FOREWORD

The "USAF Statistical Digest" (Short Title USAFSD-55) summarizes in one document the volume of statistical data collected and published by various offices in Headquarters, United States Air Force and certain major commands. It is to be used as the official basic reference document for the period and areas covered.

The Fiscal Year 1955 edition is the tenth edition of the series. Original editions - Army Air Force Statistical Digest (World War II) and supplement Number 1, 1945 were followed by AAF Statistical Digest, 1946 and USAF Statistical Digest 1947. The 1946 and 1947 editions made Air Force statistics available in summarized form, available as far back as possible, with the exception of Combat Operations. This data is found only in the 1945 edition. The 1948 issue was the first strictly annual publication. The present issue, and the 1949, 1950, 1951, 1952, 1953 and 1954 editions are organized on a Fiscal Year basis.

Immediately following the Table of Contents is a Major Air Command Directory, containing information which is appropriate to all data included in this issue. Definitions appropriate to only one area will be found in an introductory statement preceding the Part in question. Tables indicated in the headnote as "New Tables" are tables which were not included in the FY 54 edition of this publication.

Sources of the majority of the data are the published and unpublished records of the Directorate of Statistical Services. The balance of the data was furnished by other agencies as noted in source reference data.

Correspondence relative to the content of this document as well as recommendation for new material for inclusion should be addressed to the Director of Statistical Services, Headquarters United States Air Force, Washington 25, D.C.

PART I

AIR FORCE UNITS AND CAPACITIES

The tables included in this section provide a summary of all USAF Units and Summary data reflecting the status and deployment of USAF Combat and Troop Carrier Wings, and Flying Support Units.

Tables reflecting status and deployment contain the following data:

- a. Total units activated, Fiscal Years 1942 - 1955, inclusive.
- b. Equipped units by type and model of aircraft possessed, Fiscal Year 1942 - 1955, inclusive.
- c. Authorized, possessed, combat ready aircraft, and authorized, assigned, combat ready crews in units by type and model of aircraft, Fiscal Years 1950 - 1955, inclusive.
- d. Operational Readiness of Combat and Troop Carrier Wings, Fiscal Year 1955.

DEFINITIONS

Wing - An air unit composed normally of one primary mission group and the necessary supporting organization, i. e. supply, maintenance, hospital and other services required by the primary mission group.

NOTE: In some cases, Combat and Troop Carrier groups do not have a parent wing. Also, certain Combat and Troop Carrier squadrons do not have a parent wing or group. Such units are shown in wing equivalents on the basis that one primary mission group or approximately three primary mission squadrons are the equivalent of a wing.

Combat Wing - A wing designed for direct participation in operations against enemy forces.

Troop Carrier Wing - A wing which has a mission of providing airlift for combat elements.

Flying Support Unit - A flying unit which has a mission of furnishing of rational assistance to combat elements.

Operational Readiness - A measurement of relative capability. It is the degree to which a unit is manned, equipped and trained for the satisfactory performance of its primary mission.

Primary Mission - The principal mission currently assigned the unit. Normally it is preparing for, or executing the task for which the unit was basically intended.

TABLE 2 — USAF COMBAT AND TROOP CARRIER WINGS AND SQUADRONS, WORLD-WIDE, CONTINENTAL US AND OVERSEAS, BY TYPE — FY 1955

The following tables reflect the number of wings and/or groups (including Flying Support Units) and, in parentheses, the number of squadrons comprising the wings and/or groups. Combat and Troop Carrier Squadrons not having wing or group assignments are shown in wing equivalents on the basis of approximately three squadrons to a wing.

Statistics presented include only those Combat and Troop Carrier units (including Flying Support Units) activated or organized and for which inactivation or discontinuance had not been accomplished on the date shown.

Units located within the continental limits of the United States are shown within their respective command of assignment. Units located outside the continental limits of the United States are shown under the major commands in which they are located.

The Flying Support Units for FY 1955 are Troop Carrier Assault, Air Refueling, Air Transport, Air Reserve, Weather Reconnaissance, Photographic Mapping, Airborne Early Warning and Control, Air Resupply, Liaison, Logistic Support, Strategic Support, Radar Evaluation, Tow Target and Pilotless Bomber Light (redesignated to Tactical Missile).

TABLE 14 - OPERATIONAL READINESS OF COMBAT AND TROOP CARRIER WINGS - FISCAL YEAR 1955

24

Unit capabilities are expressed as "C" ratings. These evaluations are prepared by Headquarters USAF after considering all known factors affecting unit readiness.

C-1 High degree of relative effectiveness. Adequately manned, equipped and trained to perform primary mission with latest type UE (first line aircraft and equipment).

C-2 Same as C-1 except with second line aircraft and equipment (B-26, F-80, etc.) or with first line aircraft and equipment not designed to perform the primary mission of the unit.

C-3 A lesser degree of effectiveness than indicated above with either first or second line equipment. Shortage of personnel, equipment and facilities, etc., exists.

C-4 A very low degree of effectiveness. Extreme shortage in equipment, personnel and facilities exists.

FLIGHT OPERATIONS

INTRODUCTION AND DEFINITIONS

Aircraft flight operations data included in this section are based on statistics submitted on AF Form 110A in accordance with AFR 65-110 as revised. The 110A report is compiled on a physical possession bases with the various activity categories determined by the assigned purposes of the status of the aircraft rather than actual use.

The tables provide summary data covering flight operations on "Operating Active", "Other Active" and "Inactive" USAF aircraft and include aircraft utilization, flying hours, fuel consumption, etc., during the FISCAL YEAR 1955. The data are segregated into the following types of activity:

(AD) Administrative: Aircraft assigned major air commands for the performance of command administrative missions.

(CC) Primary Tactical Unit: Aircraft assigned as primary unit equipment for the direct accomplishment of tactical unit operations.

(CE) MATS Air Evacuation: Aircraft assigned for the accomplishment of air evacuation operations within MATS.

(CS) Operational Support: Aircraft assigned for essential liaison and logistic support not otherwise provided and for the required combat readiness training of rated personnel not presently assigned to tactical units or crew positions.

