RELEASE - DISTRIBUTION
UNLIMITED

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

RESEARCH PLATFORMS

Aircraft

1. The S2D (BUNO 149240), contains specially installed equipment and wing-mounted pods for cloud physics research. Also used in chaff research and for short-term experiments compatible with space limitations of the aircraft.
2. The C-54 (BUNO 50851), presently being used for the Omega Navigation system, Project Blocker, and various short-term projects requiring only minor aircraft modifications.
3. The EC-121-K (BUNO 128324), used strictly for wave propagation studies in the four-frequency radar system.
4. The EC-121-K (BUNO 135753), used for research in cloud physics, navigation, low-frequency radar, and other projects requiring only minimal aircraft conversion.
5. The EC-121-K (BUNO 191297), used basically for matched filter radar project. Equipment for navigation experiments and other projects requiring only a small space may be installed.

Available Ships

1. USNS MIZAR (AGOR-11), scheduled by NRL.
2. USNS GILLISS (T-AGOR-4), USNS SANDS (T-AGOR-6), and USNS LYNCH (T-AGOR-7). Each under OPCON of MSTSLANT for utilization East Coast Navy Labs with direction of NAVOCEANO; schedules prepared by NRL.
3. USNS MISSION CAPISTRANO (T-AG-162), under OPCOM of MSTSLANT for use in ONR-supported Project Artemis. Former tanker modified to accommodate a high-powered sonar transducer, approximately five stories high and weighing hundreds of tons, which is lowered through center well.
4. AG(SS)214, GROUPER. Carries the SDG sonar.
5. SSX-1, used mainly with Project Clinker; scheduled by NRL.
6. Other surface vessels and submarines occasionally scheduled for NRL use by OPTEVFOR.

General development plan

THE NAVY'S CORPORATE LABORATORY

The Naval Research Laboratory is one of the principal in-house research and development institutions of the U.S. Government. It was established in 1923 to ensure that the advances made by science and engineering could be readily applied to the Navy's needs. Directed always toward this end, the NRL research program has developed to its present status as a broadly based and coordinated effort in the physical, mathematical, and environmental sciences. The work of the Laboratory is conducted at the main establishment in the District of Columbia and at various field sites that provide unique environment and facilities not available at the main site.

Some principal elements of the research program include fundamental and applied work in electromagnetic wave propagation, underwater sound propagation, atmospheric light propagation, refractory metals and exotic materials for high-performance structures, surface chemistry, high-temperature lubricants, submarine air purification, chemical oceanography, structural design theory, metallurgy in all aspects of the sea environment, cryogenic physics, plasma physics, and solar radiation and its effects on environmental phenomena near the earth. The NRL FY 1967 Program Budget is \$77.2 million.

The Laboratory has about 3500 employees, including over 1100 professional scientists and engineers. During the year 1965, almost 260 official technical reports were issued, about 220 scientific papers were published in professional journals, and some 300 scientific presentations were made at meetings, both at home and in many foreign countries. Also, in the same year, 72 patents were issued to NRL personnel, and 91 additional applications were filed with the U.S. Patent Office.

In its investigations of broad scientific areas, in considering these for potential military applications, and in furnishing to the naval systems commands and Secretariat expert consultative services relating to science and military systems, NRL functions as the corporate laboratory of the Navy. Thus it provides a central focus of research and development activity that supports the Navy. When NRL findings and capabilities have borne fruit in particular areas, the results are made known to and used by not only the Navy but also the other armed services, the Advanced Research Projects Agency, the Atomic Energy Commission, and other agencies of the government.

