14. ABSTRACT (<i>Maximum 200 words</i>): This report describes the updating of ARI's educational benefits usage database with Montgomery GI Bill and Army College Fund data for Army Regular, Reserve, and Guard components over the 2009 and 2010 period. For the Regular component, the report includes tabulations of program participation and benefit usage, type of educational program entered, and time between separation and start of education benefits. For Reserve and Guard components, the report includes tabulations by benefit eligibility status, VA training time type, and type of educational program entered. The tabulations are presented by entry cohort, going back to the 1985 entry cohort for all three components.

Updating ARI Educational Benefits Usage Database for Army Regular, Reserve, and Guard: 2009-2010

Introduction

This report describes the work done for the US Army Research Institute for the Behavioral and Social Sciences (ARI) under Delivery Order #5 of the Contract for Manpower, Personnel, Leader Development, and Training (COMPLETRS II), titled “Updating Databases for Modeling Army College Fund (ACF) and Montgomery GI Bill (MGIB) Usage: 2009-2010.”

The provision of educational benefits is an important and expensive program designed to aid recruiting and to address larger social goals. Accordingly, ARI collects and tabulates program participation and benefit usage data and provides it to Army G-1 (Deputy Chief of Staff for Personnel) to support its reporting to Congress and to the U.S. Army Accessions Command (USAAC). The ARI educational benefits usage database pulls source data from Army personnel records, the Defense Manpower Data Center (DMDC), and the Veterans Administration (VA). Program participation and benefit usage rates are calculated by accession cohort for Army College Fund and Montgomery GI Bill programs.

Two databases were updated, analyzed, and archived in this effort. The ACF database contains individual level data on Soldiers who enlisted between fiscal years 1981 and 1986; the MGIB database contains individual level data on Soldiers who enlisted after 1 July 1985 and enrolled in the Montgomery GI Bill program.

Army College Fund Database

The ACF/Chapter 32 database has been updated on an annual basis from 1986 to 2002. The database was created originally using the Army Accessions data files from the U.S. Military Entrance Processing Command (MEPCOM). The database was divided into three separate cohorts: the FY81/82 accessions cohort, the FY83/84 accessions cohort, and the FY85/86 accessions cohort. The data for each cohort have been updated annually using the latest information on benefits usage from VA Chapter 32 data. At each update, critical information was first extracted from the data source and then merged into each of the three cohort files. A different set of variable names by time period and cohort was used for each update to support longitudinal analyses.

At the end of each fiscal year, DMDC provides ARI with a “de-identified” copy of the VA Chapter 32 data for selected record types. Nearly 3.9 million records were received on the FY08 VA benefit usage data file. These records contain information on benefit usage, date and amount of contribution, education level and objective, and related facility and training information.

The FY09 VA Chapter 32 data file from DMDC contained a total of 3,836,727 records. This file was copied and archived onto CD-ROM after processing and verification of data records was completed. Unlike previous updates from 1986 to 2002 where the ACF FY81/82, FY83/84, and the FY85/86 accessions cohort were updated using the most recent VA Chapter 32

data, the FY09 Chapter 32 data, along with similar data from FY03 through FY08 are archived to facilitate future updates when there is such a need.

Montgomery G.I. Bill Database

The Montgomery GI Bill (MGIB) database was started in 1991 and was originally updated on an annual basis. Since March 1993, ARI has received update tapes from DMDC on a quarterly basis. This allowed the analysis of MGIB usage on a quarterly basis.

Around the fall of 1999, DMDC began to convert the existing legacy system into the Defense Enrollment Eligibility Reporting System (DEERS). Consequently, no MGIB data were available from DMDC until April 2002. The first quarterly data containing Regular Army records received from DMDC after the conversion was as of September 2001, with a new record layout, data dictionary, and more variables than previously provided on the quarterly files. With the help of the DMDC staff familiar with the database, we were able to identify the variables needed for analysis. In April 2002 we also began receiving quarterly data files for the Army Reserve and National Guard.

Six quarterly MGIB data files were processed for this contract: June 2009, September 2009, December 2009, March 2010, June 2010, and September 2010. Upon the processing of each quarterly “de-identified” data set, three sets of tabulations were created, one for the Regular Army, one for the Army Reserve and one for National Guard. For this contract, only three quarterly MGIB data files were designated to be used to produce the tables: September 2009, March 2010, and September 2010. The remaining three MGIB quarterly files that were not used for reporting were archived to CD.

While creating the March 2010 tabulations, we discovered a problem with the MGIB Chapter 1606 (Reserve and Guard) data. There was a dramatic increase in cases where the VA Training Time Type Code (byte 55) and VA Training Category Code (byte 54) were coded as unknown. Overall, an alarming 94% of the cases had a value of "Z" for “Unknown”. We checked the March 2009, June 2009, September 2009 and December 2009 Ch1606 quarterly data files for similar unknown cases for these two variables and found that the ratio of these cases remained constant at about 81% across all these earlier files. This situation was reported to DMDC. Further inspection of these data indicated that the VA has erroneously updated the replication table with unknown values in these two variables. Unfortunately, due to limited resources at the VA, this problem was not corrected in time for this reporting period. Only Table 3 for the Reserve and National Guard tabulation was affected by this problem starting with March 2010. The tabulations for Army Regular component remain unchanged.

For the Regular component, the report includes tabulations of program participation and benefit usage, type of educational program entered, and time between separation and start of education benefits. For Reserve and Guard components, the report includes tabulations by benefit eligibility status, VA training time, and type of educational program entered. The tabulations are presented by entry cohort, going back to the 1985 entry cohort for all three components. Benefit usage numbers (Table 2, Appendix) and rates (Table 3) for recent cohorts in the Regular component are small / low as would be expected for this type of program. As cohorts age and members leave

the Service, usage rates pick up. A sense of steady state usage rates can be inferred from the older cohorts. As of December 2010, 12 additional quarterly files were processed and available for analysis. These files are:

<u>Type</u>	<u>Date</u>	<u>Total Cases</u>
Regular Army	3 rd quarter 2009 (as of June 2009)	2,119,401
Regular Army	4 th quarter 2009 (as of September 2009)	2,140,613
Regular Army	1 st quarter 2010 (as of December 2009)	2,157,967
Regular Army	2 nd quarter 2010 (as of March 2010)	2,174,228
Regular Army	3 rd quarter 2010 (as of June 2010)	2,194,657
Regular Army	4 th quarter 2010 (as of September 2010)	2,213,168
Reserve/Guard	3 rd quarter 2009 (as of June 2009)	2,393,247
Reserve/Guard	4 th quarter 2009 (as of September 2009)	2,409,182
Reserve/Guard	1 st quarter 2010 (as of December 2009)	2,435,605
Reserve/Guard	2 nd quarter 2010 (as of March 2010)	2,450,006
Reserve/Guard	3 rd quarter 2010 (as of June 2010)	2,469,094
Reserve/Guard	4 th quarter 2010 (as of September 2010)	2,488,049

Tabulations and Documentation

The tabulation of the updated MGIB databases is presented here in three sections:

- I. MGIB Regular Army Analysis Tables
- II. MGIB Army Reserve Analysis Tables
- III. MGIB National Guard Analysis Tables

A compact disk (CD-ROM) has been prepared and is available for Army G-1 and other Army agency use. It contains the electronic version of the following deliverables: FY09 ACF data file; FY09 and FY10 MGIB data files; record layouts; data dictionary; SPSS transport files for MGIB databases; MGIB Analysis Tables; and ACF/MGIB 2011 Contractor Report. Please contact the Contract Officer's Representative (COR) for more information.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.
