DoD ESI Overview:

Economies of Scale for COTS IT Acquisition

Unclassified

Unclassified

DoD ESI Overview

- Summary: Joint DoD strategic sourcing initiative to save time and money on acquisition of commercial software, IT hardware and services
- Executive Sponsor: DoD CIO
- Goals:
 - Enterprise leverage and efficiencies in COTS IT acquisition
 - IT asset management

Unclassified

Unclassified

DoD ESI Operations

- Team Composition: Army, DON, Air Force, DLA, DISA, NGA, DIA, and OSD
- Operations:
 - Award enterprise agreements for IT products and services
 - Implement unified vendor and contract management strategy
- Results:
 - Over 80 agreements with 48 separate software publishers and research/advisory firms
 - Over \$4 billion cost avoidance since inception
 - IT asset visibility of DoD ESI suppliers
 - More efficient acquisition processes for DoD ESI Enterprise Software Agreement (ESA) users

Unclassified

Focus on Customers & Efficiencies

- Implement DoD enterprise agreements for Commercial Off the Shelf Information Technology (COTS IT) - leveraging DoD enterprise scale
- Establish software enterprise licenses for common use software
- Influence Federal and DoD IT acquisition policy to lower the total cost of IT ownership for the DoD enterprise
- Maintain enterprise strategic sourcing relationships with leading IT vendors
- Operate using an agile, low overhead model executed through Software Product Managers (SPMs) in five DoD Components
- Coordinate development of enterprise IT asset management (ITAM) policy, standards, and best practices
- Provide IT acquisition expertise to DoD buyers of all size
- Establish “best value” contract terms and conditions

DoD ESI Model: Lean and Agile

- Lean Enterprise Governance and Management Structure
 - Recognized in FAR/DFARs, DoD 5000, and CIO policy and guidance
 - Aligned under Enterprise Governance Board (EGB)
 - Matrixed team structure, leveraging in-place Component expertise
- Agile Operations
 - Empowered Working Group with minimal decision points
 - Flexible framework for selecting target technologies
- Small team footprint embedded in OSD
 - Minimal dedicated staff
 - Execution through five Components (Army, DON, USAF, DISA, DLA)

DoD ESI and GSA SmartBUY

- GSA SmartBUY
 - Aligned under the Federal Strategic Sourcing Initiative (FSSI)
 - Federal government strategic sourcing program for software
- DoD ESI partnership with SmartBUY
 - SmartBUY is implemented within DoD through DoD ESI
 - DoD manages 21 GSA SmartBUY agreements
 - GSA SmartBUY participates in regular DoD ESI Team meetings
- Requirements for DoD ESI and SmartBUY Use
 - **In Acquisition Planning** – DoD 5000.2 requires maximum use of and coordination with DoD ESI when use of commercial IT is viable
 - **During Procurement** – DFARS mandates use of DoD ESI process when fulfilling requirements for software and related services
 - **DPAP/DCIO Memorandum** mandates use of GSA SmartBUY agreements where requirements match the offerings

Unclassified

ESI Agreements

- Software, Hardware and Commercial IT Services
- Special contract terms and conditions for enterprise needs
- Open to all DoD Components, Intelligence Community (IC), NATO, and Auth. Contractors
- Vehicles for products widely-used across DoD

Unclassified

DoD IT Challenges

Hundreds of sub-optimal data centers and networks incur **unnecessary costs**

Limited interoperability reduces information sharing and mission collaboration

Increasing demand for **new technology** on **rapidly** evolving devices

IT Programs average **81 Months*** – cannot rapidly and efficiently field new technology to meet warfighter needs

Cyber security vulnerabilities threaten to exploit classified information and endanger our national security

Current IT delivery process hinders our ability to take advantage of **new commercial technology**

ESI Alignment with JIE Oversight

JIE Guiding Principals & ESI

- All stakeholders commit to an enduring program
- Mission success is the first priority
- Commonality is the default; uniqueness is allowed, but only when essential for mission success
- DoD IT will operate in an enterprise model
 - We are developing the DoD plan, not separate component plans
- We will maximize utilization of existing efforts
- We will enhance security
- We will leverage the existing statutory framework