(CP) Tactical Unit Support: Aircraft which are authorized and assigned as tactical unit support aircraft.

(CM) Special Mission: Aircraft assigned to special units and activities of the Air Force for the accomplishment and support of special missions.

(CT) MATS Transport: Aircraft assigned for the accomplishment of transport operations within MATS.

(CU) Student Training: Aircraft assigned to perform the mission of student and combat crew training within the Air Training Command only.

(CX) MDAP Aircraft Temporarily Diverted to USAF: Aircraft programmed for foreign countries under the Mutual Defense Assistance Program for which delivery to the ultimate recipient foreign country has been deferred in order to divert temporarily those aircraft to the USAF.

(ES) Test Support: Aircraft assigned to support organized test of aircraft and allied equipment other than aircraft on bailment contract for test support.

(EX) Test: Aircraft assigned for testing, research and development other than "X" models and aircraft on bailment contract.

(TC) Combat Crew Training: Aircraft assigned specifically to combat training schools for the accomplishment of combat crew training.

Operating Active: The total of codes AD, CC, CE, CS, CP, CM, CT, CU, CX, ES, EX AND TC.

Other Active: Aircraft of one command undergoing organization or field maintenance in a unit of a different major air command (RT), aircraft undergoing depot maintenance (RF), aircraft in an en route status (NR), and aircraft on project established to effect assignment or reassignment of USAF aircraft to fulfill active requirements as ordered by ADO of Headquarters Air Materiel Command (PA).

Inactive: Aircraft on loan to other than Air Force activities (AL), flyable inactive (FI), new production (NP), project inactive (PI), project non-Air Force (PN), depot modification or reconditioning (RM), recommended salvage (RS), storage-cocooned (SC), in process for storage (SI), in process or removal from storage (SO), storage non-cocooned (SS), excess flyable (XF), excess grounded (XG), excess to command (XJ), excess storage (XS), and all "X" model aircraft.

Safety

PART

SAFETY

The data presented on this category are subdivided into two sections: Flying Safety and Ground Safety.

FLYING SAFETY

The content of this section presents data on aircraft accidents which occurred in the United States Air Force and the Air National Guard during Fiscal Year 1955. USAF, command, and aircraft type and model totals include flying time and accidents of Air Force Reserve aircraft, ANG aircraft, and the Navy units flying for the Military Air Transport Service.

During Fiscal Year 1955, all accidents, major and minor, totalled 2,116. These accident statistics are reflected herein by command, by type and model of aircraft involved, by phase of operation in which the accident occurred, by the factors causing the accident and by the conditions affecting the accident. All rates are expressed in number of accidents per 100,000 flying hours.

AIRCRAFT ACCIDENT:

An event not caused directly by enemy action, involving one or more Air Force aircraft (including ANG aircraft) that occurs between the time the engine(s) is started for the purpose of commencing flight and the time when the aircraft lands and comes to rest with the engine(s) stopped for normal deplaning, and which results in minor, substantial damage or destruction of the aircraft.

MAJOR ACCIDENTS:

When the aircraft is destroyed or receives substantial damage.

ALL ACCIDENTS:

As used herein is the total of major plus minor accidents. A minor accident is one in which the aircraft receives minor damage.

FATAL ACCIDENT:

In which any person receives fatal injuries.

FATAL:

A fatal injury that results in death because of major injuries received in the accident or the complications arising therefrom. Fatalities enumerated include all persons killed and/or missing as a result of USAF aircraft accidents. Pilot fatalities apply to USAF pilots only.

MISSION:

The primary objective or purpose for which a flight was undertaken. The mission classifications used herein conform with the AFR 65-110 mission categories.

BAILEMENT AND/OR LOAN:

Accidents in aircraft which are on bailment contract or on loan are included in the total number of accidents appearing in this section. However, flying time is not available for bailment/loan aircraft, and accidents in these planes have not been included in rate computations.

Data in this section secured from the Directorate of Flight Safety Research, Office of the Inspector General, Norton Air Force Base, California.

GROUND SAFETY

DEFINITIONS

The tables included in this section are USAF Ground Accident statistics approved and directed by the Air Force Regulation 32-1, dated 24 August 1948. In establishing the reporting system, standardized cost factors and definitions have been approved. The present standard accident costs for injuries and fatalities were established by the Air Force Regulation 32-2, dated 11 March 1954.

ACCIDENT, GROUND

Any accident which occurs on or off an Air Force installation, base, or site which involves Air Force military personnel, Air Force civilian personnel on duty, or Air Force property. Reference paragraph 3, Air Force Regulation 32-2, dated 11 March 1954.

ACCIDENT, PRIVATE MOTOR VEHICLE

A motor vehicle accident involving only non-Air Force motor vehicle or, if both Air Force and non-Air Force motor vehicles were involved, the Air Force motor vehicle was not being operated at the time of the accident. Motor vehicles which are not Air Force property will be considered as private motor vehicles. Vehicles which are the property of Government agencies other than the Air Force will also be considered as private motor vehicles.

ACCIDENT, USAF MOTOR VEHICLE

An accident involving the operating of an Air Force motor vehicle which results in either disabling or non-disabling injury to Air Force personnel and/or non-USAF persons and/or damage aggregating \$25.00 or more to Air Force motor vehicles, or to other vehicles or property without regard to ownership.

ACCIDENT, USAF PROPERTY

An incident resulting from Air Force ground operation wherein Air Force property is accidentally damaged in amount of \$25.00 or more.

COST PER CAPITA

Cost per Capita - $\frac{\text{Cost of Injuries} + \text{Cost of Fatalities} + \text{Cost of Property Damage}}{\text{Total Command Strength (Average Military and Average Civilian)}}$

COMMAND (FISCAL YEAR MAJOR), CONTINENTAL US

Continental Command - A Major Air Command whose headquarters and subordinate units are located within the Continental United States.

COMMAND (FISCAL YEAR MAJOR), OVERSEAS

Overseas Command - A Major Air Command whose headquarters and subordinate units are located outside the Continental United States.