MISSION

The mission of the Naval Research Laboratory is to conduct scientific research and development in the physical sciences and related fields directed toward new and improved materials, equipment, techniques, and systems for the Navy. In fulfillment of this mission, the Naval Research Laboratory:

1. Initiates and conducts scientific research and development of a basic and long-range nature in scientific areas of special interest to the Navy.
2. Performs scientific research and development for the Systems Commands and offices of the Navy and, where specially qualified, for the Defense Department and, in defense related efforts, for other government agencies.
3. Provides to the Navy and its contractors standardized techniques and procedures for measurements and for the accurate calibration of standard instruments in areas of special Navy needs.
4. Furnishes scientific consultative services for the Navy and, where specially qualified, for the Defense Department and, in defense related efforts, for other government agencies.
5. Provides to the Navy unbiased determination of performance characteristics of developmental and prototype devices through limited engineering test and evaluation services.

Position of NRL in the Department of Defense structure

AWARDS RECEIVED BY CIVILIAN EMPLOYEES*

As of July 1, 1966

<u>Government Awards</u>	<u>Number</u>
The Medal of Merit from the President of the United States	1
The Certificate of Merit from the President of the United States	11
The President's Award for Distinguished Federal Civilian Service	2
Department of Defense Distinguished Civilian Service Award	4
Department of Defense Certificate of Merit	1
Department of the Navy Award for Distinguished Achievement in Science	2
Navy Distinguished Civilian Service Award	49
Navy Captain Robert Dexter Conrad Award	2
Navy Superior Civilian Service Award (established 1959)	20
Navy Meritorious Civilian Service Award	178
E. O. Hulburt Annual Science Award (local NRL award)	11
<u>Non-Government Awards</u>	
Henry Draper Medal of the National Academy of Sciences	1
Engineering Science Award of the Washington Academy of Sciences	3
Award in the Physical Sciences of the Washington Academy of Sciences	3
Morris Liebmann Memorial Prize of the Institute of Radio Engineers	1
Medal of Merit Award of the Institute of Radio Engineers	2
Harry Diamond Award of the Institute of Radio Engineers	4
John Scott Medal of the City of Philadelphia	1
Patrons Award of the Institute of Radio Engineers (Washington section)	1
Frederic Ives Award of the Optical Society of America	2
Joseph S. Seaman Gold Medal Award of the American Foundrymen's Society	1
John A. Penton Gold Medal of the American Foundrymen's Society	1
Burgess Prize Award of the American Society for Metals	2

*Information concerning civilian personnel of the Underwater Sound Reference Division is not included under this heading.

<u>Non-Government Awards (Continued)</u>	<u>Number</u>
Charles B. Dudley Medal of the American Society for Testing Materials	1
Gold Medal Award of the American Society of Naval Engineers	1
Stuart Ballantine Medal of the Franklin Institute of Pennsylvania	1
A. K. Doolittle Award of the National American Chemical Society	1
Kendall Company Award of the American Chemical Society	1
Hillebrand Prize of the American Chemical Society	1
William Blum Award of the Washington-Baltimore Electrochemical Society	1
National Award of the American Society of Lubrication Engineers	1
Annual Award of the Society for Applied Spectroscopy	1
E. Edward Pendray Award of the American Rocket Society	1
James H. Wyld Memorial Award of the American Rocket Society	1
Space Science Award of the American Institute of Aeronautics and Astronautics	1
Eddington Medal of the Royal Astronomical Society (Great Britain)	1
Janssen Medal of the French Photographic Society	1
Ancel Prize of the French Photographic Society	1
Progress Award of the Photographic Society of America	1
Professional Achievement Award of the D. C. Council of Engineers and Architectural Studies	1
National Capital Award of the D. C. Council of Engineers and Architectural Studies	3
Award for Technical Achievement of the American Society of Mechanical Engineers	1
Reliability and Quality Control Award of the Radio Engineers Professional Group	1
Service to Mankind Award of the Washington Sertoma Club	1
Pittsburgh Spectroscopy Award of the Spectroscopy Society of Pittsburgh	1
Pure Science Award of the Scientific Research Society of America (NRL Branch)	11
Applied Science Award of the Scientific Research Society of America (NRL Branch)	11
Arthur S. Fleming Award of the Washington Chamber of Commerce	1
Notre Dame Centennial of Science Award	2

