FOREWORD

The "USAF Statistical Digest". (Short Title. USAFSD -54) summarizes in one document the volume of statistical data collected and published by various offices in Headquarters, United States Air Force and certain major commands. It is to be used as the official basic reference document for the period and areas covered.

The Fiscal Year 1954 edition is the ninth edition of the series. Original editions - Army Air Force Statistical Digest (World War II) and supplement Number 1, 1945 were followed by AAF Statistical Digest, 1946 and USAF Statistical Digest 1947. The 1946 and 1947 editions made Air Force Statistics available in summarized form, available as far back as possible, with the exception of Combat Operations. This data is found only in the 1945 edition. The 1948 issue was the first strictly annual publication. The present issue, and the 1949, 1950, 1951, 1952, and 1953 editions are organized on a Fiscal Year basis.

Immediately following the table of contents is a Major Air Command Directory, containing information which is appropriate to all data included in this issue. Definitions appropriate to only one area will be found in an introductory statement preceding the Part in question.

Sources of the majority of the data are the published and unpublished records of the Directorate of Statistical Services. The balance of the data was furnished by other agencies as noted in source reference data.

Correspondence relative to the content of this document as well as recommendation for new material for inclusion should be addressed to Director of Statistical Services, Headquarters United States Air Force, Washington 25, D. C.

Organizations Combat and Airlift Units

PART I

ORGANIZATIONS - COMBAT AND AIRLIFT UNITS

The tables included in this section provide a summary of active USAF Organizations and summary data pertaining to composition, status, deployment, aircraft, crews and operational readiness of the USAF Combat and Airlift Units, including supporting flying units, during the Fiscal Year 1954.

In addition to information reflecting the status and deployment of the USAF Combat and Airlift Units, the tables contain the following data by type of unit: Total units activated, equipped units by type and model of aircraft possessed; authorized, on hand and combat ready aircraft and crews in units by type and model of aircraft and composition of squadrons by Table of Organization reflecting authorization of aircraft, crews, crew personnel and military personnel.

DEFINITIONS

COMBAT AND AIRLIFT UNIT

A classification of military force having an organization prescribed by the Department of the Air Force, the primary mission of which is one or more of the following:

1. Destruction of enemy forces, resources, and/or installations, for example, bombardment and fighter units and troop carrier units which have a mission of providing airlift for combat elements.
2. Furnishing operational assistance to combat elements, for example, reconnaissance, troop carrier, and supporting flying units.

A Combat Unit is said to be combat ready when it is manned, equipped and fully prepared to perform its combat mission.

COMBAT MISSION

The combat mission of an organization is the specific combat task assigned or, if no specific combat task is assigned the task ordinarily performed by that type of organization under combat conditions. In the latter case, the mission may be limited by the weapon in the possession of a unit. For example, a unit authorized jet bombers but actually possessing B-29's will consider as its mission the type of operation ordinarily performed by B-29's.

SUPPORT FORCES

Support Forces as shown in the following tables are those flying units consisting of designated types other than those comprising a Combat Group or Wing structure and having a mission of furnishing operational assistance to combat elements.

TABLE 3 - COMBAT AND AIRLIFT WINGS AND SQUADRONS, BY TYPE, WORLD-WIDE, CONTINENTAL US, AND OVERSEAS - FY 1954

Statistics on the number of Combat and Airlift Wings and Squadrons (including Flying Supporting Units) presented in the following tables include only those units which were actually activated and/or organized prior to or on the dates shown, and for which inactivation or discontinuance orders had not been actually accomplished by the dates shown. The units are listed by the number of wing headquarters (with certain exceptions) and squadrons of Bomber, Fighter, and Reconnaissance as the Combat types and the Troop Carrier as the Airlift type. The flying supporting units are Troop Carrier Assault, MATS Air Transport and Air Refueling Squadrons as the Support Forces and Air Rescue and Photographic Mapping Groups and Airborne Early Warning and Control, Air Resupply, Liaison, Logistic Support, Weather Reconnaissance, Air Transport (Air Evacuation), Strategic Support, Tow Target and Pilotless Bomber Squadrons and Radar Evaluation Units as the Separate Units. The exception in concept of a Wing referred to above are those squadrons which have no wing headquarters but are considered as equivalent of a wing on the basis of three squadrons comprising one wing and are so included in these tables. Figures within parentheses represent the number of squadrons of the type corresponding to the wing or group. Activated units presented in these tables are defined in AFR-20-38.

Units located within the continental limits of the United States are shown within their respective assigned commands. Units located outside the continental limits of the United States are shown in the major commands in which they are located.

TABLE 7 - OPERATIONAL READINESS OF COMBAT AND AIRLIFT WINGS - FISCAL YEAR 1954

Unit capabilities are expressed as "C" ratings. These evaluations are prepared by Headquarters USAF after considering all known factors affecting unit readiness.

- C - 1 High degree of relative effectiveness. Adequately manned, equipped and trained to perform assigned mission with latest type UE (first line aircraft or equipment).
- C - 2 Same as above with second line aircraft or equipment (B-29, etc) or with first line aircraft not designed to perform the primary mission of the unit.
- C - 3 A lesser degree of effectiveness than indicated above on either first or second line equipment. Shortage of personnel, facilities, etc, exists.
- C - 4 A very low degree of effectiveness. Extreme shortage in equipment, personnel and facilities exists.

FLIGHT OPERATIONS

INTRODUCTION AND DEFINITIONS

Aircraft flight operations data included in this section are based on statistics submitted on AF Form 110A in accordance with AFR 65-110 as revised. The data in this section of this Statistical Digest are not exactly comparable to previous editions in that reporting codes and definitions have been revised. The 110A report is compiled on a physical possession basis with the various activity categories determined by the assigned purposes of the status of the aircraft rather than actual use.