ESI Focus

IT Modernization Benefits

- Mission Effectiveness
 - Rapidly and dynamically respond to and support changing mission information needs for all operational scenarios
 - Users and systems will have timely and secure access to the data and services needed to accomplish their assigned missions, regardless of their location
 - Users and systems can trust their connection from end to end with the assurance that their activity will not be compromised.
 - Capabilities are still available during an event, even if they are degraded.
- Increased Security
 - The DoD can operate, monitor and defend the DoD's IT assets to attain and maintain information dominance.
- IT Efficiencies
 - Information assets are joint assets to be leveraged for all Department missions.
 - A consistent IT architecture supports effective fielding of Department capabilities.
 - The DoD has visibility into its IT expenditures through increased budget transparency.

Secondary Alignment with IT Modernization Plan

CONSOLIDATE INFRASTRUCTURE

1. Consolidate Enterprise Networks

- Consolidate data centers and network operations
- Optimize to a joint enterprise architecture with secure access

2. Deliver DoD Enterprise Cloud

- Develop and execute a strategy and standards for a secure DoD cloud environment.
- Leverage commercial clouds that meet cyber security requirements

3. Standardize IT Platforms

- Minimize program-unique platforms
- Drive DoD use of standard platforms
- Design platforms that ensure a secure cyber environment

Cloud Services (e.g., GSA EaaS)

STREAMLINE PROCESSES

4. Enable Agile IT

- Lead the development of an Agile IT development methodology
- Provide Guidance to DoD On Agile IT Best Practices

5. Strengthen IT Governance

- Restructure IT governance boards for enterprise view
- Improve DoD IT decisions, strategies, investments
- Streamline compliance processes

6. Leverage Strategy for IT Commodities

- Implement an enterprise approach for the procurement of common IT H/W
- Establish a DoD Commodity Co

Software Enterprise Licensing; UMGD

Compass SI Agreements

7. Strengthen Cybersecurity

- Develop enterprise cyber situational awareness including authentication
- Leverage automated tools and continual assessments
- Streamline certification and reinforce reciprocity

8. Strengthen IT Investments

- Obtain transparency of IT investments
- Align IT Investments to DoD strategies
- Review performance of major investments

9. Improve Enterprise Architecture Effectiveness

- Transition document based process to decision support model
- Develop EA Implementation Plan and Instruction

IT Asset Management

STRENGTHEN WORKFORCE

10. Modernize IT Guidance and Training

- Provide guidance to DoD on adoption of Agile IT best practices
- Leverage ongoing workforce initiatives
- Develop a robust IT acquisition community

IT Acquisition Training & Tools

ITES&R Consolidation Initiatives

- Working Groups identified specific initiatives in the following functional areas:
 - **Network Services (NS):** Services (including hardware, software, and labor) that provide telecommunications, long-haul networks, installation campus area networks (ICAN), and network management and IA services
 - **Computing Services (CS):** Services that provide the ability to process, store, and access information, including data centers and servers, storage, and other hardware inside of them
 - **Application and Data Services (ADS):** Common shared applications, services, and processes
 - **End-User Services (EUS):** Subset of computing services that enable end users to access information applications and services locally and via the network
 - **IT Business Processes (BP):** Processes used to procure the hardware, software, and services needed to operate and maintain the DoD IT infrastructure

10 Point Plan: IT Strategic Sourcing

Objective: The DoD CIO, in **collaboration with AT&L and Components**, will develop strategic sourcing plans and utilize consolidated contracts for DoD-wide purchasing of common IT software and hardware commodities. This enterprise strategic sourcing initiative for IT will allow DoD to gain economies of scale, improve effectiveness of IT throughout its lifecycle, and reduce total cost to the enterprise.

Background: The DoD Enterprise Software Initiative (ESI) seeks to implement a software enterprise management process within DoD ... **Additional emphasis, however, needs to be placed upon ...the role of Software Product Managers within their Components... supporting Department-wide requirements.** Additional benefits include compliance with standards, sustainability, security, energy efficiency, asset tracking, technology refresh, quality and achieving small business or other “good citizen” goals. The initiative will enhance current DoD bulk purchasing efforts by ensuring a focus on the larger set of objectives that can be realized from strategic sourcing.