DAYS OUT OF SERVICE

Air Force vehicle "days out of Service" and Air Force aircraft "days out of service" will be estimated total number of calendar days that the particular piece of equipment is out of service as a result of a ground accident, beginning with the day after the accident occurs and continuing up to the day on which it is estimated that the equipment will return to service.

GROUND SAFETY (CONTINUED)

DEFINITIONS

INJURY, DISABLING

An injury which results in death, permanent total, permanent partial injury, or temporary total injury which in the opinion of competent medical authority makes it impossible for the injured to return to work or duty at any time during the next calendar day following date of injury.

INJURY, NON-DISABLING

A non-disabling injury is an injury which, although requiring medical attention, would not keep the injured person from performing his regularly assigned duties during the next calendar day or any subsequent day. This type is generally known as a first-aid case.

PERSONNEL, CIVILIAN

Includes citizens and/or residents of the United States, its territories, and Canada, who are employed by the US Air Force and are paid from appropriated funds. Excludes Foreign Nationals.

PERSONNEL, MILITARY

Includes officers and airmen on active duty, special category Army with Air Force (SCARWAF), and Navy personnel under operational control of MATS.

REPORTABLE BUT NOT CHARGEABLE

Act of God, commercial carrier and other reportable but not chargeable type accident data have not been included in these tables. The total cost of these accidents was \$3,450,570 which includes cost for, a) injury (military and civilian) \$333,155; b) motor vehicle property damaged \$5,924; c) aircraft damaged as result of ground accident \$433,569; d) all other USAF property damaged \$2,677,922.

RATES

Frequency rates were computed to the following formulas:

$$\text{Civilian Injury Rate} = \frac{\text{Number of Civilian Disabling and Fatal Injuries} \times 1,000,000}{\text{Total Hours of Civilian Employment}}$$

$$\text{Military Injury Rate (On Duty)} = \frac{\text{Number of Military Disabling and Fatal Injuries "On Duty"} \times 100,000}{\text{Total Military Man-Days of Exposure} \times 1/3}$$

$$\text{Military Injury Rate (Off Duty)} = \frac{\text{Number of Military Disabling and Fatal Injuries "Off Duty"} \times 100,000}{\text{Total Military Man-Days Exposure} \times 2/3}$$

$$\text{USAF Motor Vehicle Rate} = \frac{\text{Number of USAF Motor Vehicle Accidents} \times 100,000}{\text{Total USAF Motor Vehicle Mileage}}$$

STATUS

Indicates whether or not the person involved in the accident was on or off duty and whether the accident occurred on or off a military installation, base or site.

STRENGTH (AVERAGE), CIVILIAN

The derived civilian employee strength is developed by dividing the total civilian payroll man-hours worked (including legal holidays) during the report period by the standard number of work hours during the report period:

$$\text{Derived Civilian Strength} = \frac{\text{TOTAL CIVILIAN Man Hours Worked}}{\text{Number of Standard Work Hours}}$$

STRENGTH (AVERAGE), CIVILIAN (Continued)

The number of standard work-hours during the report period are the number of calendar days in the month minus Saturdays and Sundays multiplied by 8. Example - there were 21 paid payroll work-days in January 1955, therefore, the standard number of work-hours in the month was 21 multiplied by 8, or 168 hours.

STRENGTH (AVERAGE), MILITARY

The average military strength is obtained by dividing the total military man-days of exposure by the number of days in the report period:

$$\text{Average Military Strength} = \frac{\text{Exposure}}{\text{Number of Days in the Report Period}}$$

The total military exposure is the sum of daily assigned strength figures as shown on all morning reports for the entire report period.

GROUND SAFETY (CONTINUED)

DEFINITIONS

TIME LOSS (CIVILIAN)

Time loss for a civilian employee will be the estimated total number of days he will be unable to report for work as a result of the injury beginning with the first day he is unable to report for work and continuing up to the date of return. Sick leave, annual leave, and holidays will be included in the time loss.

TIME LOSS (MILITARY)

Time loss for a military person will be the estimated number of calendar days he is unable to report for duty as a result of an accidental injury, beginning with the first day he is unable to report for duty and continued up to the date of return.

USAF AIRCRAFT DAMAGED FROM GROUND ACCIDENTS

USAF Aircraft damaged as the result of a ground accident.

Aircraft and Materiel

PART IV

AIRCRAFT - MATERIEL

INTRODUCTION AND DEFINITIONS

The tables included in this section provide summary data pertaining to the procurement, production, inventory, status, deployment, and disposition of USAF aircraft, and similar information for other major items of materiel in the USAF during the Fiscal Year 1955. Production data for aircraft and guided missiles are obtained under the provision of AF Regulation 67-62, dated 6 August 1954.

In addition to information reflecting the status of aircraft procurement and production, these data contain the following information by type and model of aircraft: Total aircraft inventory, active and inactive aircraft inventory, planned program, aircraft in and out of commission, aircraft in storage, aircraft excess to all military requirements, aircraft production, gains and losses to the aircraft inventory, and a summary of active and inactive aircraft by functional distribution.

The classification of aircraft herein is in accordance with AF Regulation 65-60, dated 15 June 1955, Aeronautical Board Memorandum, dated 21 October 1947, and the latest AF Technical Orders and other authorizations. The type classification is generally based upon the basic type designator or the prefix preceding the basic type designator of each aircraft model. A prefix is assigned an aircraft model when the aircraft is modified to perform a function (indicated by the prefix) other than its basically designated purpose. The classification into FIRST AND SECOND-LINE categories is in accordance with HOI 27-2, dated 16 March 1954 and as specified in PEACETIME PLANNING FACTORS MANUAL AS OF JUNE 1954.

The following definitions apply to the terms herein -

AIRCRAFT: Any weight carrying structure for navigation of the air, designed to be supported either by buoyancy of the structure, or by the dynamic action of the air against its surface. All aircraft which have been accepted by the USAF and USAF Reserve Forces and which are currently in the accountable inventory are included, except Class 012 aircraft which are shown separately.