The tables provide summary data covering flight operations on "Operating Active", "Other Active" and "Inactive" USAF aircraft and include aircraft utilization, flying hours, fuel consumption, etc., during the FISCAL YEAR 1954. The data are segregated into the following types of activity:

(AD) Administrative: Aircraft assigned major air commands for the performance of command administrative missions.

(CC) Primary Tactical Unit: Aircraft assigned as primary unit equipment for the direct accomplishment of tactical unit operations.

(CE) MATS Air Evacuation: Aircraft assigned for the accomplishment of air evacuation operations within MATS.

(CS) Operational Support: Aircraft assigned for essential liaison and logistic support not otherwise provided and for the required combat readiness training of rated personnel not presently assigned to tactical units or crew positions.

(CP) Tactical Unit Support: Aircraft which are authorized and assigned as tactical unit support aircraft.

(CM) Special Mission: Aircraft assigned to special units and activities of the Air Force for the accomplishment and support of special missions.

(CT) MATS Transport: Aircraft assigned for the accomplishment of transport operations within MATS.

(CU) Student Training: Aircraft assigned to perform the mission of student and combat crew training within the Air Training Command only.

(CX) MDAP Aircraft Temporarily Diverted to USAF: Aircraft programmed for foreign countries under the Mutual Defense Assistance Program for which delivery to the ultimate recipient foreign country has been deferred in order to divert temporarily those aircraft to the USAF.

(ES) Test Support: Aircraft assigned to support organized test of aircraft and allied equipment other than aircraft on bailment contract for test support.

(EX) Test: Aircraft assigned for testing, research and development other than "X" models and aircraft on bailment contract.

(TC) Combat Crew Training: Aircraft assigned specifically to combat training schools for the accomplishment of combat crew training.

Operating Active: The total of codes AD, CC, CE, CS, CP, CM, CT, CU, CX, ES, EX AND TC.

Safety

***PART* III**

S A F E T Y

The data presented on this category are subdivided into two sections: Flying Safety and Ground Safety.

FLYING SAFETY

The content of this section presents data on aircraft accidents which occurred in the United States Air Force and the Air National Guard during Fiscal Year 1954. USAF, command, and aircraft type and model totals include flying time and accidents of Air Force Reserve aircraft, ANG aircraft, and the Navy units flying for the Military Air Transport Service.

During Fiscal Year 1954, all accidents, major and minor, totalled 3,070. These accident statistics are reflected herein by command, by type and model of aircraft involved, by phase of operation in which the accident occurred, by the factors causing the accident and by the conditions affecting the accident. All rates are expressed in number of accidents per 100,000 flying hours.

DEFINITIONS

AIRCRAFT ACCIDENT:

An event not caused directly by enemy action, involving one or more Air Force aircraft (including ANG aircraft) that occurs between the time the engine(s) is started for the purpose of commencing flight and the time when the aircraft lands and comes to rest with the engine(s) stopped for normal deplaning, and which results in minor, substantial damage or destruction of the aircraft.

MAJOR ACCIDENTS:

When the aircraft is destroyed or receives substantial damage.

ALL ACCIDENTS:

As used herein is the total of major plus minor accidents. A minor accident is one which the aircraft receives minor damage.

FATAL ACCIDENT:

In which any person receives fatal injuries.

FATAL:

A fatal injury that results in death because of major injuries received in the accident or the complications arising therefrom. Fatalities enumerated include all persons killed and/or missing as a result of USAF aircraft accidents.

DOLLAR LOSSES:

Represent the investment cost of airplanes destroyed, plus average cost of labor, material and indirect expenses required to repair airplanes sustaining substantial damage as the result of accidents. Dollar losses do not include the cost of lives lost, injuries, property damage, search and rescue, minor aircraft damage or other losses resulting from aircraft accidents.

BAILEMENT AND/OR LOAN:

Accidents in aircraft which are on bailment contract or on loan are included in the total number of accidents appearing in this section. However, flying time is not available for bailment/loan aircraft, and accidents in these planes have not been included in rate computations.

Data in this section secured from the USAF Flying Accident Bulletins published by Directorate of Flight Safety Research, Office of the Inspector General, Norton Air Force Base, California.

b/ Accident data for the Air National Guard are included since 1947. This tabulation may, therefore, not necessarily agree with data published in prior years which excluded the ANG.

c/ Accidents and Flying Hours of Navy Units flying for MATS included since 1950.

a/ Flying hours include 98,278 hours flown by Navy for MATS.

b/ USAF Security Service, Joint Brazil-U.S. Military Commission and hours flown by USAF crews delivering aircraft to overseas MDAP recipients.

c/ For statistical purposes accidents during ferrying in aircraft possessed by one command but operated by another are not charged to a specific command, but are included in the USAF totals.

Accidents in aircraft which were on bailment contract and/or on loan are included in the above and succeeding tabulations of USAF Aircraft Accidents. However, flying time is not available for B/L aircraft, and accidents in these planes are not included in rate computations. The B/L accidents are listed below.

a/ Flying hours include hours flown by Navy for MATS.

b/ Includes non-USAF fatalities which are excluded from rate computation.

Accidents in aircraft which were on bailment contract and/or on loan are included in the above and succeeding tabulations of USAF Aircraft Accidents. However, flying time is not available for B/L aircraft, and accidents in these planes are not included in rate computations. The B/L accidents are listed below.

TABLE 19 - USAF AND ANG MAJOR ACCIDENTS AND DOLLAR LOSS BY PRIMARY CAUSE FACTORS OF ACCIDENTS - FY 1954

Since multi-plane accidents are analyzed statistically as single accidents and are tabulated by responsible aircraft, the dollar losses shown may include losses in models other than the model listed in the line total. The line totals indicate accident dollar loss for which each model was responsible.
(Includes Air Force Reserve, MATS Navy Units and CAP Aircraft in the USAF Inventory)

GROUND SAFETY

Ground Accident statistics were approved and directed by Air Force Regulation 32-1, dated 24 August 1948.. (See paragraph 4a(6).) In establishing the reporting system, standardized cost factors and definitions have been approved. The present standard accidents costs for injuries and fatalities were established by Air Force Regulation 32-2, dated 11 March 1954.