Captain Thomas B. Owen

DATE OF BIRTH: March 19, 1920

PLACE OF BIRTH: Seattle, Washington

RESIDENCE ADDRESS: 5400 Greystone St., Chevy Chase, Maryland

MARITAL STATUS: Married. Wife: Rosemary Stolz Owen.
Children: Catherine, Thomas, Jr.,
James, and Nancy

EDUCATION: University of Washington, BS (cum laude) 1940
U.S. Naval Postgraduate School, 1946-47
Navy Advanced Science Program, Cornell
University, PhD (Chemistry) 1950
University of Amsterdam, Netherlands,
Postdoctoral work (1950-51)
Industrial College of Armed Forces, 1961-62
Advanced Management Program,
Harvard Graduate School of Business
Administration, Sept-Dec 1964

EXPERIENCE:

Combat duty with Pacific Fleet	Mar 1941-Apr 1945
Bureau of Naval Personnel, Officer Distribution Division	Jun 1945-Jun 1946
Office of Naval Research in Armaments Branch and Military Operations Branch	Jul 1951-Jul 1953
Assistant Repair Superintendent (Hull) and Production Analysis Superintendent, Long Beach Naval Shipyard	Aug 1953-Jun 1957
Director of Applied Sciences Division and Director, Research and Development Planning Division, Navy Bureau of Ships	Jul 1957-Jul 1961
Military Assistant to Deputy Director of Defense Research and Engineering (Engineering and Chemistry)	Jun 1962-Mar 1963
Temporary duty with Office of the Assistant Secretary of the Navy (R&D), with ultimate assignment as Director of Support Services, Naval Research Laboratory	Mar 1963-Jan 1965
Director, Naval Research Laboratory	Jan 1965

DECORATIONS: Silver Star, Bronze Star, and numerous
campaign medals, including the Asiatic-
Pacific Campaign Medal with 12 battle
stars.

Captain Thomas B. Owen, USN
Director, Naval Research Laboratory

Blank Page

Research Department

THE RESEARCH DEPARTMENT

The Research Department is headed by a civilian director of research. The research effort is divided into three major fields—electronics, materials, and general sciences—which correspond to the principal areas of the Navy's interest in the physical and engineering sciences. There is an associate director of research for each of these three broad areas. Fifteen scientific divisions, each headed by a civilian scientist, pursue work in specific fields. Branches within these divisions form interrelated working units.

The director of research is also assisted by two other associate directors, one for program planning and one for special projects.

Office of Director of Research

Code 4000	Director of Research	Dr. R. M. Page
4005	Staff Adviser for Naval Analysis	Dr. P. Waterman (Acting)
4007	Scientific Adviser	Dr. N. W. Rakestraw
4010	Research Program Officer	Mr. A. Hollings
4100	Associate Director of Research for Program Planning	
4200	Associate Director of Research for Special Projects	Dr. A. H. Schooley
5000	Associate Director of Research for Electronics	Dr. C. E. Cleeton
6000	Associate Director of Research for Materials	Dr. R. L. Dolecek
6010	Research Computation Center	Mr. A. B. Bligh
6020	Shock & Vibration Information Center	Dr. W. W. Mutch
7000	Associate Director of Research for General Sciences	Dr. W. C. Hall
7005	Director, ASW (R&D) Task Group	Dr. J. O. Elliot
7010	Radiological Safety Officer	Mr. L. A. Brauch
7020	Chief Scientist, Laboratory for Cosmic Ray Physics	Dr. M. M. Shapiro

Dr. Robert M. Page
Director of Research
Naval Research Laboratory

Dr. Page [REDACTED] He received the B.S. degree in physics from Hamline University, St. Paul, Minnesota, in 1927, the M.S. degree in physics from George Washington University, Washington, D.C., in 1932, and was awarded an Honorary Doctor of Science degree by Hamline University in 1943.