AIRPLANES: All aircraft except aerial target type aircraft.

ACTIVE AIRCRAFT INVENTORY: The number of aircraft provided an organization in the accomplishment of its mission - aircraft undergoing maintenance, administrative aircraft, test aircraft (excluding those test aircraft on bailment and X-prefixed models), aircraft provided for operational support, active project aircraft and enroute aircraft.

INACTIVE AIRCRAFT INVENTORY: Storage aircraft, flyable inactive aircraft, aircraft undergoing modification, aircraft on loan, bailment contract (except those bailed for maintenance), X-prefixed aircraft, aircraft declared excess to requirements, aircraft recommended for reclamation, aircraft on project for assignment to a non-USAF activity, inactive project aircraft, and aircraft accepted by USAF but not delivered to recipient.

FIRST AND SECOND-LINE AIRCRAFT: The classification of aircraft into first and second-line categories is in accordance with the provisions of HOI 27-2, dated 16 March 1954, and the first-line life specified in PEACETIME PLANNING FACTORS MANUAL AS OF JUNE 1954.

ACCEPTANCE: Aircraft which have been shop-assembled and fully inspected by constituted USAF or Navy production authorities; and the title, responsibility, and accountability assumed by the contracting agency or recipient.

IN COMMISSION: In commission means that an aircraft, without additional repair or maintenance, is safe and capable of normal flight operations. This does not necessarily indicate that the aircraft is capable of performing a specific mission such as combat, photo, etc., but merely that the aircraft is flyable and that the Form 1 and the Form 41B do not bear a red cross. Weather, runway conditions, shortage of operations personnel, or other factors not relating to the aircraft itself will not cause an aircraft to be reported "out of commission".

A O C P: "Aircraft Out of Commission Awaiting Parts" are those aircraft not flyable as indicated by a red cross on Form 1 and Form 41B, solely due to lack of parts. Aircraft will not be reported as awaiting parts unless the required parts have been requisitioned from the normal supply source at the station where the aircraft is located and notification has been received from the normal supply source that the parts are not available. This category does not include those aircraft awaiting parts required for the performance of modifications defined in AF Regulation 65-60.

AIRFRAME WEIGHT: The weight of the assembled principal structural components of an airplane. It includes hull or fuselage, wings, stabilizers, vertical fins, control surfaces, landing gear, and nacelles.

GUIDED AIRCRAFT ROCKET: A type of self-propelled aircraft armament normally carried by piloted aircraft and which, after launching, can be guided to the target which it destroys by means of an explosive war-head.

USAF GUIDED MISSILES: An unmanned vehicle moving above (about) the earth's surface whose trajectory or flight path is capable of being altered by a mechanism within the vehicle.

USAF AMMUNITION: All stocks of serviceable and suspended Air Force ammunition items physically on hand.

CLASS 012: Complete aircraft used for ground instructional training.

AIRCRAFT ENGINES

INTRODUCTION AND DEFINITIONS

Tabular data on production and inventory of aircraft engines are presented in this section. Data on engine production are obtained under the provisions of AF regulation 67-62, dated 6 August 1954 and data on engine inventory are obtained under the provisions of AF regulation 65-20, dated 20 August 1953.

The following definitions apply to the terms herein-

ACCEPTANCE: An aircraft engine that has been shop-assembled and fully inspected by constituted USAF or Navy production authorities; and the title, responsibility, and accountability assumed by the contracting agency or recipient.

INSTALLED ENGINE: Serviceable or reparable engine assets which are either physically mounted on aircraft or undergoing organizational maintenance for reinstallation in an aircraft.

SPARE ENGINE: Engines in or intended for the supply system, which are for normal flying support of aircraft.

REPARABLE ENGINE: Aircraft engine determined to be in unsuitable operating condition requiring other than organizational or field maintenance.

SERVICEABLE ENGINE: Aircraft engine determined to be in suitable operating condition or engine either awaiting or undergoing organizational or field maintenance.

PART

AVIATION FUEL AND OIL

The information contained in this section summarizes USAF aviation fuel and oil, world-wide, for Fiscal Year 1955.

The data shown in the following tables include fuel and oil inventories, issues and receipts.

DEFINITIONS: The following definitions apply to the terms herein:

AVIATION FUEL - applies to aviation gasoline and jet fuel. Aviation gasoline is graded by octane rating in order - 115/145, 100/130, 91/96 and 80. Jet fuel includes JP-4 and JP-5 type.

AVIATION OIL - a term which applies to aircraft engine lubricating oil, graded thus - 1120, 1100, 1080, 1065 and Jet oil - 1015, 1010, 1005, and special Jet 7808. It does not include reused product.

INVENTORY - Product on hand at base, terminal and in transit.

IN TRANSIT - Product on way to destination. Applies to both overseas and zone of interior.

ISSUES - Includes fuel consumption for flying purposes, fuel utilized for other than direct flight operations; i.e., crash boats, engine block testing, and modification centers. "Issues" is broken down into four "Sales" - charge sales (issues to users of USAF, USAF Reserve and Air National Guard Aircraft, and other than aircraft), reimbursable sales to other than USAF Aircraft, issues for cash, and exchange account (Canadian AF or Canadian Navy).

RECEIPTS - The increase in inventory caused by receipt of incoming shipment of product.

Unit Authorization List

PART IX

UNIT AUTHORIZATION LIST

PREFACE AND DEFINITIONS

The tables included in this section provide summary data which represent the first of a series planned for publication following each annual Unit Authorization List cycle. Air Force Regulations 5-25 and 67-83, and Air Force Manual 171-5 constitute the basic authority for the system.

ORGANIZATIONAL EQUIPMENT. Non-expendable replacement-type equipment, excluding aircraft, prescribed by an authorization document.

MASTER EQUIPMENT ALLOWANCE LIST. A publication which prescribes allowances of organizational equipment to be authorized to T/O units through the medium of the Unit Mission Equipment column of the Unit Authorization List.

UNIT MISSION EQUIPMENT. Those items of equipment prescribed by the MEAL, Station Sets and T/A 1-21 for specific T/O units. This equipment is normally taken with the unit when it changes location.

