their emotional experiences/reactions in the month prior to taking the survey (Q23a-j). The measure of perceived stress is a 10-item version of the *Perceived Stress Scale*⁶ (Cohen & Williamson, 1988). Items were scored 0 to 4. For the purposes of this report, Q23d, e, g and h were reverse-coded. Scores are reported as a single figure, which is the sum of the individual scores (range 0 to 40). Higher scores indicate members have greater perceived stress.
- *Post-Traumatic Stress Disorder (PTSD)*—The PTSD Check List, a 17-item screening tool, was used to provide information regarding the relative severity of PTSD symptoms that individuals are experiencing (Q24a-q). Scores on all items are summed to get a Total Score. Total Scores range from 17 to 85,⁶ with higher scores indicating greater experience of PTSD symptoms. Traditionally, a score of 50 on the PCL-C is considered to be a reliable cutoff suggesting that further evaluation for PTSD would be beneficial.
- *Depression Scale*—Question 25a-h contains the first eight questions from the *Patient Health Questionnaire (PHQ-9)*. The items are scored 1-4. Scores were reported as a single figure, which is the average of the individual scores (range 1-4). Higher scores indicate higher levels of depression. The PHQ-9 is a well-validated clinical tool which is consistent with DSM-IV criteria for depressive disorders. One item, "Thoughts that you would be better off dead or hurting yourself in some way," from the PHQ-9 Depression Scale was excluded from this survey. For more information on the PHQ-9, see Spitzer, Williams, Kroenke, Linzer, deGruy, Hahn, Brody, & Johnson (1994).

⁶ For the PCL-C, respondents were required to have answered sixteen of the seventeen items. Of those who met these criteria, missing data was set to the lowest value, 1, and then responses were summed.

- *Overview of Composite Measures of 2010 Incident Rates of Gender-Related Harassment and Discrimination Experienced by Active Duty Members*—Incident rates, constructed from 30 items, reflect whether members indicated they experienced gender-related insensitivity, coercion, harassment, or discrimination.⁷ The 2010 WGRA incident rates comprise the percentage of members who indicated experiencing at least one of the behaviors during the 12 months prior to the survey.
- *Sex Discrimination*—To assess perceptions of discrimination in the workplace, members were asked to indicate if they had recently experienced any of the 12 behaviors or situations where they thought gender was a motivating factor (Q28). The items form three incident rates: *Evaluation* (Q28a-d), *Assignment* (Q28e-g, l-m⁸), and *Career* (Q28h-k). In order to be counted as having experienced *Evaluation*, *Assignment*, or *Career* discrimination, respondents must have indicated that gender was a factor in their experience of at least one of the behaviors in the scale (Q28). In addition to the tabulation of incident rates of the three types of discrimination, a summary variable *Sex Discrimination*, is also tabulated. In order to be counted as having experienced *Sex Discrimination*, respondents must have indicated experiencing one of the 12 behaviors where gender was a factor AND they must have indicated that they considered at least some of the behaviors experienced to have been sex discrimination (Q29).
- *Unwanted, Gender-Related Behavior*—Incident rates of unwanted, gender-related behaviors were derived from 18 behavioral items (Q30) and represent a continuum of behaviors. The categories of behaviors and corresponding items are as follows: *Crude/Offensive Behavior* (Q30a, c, e-f), *Unwanted Sexual Attention* (Q30h, j, m-n), *Sexual Coercion* (Q30k-l, o-p), *Sexist Behavior* (Q30b, d, g, i), and *Behavior Against One's Consent* (Q30r-s). Respondents were asked to indicate how often they had been in situations involving these behaviors, ranging from *Never* to *Very often*. Items are derived from the *Sexual Experiences Questionnaire* (SEQ) (Fitzgerald et al., 1988; Fitzgerald, Gelfand, & Drasgow, 1995). Incident rates indicate whether the individual reported experiencing at least one of the behaviors in a category (e.g., *Sexual Coercion*) at least once in the 12 months before responding to the survey.
- *Sexual Harassment*—The prevalence of sexual harassment is determined using a two-step process. In order to be counted as having experienced *Sexual Harassment*, respondents must have indicated they experienced one

⁷ A Service member is included in an incident rate if he/she endorsed one survey item, more than one survey item, or all survey items included in that rate. That is, a member is counted in an incident rate only once regardless of the number of items he or she endorsed.

