

Directions in Engine-Efficiency and Emissions Research (DEER) Conference 3 October 2011

**Dr. Grace M. Bochenek,
Director**

U.S. ARMY TANK AUTOMOTIVE RESEARCH, DEVELOPMENT AND ENGINEERING CENTER (TARDEC)

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.					
1. REPORT DATE 03 OCT 2011		2. REPORT TYPE		3. DATES COVERED 00-00-2011 to 00-00-2011	
4. TITLE AND SUBTITLE Directions In Engine-Efficiency And Emissions Research (DEER) Conference				5a. CONTRACT NUMBER	
				5b. GRANT NUMBER	
				5c. PROGRAM ELEMENT NUMBER	
6. AUTHOR(S)				5d. PROJECT NUMBER	
				5e. TASK NUMBER	
				5f. WORK UNIT NUMBER	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) US Army Tank Automotive Research Development ,and Engineering Center (TARDEC),6501 E. 11 Mile Road,Warren,MI,48397				8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)				10. SPONSOR/MONITOR'S ACRONYM(S)	
				11. SPONSOR/MONITOR'S REPORT NUMBER(S)	
12. DISTRIBUTION/AVAILABILITY STATEMENT Approved for public release; distribution unlimited					
13. SUPPLEMENTARY NOTES Directions in Engine-Efficiency and Emissions Research (DEER) Conference October 3-6, 2011					
14. ABSTRACT					
15. SUBJECT TERMS					
16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT Same as Report (SAR)	18. NUMBER OF PAGES 22	19a. NAME OF RESPONSIBLE PERSON
a. REPORT unclassified	b. ABSTRACT unclassified	c. THIS PAGE unclassified			

What We Do

- **Acquisition:** Program Management
- **Logistics:** Industrial Operations, and Contracting
- **Technology:** Research, Development, and Life Cycle Engineering

The Magnitude

- Over 60% of the Army's Equipment and Systems (65% BCT's)
- Over 130 Allied Countries Own Our Equipment
- Approximately 3,300 Fielded Product Lines and 38,500 Components

The Product Lines

- | | |
|---|---------------------------------|
| 1. Mine Resistant Ambush Protected (MRAP) | 14. Force Providers |
| 2. Combat Vehicles | 15. Materiel Handling Equipment |
| 3. Armored Security Vehicle | 16. Chemical Defense Equipment |
| 4. Route Clearing Vehicle | 17. Tactical Bridges |
| 5. Howitzers | 18. Fuel & Water Dist Equipment |
| 6. Tactical Vehicles | 19. Trailers |
| 7. Rifles / Machine Guns | 20. Watercraft |
| 8. Large Caliber Guns | 21. Rail |
| 9. Mortars | 22. Construction Equipment |
| 10. Rapid Fielding Initiative | 23. Commercial Vehicles |
| 11. Aircraft Armaments | 24. Fuel & Lubricant Containers |
| 12. Robotics | 25. Sets, Kits & Outfits |
| 13. Soldier Uniforms & Equipment | 26. Shop Equipment |

We support a diverse set of product lines through their life cycles, from combat and tactical vehicles, armaments, watercraft, fuel and water distribution equipment, to soldier, biological, and chemical equipment.

► Tactical Vehicles

Vehicle	Description	Units
Light Tactical Vehicles (LTV)	HMMWV vehicle variants made up of 1 ¼ ton payload class	163,661
Medium Tactical Vehicles (MTV)	14 variants in 2.5 and 5 ton payload class	43,143
Heavy Tactical Vehicles (HTV)	Heavy-duty trucks, 10 ton and up, used for cargo, moving heavy equipment, tractors, tankers, wreckers, fire fighting trucks, dump trucks and others	55,236
Mine Resistant Ambush Protected (MRAP)	A family of armored fighting vehicles designed to survive IED attacks and ambushes	10,902 (*16238 required)
Total		272,942

► Non-Tactical Vehicles

Vehicle	Description	Units
Passenger Vehicles	Sedans, station wagons, passenger vans, SUVs	86,138
Light Trucks	Vans, pickup trucks	42,665
Medium Trucks	Miscellaneous cargo, flatbed, boxvan, others	43,762
Trucks	Heavy-duty trucks	17,598
Other	Ambulances, buses and support vehicles	6,633
Total		196,796

- All tactical vehicles are considered medium or heavy-duty by commercial standards (they are above 10,000 GVW, and all use JP8)
- About 30 percent of non-tactical vehicles are also medium or heavy-duty
- In total, about 72% of the total DoD fleet is medium or heavy-duty vehicles

**Increasing demands, operational flexibility, and inter-relationships
Requires a Systems Engineering approach and investments in key technology areas**

Powertrain

**Thermal
Management**

**Track &
Suspension**

**Non-Prime
Power**

**Energy
Storage**

**Pulse
Power**

**Advanced
Propulsion**

Systems Level Analysis, Integration and Testing

Power, Energy & Mobility

Newton-Euler Equations of Motion

$$\left. \begin{aligned} M\ddot{q} + C_q^T \lambda &= Q \\ C(q, t) &= 0 \end{aligned} \right\}$$

Solve for vehicle mobility and component loads

$$\begin{bmatrix} M & C_q^T \\ C_q & 0 \end{bmatrix} \begin{bmatrix} \ddot{q} \\ \lambda \end{bmatrix} = \begin{bmatrix} Q_c + Q_v \\ Q_d \end{bmatrix}$$