UNIT SUPPORT EQUIPMENT. That unit equipment other than mission equipment which is required to perform the assigned mission of the unit at a specific base. This equipment will normally be retained by the base upon movement of the unit.

UNIT AUTHORIZATION LIST. An electric accounting machine list of specific equipment, consisting of unit mission equipment and/or unit support equipment authorized to each individual T/O or non-T/O unit. AF Form 601B is used for this purpose.

TABLE OF ALLOWANCE (T/A). Headquarters USAF publications which establish equipment allowances. Table of Allowances provide a basis for authorizing Unit Support Equipment in UALs.

TABLE OF ORGANIZATION (T/O). A Headquarters USAF publication which states the mission and capability for which a unit must be manned and equipped; and a guide for manpower planning, programming, and allocation.

EQUIPMENT COMPONENT LIST (ECL). A publication which prescribes the components of individual kits and organizational sets of equipment required for the performance of specific duties, functions, or support of end items of equipment.

STATION SETS. Listings of non-expendable equipment extracted from the MEAL and/or applicable ECLs, and expendable equipment extracted from supply catalogs and/or stocks necessary to be included in prepositioned assemblages to insure the capability of a base to meet the minimum requirements of a tactical unit equipped with unit mission equipment.

NON-STOCK LISTED. Items which are not listed in AF or Army Technical Services catalog publications.

AERONAUTICAL STATUS

The general grouping of Air Force personnel with reference to their aeronautical rating, aeronautical designation, and flying status. The principal groupings are:

1. Rated Personnel: USAF Officers who have been awarded an aeronautical rating of Pilot or Aircraft Observer on personnel orders per authority AFR 50-7.

2. Non-Rated Personnel: Personnel who do not have an aeronautical rating of Pilot or Aircraft Observer, including personnel who have aeronautical designation, e. g., Flight Surgeon, Aviation Medical Examiner, Flight Nurse, Non-Rated Crew Member and Non-Rated Non-Crew Member, even though such personnel may be on flying status.

AIR CREW

A stipulated number of air crew personnel locally organized to operate an aircraft on an assigned mission. (For single-place aircraft, "air crew" equals "air crew personnel.")

AIR CREW PERSONNEL

Personnel whose current principal duty is occupancy of an air crew position. Included are tactical air crew personnel, instructors, advanced flying students, and administrative crew personnel whose principal duty is flying.

AIR FORCE COMMAND STRENGTH

All military personnel (permanent party and pipeline, USAF, SCARWAF, and Navy) who are assigned to Air Force units. This strength is chargeable against the personnel ceiling of the Department of the Air Force and is under the command jurisdiction of the Chief of Staff, USAF.

1. Command Strength - Continental: The total strength of military personnel who are assigned to units of which the Headquarters have permanent station location in the Continental US or to units which are enroute between Continental and Oversea stations but are assigned to a Continental Command or to the ZI portion of a Global Command.

2. Command Strength - Oversea: The total strength of military personnel who are assigned to units of which the Headquarters have permanent station location outside the Continental US or to units which are enroute between Continental and Oversea stations but are assigned to an Oversea Command or to the oversea portion of a Global Command.

3. Command Strength - Worldwide: The total strength of personnel assigned to Air Force units (USAF and SCARWAF) regardless of location.

AIR FORCE DEPARTMENTAL STRENGTH

The total strength of military personnel commissioned, appointed or enlisted in the United States Air Force, whether or not such personnel have been placed on duty with another Department.

AIR FORCE PERSONNEL

A general term comprising all military personnel (USAF, SCARWAF, or Navy) assigned to Air Force Units.

AIR FORCE SPECIALTY (AFS)

A grouping of positions which require common qualifications. An AFS is identified by a Title and Code.

AIR FORCE SPECIALTY CODE (AFSC) - AIRMEN

A combination of meaningful digits used to identify an AFSC. For example:

AFSC	68150 (Statistical Services Specialist)
68	Career Field (Statistical Services and Machine Acctg)
1	Career Field Subdivision (Statistical Services)
5	Skill Level (Skilled)
0	Specialty (Statistical Services Specialist)
68150	

CAREER FIELD

A grouping of related AFS's involving basically similar knowledge and skills.

a/ Under certain conditions, civilians are also eligible for the military-type decorations.

1. ELIGIBILITY:

a. Eligibility for a military or civilian-type decoration depends upon the individual's status at the time the heroic deed or meritorious service was performed.

b. Members of the Reserve components not on active duty with the Air Force are eligible for award of the Distinguished Flying Cross, the Soldier's Medal, the Air Medal, and the Commendation Ribbon, provided that the requirements are otherwise fulfilled.

c. In order for an award to be made, the military service of a person must have been honorable subsequent to the time he distinguished himself.

2. POSTHUMOUS, MISSING IN ACTION, AND PRISONERS OF WAR AWARDS:

Next of kin of deceased persons are entitled to receive decorations earned but not presented because of death. The next of kin eligible for posthumous presentation of decorations will be selected from one of the following, in the order listed: widow, widower, eldest son, eldest daughter, father, mother, eldest brother, eldest sister, eldest grandchild.

3. MISCELLANEOUS:

Decorations differ from service medals in design; each decoration has distinguished shape. Service medals, described in AFR 35-50, are usually circular with pictorial relief.

4. MILITARY DECORATIONS:a. Medal of Honor:

(1) The Medal of Honor is a five-pointed star in gold, centered with the head of Minerva and surrounded by green enamel laurel leaves suspended from a link surmounted by an eagle. The ribbon is the collar type of light blue silk and above the suspension carries an octagon of the same material with thirteen white stars.

(2) The Medal of Honor, established by law, is awarded to any person who, while an officer or airman in the Air Force, in conflict with an enemy of the United States, distinguishes himself conspicuously by gallantry and intrepidity at the risk of his life above and beyond the call of duty. Recommendations for this highest United States decoration must incontestably prove that the bravery of self-sacrifice involved conspicuous risk of life, the omission of which could not justly cause censure (act of 9 July 1913, 40 Stat 870; 10 USC 1403; ML 1949, sec. 903).