FISCAL YEAR 1954		
Injury	Military	Civilian
Non-Disabling	\$ 7.00	\$ 7.00
Temporary Total	30.00/Day	14.00/Day
Permanent Partial	43,000.00	10,500.00
Permanent Total	63,500.00	70,000.00
Fatal	31,500.00	25,000.00

Quarterly estimates can be made by dividing the total by 4, as the quarterly experience was approximately equal. Frequency rates were computed to the following formulas:

- a. Civilian Injury Rate = $\frac{\text{Number of Civilian Disabling and Fatal Injuries} \times 1,000,000}{\text{Total Hours of Civilian Employment}}$
- b. Military Injury Rate (On Duty) = $\frac{\text{Number of Military Disabling and Fatal Injuries "On Duty"} \times 100,000}{\text{Total Military Man-Days of Exposure} \times 1/3}$
- c. Military Injury Rate (Off Duty) = $\frac{\text{Number of Military Disabling and Fatal Injuries "Off Duty"} \times 100,000}{\text{Total Military Man-Days of Exposure} \times 2/3}$
- d. USAF Motor Vehicle Accident Rate = $\frac{\text{Number of USAF Motor Vehicle Accidents} \times 100,000}{\text{Total USAF Motor Vehicle Mileage}}$

Cost Per Capita was computed by the following formula per month of per annum:

$$\frac{\text{Cost of Injuries} + \text{Cost of Fatalities} + \text{Cost of Property Damage}}{\text{Total Command Strength (Average Military and Average Civilian)}}$$

The strength figures employed were based on exposure (man-days for military and man-hours for civilians) as reported by the Major Air Commands.

The "USAF Statistical Digest" reports accidents and accident rates on a fiscal year basis. The following reductions and increase were noted for fiscal year 1954 over fiscal year 1953:

Military Accident rates	- Continental US	- 4.46 per cent decrease
Military Accident rates	- Overseas	- 5.76 per cent increase
Civilian Accident rates	- Continental US	- 31.29 per cent decrease
Civilian Accident rates	- Overseas	- 46.00 per cent decrease
USAF Motor Vehicle Accident rates	- Continental US	- 21.38 per cent decrease
USAF Motor Vehicle Accident rates	- Overseas	- 15.79 per cent decrease

The following definitions were used in developing the tables in this section of the book:

DISABLING INJURY - An injury which results in death, permanent total, permanent partial injury, or an injury, which in the opinion of competent medical authority makes it impossible for the injured to return to work or duty at any time during the next calendar day following date of injury.

TORT CLAIM - Any wrong, injury, or damage, not including a breach of contract, for which a civil suit can be brought.

USAF MOTOR VEHICLE ACCIDENT - An incident involving the operating of an Air Force motor vehicle which results in either disabling or non-disabling injury to Air Force personnel and/or non-USAF persons and/or damage aggregating \$25.00 or more to Air Force motor vehicles, or to other vehicles or property without regard to ownership.

USAF PROPERTY DAMAGE ACCIDENT - An incident resulting from Air Force Ground operation wherein Air Force property is accidentally damaged in amount of \$25.00 or more.

FISCAL YEAR 1954 MAJOR AIR COMMANDS ARE REPORTED AS FOLLOWS:

Continental Command - A Major Air Command whose headquarters and subordinate units are located within the Continental United States.

Overseas Command - A Major Air Command whose headquarters and subordinate units are located outside the Continental United States.

Aircraft and Materiel

PART IV

AIRCRAFT-MATERIEL

INTRODUCTION AND DEFINITIONS

The tables included in this section provide summary data pertaining to the procurement, production, inventory, status, deployment and disposition of USAF aircraft, and similar information for other major items of materiel in the USAF during the Fiscal Year 1954.

In addition to information reflecting the status of aircraft procurement and production, these data contain the following information by type and model of aircraft: Total aircraft inventory, active and inactive aircraft inventory, planned program, aircraft in and out of commission, aircraft in storage, aircraft excess to all military requirements, aircraft production, gains and losses to the aircraft inventory, and a summary of active and inactive aircraft by functional distribution.

The classification of aircraft herein is in accordance with AF Regulation 65-60, dated 9 May 1949, and changes A and B, Aeronautical Board Memorandum, dated 21 October 1947, and the latest AF Technical Orders and other authorizations. The type classification is generally based upon the basic type designator or the prefix preceding the basic type designator of each aircraft model. A prefix is assigned an aircraft model when the aircraft is modified to perform a function (indicated by the prefix) other than its basically designated purpose. The classification into FIRST AND SECOND-LINE categories is in accordance with HOI 27-2, dated 16 March 1954 and as specified in PEACETIME PLANNING FACTORS MANUAL AS OF JUNE 1954.

The following definitions apply to the terms herein -

AIRCRAFT: Any weight carrying structure for navigation of the air, designed to be supported either by buoyancy of the structure, or by the dynamic action of the air against its surface. All aircraft which have been accepted by the USAF and USAF Reserve Forces and which are currently in the accountable inventory are included, except Class 012 aircraft which are shown separately.

AIRPLANES: All aircraft except aerial target type aircraft.

ACTIVE AIRCRAFT INVENTORY: The number of aircraft provided an organization in the accomplishment of its mission - aircraft undergoing maintenance, administrative aircraft, test aircraft (excluding those test aircraft on bailment and X-prefixed models), aircraft provided for operational support, active project aircraft and enroute aircraft.

INACTIVE AIRCRAFT INVENTORY: Storage aircraft, flyable inactive aircraft, aircraft undergoing modification, aircraft on loan, bailment contract (except those bailed for maintenance), X-prefixed aircraft, aircraft declared excess to requirements, aircraft recommended for reclamation, aircraft on project for assignment to a non-USAF activity, inactive project aircraft, and aircraft accepted by USAF but not delivered to recipient.

