

DoD Qualification Program Overview

DMSMS & STANDARDIZATION
CONFERENCE August 29, 2011

Hollywood, FL

Mr. Timothy Koczanski, DSPO

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

Qualification Description

- Qualification is a process that:
 - Demonstrates through testing a producer's ability to make a specified product or family of products
 - Certifies that the manufacturer's product or family of products is in compliance with the governing specification

Qualification Requirement

- Requirement for qualification must be specified in Section 3 of the specification
- Technical requirement for offeror to demonstrate capability prior to:
 - Bid opening (sealed bid)
 - Contract award (negotiation)

Qualification Policy

- Guidance for qualification is in:
 - Federal Acquisition Regulation, Subpart 9.2., Qualification Requirements
 - DoD 4120.24-M, Defense Standardization Policies and Procedures
 - SD-6, Provisions Governing Qualification
 - Federal Standardization Manual (for Federal Specifications)

Qualification

- Qualification criteria is prohibited in Commercial Item Descriptions
- Non-Government Standards (NGSs) may have a qualification requirement
 - DoD may be the Qualifying Activity, or there may be third party certification, such as the Performance Review Institute (PRI)

Qualification Oversight

- Initial qualification requirements in a specification require approval by the cognizant Departmental Standardization Office (DepSO)
- Waiver of qualification criteria can only be granted by the Preparing Activity, or, in the case of a Critical Safety Item, the Design Control Activity

Qualification Criteria

- Testing time will exceed 30 days
- Test equipment is not readily available
- Life survival/emergency equipment
- Items designated as safety critical in the Federal Logistics System
- Ensure performance, quality & reliability, reduce risk of catastrophic failure to mission, equipment, safety, or life

Qualification Considerations

- No other practical way to obtain evidence of availability of products meeting requirements
- Two or more manufacturers are available and willing to submit products for qualification testing
- Test facilities and resources are available (estimated cost of testing and evaluation has been determined)

Qualification Pluses & Minuses

- Advantages:
 - Avoid delivery delays for long-term or specialized testing
 - Can reduce inspection burden
- Disadvantages:
 - Administrative Burden
 - Lab facilities can be costly
 - It can limit competition

Qualification Retention

- Qualification is for a set period
 - Usually 1-3 years, some commodities longer (e.g. packaged lubricants).
- Retention not automatic
- Three modes for retention
 - Certification by manufacturer
 - Submission of new test data
 - Complete requalification

Qualified Products Database

- DoD has an online database to manage qualification data (QPD)
 - Access via <https://assist.daps.dla.mil>
 - QPD went live in April 2006
 - 96% of Paper QPLs and QMLs have been transitioned into the QPD

Qualified Products Database

- Level of access to QPLs is driven by the users role
- Users need an individual ASSIST account to load and maintain QPL Data
- Users with an ASSIST account can:
 - Conduct searches by part number, source name, governing spec, FSC, etc.
 - Run standard reports (i.e. manufacturer's parts by CAGE code, or Gov't designation)

Qualified Products Database

- Users may also access QPL data (read only) from either ASSIST QuickSearch or www.assistdocs.com.
- To be published in the QPD, suppliers must be registered in the Central Contractor Registry (www.ccr.gov) in an active status.

Qualified Products Database

- Most of the static paper QPLs have been transitioned into the QPD
- There is only a small percentage of paper QPL's in the ASSIST—most have been converted to electronic QPLs

Qualified Products Database

- If you search in the ASSIST for a QPL that has been converted, clicking on the qualification link on the Document Analysis page (overview section) will take you to the QPL in the QPD
- Qualification Policy is being revised to reflect the new automated process

(see policy memo 07-03 for more information at <http://www.dsp.dla.mil>)

Connecting Buyers To Suppliers

To comply with revised DOD policy, suppliers who wish to be listed or retained on a QPL or QML must register with Central Contractor Registration (CCR) @ www.ccr.gov and maintain their CCR registration in an "Active" status.

Preamble

The Qualification Dataset for the following governing specification was last updated on 07/29/2011

Qualifying Activity	FSC Code	Document Date	Document ID	QPL Number	Status	Title
AS	6850	03/20/2006	MIL-PRF-85570D (1)	QPL-85570	Active	Cleaning Compounds, Aircraft, Exterior

This QPL has been prepared for use by or for the Government in the acquisition of products covered by the subject specification and inclusion of a product is not intended to and does not connote endorsement of the product by the Department of Defense. All products included herein have been qualified under the requirements for the products as specified in the latest effective issue of the applicable specification. This QPL is updated as necessary and is subject to change without notice. Inclusion of a product does not release or otherwise affect the obligation of the manufacturer to comply with the specification requirements.

ASSIST Quick Search Tell Us What You Want!

ASSIST-Quick Search provides direct access to Defense and Federal specifications and standards available in the official DoD repository, the ASSIST database. Enter your search criteria in one of the search fields to locate documents available for distribution by the DODSSP. Click on the label next to each search field block for a description and examples of search criteria.

(Please note that you can enter search criteria in more than one search field; however, Quick Search will then only find documents that satisfy all of the specified search criteria. If your search doesn't yield the results you expected, please try again using only one search parameter, such as the document number.)