(3) The Medal of Honor is awarded in the name of Congress and is usually presented by the President of the United States. It should not be confused with specially enacted Congressional medals.

b. Distinguished Service Cross:

(1) The Distinguished Service Cross is a bronze cross on which is centered an eagle over a wreath. Ribbon is predominantly dark blue with edgings of red separated from the blue by white lines.

(3) Authority to award the Distinguished Service Cross to United States personnel may be delegated during wartime to commanders of major air commands, but awards to foreign persons are reserved to the Department of the Air Force.

c. Distinguished Service Medal:

(1) The Distinguished Service Medal, established by law, is awarded to any person serving in any capacity with the Air Force who distinguishes himself by exceptionally meritorious service to the Government in a duty of great responsibility. Responsibility means the exercise of authority or judgment in duties which decide the successful outcome of any major military operation. In peacetime, awards are limited to recognizing services of national or international significance (act of 9 July 1918, 40 Stat 870; 10 USC 1407; 1408; ML 1949, sec. 906).

(3) The Legion of Merit is awarded without degree to members of the Armed Forces of the United States.

TABLE 129 - SUMMARY - MILITARY STRENGTH BY TYPE - 1 AUG 1907 THROUGH 30 JUN 1955

NOTE. Annual strength figures are as of 30 June except as noted. The history of the AAF falls into several well defined phases. On 1 August 1907 the Aeronautical Division of the Signal Corps was established, and this division continued until 1 July 1914 when it was reorganized as the Aviation Section of the Signal Corps. In May 1918 Army aviation was divorced from the Signal Corps by Presidential order and comprised the Division of Military Aeronautics, Bureau of Aircraft Production, and the Spruce Section which had been organized in November 1917. (The latter was created to expedite lumber production for aircraft construction.) Legislative cognizance of a separate arm occurred on 4 June 1920 when the Air Service was created. The Air Corps was established in July 1926 and continued until the reorganization of the Army in March 1942. At that time, the Army Air Forces came into being and continued under this organization until the three defense agencies were established in 1947. On 17 September 1947, James V. Forrestal took the oath of office as Secretary of Defense. The Air Force was officially separated from the Army the following day and the new agency, U.S. Air Force, was established, but it was not until 1948 that Air Force reporting was entirely divorced from the Army. Blank columns in the table below indicate that breaks were not available for the period; dashes indicated zero entries; and other necessary explanations are covered with foot notes. Army personnel on duty with the US Air Force known as SCARWAF, were included in this table from September 1947 through June 1955.

TABLE 145 - REGULAR OFFICERS SELECTED FOR PERMANENT PROMOTIONS - FY 1951 THROUGH FY 1955

(All data indicates officers selected for promotion and not necessarily the number of actual promotions, due to resignations, etc. All selections with the exception of lieutenants were made by Selection Boards. Data are based on the dates of the board reports which are not necessarily dates of actual promotions. Promotions for lieutenants were accomplished under Public Law 381, Sec. 508, 1947. According to this law, all second lieutenants were automatically promoted to first lieutenant after completing three years of Promotion List Service. No SCARWAF included.)

TABLE 147 -- OFFICERS SELECTED FOR TEMPORARY PROMOTIONS BY FISCAL YEAR IN WHICH SELECTED --
FY 1951 THROUGH FY 1955

(Selections made by Selection Boards do not necessarily mean actual promotions, as cancellations may be made because of resignations, etc. The table includes both regular and non-regular officers. The table excludes selections of Captains for promotions accomplished through other than Selection Board actions such as those selected under AFR 16-14. Temporary promotions of Second Lieutenants to First Lieutenants are also excluded as such promotions were not accomplished by action of a Selection Board. (Received from and financial assistance to US Air Force personnel. The total amount of loans outstanding at 30 June 1955 amounted to \$1,308,447 of which it is estimated that \$160,767 will not be collected for various reasons. Between 1 March 1946 and 30 June 1955 a total of \$727,707 has been written off as uncollectible due to death or subsequent financial difficulties of the borrowers. This results in a total assistance to date of \$2,048,590 on which repayment can not be expected. Table below is a modification of Table 212, FY 1954.)

MEDICAL ACTIVITIES, CASUALTIES
AND PATIENT TRANSPORT

***PART* XIV**

MEDICAL ACTIVITY, CASUALTIES, AND PATIENT TRANSPORT

DEFINITIONS

ACTIVE DUTY MILITARY PERSONNEL

Consists of all military personnel who are on extended active duty. Excluded are military personnel who are on short tours of duty.

ADMISSION FROM DUTY

The enrollment in a patient status of a military person whose treatment requires that he be excused from duty beyond midnight of the day on which he reported for treatment, whether treated in a hospital, an infirmary or quarters. A patient is considered as admitted from duty only once during a continuous period of treatment; if he is transferred from one medical facility to another, the transfer is not an admission from duty. The term includes patients admitted to non-military medical facilities when the reporting facility has assumed responsibility for the records of the patient. Admissions from AWOL, except those AWOL from a patient status, are counted as admissions from duty. The term excludes persons treated on an outpatient status, and cases carded for record only.

ADMISSIONS RATE

A measure which indicates the frequency of patients being relieved from duty because of medical reasons. Hence, the admission rate is based on admissions from duty. The conversion of number of admissions to show the number of admissions that would occur during a year if admissions occurred throughout an entire year at the same frequency as in the period of observation, per thousand average strength is termed the annual admission rate and is computed as follows:

$$\frac{\text{Number of admissions during X number of such periods in a year} \times 1000}{\text{Average daily strength during the period}}$$

ADMISSIONS TO HOSPITALS AND INFIRMARIES

Include all patients admitted to the wards of an Air Force hospital or infirmary whether from duty or by transfer from another medical facility. Excluded are cases treated in quarters, or in a duty status, or in a nonmilitary medical facility.

AVERAGE OCCUPIED BEDS

The average daily number of patients occupying beds in hospitals and infirmaries as of midnight of a given day.