FIRST AND SECOND-LINE AIRCRAFT: The classification of aircraft into first and second-line categories is in accordance with the provisions of HOI 27-2 dated 16 March 1954, and the first-line life specified in PEACETIME PLANNING FACTORS MANUAL AS OF JUNE 1954.

ACCEPTANCE: Aircraft which have been shop-assembled and fully inspected by constituted USAF or Navy production authorities; and the title, responsibility, and accountability assumed by the contracting agency or recipient.

IN COMMISSION: In commission means that an aircraft, without additional repair or maintenance, is safe and capable of normal flight operations. This does not necessarily indicate that the aircraft is capable of performing a specific mission such as combat, photo, etc., but merely that the aircraft is flyable and that the Form 1 and the Form 41B do not bear a red cross. Weather, runway conditions, shortage of operations personnel, or other factors not relating to the aircraft itself will not cause an aircraft to be reported "out of commission".

A O C P: "Aircraft Out of Commission Awaiting Parts: are those aircraft not flyable as indicated by a red cross on Form 1 and Form 41B, solely due to lack of parts. Aircraft will not be reported as awaiting parts unless the required parts have been requisitioned from the normal supply source at the station where the aircraft is located and notification has been received from the normal supply source that the parts are not available. This category does not include those aircraft awaiting parts required for the performance of modifications defined in AF Regulation 65-60.

AIRFRAME WEIGHT: The weight of the assembled principal structural components of an airplane. It includes hull or fuselage, wings, stabilizers, vertical fins, control surfaces, landing gear, and nacelles.

GUIDED AIRCRAFT ROCKET: A type of self-propelled aircraft armament normally carried by piloted aircraft and which, after launching, can be guided to the target which it destroys by means of an explosive war-head.

USAF GUIDED MISSILES: An unmanned vehicle moving above (about) the earth's surface whose trajectory or flight path is capable of being altered by a mechanism within the vehicle. Pilotless aircraft and guided aircraft rockets were redesignated USAF Guided Missiles as of 16 November 1954.

USAF AMMUNITION: All stocks of serviceable and suspended Air Force ammunition items physically on hand.

CLASS 012: Complete aircraft used for ground instructional training.

Aviation Fuel and Oil

PART

VI

AVIATION FUEL AND OIL

The information contained in this section summarizes USAF aviation fuel and oil, world-wide, for Fiscal Year 1954.

The data shown in the following tables include fuel and oil inventories, issues and receipts.

DEFINITIONS: The following definitions apply to the terms herein:

AVIATION FUEL - applies to aviation gasoline and jet fuel. Aviation gasoline is graded by octane rating in order - 115/145, 100/130, 91/96 and 80. Jet fuel includes JP-3 and JP-4.

AVIATION OIL - a term which applies to aircraft engine lubricating oil, graded thus - 1120, 1100, 1080, 1065 and jet oil - 1015, 1010 and 1005. It does not include reused product.

INVENTORY - Product on hand at base, terminal and in transit.

IN TRANSIT - Product on way to destination. Applies to both overseas and zone of interior.

ISSUES - Includes fuel consumption for flying purposes, fuel utilized for other than direct flight operations; i.e., crash boats, engine block testing, and modification centers. "Issues" is broken down into four "Sales" - charge sales (issues to users of USAF, USAF Reserve and Air National Guard Aircraft, and other than aircraft), reimbursable sales to other than USAF Aircraft, issues for cash, and exchange account (Canadian AF or Canadian Navy).

DETERMINABLE LOSSES - Loss of fuel or oil due to fire, shrinkage, leakage, contamination or downgraded fuel or oil.

RECEIPTS - The increase in inventory caused by receipt of incoming shipment of product.

TABLE 97 - MUTUAL DEFENSE ASSISTANCE PROGRAM (MDAP) TECHNICAL REPRESENTATIVES, WORLDWIDE - FY 1950 THROUGH FY 1954

(These data show Technical Representatives giving training rather than students receiving training. The number of actual recipients of training cannot be determined, since successful trainees become teachers of others. Data for the table on a monthly basis were not available prior to 31 January 1954. Technical Representatives are defined as contract civilian technical specialists engaged in technical assistance, providing instruction or guidance in connection with newly designed or complicated equipment, whose skills are not available from military sources. Value is defined as the amount of money, expressed in United States dollars, contributed by the United States and recipient countries.)

(These data show Mobile Training Teams giving training rather than students receiving training. The number of actual recipients of training cannot be determined, since successful trainees become teachers of others. The only data available are cumulative FY 1950 through FY 1954. A Mobile Training Team is a group of one or more specialists organized to provide training instruction, guidance, or assistance to Mutual Defense Assistance recipient countries. Mobile Training Teams include the personnel of mobile training units, as well as military and/or civilian technical specialists (other than technical representatives) on mobile training team duty on a temporary basis. Value is defined as the amount of money, expressed in United States dollars, contributed by the United States and recipient countries.)

Operational control comprises those functions of a command involving the composition of subordinate forces, the assignment of tasks, the designation of objectives, and the authoritative direction necessary to accomplish the mission. Normally it does not include such matters as administration, discipline, or internal organization.

OPERATING LOCATION

A permanent duty station of an individual. A station is considered permanent if the orders specify a period of three months or longer. If no period is specified the duty station is considered permanent.

OPERATIONAL READY AIR CREW

A complete air crew, present for duty, which a unit commander considers fully capable of performing the type of flying operation required of it by the tactical unit's combat mission. Complete air crews with other than tactical units will be considered operationally ready if determined by the commander of the unit to which assigned or attached to be qualified, without further training, for immediate assignment to tactical units, in the capacity in which reported.