From 1927 to the present, Dr. Page has been at the Naval Research Laboratory, working mainly with precision instrumentation in the field of electronics. In 1934 he developed the first pulse radar in the world for detection of aircraft, for which he has received the U.S. Navy Distinguished Civilian Service Award, the Presidential Certificate of Merit, an IRE Fellowship, the Harry Diamond Memorial Award of IRE, and the Stuart Ballantine Medal of the Franklin Institute. In recognition of technical and scientific achievement in research and development for the United States Navy, he was given the Captain Robert Dexter Conrad Award. In March of 1960 he was presented with the President's Award for Distinguished Federal Civilian Service.

Dr. Page holds over 45 patents, mostly in radar. He has authored a book, "The Origin of Radar," in addition to numerous technical articles and lectures.

APPLICATIONS RESEARCH

SATELLITE PREPARATION

SPASUR FENCE

SYSTEM PROPOSED BY NRL: FEBRUARY 1958
 PROJECT AUTHORIZED BY ARPA: JUNE 1958
 FIRST OBSERVATION: AUGUST 1958
 WESTERN COMPLEX IN FULL-TIME OPERATION: FEBRUARY 1959
 SYSTEM TRANSFERRED FROM ARPA TO NAVY: OCTOBER 1960
 KICKAPOO TRANSMITTER IN OPERATION: JUNE 1961
 PRE-SELECTORS ADDED TO RECEIVERS: MAY-DECEMBER 1961
 5600 FOOT ALERT ANTENNA INSTALLED AT FORT STEWART: OCTOBER 1962

- DATA PROCESSING
- ENGINEERING PSYCHOLOGY
- OPERATIONAL RESEARCH
- CIC FACILITY
- SPACE SURVEILLANCE
- SATELLITE TECHNIQUES

BASIC RESPONSIBILITIES

The Applications Research Division conducts basic and applied research, together with evaluation and consultation, relative to systems and military applications of space. Current effort is devoted largely toward design and utilization of satellites and systems for navigation, space object classification, orbits, and space surveillance.

BRANCHES

Data Processing

Manned orbiting laboratory experiments
Intercept control
Data processing and display
IFF display
Lasers for data processing
Space physics and quantum electronics

Engineering Psychology

Man-machine engineering
Human engineering of aircraft instrumentation
Human engineering of submarine instrumentation
Aircraft landing aids

Operational Research

Orbit computation
Computation and digital facilities (for SPASUR)
Navy fire control and data processing

Solid State Applications

Radiation effects on semiconductor material and devices used in satellites
Radiation effects on dielectric materials

CIC Facility (at CBD)

Technical evaluation of radar indicators and switchboards
Correlation and compatibility studies of command combat direction stations and Combat Information Centers (CIC)

Space Surveillance

Profile techniques
Space surveillance
Rapid navigation satellite readout

Satellite Techniques

Satellite development
Calibration satellites
Research satellites, especially solar radiation devices
Navigation satellites

GAS LASERS

ELECTRON TUBE RESEARCH

ANTENNA RESEARCH

- SOLID STATE ELECTRONICS
- ENERGY CONVERSION
- ELECTRON TUBES
- MICROWAVE ANTENNAS
- SECURITY SYSTEMS
- WAVE PROPAGATION
- ELECTROMAGNETIC MATERIALS

BASIC RESPONSIBILITIES

The Electronics Division carries out programs of basic and applied research and development in the fields of: electronic properties of solid materials; energy conversion methods; microwave antennas and components; microelectronic technology; electronic identification systems; electromagnetic wave propagation; properties of ground and sea surface radar returns; and vacuum and gaseous electron devices.