⁸ This item is constructed from Q28l and Q28m. Question 28l asks if a respondent did not get a job assignment that he/she wanted and for which he/she was qualified. Question 28m asks the respondent if this assignment was legally open to women. Combining these items allows the focus to be only on jobs that were legally open to women.

of the following types of unwanted, gender-related behaviors: *Crude/Offensive Behavior*, *Unwanted Sexual Attention*, or *Sexual Coercion* during the 12 months prior to completion of the survey (Q30) AND they must have indicated that they considered at least one of the behaviors experienced to have been sexual harassment (Q31).

- *Unwanted Sexual Contact*—Respondents were counted as having experienced unwanted sexual contact if they indicated Yes to Q44.
- *Combinations of Unwanted Sexual Contact*—Combinations of unwanted sexual contact experienced during the one event were determined by responses to Q46. Respondents were counted in the *Experienced unwanted sexual touching (single category)* if they indicated experiencing sexual touching (without experiencing attempted or completed sexual intercourse, oral sex, anal sex, or penetration by a finger or object). Respondents were counted in the *Experienced attempted sexual intercourse, anal, or oral sex (with or without unwanted touching)* if they indicated experiencing attempted sexual intercourse, oral sex, anal sex, or penetration by a finger or object (without experiencing completed sexual intercourse, oral sex, anal sex, or penetration by a finger or object). Respondents were counted in the *Experienced completed sexual intercourse, anal, or oral sex (with or without unwanted touching or attempted sexual intercourse, anal, or oral sex)* if they indicated experiencing completed sexual intercourse, oral sex, anal sex, or penetration by a finger or object.

Margins of Error

The complex sample design required weighting to produce population estimates, (e.g., percent female).⁹ Because of the weighting, conventional formulas for calculating the margin of error will overstate the reliability of the estimate. For this report, variance estimates were calculated using SUDAAN[®] PROC DESCRIPT (Research Triangle Institute, Inc., 2004).

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the variance around population parameters (such as percentages or means) and are used to construct margins of error (i.e., confidence interval half-widths). Percentages and means in these tabulations are reported with margins of error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (Max ME) for each reporting category is shown. That is, the tab volume shows only the largest margin of error for the percentages or means in each row. For each average shown in these tabulations, its margin of error is also printed.

⁹ As a result of differential weighting, only certain statistical software procedures, such as SUDAAN[®], correctly calculate standard errors, variances, or tests of statistical significance for stratified samples.

The following reporting conventions are used:

- “0” indicates that no one in any reporting group selected the response option,
- NR indicates the estimate is *Not Reportable* and is suppressed because of low reliability. Estimates of low reliability are suppressed based on criteria defined in terms of nominal sample size (less than 5), effective sample size (less than 15), or relative standard error (greater than 0.3),
- NA indicates the question was *Not Applicable* because the question did not apply to respondents in the reporting category based on answers to previous questions,
- no Max ME is printed when all percentages in the row are shown as NR,
- no margin of error is printed for an average when it is shown as NR.

Note. Percent responding are active duty members who answered the question. The scale ranges from 1 to 4. Higher scores indicate higher levels of depression. Cronbach's coefficient alpha = 0.92. One item, "Thoughts that you would be better off dead, or of hurting yourself in some way," on the Patient Health Questionnaire (PHQ-9) Depression Scale was excluded from this survey.

29. Sex Discrimination incident rate: Constructed from Q28a-k, Q28lm, Q28n, and 29a. Sex Discrimination is comprised of three types of potentially discriminatory behaviors: discrimination in evaluations, career development, and assignments.

Note. Percent responding are active duty members who answered the question. Annual incident rate indicates the percentage of members who experienced Evaluation, Assignment, or Career discrimination (Q28) and who indicated they considered at least some of the behaviors experienced to be sex discrimination (Q29). Cronbach's coefficient alpha without the inclusion of Q29a = 0.85.

Note. Percent responding are active duty members who answered the question. Annual incident rate indicates the percentage of members who experienced Crude/Offensive Behavior, Unwanted Sexual Attention, or Sexual Coercion (Q30a-p) and who indicated they considered at least some of the behaviors experienced to be sexual harassment (Q31). Cronbach's coefficient alpha without the inclusion of Q31 = 0.94.