Approach: The DoD CIO will leverage the existing Strategic Sourcing Board of Directors (BOD) as a DoD Commodity Council co-chaired by senior leadership of AT&L/DPAP and DoD CIO, with representation from each of the Services. This Council will review requirements and analyze current DoD spending data to identify and agree on a **DoD-wide strategic sourcing strategy for IT hardware and software**

...Lastly, once strategic sourcing has been standardized across DoD, the DoD Commodity Council will implement a process for enterprise-wide strategic sourcing for commodity IT purchases. The Council will review and analyze current IT hardware spending and **identify a standard set of hardware** for DoD-wide procurement and use.

IT Business Process (BP) Initiatives - Objectives

- Leverage economies of scale in purchasing
- Identify DoD-wide approaches to common IT business needs and direct IT-related business and operational practices
- Limit COTS hardware and software procurements to enterprise-wide vehicles to reduce lifecycle costs for procurement and contract administration
- Reduce the number of IT hardware configurations to reduce testing, patch management, and software upgrade installation costs

Initiatives	Increase Mission Effectiveness	Improve Cyber Security	Deliver Efficiencies	Technical Risk	Cultural Barriers
BP1: Consolidate COTS Software Purchasing			◆	Low	Medium
BP2: Consolidate COTS Hardware Purchasing	◆	◆	◆	Low	Medium
BP3: Optimize IT Service Purchasing	◆		◆	Low	High
BP4: Common Business Process Foundation	◆		◆	Medium	High
BP5: Promote and Adopt "Green" IT			◆	Low	Medium

◆ Significant Contribution

◆ Some Contribution

(http://dodcio.defense.gov/Portals/0/Documents/Announcement/Signed_ITESR_6SEP11.pdf)

Consolidate Software Purchasing

- Centralize DoD-wide enterprise licenses for the most widely used commercial software products
- Consolidate existing major Component-level enterprise licenses, or establish new DoD enterprise licenses and manage these licenses at the DoD level
- “Follow-the-Money” and focus on products and services from proven providers already accepted and in use within DoD
- Lower expenditures associated with patching and maintaining heterogeneous software products
- Reduce contract administration overhead

Consolidate Hardware Purchasing

- Drive procurement of all DoD commodity IT hardware (desktops, laptops, monitors, servers, printers) through large-scale, proven enterprise-buying processes such as:
 - Air Force Quarterly Enterprise Buy (QEB)
 - Army Consolidated Buy (CB)
 - Marine Corps Hardware Suite (MCHS)
- Modify these processes to ensure capture of other Components' basic configuration requirements
- Adopt other Component IT hardware buying processes or establish new vehicles to ensure coverage of other IT hardware devices, as needed
- Reduce lifecycle costs by reducing procurement expenditures, easing testing and maintenance support tasks, reducing aggregate contract administration overhead, and using "green" specifications to reduce power consumption

DoD ESI Best Value Toolkit for Software Buyers

Unclassified

Unclassified

Challenges for Software Buyers

Unclassified

Best Value for Software

Best value can be achieved when programs:

- Acquire solutions that best fit their requirements
- Receive the best price, all factors considered
- Secure the best terms and conditions

As defined in FAR 2.101, "Best value" means the expected outcome of an acquisition that, in the Government's estimation, provides the greatest overall benefit in response to the requirement.

Dan Gordon, who recently stepped down as OFPP administrator, offers a more tempered view. There are times when the lowest cost is fine, he said. But on more complicated procurements, the best value deserves a close look, too.

"IT acquisition: Pay less now, more later," Federal Computer Week, by Matthew Weigelt, 1/20/2012

Total cost of ownership

From Wikipedia, the free encyclopedia

Total cost of ownership (TCO) is a financial estimate whose purpose is to help consumers and enterprise managers determine direct and indirect costs of a product or system. It is a management accounting concept that can be used in full cost accounting or even ecological economics where it includes social costs.

Contents [hide]

- Use of concept
 - Computer and software industries
 - Transportation industry
- See also
- References
- External links

Use of concept

TCO, when incorporated in any financial benefit analysis, provides a cost basis for determining the economic value of an investment. Examples include: return on investment, internal rate of return, economic value added, return on information technology, and rapid economic justification.

