TACOM LCMC INDUSTRIAL BASE ENGINEERING SUPPORT – Commanders' Conference

TARDEC, Engineering Business Group
July, 2011

Report Documentation Page			Form Approved OMB No. 0704-0188		
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

Provide an overview of the U.S. Army Tank Automotive Research, Development and Engineering Center's (TARDEC's) Industrial Base Database and the Sustainment Engineering Risk Assessment.

- **Industrial Base Environment**
- **TARDEC Industrial Base Support**
- **Industrial Base Culture Change**
- **IBIT/IBET Mission**
- **TARDEC's DMSMS Contract**
- **Industrial Base Database**
- **Sustainment Engineering Risk Assessment (SERA)**

Escalating Support Challenges (production & sustainment)

- Increasing O&S requirements (65-80% of Life Cycle Cost)
- Equipment condition due to deployment s (Degradation)
- Obsolescence of Army systems due to age (25-40 yrs)
- Loss/change of manufacturing sector for COTS (Support Strategy Risk)
- Inconsistent lifecycle sustainment policy & planning (Organic vs CLS vs TDPs?)
- Inconsistent engineering/design influence for sustainment (Poor Planning)
- Stove-piped industrial base issue investigation & resolution (ILSC & PM versus LCMC)
- Negative economic trends impacting commercial industrial base (Industrial Base Risk)
- Environmental and safety impacts

Result = Increase in Re-active Support Issues

Solution = Pro-active Logistics Engineering Support

Industrial Base Engineering Team (IBET)

TARDEC Engineers:

- Support LCMC Industrial Base requirements
- Provide investigation
- Leverage experience, capability & expertise
- Provide quick response to problems
- Support proactive management
- Improve LCMC communication
- Apply disciplined processes
- Implement LCMC wide solutions (standardization)

TARDEC POC: IBET Team Leader, Mr. Tony Mitek

Past Support = Component or platform focus

- Lack of standardized LCMC strategies
- Separate platform support
- Focus on select STS & OEM supported platforms
- Individual “isolated” platform solutions
- LCMC and experience was not leveraged or shared
- No pro-active Industrial Base or DMSMS management

Current/Future Support = LCMC consideration & application

- Industrial Base Integration Team (IBIT) Process (2007) = LCMC focus
- Leverages & shares common/existing LCMC solutions & capability
- Interfaces with broad commercial industrial base (DMSMS contract)
- Pro-active LCMC Industrial Base monitoring (capability & risk)
- Leverages & cultivates non-traditional sources of capability
- Documents IBIT issues and provides user access (IBIT Console)

Diminishing Manufacturing Sources and Material Shortages

- Automation Alley, Michigan's largest technology business association, is currently on contract with TARDEC to provide industrial base support for the TACOM LCMC Diminishing Manufacturing Sources and Material Shortages (DMSMS) program
- The contract with Automation Alley has created a capability to establish commercial industrial base visibility and communicate TACOM LCMC requirements with companies across the United States
- Current Efforts:
 - Industrial Base Data & Communication Tool
 - TACOM LCMC Industrial Base Health/Risk Assessments
 - Sustainment Engineering Risk Assessments (SERA) of TACOM Equipment
 - Cadmium/Hex Chrome Replacement (High Purity Aluminum) Capability
 - Advanced Aviation Forward Area Refueling System (AAFARS) Tech Data Development
 - Common Automotive/TACOM LCMC Industrial Base Sector Study

TARDEC DMSMS Contract Officer's Representative (COR), Mr. Stan Michener

LCMC Vendor Database

- TACOM LCMC Vendor Industrial Database (Total 20,000 + vendors)
 - Warren
 - Natick
 - RIA
 - DLA
- Identification of TACOM's Sustainment Industrial Base (Vendors)
- Communication with Industrial Base capability
- Search capability (database and nation-wide)
- Sector studies
- Bi-annual health assessments
- Web Portal Access
- Geo-Tech visual tool solution
- Trend analysis

UNCLASSIFIED

AR 700 – 127 (ILS Mgt) Mandates Post-fielding Sustainment Readiness Reviews (SRR)

- Should Occur at least every 5 years after IOC.
- Ensure that the support system is working effectively throughout the life cycle.
- Measure how well the support system performs against the plan (supportability strategy).
- Recommend adjustment to the support system when not achieving the desired readiness / availability outcomes.
- Recommend design changes based upon Reliability, Maintainability, and Supportability (RMS) data.
- Review unresolved material release conditions.
- Optimize program resources.
- Review transition plans from interim contractor support to Organic Support.
- Report and resolve outstanding operational and developmental performance deficiencies

SERA Objective

- Proactively evaluate equipment data and identify industrial base related obsolescence and sustainment risk.
- Leverages all existing available data (support strategy and usage).
- Identify and document system, platform, or vehicle level obsolescence evidence .
- Provide platform or equipment managers factual documentation necessary to forecast resources via Army Working Capital Fund (AWCF) Sustainment System Technical Support (SSTS), and plan corrective actions and material change efforts.

TACOM LCMC Industrial Base Integration Team (IBIT) Console

Welcome.

The TACOM LCMC Industrial Base Integration Team (IBIT) was established to identify, forecast, resolve and inform on industrial base issues and to support current and future peacetime and contingency operational Industrial Base (IB) needs. This mission and functions are outlined in Army Regulation 700-90 and other supporting regulations and guidance.

In order to support this effort we have created a TACOM LCMC IBIT Console made up of selected modules to support a variety of Industrial Base concerns.

We look forward to your comments and questions on this IB Tool.

Using the IBIT Console – Homepage

The screenshot displays the IBIT Console homepage. At the top, a blue header bar contains the "IBIT Console" logo on the left and an "about" link on the right. Below the header, a light blue navigation bar features a "Home" link and a user status bar on the right that reads "User : NANW/teri.l.beale | Version : 2.0.3923.14218". The main content area is divided into three horizontal panels, each with a blue header and a light blue body. The first panel, titled "My Menu", lists: "Create New IBAR", "Draft IBARs (1)", "Submitted IBARs (0)", "Active IBARs (0)", "Resolved IBARs (0)", and "Closed IBARs (6)". The second panel, titled "Public Menu", lists: "Draft IBARs (2)", "Submitted IBARs (0)", "[Active IBARs \(24\)](#)", "Resolved IBARs (0)", and "Closed IBARs (9)". The third panel, titled "Board Menu", lists: "Submitted IBARs (0)", "Active IBARs (24)", "Resolved IBARs (0)", and "Closed IBARs (11)".