PERMANENT PARTY PERSONNEL

Those personnel assigned to a unit to perform their principal duty in the furtherance of the missions of the unit and who are properly chargeable against the authorization of the unit. This is to include assigned over-strength.

PIPELINE PERSONNEL

Those USAF, SCARWAP, and Navy personnel who are assigned to an Air Force Unit temporarily for the purpose of administration and enlistment, reenlistment, replacement processing, training or hospitalization, i.e., those that are temporarily ineffective. Such personnel are not chargeable against the specific authorizations of the unit to which they are assigned while in a pipeline status.

The categories of pipeline personnel are defined as follows:

(1) Oversea Replacements. Personnel who are assigned to a unit to be processed for further reassignment and movement to duty with an oversea unit.

(2) Returnees. Personnel who are assigned to be processed for return from overseas for further reassignment and movement to duty with a ZI unit.

(3) Fillers. Personnel assigned to a unit as a result of just having entered extended active duty and who

DEFINITIONS

are awaiting reassignment to another unit for duty, further training, or overseas movement.

(4) Patients. Hospitalized personnel assigned to an Air Force unit which administers personnel undergoing inpatient treatment at a medical facility operated by any of the three military departments.

(5) Students. Personnel assigned in a student status to a unit charged with administration of individuals attending a formal course of instruction at a service or civilian school or a basic military training course.

PRIMARY AIR FORCE SPECIALTY (Primary AFS)

The awarded AFS in which an Officer or Airman is most highly qualified to perform duty.

REGULAR AIR FORCE PERSONNEL

Department of the Air Force military personnel who are, by enlistment, appointment, or commission, members of the Regular United States Air Force.

RETIREMENT

Retired from combat flying upon completion of tour. For the tables herein, only those personnel who have completed a tour of duty and are withdrawn from combat flying and are not expected to perform any additional combat duty on the current tour are considered as retirements.

SCARWAF PERSONNEL

Those Department of the Army personnel assigned as permanent party or pipeline to a USAF or SCARWAF unit.

SKILL LEVEL

The level of an AFS which indicates the degree of qualification of airman:

<u>Skill Level</u>	<u>Fourth Digit of AFSC</u>
Advanced	7
Skilled	5
Semi-skilled	3
Unskilled	1

SORTIE

An aircraft airborne on an assigned mission against the enemy or in support of combat operations. Normally, a sortie begins when aircraft is airborne and ends at time of first scheduled or intended landing.

SORTIE CREDIT

The credit which an air crew member receives for having flown on a combat mission and which is used as a measure for the determination of a tour of duty.

TACTICAL AIR CREW

A stipulated number of tactical air crew personnel locally organized as a crew to operate primary tactical unit aircraft.

TACTICAL AIR CREW PERSONNEL

Personnel whose current principal duty is the occupancy of an air crew position in a primary tactical unit aircraft.

TACTICAL MISSION

A mission flown by a tactical unit in performing its designated functions.

TACTICAL UNIT

A unit organized for the direct accomplishment of combat mission or for operations in direct support thereof (specifically, those types of units listed in Table 11, parts A, C and D, AFL 150-10, 2 February 1953.)

TOUR OF DUTY

The accomplishment of a variable amount of combat, or combat support activity, which, in the judgment of the theater or major air commander is sufficient to constitute eligibility for retirement of air crew personnel, current operational demands upon the command permitting. Although usually measured in sorties, combat hours, time in theater, or a combination of these factors, the actual retirement point will vary depending upon local conditions, availability of replacements, etc.

DEFINITIONS

TRANSFER

Permanent change in departmental status, regardless of whether or not accompanied by a change of command status and/or unit assignment.

USAF PERSONNEL

Those Department of the Air Force military personnel assigned as permanent party or pipeline to a USAF or SCARWAF unit.

2. Those who are losses from service because of fatality as a direct result of training.
3. Those who are withdrawn from a course because of illness, death, or any reason other than 1 and 2 above and who will not continue that course at a later date.

COURSE LENGTHS

A table showing the approximate length of courses at the Air University, Air War College, Air Command and Staff School, and Joint Service School for FY 1954 is entered below:

Air War College (Top Secret)	10 Months
Field Officer Course (Top Secret).	22 Weeks
Squadron Officer Course (Restricted)	10 Weeks
Communications Electronics Staff Officer Course (Crypto)	22 Weeks
Logistic Staff Officer Course (Top Secret)	22 Weeks
Comptroller Staff Officer Course (Secret).	15 Weeks
Judge Advocate General Staff Officer Course (Restricted)	10 Weeks
Academic Instructor Course (Restricted).	6 Weeks
Air Weapon Course (Top Secret)	7 Weeks
Air Weapon Orientation Course (Top Secret)	5 Days
Intelligence Staff Officer Course (Top Secret)	22 Weeks

FATALITY

This type of attrition is a student lost from a course by reason of accidental death, occurring as a direct result of training while actually undergoing instruction. (Students becoming fatalities by reason of death from other causes are reported as "Other".)

FOREIGN NATIONALS

Students who are detailed to the school in an attached status from any foreign country, territory, or possession, excluding those possessions and territories of the United States of America.

GRADUATES

Students who have successfully completed a course in which enrolled.

MILITARY PERSONNEL TRAINING (CONTINUED)

DEFINITIONS

MDAP TRAINING

Refers to the training of foreign nationals under the Mutual Defense Assistance Program. (They are included in the foreign training statistics of the tables, but a training table on MDAP may be found under that area of the publication.)

STUDENTS

Training students are those personnel enrolled for the purpose of undergoing standardized courses of instruction at service schools conducted by the US Air Force, Army, Navy, and Civilian Schools and Hospitals. (This group includes USAF, Army, Navy, and Civilian students, or foreign nationals.) In referring to USAF training, students fall under these categories:

1. Assigned - Personnel assigned to the school unit and for whom the school unit is responsible for morning report strength accountability.
2. Attached - Personnel attached to the school unit from other units of the Air Force or other Federal agencies, who are scheduled to return to their respective units upon completion of the course, and for whom strength accountability is at all times maintained by such other units.