A TCO analysis includes total cost of acquisition and operating costs. A TCO analysis is used to gauge the viability of any capital investment. An enterprise may use it as a product/process comparison tool. It is also used by credit markets and financing agencies. TCO directly relates to an enterprise's asset and/or related systems total costs across all projects and processes, thus giving a picture of the profitability over time.

TCO: Sum of all expenses for buying, sustaining, and decommissioning an asset or investment over its entire life.

Analyzing Total Cost of Ownership

W http://en.wikipedia.org/wiki/Total_cost_of_ownership

View Favorites Tools Help

Meetings DoD ESI | Best Value Toolkit W Total cost of ownership - ... x

Computer and software industries

TCO analysis was popularized by the [Gartner Group](#) in 1987.^[1] The roots of this concept date at least back to the twentieth century.^[2] Many different [methodologies](#) and software tools have been developed to analyze TCO. TCO is the financial impact of deploying an information technology product over its [life cycle](#). These technologies include software and training.

Technology deployment can include the following as part of TCO:

- Computer hardware and programs
 - Network hardware and software
 - Server hardware and software
 - Workstation hardware and software
 - Installation and integration of hardware and software
 - Purchasing research
 - Warranties and licenses
 - License tracking - compliance
 - Migration expenses
 - Risks: susceptibility to vulnerabilities, availability of upgrades, patches and future licensing policies, etc.
- Operation expenses
 - Infrastructure (floor space)
 - Electricity (for related equipment, cooling, backup power)
 - Testing costs
 - Downtime, outage and failure expenses
 - Diminished performance (i.e. users having to wait, diminished money-making ability)
 - Security (including breaches, loss of reputation, recovery and prevention)
 - Backup and recovery process
 - Technology training
 - Audit (internal and external)
 - Insurance
 - Information technology personnel
 - Corporate management time
- Long term expenses
 - Replacement
 - Future upgrade or scalability expenses
 - Decommissioning

In the case of comparing TCO of existing versus proposed solutions, consideration should be put towards costs related to the existing solution that may not necessarily be required for a proposed solution. Examples include cost of manual labor only required to support lack of existing automation, and extended support personnel.

Alternative: Rapid Assessment

Gather

- ✓ Collect acquisition information: items, quantities, quoted prices, Ts & Cs, Maintenance practices, configuration required, services needed, etc.
- ✓ Ensure that the Customer/Technical Lead has validated that the software satisfies requirements.
- ✓ Identify available contract vehicles and their terms & conditions
- ✓ Review industry literature or benchmark data to determine standard pricing, Ts & Cs, and average TCO

Analyze

- ✓ Compare quotes and terms to existing contracts.
- ✓ Utilize The Best Value Terms and Conditions Guide to compare Ts & Cs reflect best practices.
- ✓ Compare market research to benchmark prices, TCO, and Ts & Cs.
- ✓ Review the Total Cost of Ownership (TCO) Elements List. Complete the Total Cost of Ownership (TCO) Workbook. Analyze the entire deal, alternative offers, and alternative issues

Strategize

- ✓ Determine the Best Value Range (Price, Ts & Cs, and TCO) that is acceptable to the Government.
- ✓ Establish your target Ts & Cs and develop your trade-off plans.
- ✓ Review the Best Value Price Factors Guide and incorporate this information is establishing your negotiation strategy.
- ✓ Use the Negotiation Position/Strategy Outline as a framework for ensuring all issues are addressed.

Negotiate

- ✓ Negotiate to your Best Value Target.
- ✓ Use the TCO Worksheet to track financial trade-offs for the Life-cycle of the program.
- ✓ Award a contract, knowing that you obtained Best Value.
- ✓ Report deal data if using DoD ESI or GSA SmartBUY vehicle.

DoD ESI Summary

- Promotes cross-Component sharing of IT acquisition “lessons learned”
- Protects enterprise-level IT management interests in IT vendor negotiations
- Leverages economies of scale for IT acquisitions
- Returns significant cost avoidance, improved software use rights for ordering agencies
- Reduces administrative costs by reducing duplicative IT agreements and contracts
- Promotes enterprise-level visibility into IT asset acquisitions
- Enables buyer access to professional licensing expertise
- Ensures that unique DoD enterprise needs are communicated at the Federal level for COTS IT acquisition policy and initiatives