PRIVACY ACT & INFORMED CONSENT

In accordance with the Privacy Act, this notice informs you of the purpose of the HRSAP Surveys and how the findings of these surveys will be used. It also provides information about the Privacy Act and about informed consent. Please read it carefully.

Returning this survey indicates your agreement to participate in this research.

AUTHORITY: 10 United States Code, Sections 136, 481, 1782, and 2358. 14 United States Code, Section 1.

PRINCIPAL PURPOSE: Information collected in this survey will be used to research attitudes and perceptions about gender-related issues, estimate the level of sexual harassment and unwanted sexual contact, and identify areas where improvements are needed. This information will assist in the formulation of policies, which may be needed to improve the working environment. Reports will be provided to the Office of the Secretary of Defense, each Military Department, the United States Coast Guard, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. Data could be used in future research and datasets without any identifying information may be analyzed by researchers outside of DMDC. Briefings and reports on results from these surveys will be posted on the following Web site: <http://www.dmdc.osd.mil/surveys/>. In no case will individual identifiable survey responses be reported.

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. Most people take 30 minutes on average to complete the survey. There is no penalty or loss of benefits to which you are entitled if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used only by government and contractor staff engaged in, and for purposes of, the survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel & Readiness) and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. This survey is being conducted for research purposes. If you answer any items and indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if a direct threat to harm yourself or others is found in survey comments or communications about the survey, DMDC is legally required to forward information about that threat to an office in your area for appropriate action.

SURVEY ELIGIBILITY AND POTENTIAL BENEFITS: DMDC uses well-established, scientific procedures to select a sample that represents the Defense community. This sampling procedure sets up clusters of people based on combinations of demographic characteristics (e.g., location, gender). You were selected at random from one of these clusters of people. This is your chance to be heard on issues that directly affect you. While there is no benefit just for you for your individual participation, your answers on a survey make a difference.

STATEMENT OF RISK: The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure that survey data are safe and protected. For example, no identifying information (name, address, Social Security Number) is ever stored in the same file as answers to survey questions. Answers to survey questions may be shared with organizations doing research on DoD personnel but only after minimizing detailed demographic data (for example, paygrade and detailed location information) that could possibly be used to identify an individual. A confidentiality analysis is performed to reduce the risk of there being a combination of demographic variables that can single out an individual. To further minimize this risk, some variables are randomly set to missing. Government and contractor staff members have been trained to protect client identity and are subject to civil penalties for violating your confidentiality.

A respondent who experienced sexual harassment or unwanted sexual contact may experience discomfort and/or other emotions while completing the survey. Contact information is provided below for those who experience such discomfort.

- If you are a victim of sexual assault, or a person who wishes to prevent or respond to this crime, you may want to contact a Sexual Assault Response Coordinator (SARC) or Victim Advocate (VA).
- To reach Military One Source 24/7 for restricted/unrestricted reporting and established DoD Sexual Assault Services, call a hotline number:
Stateside: 1-800-342-9647
Overseas: 00-800-3429-6477 or call collect 1-484-530-5908
Worldwide: www.militaryonesource.com or www.sapr.mil
- Coast Guard members may want to call Employee Assistance Program Counseling Services (1-800-222-0364)
- If you are a victim of sexual harassment, or a person who wishes to prevent or respond to it, you may want to contact your Service's local sexual harassment or equal opportunity office.
- To reach a hotline for your Service call:
Army: 1-800-267-9964 Marine Corps: 703-784-9371
Navy: 1-800-253-0931 Air Force: 1-800-616-3775
Coast Guard: 1-800-222-0364

There are other types of helping professionals you can contact as well. Overseas members can contact Military OneSource by calling 800-3429-6477 (Dial country access code; do not dial "1"). You can also contact the counseling hotline: 1-800-784-2433 (1-800-SUICIDE: an anonymous, civilian hotline).

If you are experiencing any problem with the survey, please e-mail the Survey Processing Center at HRSurvey@osd.pentagon.mil or leave a message any time, toll-free, at 1-800-881-5307. If you desire to withdraw your answers after you submit your survey, please notify the Survey Processing Center prior to May 25, 2010. Please include your name and Ticket Number. If you have concerns about your rights as a research participant, please contact: Ms. Caroline Miner, Human Research Protection Program Manager for the Office of the Under Secretary of Defense (P&R), HRPP@tma.osd.mil, 703-575-2677.
