

DOD, Climate Change and Energy Background and Initiatives

Bill Van Houten
Office of the Secretary of Defense
Environmental Management Staff

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.					
1. REPORT DATE JUN 2010		2. REPORT TYPE		3. DATES COVERED 00-00-2010 to 00-00-2010	
4. TITLE AND SUBTITLE DOD, Climate Change and Energy Background and Initiatives				5a. CONTRACT NUMBER	
				5b. GRANT NUMBER	
				5c. PROGRAM ELEMENT NUMBER	
6. AUTHOR(S)				5d. PROJECT NUMBER	
				5e. TASK NUMBER	
				5f. WORK UNIT NUMBER	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) Office of the Secretary of Defense,Energy Infrastructure Compatibility, Washington,DC,20301				8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)				10. SPONSOR/MONITOR'S ACRONYM(S)	
				11. SPONSOR/MONITOR'S REPORT NUMBER(S)	
12. DISTRIBUTION/AVAILABILITY STATEMENT Approved for public release; distribution unlimited					
13. SUPPLEMENTARY NOTES Presented at the NDIA Environment, Energy Security & Sustainability (E2S2) Symposium & Exhibition held 14-17 June 2010 in Denver, CO.					
14. ABSTRACT					
15. SUBJECT TERMS					
16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT Same as Report (SAR)	18. NUMBER OF PAGES 24	19a. NAME OF RESPONSIBLE PERSON
a. REPORT unclassified	b. ABSTRACT unclassified	c. THIS PAGE unclassified			

WH CC Agenda

- Make the US a leader in climate change
- Ensure 10% of electricity comes from renewable sources by 2012, 25% by 2025.
- Create 5M new jobs by investing \$150B over 10 years to catalyze private investment in clean energy technologies.
- LOW CARBON ECONOMY

Atmospheric CO₂ Concentration

Year 2007

Atmospheric CO₂

Concentration:

385 ppm

37% above pre-industrial

Growth in Atmospheric CO₂ Concentrations/Year

1970 - 1979: 1.3 ppm/year

1980 - 1989: 1.6 ppm/year

1990 - 1999: 1.5 ppm/year

2000 - 2007: **2.0 ppm/year**

2007: **2.2 ppm/year**

Temperatures will increase if GHG increase (2007 IPCC Projections)

CC in the QDR

- Results of the Quadrennial Defense Review
 - Climate Change will play a significant role in shaping the future security environment
 - Climate change will shape the operating environment, roles and mission
 - DoD will need to adjust to the impacts of climate change on our facilities and military capabilities

QDR Continued

- DoD “must complete a comprehensive assessment of all installations to assess the potential impacts of climate change on its missions and adapt as required.”
- DoD “is increasing its use of renewable energy supplies and reducing energy demand to improve operational effectiveness, reduce greenhouse gas emissions in support of climate change initiative and to protect the Department from energy price fluctuations.”

EO 13514

- Issued October 8, 2009
- Title – Federal Leadership in Environmental, Energy and Economic Performance
- Integrated Strategy Toward Sustainability in the FG & Make Reduction of GHG a Priority of Federal Agencies

Measurement

- Section 9 of EO 13514 Requires Recommendations for Comprehensive GHG Accounting and Reporting
- Treatment of Land Use, Sequestration and Agricultural Emissions
- Use of RE Purchases and Offsets
- Methods to Calculate Scope 1, 2, & 3 Emissions

Common Sources of Federal Greenhouse Gas Emissions

SCOPE 1:

Greenhouse gas emissions from sources that are owned or controlled by a Federal agency.

SCOPE 2:

Greenhouse gas emissions resulting from the generation of electricity, heat, or steam purchased by a Federal agency.

SCOPE 3:

Greenhouse gas emissions from sources not owned or directly controlled by a Federal agency but related to agency activities⁹

DoD Energy Use

- Mobility (Aircraft, Ships, Vehicles)
- Buildings

Source: DoD Annual Energy Management Report (FY 2007) and Mr. Elmer Ransom

Office of the Assistant General Counsel, ASN

Scope 1 and 2

- DoD Established an Aggressive 34% Reduction Target from 2008 to 2020.
- Target Based on Statutory Targets Through 2015 with DoD Goals Through 2020.
- About 2/3 of Reductions Will Come From Reductions in Purchased Electricity.
- Energy Driven Number plus HFC's, etc.

Its Not Just CO2

• Carbon Dioxide	1
• Carbon Monoxide	.89
• Methane	21
• Nitrous Oxide	310
• HFC's	1300
• CF4	6500
• C2F6	9200
• SF6	23000

Scope 3

- DoD Just Sent a 13.5% reduction target to CEQ and OMB for Scope 3 Emissions for 2008 to 2020.
- Three major sources make up this target:
 - Employee Travel – commutes/business
 - Transmission and Delivery Losses
 - Contracted Waste Disposal

Incremental Approach to Scope 3 Emissions

DoD Mitigation

- Mitigation is about more than just energy reduction. We need to address all of the gases.
- Energy Reductions – Demand and Supply
- Methane – Do we know where all of the current and closed landfills are and how much methane they are generating?
- HFC's – Do we need to do another round of substitutions? What about the Montreal Protocol to limit these emissions?

DoD Adaptation

- Do we fully understand the potential impacts to our real estate?
- How should infrastructure planning change?
- How will habitats change? Species migrate? Will invasive species increase?
- What will be the new carrying capacity of facilities?

International Agreements

- Whether there is an international agreement is not critical to whether DOD will have to measure its carbon footprint, mitigate emissions and adapt.
- Note, However – we are looking to preserve current military exemptions:
 - Bunker fuels, contingency operations as part of UN mandate, emissions in host nations

State Initiatives

- Regardless of science or international picture, DOD needs to prepare for climate change and regulation/legislation.
- State Actions:
 - 19 states have greenhouse gas emission targets.
 - 38 states have CAP's or are developing revising one.
 - Regional Initiatives.

EPA Reporting Rule

- Rule covers CO₂, methane, nitrous oxide, hydro fluorocarbons, perfluorocarbons, sulfur hexafluoride and other fluorinated gases including nitrogen trifluoride and hydrofluorinated ethers.
- DoD should not be significantly impacted due to the 25000 metric ton CO₂ equivalent per year reporting threshold and the rule's definition of a facility.

Energy Compatibility

- US energy security and GHG reduction targets drive the need for renewable energy sources on and off installations, but there are both obstruction and radar disruption issues.
- DoD must not self-encroach.
- Issues concerning development on Withdrawn Land.

U.S. Wind Resource and DoD Ranges and Special Use Airspace

Sources: Wind resource: Wind Energy Resource Atlas of the US, 1987;
Special Use Airspace: and MTRs, NGA DAFIF, 2009;
DoD Ranges: DISDI IVT, 2006, ORIS, 2007.

U.S. Solar Resource and DoD Ranges and Special Use Airspace

Sources: Solar resource - CONUS, H1:10km data, SUNY/NREL, 2003, AK: 40km data NREL, 2003; Special Use Airspace: and MTRs, NGA DAFIF, 2009; DoD Ranges: DISDI IVT, 2006, ORIS, 2007.

Interagency Cooperation

- **Outer Continental Shelf – DoD & DoI MoA 1983, update in progress**
- **West-wide Energy Corridors PEIS - 2006**
- **BLM & DoD Wind Energy Protocol – 2008**

Point of Contact

DoD Renewable Energy Policy

For questions about renewable energy project compatibility with DoD testing, training, and operations or climate change:
