

ENERGY INITIATIVES TASK FORCE

SECURING ARMY INSTALLATIONS WITH **ENERGY** THAT IS
CLEAN, RELIABLE AND AFFORDABLE

Environment, Energy Security and
Sustainability
May 23, 2012

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.					
1. REPORT DATE 23 MAY 2012		2. REPORT TYPE		3. DATES COVERED 00-00-2012 to 00-00-2012	
4. TITLE AND SUBTITLE Energy Initiatives Task Force: Securing Army Installations with Energy That Is Clean, Reliable and Affordable				5a. CONTRACT NUMBER	
				5b. GRANT NUMBER	
				5c. PROGRAM ELEMENT NUMBER	
6. AUTHOR(S)				5d. PROJECT NUMBER	
				5e. TASK NUMBER	
				5f. WORK UNIT NUMBER	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) Army Energy Initiatives Task Force,110 Army Pentagon Room 2A486, ASA (IE&E),Washington,DC,20310-0110				8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)				10. SPONSOR/MONITOR'S ACRONYM(S)	
				11. SPONSOR/MONITOR'S REPORT NUMBER(S)	
12. DISTRIBUTION/AVAILABILITY STATEMENT Approved for public release; distribution unlimited					
13. SUPPLEMENTARY NOTES Presented at the NDIA Environment, Energy Security & Sustainability (E2S2) Symposium & Exhibition held 21-24 May 2012 in New Orleans, LA.					
14. ABSTRACT					
15. SUBJECT TERMS					
16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT Same as Report (SAR)	18. NUMBER OF PAGES 11	19a. NAME OF RESPONSIBLE PERSON
a. REPORT unclassified	b. ABSTRACT unclassified	c. THIS PAGE unclassified			

Army Threats to Energy

Army Energy Outlook

Path to 25% Renewable Energy by 2025 - Notional

Reaching Army energy goals will require significant number of large scale renewable energy projects

Major Issues for Army Large Scale Renewable Energy Projects

- Declining Budgets/Incentive Leverage
Need for third party financing
- Specialized Expertise
Requires financial, regulatory, environmental, and real estate expertise
- Enterprise Strategy
To define the most efficient path to reach Army goals

Army Energy Initiatives Task Force

Energy Initiatives Task Force (EITF) established by the Secretary of the Army on September 15, 2011.

EITF serves as the central management office for **partnering** with Army installations to implement **cost-effective, large-scale,** renewable energy projects, leveraging **private sector financing**.

- Projects **greater than 10MW**
 - Will coordinate with installations for 1-10MW opportunities
 - Potential for projects that exceed Army requirements
- Solar, Wind, Biomass/WTE and Geothermal technologies
 - Potential to support resource validation, environmental permitting, regulatory approval and other project requirements
- Will use existing DoD land-use and third-party financing authorities

Secretary of the Army
John M. McHugh

Planning and Execution Process

The EITF is producing a process for developing large-scale renewable energy projects that is **clear, consistent and transparent**. This process will be described in a ***Renewable Energy Project Development Guide*** that will detail the five phases of project development.

Project Risk Assessment Template

Project Risk Factors are reviewed on a weekly basis to identify roadblocks and key issues for successful project development

Project Risk Assessment	
Mission/ Security	• How does project enhance energy security on Installation? • What are the possible impacts to Installation operations?
Economics	• What is the estimate of the baseline capital cost? • Have all other development costs been included? • What is the value of any REC's? • Is resource validation required? What is the status? • What is existing utility rate and alternative tariffs? • Does Economic Case Analysis (ECA) show cost savings for Army considering current and project utility rates?
Real Estate	• What is the approach and what authority is being used? • What are issues to obtaining required BLM agreement?
Regulatory (Legal)	• What are the regulatory limits for interconnection, net-metering? • What is the status of getting required PUC approvals?
Off-Take	• How much does installation use now and is this sufficient to consume all electricity? • If power is to be sold off the installation, have off-takers been identified? • What is the status of state RPS to drive demand?
Integration (Technical)	• What are the technical issues to connect to grid (e.g., substation, line capacity, etc.)? • What is the status of required interconnect or flow studies?
NEPA	• What are the major NEPA issues? • Who will implement NEPA and what is the timeline?
Acquisition	• What is acquisition strategy and timeline to implement? • What performance risks are there with the developer or other partners?

Assistant Secretary of the Army (Installations, Energy & Environment)

Opportunity Assessments

EITF Acquisition Approach

- The EITF will develop a multi-pronged acquisition strategy that can provide required flexibility beyond the Task Force term.
- We expect to utilize multiple contracting offices, potentially including the Army Corp of Engineers and Defense Logistics Agency, as well as DOE contracting authorities (WAPA, BPA, TVA).
- The EITF anticipates leveraging a Multi-Award Task Award Contract (MATOC) for PPA's being developer through USACE-Huntsville.
 - Draft RFP was issued for comment on February 24, 2012

Multi-Award Task Order Contract (MATOC)

Working with the EITF

Industry

- Register to **meet with EITF staff** to provide summaries on industry capabilities, visit www.armyeitf.com
- **Industry Days** at installations
- **Joint United States Army & United States Air Force Renewable Energy Industry Day**, June 12, 2012, Crystal City VA

Installations

- The EITF will actively work with installations to screen and provide feedback on renewable energy project opportunities based on an enterprise-wide approach.