BRANCHES

Solid State Electronics

Electroluminescent semiconductor diodes
Semiconductor device material
Thin films
Microwave semiconductor devices and circuits

Electromagnetic Materials

Backscatter from surfaces and particles
Determination of loss tangent characteristics of materials
Radar protective coatings
Advisory services on absorbent materials

Energy Conversion

Advanced electric sources
Energy processing for pulsed and low voltage
Electric power and energy control

Electron Tubes

Gas lasers
Millimeter wave generation
Vacuum breakdown
Thermionics research

Microwave Antennas and Components

Millimeter wave communication system
Naval electrical scanning antennas for airborne use
Advanced microwave antenna research
Microwave electronic components

Security Systems

Development of new IFF system
Consulting services to AIMS* tri-service program
Microminiaturization of electronic instrumentation
Semiconductor devices and circuits
Avigation research

Wave Propagation

Properties of ground and sea surface radar echoes

Meteorological phenomena and their effects

RADAR TARGETS

- HIGH RESOLUTION
- RADAR TECHNIQUES
- SEARCH RADAR
- TRACKING
- EQUIPMENT RESEARCH

BASIC RESPONSIBILITIES

The Radar Division conducts research and advanced development on new radar systems and techniques and investigates basic physical phenomena of importance to radar and related sensors. Systems analysis, evaluation of special radar systems, and consultative services also are provided.

BRANCHES

High Resolution

High resolution techniques
ASW radar
Satellite radar
Ocean surface effects

Tracking

Radar target noise studies
Precision tracking radar techniques
Target signature analysis
Microwave techniques
Radar evaluation

Radar Techniques

High-frequency radar
Signal processing
Propagation through plasma

Equipment Research

Airborne intercept radar consultative services
Radar and infrared counter-countermeasures
Strategic deterrence support studies
Secure command guidance
Target radar-spectra studies
Weapon system analysis

Search Radar

Moving target indication techniques for ship and airborne radars
Phased array techniques
Studies of the ionosphere by means of radar and satellite transmissions
Radar measurements of satellites and ballistic missiles
AEW techniques and environmental studies

Mathematics Staff

Signal processing theory
Mathematical analysis

SOUND

SENECA
LAKE
FACILITY

ARTEMIS TRANSDUCER ARRAY

- PROPAGATION
- TRANSDUCER
- ELECTRONICS
- TECHNIQUES
- ELECTRICAL APPLICATIONS

VORTEX STUDIES

BASIC RESPONSIBILITIES

The Sound Division conducts research in the generation and reception of underwater sound; investigates, over a wide range of frequencies, its intensity, velocity and absorption; and studies its refraction, reflection, scattering, and interference. From these studies, the Division designs, develops, and evaluates complete and integrated sonar systems for submarines, surface vessels, and aircraft to be used by the Navy in pro- and anti-submarine programs, harbor defense, acoustically controlled missiles, and countermeasures.

BRANCHES

Propagation

Ocean sound propagation
Microacoustics
Flow acoustics
Ultrasonics
Sound recording

Techniques

Acoustic countermeasure techniques
Long-range attack
Assured range studies
Ocean surface effects from submarines

Transducer

Basic radiation theory
Electroacoustic modeling
Transducer mathematical models
Calibration of large transducer arrays

Electrical Applications

Sound scattering in the ocean
Sound speeds in the ocean
ARTEMIS transducer array
Sonar transmitter development
Signal analysis
Shallow water propagation

Electronics

Signal processing
Communication theory
Data presentation

BEARING LUBRICANTS

BASIC RESPONSIBILITIES

The Chemistry Division conducts a diversified program of basic and applied research and development in physical, organic, inorganic, nuclear, and biological chemistry. Specialized programs within these fields include fuels, lubricants, corrosion and surface protective coatings, polymers, electrochemistry, molecular structure, submarine atmosphere purification, and BW/CW personnel protection. Consultative services form an important element in the division effort.