TABLE 130 -- OFFICERS SELECTED FOR TEMPORARY PROMOTIONS BY FISCAL YEAR IN WHICH SELECTED --
FY 1950 THROUGH FY 1954

(Selections made by Selection Boards do not necessarily mean actual promotions, as cancellations may be made because of resignations, etc. The table includes both regular and non regular officers. The table excludes selections of Captains for promotions accomplished through other than Selection Board actions such as those selected under AFL-36-25 or AFR 36-14. Temporary promotions of Second Lieutenants to First Lieutenants are also excluded as such promotions were not accomplished by action of a Selection Board. Complete data on temporary promotion of lieutenants were not available for this publication. No SCARWAF included).

Medical Activity
Casualties and
Patient Transport

PART XIII

MEDICAL ACTIVITY, CASUALTIES, AND PATIENT TRANSPORT

DEFINITIONS

ACTIVE DUTY MILITARY PERSONNEL

Consists of all military personnel who are on extended active duty. Excluded are military personnel who are on short tours of duty.

ADMISSION FROM DUTY

The enrollment in a patient status of a military person whose treatment requires that he be excused from duty beyond midnight of the day on which he reported for treatment, whether treated in a hospital, an infirmary or quarters. A patient is considered as admitted from duty only once during a continuous period of treatment; if he is transferred from one medical facility to another, the transfer is not an admission from duty. The term includes patients admitted to non-military medical facilities when the reporting facility has assumed responsibility for the records of the patient. Admissions from AWOL, except those AWOL from a patient status, are counted as admissions from duty. The term excludes persons treated on an outpatient status, and cases carded for record only.

ADMISSIONS RATE

A measure which indicates the frequency of patients being relieved from duty because of medical reasons. Hence, the admission rate is based on admissions from duty. The conversion of number of admissions to show the number of admissions that would occur during a year if admissions occurred throughout an entire year at the same frequency as in the period of observation, per thousand average strength is termed the annual admission rate and is computed as follows:

$$\frac{\text{Number of admissions during X number of such periods in a year} \times 1000}{\text{Average daily strength during the period}}$$

ADMISSIONS TO HOSPITALS AND INFIRMARIES

Include all patients admitted to the wards of an Air Force hospital or infirmary whether from duty or by transfer from another medical facility. Excluded are cases treated in quarters, or in a duty status, or in a nonmilitary medical facility.

AVERAGE OCCUPIED BEDS

The average daily number of patients occupying beds in hospitals and infirmaries as of midnight of a given day.

AVERAGE STRENGTH SERVED

Includes not only those U. S. active duty military personnel for whom a base holds sick call, but also those U. S. active duty military personnel reporting elsewhere (Dispensaries) for sick call but attached to the base for in-patient care.

CASUALTY

Any person who is dead (from any cause) or whose services are lost to his unit for 24 hours or more because of involuntary absence (missing), capture, internment, or wounds, or injuries requiring admission to a medical treatment facility. Any person undergoing treatment for wounds or injuries as of 2400 local time, is considered as having been lost to his unit for 24 hours or longer. Mental disorders, psychoneurotic cases, colds and other diseases (not causing death) are not included as casualties. Casualties are divided into "battle" and "nonbattle" categories.

CAUSATIVE AGENT

That instrumentality, factor, or occurrence resulting in death, wound, injury, or missing status.

COMPLETE PHYSICAL EXAMINATIONS

Include only routine physical examinations performed in accordance with USAF directives and recorded on the report of medical examinations (Standard Form 68); physical inspections of food handlers or barbers are not included nor are examinations for personnel reporting sick.

DEATHS

Includes those persons killed outright (or dying before reaching a medical treatment facility); those wounded or injured persons who subsequently died of their wounds or injuries (after being admitted to a medical treatment facility); those persons reported as missing who were either subsequently conclusively determined to have been

MEDICAL ACTIVITY, CASUALTIES, AND PATIENT TRANSPORT (CONTINUED)

killed, or who, having been in a missing status for a year or more, were presumed to be no longer living; whether or not these incidents occurred "in action" or under "battle" or "nonbattle" conditions.

FULL TIME EQUIVALENT PERSONNEL

Are total assigned and attached personnel converted into actual full-time strength; for example, 10 individuals employed on a full-time basis and 4 individuals employed on a half-time basis, are considered to be 12 full-time equivalents.

HOSPITALIZATION RATIO

The proportion of strength occupying hospital and infirmary beds on an average day (of the period for which it is computed). It differs from the noneffective ratio in that quarters or dispensary patients are excluded. The ratio is computed per 100 strength as follows:

$$\frac{\text{Number of sick days in hospital and infirmary in the period} \times 100}{\text{Average daily strength} \times \text{number of days in the period}}$$

or:

$$\frac{\text{Daily average number of patients occupying hospital and infirmary beds}}{\text{Average daily strength for the period}}$$

INCIDENCE

A count of diagnostic entities reported, as distinguished from number of patients admitted.

MISSING

Any person is missing who is involuntarily absent or who fails to return from a scheduled flight or mission, who is not known to be dead, AWOL, in a hospital, in confinement, on leave, or in any other absent category.

NONBATTLE CASUALTY

Any dead (including those as a result of disease), or wounded, injured or missing person, not classed as "Battle" casualty are defined herein. All self-inflicted wounds or injuries and injuries due to elements such as frostbite and trenchfoot are considered to be "nonbattle". If there is any doubt as to whether a casualty, occurring under combat mission conditions, was due to "nonbattle" factors, the casualty is classed as "battle" and not as "nonbattle."

NONEFFECTIVENESS

The temporary loss of manpower from duty, in this context for medical reasons.