AVERAGE STRENGTH SERVED

Includes not only those U. S. active duty military personnel for whom a base holds sick call, but also those U. S. active duty military personnel reporting elsewhere (Dispensaries) for sick call but attached to the base for in-patient care.

CASUALTY

Any person who is dead (from any cause) or whose services are lost to his unit for 24 hours or more because of involuntary absence (missing), capture, internment, or wounds, or injuries requiring admission to a medical treatment facility. Any person undergoing treatment for wounds or injuries as of 2400 local time, is considered as having been lost to his unit for 24 hours or longer. Mental disorders, psychoneurotic cases, colds and other diseases (not causing death) are not included as casualties. Casualties are divided into "battle" and "nonbattle" categories.

CAUSATIVE AGENT

That instrumentality, factor, or occurrence resulting in death, wound, injury, or missing status.

COMPLETE PHYSICAL EXAMINATIONS

Include only routine physical examinations performed in accordance with USAF directives and recorded on the report of medical examinations (Standard Form 88); physical inspections of food handlers or barbers are not included nor are examinations for personnel reporting sick.

DEATHS

Includes those persons killed outright (or dying before reaching a medical treatment facility); those wounded or injured persons who subsequently died of their wounds or injuries (after being admitted to a medical treatment facility); those persons reported as missing who were either subsequently conclusively determined to have been

MEDICAL ACTIVITY, CASUALTIES, AND PATIENT TRANSPORT (CONTINUED)

killed, or who, having been in a missing status for a year or more, were presumed to be no longer living; whether or not these incidents occurred "in action" or under "battle" or "nonbattle" conditions.

FULL TIME EQUIVALENT PERSONNEL

Are total assigned and attached personnel converted into actual full-time strength; for example, 10 individuals employed on a full-time basis and 4 individuals employed on a half-time basis, are considered to be 12 full-time equivalents.

HOSPITALIZATION RATIO

The proportion of strength occupying hospital and infirmary beds on an average day (of the period for which it is computed). It differs from the noneffective ratio in that quarters or dispensary patients are excluded. The ratio is computed per 100 strength as follows:

$$\frac{\text{Number of sick days in hospital and infirmary in the period} \times 100}{\text{Average daily strength} \times \text{number of days in the period}}$$

or:

$$\frac{\text{Daily average number of patients occupying hospital and infirmary beds}}{\text{Average daily strength for the period}}$$

INCIDENCE

A count of diagnostic entities reported, as distinguished from number of patients admitted.

MISSING

Any person is missing who is involuntarily absent or who fails to return from a scheduled flight or mission, who is not known to be dead, AWOL, in a hospital, in confinement, on leave, or in any other absent category.

NONBATTLE CASUALTY

Any dead (including those as a result of disease), or wounded, injured or missing person, not classed as "Battle" casualty are defined herein. All self-inflicted wounds or injuries and injuries due to elements such as frostbite and trenchfoot are considered to be "nonbattle". If there is any doubt as to whether a casualty, occurring under combat mission conditions, was due to "nonbattle" factors, the casualty is classed as "battle" and not as "nonbattle."

NONEFFECTIVENESS

The temporary loss of manpower from duty, in this context for medical reasons.

NONEFFECTIVE RATIO

The proportion of strength not available for duty on an average day (of the period for which it is computed) because of medical reasons whether under treatment in hospital, infirmary, dispensary, or quarters. The ratio is computed per 100 strength as follows:

$$\frac{\text{Number of sick days in period} \times 100}{\text{Average daily strength} \times \text{number of days in period}}$$

or:

$$\frac{\text{Average daily number of "patients remaining"} \times 100}{\text{Average daily strength}}$$

OPERATING BEDS

Those medical treatment facility beds which are currently set up and in all respects ready for the care of patients, and which the facility is staffed and equipped to operate. Bassinets and dispensary beds are not included.

OUTPATIENT TREATMENTS

An outpatient who presents himself for medical advice or treatment at a medical facility, is counted as one outpatient treatment each time he reports at any one of the clinic or departments; consequently, more than one treatment may be reported for each visit.

OUTPATIENT VISITS

A visit is counted for each patient (not excused from duty) who on a given day presents himself for either medical advice or treatment. On any given day, only one visit is counted regardless of the number of times the patient is seen; when the patient is seen on multiple days, one visit is counted for each day. Patients reporting for pre-

MEDICAL ACTIVITY, CASUALTIES, AND PATIENT TRANSPORT (CONTINUED)

scribed examinations and immunizations are not counted as a visit.

PRINCIPAL DIAGNOSES

A term used to indicate the sum of sole and primary diagnoses.

SPECIFIED PERIODIC EXAMINATIONS OR TESTS

Are those examinations or tests administered to personnel, military or civilian, exposed to industrial- type hazards.

RETURNS TO MILITARY CONTROL

Persons, previously reported as missing, who have returned to military control from a missing status.

SECURITY AND DISCIPLINE

OFFICE OF SPECIAL INVESTIGATIONS

DEFINITIONS

AUXILIARY OFFICE OF INVESTIGATIONS - (short terminology - "Auxiliary")

Investigations of any nature conducted by the Directorate of Special Investigations or a District Office, in which, in accordance with OSI policy, that office acts as an assistant to the controlling office (the office of origin) within its territorial investigative jurisdiction.

CLASSIFICATION

The numerical designation and descriptive character assigned to each investigation which indicates the principal nature of the purpose of the investigation.

COUNTER INTELLIGENCE INVESTIGATIONS

Investigations conducted to determine facts related to security control measures designed to insure the safeguarding of information, personnel, equipment and installations against the sabotage, espionage or subversive activities of foreign powers and of disaffected or dissident groups or individuals which may constitute a threat to the internal security of the Air Force.

GENERAL INVESTIGATIONS

Investigations conducted to determine facts and circumstances pertaining to alleged major violations of the Articles of the Uniform Code of Military Justice, Federal Statutes and/or other applicable directives, by USAF personnel, excluding incidents of a counter intelligence or procurement nature.