BRANCHES

Physical Chemistry

Atmospheric radioactivity
Infrared and ultraviolet spectroscopy
Analytical mass spectrometry
Nuclear magnetic resonance spectroscopy

Organic and Biological Chemistry

Microbiological research
Functional organic coatings
Properties of resins under high compressive loads

Inorganic and Nuclear Chemistry

High temperature materials
Submarine air purification
Oxygen generating chemicals
Corrosion mechanisms

Protective Chemistry

CW/BW ship defense
Adsorbents
Properties of microbial surfaces

Electrochemistry

Fuel cells
Fundamental electrode reactions
Electrochemical power sources
Nuclear submarine atmosphere analysis and control

Surface Chemistry

Lubricants
Absorption-desorption equilibria
Salvage of equipment damaged by sea water
Surface properties of fibers

Fuels

Organic contaminants in submarine atmosphere
Distillate fuels research
Liquid propellant properties

MECHANICS

HYPERVELOCITY GUN

GLASS
REINFORCED
PLASTICS

STRESS ANALYSIS

- BALLISTICS
- ENGINEERING RESEARCH
- DYNAMICS
- SHOCK AND VIBRATION
- STRUCTURES

BASIC RESPONSIBILITIES

The Mechanics Division conducts basic and applied research in fracture and closely related fields including penetration ballistics, hypervelocity, structural design, shock and vibration, structural dynamics, and fire extinguishment. Emphasis is placed on the dynamic as opposed to the static approach to mechanical problems. Consultative services, not only to Navy but to all DOD agencies, form an important part of the division effort.

BRANCHES

Ballistics

Fracture mechanics and fracture strength
Plastic flowing
Compression failure mechanisms in glass-reinforced plastics
Armor research and development
Deep submergence structures
Missile component failure

Dynamics

Vulnerability mechanics
Hypervelocity kill mechanisms
Hypervelocity mechanics
Penetration into earthy materials

Shock and Vibration

Shock strength of materials
Shock propagation and instrumentation
Nondestructive testing

Engineering Research

Airplane crash fire fighting
Combustion inhibition studies related to shipboard conditions
Investigation of new oxidizers

Structures

Shipboard shock fundamentals
Shock protection for weapons systems
Methods for design against shock
Fracture mechanics design studies

Key Personnel

METALLURGY

- PHYSICAL METALLURGY
- METAL PHYSICS
- HIGH TEMPERATURE ALLOYS
- WELDING METALLURGY
- ANALYTICAL CHEMISTRY
- STRENGTH OF METALS
- REACTOR MATERIALS

ELECTRON MICROSCOPE

CHEMICAL ANALYSIS

CORUNDUM CRYSTALS

REMOTE HANDLING ROOM

BASIC RESPONSIBILITIES

The Metallurgy Division conducts research, development, and evaluation in the field of metallurgy, including the physical, mechanical, chemical, and structural aspects of metals. Important consultative services are provided to Navy and other DOD activities.

BRANCHES

Physical Metallurgy

Physical metallurgy of high-temperature materials
Micromechanical metallurgy
Failure analysis
Marine corrosion studies

Metal Physics

Crystal growth in metals
Properties of metals in liquid state
Growth of high-purity single crystals
Metallurgy of metallic alloys
Effects of irradiation upon the solid state properties of metals

High-Temperature Alloys

Flow and fracture
High-temperature strength
Effects of environment on fatigue strength

Welding Metallurgy

Weld joint behavior
Development of test methods
Relationships between flaw size, temperature, and stress level for structural design

Analytical Chemistry

Precision chemical analysis
Analytical techniques development
Determination of trace quantities of elements in small samples

Strength of Metals

Properties, selection criteria, and fracture-safe design parameters for ultra-high-strength structural metals

Reactor Materials

Properties of irradiated structural metals and alloys
Mechanisms of radiation degradation of metals
Engineering application of reactor materials
Neutron spectra and dosimetry

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Grade</i>

SOLID STATE

CRYSTALS

HIGH MAGNETIC FACILITY

CRYOMAGNETICS

- CRYOGENICS
- CRYSTALS
- MAGNETISM
- MATHEMATICAL PHYSICS
- SEMICONDUCTORS

BASIC RESPONSIBILITIES

The Solid State Division is concerned with fundamental and applied research in the physics of materials, principally solids. Included are studies of the properties and applications of semiconductors and of magnetic and paramagnetic materials; of the growth and structure of solids; and of cryogenics. The purpose is an increased understanding of the physical properties and structure of matter and the relationships governing its behavior and the application of this knowledge to military and industrial problems.