NONEFFECTIVE RATIO

The proportion of strength not available for duty on an average day (of the period for which it is computed) because of medical reasons whether under treatment in hospital, infirmary, dispensary, or quarters. The ratio is computed per 100 strength as follows:

$$\frac{\text{Number of sick days in period} \times 100}{\text{Average daily strength} \times \text{number of days in period}}$$

or:

$$\frac{\text{Average daily number of "patients remaining"} \times 100}{\text{Average daily strength}}$$

OPERATING BEDS

Those medical treatment facility beds which are currently set up and in all respects ready for the care of patients, and which the facility is staffed and equipped to operate. Bassinets and dispensary beds are not included.

OUTPATIENT TREATMENTS

An outpatient who presents himself for medical advice or treatment at a medical facility, is counted as one outpatient treatment each time he reports at any one of the clinic or departments; consequently, more than one treatment may be reported for each visit.

OUTPATIENT VISITS

A visit is counted for each patient (not excused from duty) who on a given day presents himself for either medical advice or treatment. On any given day, only one visit is counted regardless of the number of times the patient is seen; when the patient is seen on multiple days, one visit is counted for each day. Patients reporting for pre-

MEDICAL ACTIVITY, CASUALTIES, AND PATIENT TRANSPORT (CONTINUED)

scribed examinations and immunizations are not counted as a visit.

PRINCIPAL DIAGNOSES

A term used to indicate the sum of sole and primary diagnoses.

SPECIFIED PERIODIC EXAMINATIONS OR TESTS

Are those examinations or tests administered to personnel, military or civilian, exposed to industrial-type hazards.

RETURNS TO MILITARY CONTROL

Persons, previously reported as missing, who have returned to military control from a missing status.

VARIABILITY ASSOCIATED WITH ADMISSIONS AND DISPOSITIONS

Estimated numbers have been shown in Tables 6, 7, and 8. Estimated numbers have been computed by multiplying the number of cases observed in the sample by 10. Because of sampling variation, it is obvious that the actual number may have been smaller or larger than the computed estimate and still have resulted in the number observed in the sample. Minimum and maximum reasonable estimated values of the actual number, computed from the observed sample may be obtained as follows:

Let n = the number in the total population

r = the number observed in the sample

When r is greater than 500:

$$n = 10 r \pm 19 \sqrt{r}$$

When r is less than 500:

$$n = 10 r + 18 \pm 19 \sqrt{r}$$

This means that there is only about one chance in 20 that the actual number would lie outside of the values so computed:

When r is less than 5:

$$n = 10 r + 18 \pm 19 \sqrt{r + 0.9}$$

This last computation is not recommended because so small a number in the sample can give only a very vague notion of the actual number noted in the total Air Force.

VARIABILITY ASSOCIATED WITH RATES

Table 9 contains rates and ratios based on the experience of that one-tenth of the Air Force represented by the 10 per cent sample of medical records. The reliability of a rate, for predictive purposes, is judged according to its statistical variability. The larger the population on which a rate is based, the smaller the variability and the greater is its reliability.

Variability commonly expressed by a range of 2σ above and below the computed rate, where

$$\sigma = \sqrt{\frac{R(1-R)}{N}}$$

R is the computed rate, and N is the total population (on which the rate is based). Roughly speaking, there is only one chance in 20 that the true rate lies outside this range.

The variability of an admission rate based on a 10 per cent sample is 3.16 times the variability of that rate if it were based on a 100 per cent sample. For example, in Table 9, the total admission rate is 362 per 1000 strength (36,213 per 100,000) is based on the 10 per cent sample. The 2σ range is computed to be from 359 to 366 per 1,000. If this rate had been based on a sample ten times as large (100 per cent sample), the 2σ range would have been from 361 to 363 per 1,000 strength.

SECURITY AND DISCIPLINE

OFFICE OF SPECIAL INVESTIGATIONS

DEFINITIONS

AUXILIARY OFFICE OF INVESTIGATIONS - (short terminology - "Auxiliary")

CLASSIFICATION

The numerical designation and descriptive character assigned to each investigation which indicates the principal nature of the purpose of the investigation.

COUNTER INTELLIGENCE INVESTIGATIONS

GENERAL INVESTIGATIONS

Investigations conducted to determine facts and circumstances pertaining to alleged major violations of the Articles of the Uniform Code of Military Justice, Federal Statutes and/or other applicable directives, by USAF personnel, excluding incidents of a counter intelligence or procurement nature.

INVESTIGATIONS CLOSED

Investigations terminated by offices of origin and auxiliary offices after all relevant facts have been determined and impartially reported to the requesting commander through proper OSI channels.

INVESTIGATIONS OPENED

Investigations initiated by offices of origin or auxiliary offices pursuant to requests from the proper commander or the Chief of Staff, USAF.

SECURITY AND DISCIPLINE (CONTINUED)

AIR PROVOST MARSHAL

Provost Marshal Statistics are a collection of selected data concerning corrections, security violations, and delinquencies charged to Worldwide Military Personnel on active duty. The statistics reported in this section are derived from AF Form 511, "Report of Air Provost Marshal Activities."

The following definitions affect this portion of the Morale Reports:

DEFINITIONS

ABSENCE WITHOUT LEAVE (AWOL)

The status or the offense of any member of the Armed Forces, who without proper authority:

- (1) Fails to go to his appointed place of duty at the time prescribed, or
- (2) Goes from that place, or
- (3) Absents himself or remains absent from his unit, organization, or other place of duty where he is required to be, at the time prescribed (Uniform Code of Military Justice, Article 86) (See AFR 35-73 1-4 dated: 19 May 1953.)