Vehicle Dynamics

Hi-Energy, Hi-Density Energy Storage

Comprehensive Thermal Management of Propulsion & Cabin

High Power Density, Low Heat Rejection & Fuel Efficient Engines

Soldier & System Survivability

Active Protection Systems

Holistic Occupant Centric Protection

$$\frac{d}{dt} \int_{V_t} f(x, t) dV = \int_{V_{c=V_t}} \frac{\partial f(x, t)}{\partial t} dV + \int_{S_{c=St}} f(x, t) \cdot n dS$$

Affordable, Multi-hit Ceramic Armor

$$\frac{dc}{dt} + i\omega(p)c + \Gamma_+(p)c - \Gamma_-(p)c = f_n(t)$$

Fire and Toxic Fume Resistant Materials

Multi-Physics Optimization

It's About Balancing Technology, Integration, Mission & Threat

Advanced Vehicle Power Technology Alliance (AVPTA) Breaking New Ground

AVPTA will move us toward reducing our reliance on fossil fuels.

Combines the intellect of the DA and the DOE to accelerate energy-related R&D initiatives.

22 July, 2010

18 July, 2011

- Partnership with true collaboration to enhance national energy security
- Demonstrate federal government leadership
- Provide shared capabilities and access to resources
- Accelerate technology development
- Drive innovation
- Increase the value of research investments
- Address national energy needs

Advanced Combustion Engines and Transmissions	Lightweight Structures and Materials	Energy Recovery and Thermal Management	Alternative Fuels and Lubricants	Hybrid Power Systems	Analytical Tools
---	--------------------------------------	--	----------------------------------	----------------------	------------------

Technical areas for potential joint activity:

Driving results through collaboration

Fuel Efficiency Demonstrator (FED) OSD Sponsored, Army Implemented

Designed to validate fuel-efficiency innovations, enhance Soldier safety and reduce Army's energy costs.

System engineering approach.
Exceeded the original goal of 30% more fuel efficient than the M1114

- Identify and assess technologies that support increasing fuel efficiency in a M1114 size vehicle and demonstrate them in a system level demonstrator
 - Alpha – Testing began July 2011
 - Bravo – Nov 2011 delivery
- Developed detailed models & simulations to evaluate energy generation, losses, recovery, etc.
- Engine Energy & Vehicle energy analysis and balancing

Fuel Efficient Demonstrator (FED)

Engine Energy Balance

Vehicle Energy Balance

Analysis

Fuel Efficient Demonstrator (FED)

Analysis

Greatest single contributor to upgrade efficiency is 7-speed dual clutch transmission, best non-hybrid efficiency option.

Power Transmission

200hp 4.5L I4 diesel; Calibrated for max efficiency.
Right-sized for application

Power Transmission

Electric Turbo-Compounding utilizes wasted heat energy.

35% rolling resistance improvement (pavement) using 22.5" commercial wheel w/ custom tread & tire compound.

Materials

HEVEA - In 4 years, the Army developed physical & analytical methods for evaluating conventional and hybrid vehicles which have been accepted by the acquisition and industry communities, including SAE.

Hybrid Electric Vehicle Experimentation and Assessment (HEVEA)

20 Vehicles (10 Conventional/10 Hybrid)

- Developed a standard testing procedure & methodology for testing HEV's
- Developed analytical tools for both assessment and evaluation
- Established credible/quantifiable data of HEV vice conventional vehicles (fuel economy, reliability,
- Developed M&S methods

Accomplishments

- **Developed analytical tools for both assessment and evaluation**
 - Implemented as a design tool for the JLTV effort
 - Used on FED program
 - Sensitivity analysis of data ongoing

- **Developed physical test for hybrid electric systems - the TOP**

- **Showed benefit to fuel economy**
 - Hybrid fuel economy gain is significant at idle (30-50%) for test HMMWV configuration
 - Tested on both Harford (highway, stop and go) and Churchillville (hilly terrain) at APG

- **Successful performance in extreme temperatures (-32° to ≥38° C)**

- **Duty cycle and terrain are major factors affecting fuel economy**

Hybrid-Electric Work to do

- **Reliability** – Evaluate the reliability of technology in military environment
- **Operational Analysis** – Assess technology value in operational scenarios
- **Cost Analysis** – Conduct cost analysis of fuel savings versus cost incurred for a specific platform in an operational mode
- **Life Cycle Cost Analysis** - Evaluate life cycle costs

Hybrid Electric Advantages

- Hybrid electric provides additional mission capabilities:
 - Power Generation – (On-board vehicle power)
 - Auxiliary Engine Support
 - Export Power
 - Silent operations

Partnerships

- Hawaii Tri-Service Advanced Vehicle Working Group
- DOD-DOE Advanced Vehicle Power Technology Alliance
- PACOM/NORTHCOM SPIDERS JCTD
- State of Hawaii
- University of Hawaii-HNEI
- Hawaii Tri-Service Military Installations

TARDEC Involvement Achieves Goals

- Supports the increase in renewable energy
- Military as an early adopter
- Develop a competitive & sustaining industry
- **Army Hydrogen based Vehicles & Refueling**
- **Army Microgrid 1-**
 - 250kW sufficient to power a building
- **Army Microgrid 2-**
 - 450kW capable of powering 500-Soldier/Forward Operating Base

Hawaii's Energy from Oil

90%

HI Imports 51 million barrels of Oil Annually

\$7B

Hawaii's Supply of Oil (at any given time)