INVESTIGATIONS CLOSED

Investigations terminated by offices of origin and auxiliary offices after all relevant facts have been determined and impartially reported to the requesting commander through proper OSI channels.

INVESTIGATIONS OPENED

Investigations initiated by offices of origin or auxiliary offices pursuant to requests from the proper commander or the Chief of Staff, USAF.

INVESTIGATIONS PENDING

AS OF 30 JUNE 1955

SECURITY AND DISCIPLINE (CONTINUED)

AIR PROVOST MARSHAL

Provost Marshal Statistics are a collection of selected data concerning corrections, security violations, and delinquencies charged to Worldwide Military Personnel on active duty. The statistics reported in this section are derived from AF Form 511, "Report of Air Provost Marshal Activities."

The following definitions affect this portion of the Morale Reports:

DEFINITIONS

ABSENCE WITHOUT LEAVE (AWOL)

The status or the offense of any member of the Armed Forces, who without proper authority:

- (1) Fails to go to his appointed place of duty at the time prescribed, or
- (2) Goes from that place, or
- (3) Absents himself or remains absent from his unit, organization, or other place of duty where he is required to be at the time prescribed (Uniform Code of Military Justice, Article 86) (See AFR 35-73 1-4 dated: 19 May 1953.)

APPREHENSION

a. Cooperation of State and Local Police Forces. Commanders of zone of interior major air commands will take steps to secure the active cooperation of all State and local police forces and such other officials and organizations as they may consider useful to insure the person's prompt return to military control. Such agencies will be informed that they should not take action to apprehend an absentee or deserter unless they are in receipt of either DD Form 553 or information from an officer of the Air Force that the person is an absentee or deserter whose return to military control is desired. Commanders of major air commands overseas will take such action as the local situation may warrant.

b. Personnel Authorized to Apprehend:

- (1) Military. Members of the Armed Forces are authorized to apprehend absentees and deserters in the circumstances described in MCM, 1951, paragraphs 17, 18, and 19.
- (2) Civilians. Any civil officer having authority to apprehend offenders under the laws of the United States or any State, district, Territory, or Possession of the United States may summarily apprehend a deserter from the Armed Forces of the United States and deliver him into the custody of the Armed Forces of the United States (Uniform Code of Military Justice, Article 8). Generally, a private citizen does not have any authority to apprehend a deserter unless authorized to do so by a military officer (distribution of DD Form 553 has been held to be sufficient authorization).

CUSTODY GRADE

Prisoners will be classified as being in a minimum, medium or maximum custody grade in accordance with the criteria outlined in (1), (2), and (3) below. The initial classification will be determined by the confinement officer based upon the nature of the offense, demeanor of the prisoner upon admission, and any other pertinent information available.

- (1) Minimum custody. This custody grade will include those prisoners who are determined to be sufficiently stable, dependable, and trustworthy as to require little or no custodial supervision.
- (2) Medium custody. This custody grade will include those prisoners who require immediate and continuous custodial supervision, but who are considered not to possess characteristics of a dangerous, violent, or trouble-making nature which would require special custodial control.
- (3) Maximum custody. This custody grade will include those prisoners who require close supervision, special custodial controls and handling because of their conduct or known characteristics of a dangerous, violent, or trouble-making nature, or other circumstances which make such controls necessary. Their movements within the confinement facility should be limited and under supervision.

The abbreviations used in connection with the Offense tables are explained below:

EXPLORERS

Air Force cooperation with Explorer program has been provided since the program was initiated in 1941, when General Arnold offered the Director of Senior Scouting, Boy Scouts of America, the support and cooperation of the USAF. The mission of this program is to assist in the general development of youth in the fundamental principles of citizenship, patriotism, and leadership while incidentally providing an opportunity for the explorers to learn aviation essentials and to obtain a better understanding of their age and its significance. Flight activities are of a routine training nature, not involving special hazards and without additional expense to the government. The activities of the USAF include some flight transportation and aircraft orientation as well as entertainment of all explorers (Air, Sea, and Navy and Rover Army) at the air bases or encampments as planned in cooperation with the Army and the Navy. The Explorer program is conducted in conjunction with other activities of the Boy Scouts of America.

EXPLORER MEMBERSHIP includes boys of 14 years of age and over; Cub Scouts, include boys 8 through 10 years, and Boy Scouts, boys 11 through 13 years.

Exploring provides activities in four areas: Indoor, Outdoor, Services and Social. It gives the young man the opportunity to plan the use of his leisure time wisely and to develop himself in the sense of security and self reliance which make for a happy, well-adjusted, law abiding citizen.

INDOOR ACTIVITIES range from industrial tours and discussion groups to hobby colleges. Vocational conferences and exploration help the young man to face the future rather than to fear it.

OUTDOOR ACTIVITIES are of the vigorous physical cross country types that take the Explorer into diversified areas such as caves, mountain areas, sea cruises, etc.

COMPONENTS (CONTINUED)
EXPLORERS (CONTINUED)

SERVICE ACTIVITIES include projects which help the Explorer's home, the Explorer's church or synagogue, and the Explorer's community.

SOCIAL ACTIVITIES afford the Explorer an opportunity to meet people, to get along with them, to express his opinion in front of groups, to defend his thoughts in debates and round table discussions. He learns to listen and evaluate; he learns good manners.

All tables reported in FY 1955 publication of the "USAF Statistical Digest" are based on the Forty Second, Forty Third and Forty Fourth Annual Reports of the Boy Scouts of America to Congress.

**TABLE 308 - CIVIL AIR PATROL (CAP) - HIGH SCHOOL AVIATION EDUCATION PROGRAM -
1949 (FALL) THROUGH 1955 (SPRING)**

The Coordinated CAP-High School Aviation Education Program is an aviation education plan which may be described as general education in regard to aviation.

The course, as a one-year program for high school instruction, is taught by regular members of the school faculty. (It is also designed as a two-year course for use at CAP squadron level with CAP and Air Force Reserve personnel serving as instructors.) Any student is eligible to participate in the high school course of instruction, and CAP membership, though desirable, is not necessary.
