EMERGING CONTAMINANTS IN THE NEWS

The following are brief summaries of recent developments related to emerging contaminants. When available, links and references to other sources of information are provided for readers seeking more detailed information on the topic. Distribution authorized to the Department of Defense and U.S. DoD contractors only (March 2009). Other requests for this newsletter shall be referred to Shannon Cunniff, Shannon.Cunniff@osd.mil

Purpose of Chemical/Material Screening

- Eliminate EC candidates from further analysis.
- Recommend priority candidates for detailed analysis.
- Identify initial issues associated with the EC.

Key Screening Questions

- Is the chemical/material important to mission of DoD?
- Is it probable that the chemical/material will be regulated or subject to regulatory policy change?

Screening Process Details

Step 1. Does chemical/material meet definition of an emerging contaminant?

ECs are chemicals/materials that have pathways to enter the environment and present potential unacceptable human health or environmental risk and either do not have regulatory peer-reviewed human health standards or the regulatory standards are evolving due to science, detection capabilities, or new pathways.

Screening Process Details

Step 2. Apply CMRM Rejection Rules

- *Chemical is not used by DoD.*
- *Chemical is used by DoD but use is not significant to DoD mission.*
- *DoD's use of chemicals not DoD unique or other DoD activities manage any associated risk.*

Screening Process Details

Step 3. Apply CMRM Acceptance Rules

- *The probability of regulatory change affecting 1 of 5 DoD Functional areas.*
- *A potential change in our understanding of impact on health.*
- *A potential impact to the public perception of DoD.*
- *A potential impact to current manufacturing, transportation, storage, use, or disposal practices.*

Key Data Sources

- *EPA TRI*
- *TOX NET*
- *KBCRS**
- *Army Environmental Reporter**

** Passwords are required*

Hazardous Materials Information Resource System (HMIRS)

- DoD system developed and maintained by the Defense Logistics Agency.
- Provides a central repository for Material Safety Data Sheets for materials purchased by the Federal Government through DoD.
- System designed to help DoD personnel who handle, store, transport, use and dispose of hazardous material.

Munitions Items Disposition Action System (MIDAS)

- Database developed by the U.S. Army Defense Ammunition Center.
- Provides essential information on munitions used for demilitarization planning, resource recovery and reuse, waste characterization, environmental permit applications and impact assessments.
- Contains detailed technical package information on a wide range of DoD munitions.

Knowledge-Based Corporate Reporting System (KBCRS)

- Web-based application that provides environmental program data to OSD.
- Provides predefine reports such as those published in Annual Report to Congress.
- Provides an ad hoc reporting tool that gives information on chemicals found on DoD sites.

Army Environmental Reporting Online (AERO)

- State of the art “portal” to the Army Environmental Database.
- Includes a number of Army environmental reporting systems.
- Environmental Restoration Information System (ERIS) is one such systems.
- ERIS provides a means to search and generate reports of the chemicals found on Army training or firing ranges.

QUESTIONS?

Chemicals of Interest

Basic Chemical Information

- Hexanitrohexaazaisowurtzitane
- China-Lake 20 (CL-20)
- CAS No. 14913-74-7
- Nitroamine explosive
- Less visible smoke
- Insensitive to external stimuli
- Very costly \$400 dollars/pound

Why Emerging?

- New chemical
- No available toxicity data for development of human health damage risk criteria

General Uses

- Oil well industry using CL-20 in shaped charges

DoD Uses

- Livermore Erosive Initiator
- Spider Grenades
- Research and Development efforts to find applications

Chemicals of Interest

Basic Chemical Information

- Antimony (Sb)
- CAS No. 7446-36-0
- Metal
- Antimony trioxide a common flame retardant

Why Emerging?

- Listed as addition to EU RoHS
- Sb listed in EU NGO SIN List
- Listed as candidate for IRIS update
- NIOSH evaluating possible health concerns related to firefighter pants treated with Sb trioxide

General Uses

- Chiefly used as an alloy with lead in lead-acid storage batteries
- Sb trioxide used as flameproofing agent in textiles and plastics
- Pigments in ceramics, rubber, pyrotechnics, and paints

DoD Uses

- Camouflage paints
- Ammunition primers and pyrotechnics (390 items listed in MIDAS)
- 2379 items in HMIRS contain Sb
- Solders
- Ship ballast

Chemicals of Interest

Basic Chemical Information

- Sulfur hexafluoride (SF₆)
- CAS No. 2551-62-4
- Greenhouse gas
- Global Warming Potential of 23,900
- Atmospheric lifetime of 3,200 years

Why Emerging?

- Global Warming Pollution Reduction Act
- Listed as pollutant on EU Emission Register
- ACGIH “under study list”

General Uses

- Inert tracer gas for studying ventilation systems
- Circuit breakers and switches

DoD Uses

- Waveguide pressurization gas in radar systems
- Stored chemical energy propulsion systems in torpedoes
- Leak detection agent during repair of helicopter rotor blades