APPREHENSION

a. Cooperation of State and Local Police Forces. Commanders of zone of interior major air commands will take steps to secure the active cooperation of all State and local police forces and such other officials and organizations as they may consider useful to insure the person's prompt return to military control. Such agencies will be informed that they should not take action to apprehend an absentee or deserter unless they are in receipt of either DD Form 553 or information from an officer of the Air Force that the person is an absentee or deserter whose return to military control is desired. Commanders of major air commands overseas will take such action as the local situation may warrant.

b. Personnel Authorized to Apprehend:

- (1) Military. Members of the Armed Forces are authorized to apprehend absentees and deserters in the circumstances described in MCM, 1951, paragraphs 17, 18, and 19.
- (2) Civilians. Any civil officer having authority to apprehend offenders under the laws of the United States or any State, district, Territory, or Possession of the United States may summarily apprehend a deserter from the Armed Forces of the United States and deliver him into the custody of the Armed Forces of the United States (Uniform Code of Military Justice, Article 8). Generally, a private citizen does not have any authority to apprehend a deserter unless authorized to do so by a military officer (distribution of DD Form 553 has been held to be sufficient authorization).

CUSTODY GRADE

Prisoners will be classified as being in a minimum, medium or maximum custody grade in accordance with the criteria outlined in (1), (2), and (3) below. The initial classification will be determined by the confinement officer based upon the nature of the offense, demeanor of the prisoner upon admission, and any other pertinent information available.

- (1) Minimum custody. This custody grade will include those prisoners who are determined to be sufficiently stable, dependable, and trustworthy as to require little or no custodial supervision.
- (2) Medium custody. This custody grade will include those prisoners who require immediate and continuous custodial supervision, but who are considered not to possess characteristics of a dangerous, violent, or trouble-making nature which would require special custodial control.
- (3) Maximum custody. This custody grade will include those prisoners who require close supervision, special custodial controls and handling because of their conduct or known characteristics of a dangerous, violent, or trouble-making nature, or other circumstances which make such controls necessary. Their movements within the confinement facility should be limited and under supervision.

CURRENT AUTHORIZED STRENGTH (AIR NATIONAL GUARD)

The authorized strength which is applicable to Federally recognized Air National Guard Units as of the specified date. Such authorized strengths as are issued in appropriate Air Force table of organization with the current reduction in strength by the National Guard Bureau.

SCARWANG PERSONNEL (No SCARWANG included throughout FY 1952)

TROOP PROGRAM - AIR NATIONAL GUARD

Authorized strength of all National Guard Units allotted to the States, Territories, and possessions as issued in appropriate Tables of Organization and Tables of Distribution currently augmented and/or reduced by the National Guard Bureau.

AIR FORCE RESERVE OFFICERS TRAINING CORPS (AF ROTC)

AFROTC STRENGTH

This is the inventory of all Air Force Reserve Officers' Training Corps (AFROTC) students in active participation of ROTC training, in conjunction with academic curriculum at civilian educational institutions.

CONDITIONAL ENROLLMENT

This type of enrollment is a tentative enrollment which will not become absolute unless and until the proper authority determines that the student concerned is fully qualified for formal enrollment in the advanced course of the Air Force ROTC.

ENROLLED STUDENTS

This group includes both conditionally and formally enrolled students.

AF RESERVE (CONTINUED)

FORMAL ENROLLMENT

This type of enrollment is an absolute advanced enrollment where a condition does not exist that would question a student's qualification for enrollment. Such enrollment entitles the student concerned to receive all benefits, financial and otherwise, provided by law and regulations. (Tables in this publication are based on this type of enrollment).

EXPLORERS

Air Force cooperation with Explorer program has been provided since the program was initiated in 1941, when General Arnold offered the Director of Senior Scouting, Boy Scouts of America, the support and cooperation of the USAF. The mission of this program is to assist in the general development of youth in the fundamental principles of citizenship, patriotism, and leadership while incidentally providing an opportunity for the explorers to learn aviation essentials and to obtain a better understanding of their age and its significance. Flight activities are of a routine training nature, not involving special hazards and without additional expense to the government. The activities of the USAF include some flight transportation and aircraft orientation as well as entertainment of all explorers (Air, Sea, and Navy and Rover Army) at the air bases or encampments as planned in cooperation with the Army and the Navy. The Explorer program is conducted in conjunction with other activities of the Boy Scouts of America.

EXPLORER MEMBERSHIP includes boys of 14 years of age and over; Cub Scouts, include boys 8 through 10 years, and Boy Scouts, boys 11 through 13 years.

Exploring provides activities in four areas: Indoor, Outdoor, Services and Social. It gives the young man the opportunity to plan the use of his leisure time wisely and to develop himself in the sense of security and self reliance which make for a happy, well-adjusted, law abiding citizen.

INDOOR ACTIVITIES range from industrial tours and discussion groups to hobby colleges. Vocational conferences and exploration help the young man to face the future rather than to fear it.

OUTDOOR ACTIVITIES are of the vigorous physical cross country types that take the Explorer into diversified areas such as caves, mountain areas, sea cruises, etc.

SERVICE ACTIVITIES include projects which help the Explorer's home, the Explorer's church or synagogue, and the Explorer's community.

SOCIAL ACTIVITIES afford the Explorer an opportunity to meet people, to get along with them, to express his opinion in front of groups, to defend his thoughts in debates and round table discussions. He learns to listen and evaluate; he learns good manners.

All tables reported in FY 1954 publication of the "USAF Statistical Digest" are based on the Forty Second, Forty Third and Forty Fourth Annual Reports of the Boy Scouts of America to Congress.

TABLE 301 - CIVIL AIR PATROL (CAP) - HIGH SCHOOL AVIATION EDUCATION PROGRAM -
1949 (FALL) THROUGH 1954 (SPRING)

The Coordinated CAP-High School Aviation Education Program is an aviation education plan which may be described as general education in regard to aviation.

The course, as a one-year program for high school instruction, is taught by regular members of the school faculty. (It is also designed as a two-year course for use at CAP squadron level with CAP and Air Force Reserve personnel serving as instructors.) Any student is eligible to participate in the high school course of instruction, and CAP membership, though desirable, is not necessary.