BRANCHES

Mathematical Physics

Consultative mathematical services
Mathematical concepts of physical phenomena

Cryogenics

Cryomagnetism
Cryogenic properties of matter
Physical investigations of nonmetallic solids

Crystals

Growth and structure of crystals
Electromagnetic ceramics
High-pressure effects

Magnetism

Electronic and nuclear paramagnetism
Spin-ordered magnetic phenomena

Semiconductor

Electronic energy levels and band structure
Semiconductor applications
Physical properties of semiconductors

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Grade</i>

SPECIAL CENTERS

RESEARCH COMPUTATION CENTER BASIC RESPONSIBILITIES

The Research Computation Center provides and operates general purpose computers (both analog and digital) for NRL, including the conversion of field-collected data to a form suitable for processing. The Center advises all divisions on data collection and processing and conducts research in data processing techniques.

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Grade</i>
Mr. A. B. Bligh	Head, Research Computation Center	GS-15
	Head, Programming Section	
Mr. I. J. Levy	Head, Data Engineering & Operations Section	GS-14
Mr. W. P. DeWitt	Head, Analog Computer Section	GS-13
Mr. R. M. Mason	Head, Mathematical Consulting Section	GS-13
Dr. J. W. Kallander	Head, Programming Systems Section	GS-13

Personnel Complement

BASIC RESPONSIBILITIES

The Atmosphere and Astrophysics Division conducts research, development, and test in the fields of upper air physics and astrophysics. Satellites and rockets are used to obtain information on radiation incident on the ionosphere and on its composition and behavior. Radio telescopes are used to study incident radiation in the radio-frequency spectrum. Results are of importance to radio communications, to space travel, and to the understanding of solar emissions.

BRANCHES

Upper Air Physics

Solar x-ray photometry
Aeronomy
Research satellites and sounding rockets

Rocket Spectroscopy

Spectroheliographic and coronagraphic research
Airglow photography from manned spacecraft

E.O. Hulburt Center for Space Research

Radio Astronomy

Galactic and extra-galactic radio astronomy
Radar measurements of earth-moon distance
and topography of moon

The program is that of the combined Upper Air Physics, Rocket Spectroscopy, and Radio Astronomy Branches. It allows graduate and post-graduate students and visiting faculty members to cooperate with NRL in space research.

OPTICAL PHYSICS

- RADIOMETRY
- X-RAY OPTICS
- OPTICAL MATERIALS
- DIFFRACTION

ELECTRON PROBE

UNDERWATER
LAMP

LUMINESCENT
PROPERTIES
OF GLASS

CRYSTAL
STRUCTURE

BASIC RESPONSIBILITIES

The Optical Physics Division conducts basic and applied investigations which deal, in a broad sense, with the interaction of matter and radiation in the x-ray, ultraviolet, visible, and infrared regions of the electromagnetic spectrum. Studies include: production, control, and propagation of coherent radiation (laser physics); fundamental studies of luminescence and radiation damage phenomena and of luminescent materials, particularly solids; the absorption and scattering of optical radiations by various targets; visibility problems; atmospheric absorption and light propagation through the atmosphere; hydrological optics; optical communications; high-speed spectroscopy; development of x-ray and electron diffraction methods for structural and compositional analysis; and x-ray spectroscopy.

BRANCHES

Radiometry

Scattering and twinkle of light
Lasers
Undersea optics
Optical properties of materials, the atmosphere, and the ocean

Optical Materials

Optical and radiation-sensitive properties of nonmetallic materials
Color centers
Thermoluminescence
Lasers

X-Ray Optics

X-ray and electron optics
Nondestructive analysis

Diffraction

Electron and x-ray diffraction
Crystal structure
Theory

SURFACE EFFECTS

PHOTOSYNTHESIS

- APPLIED OCEANOGRAPHY
- ATMOSPHERIC PHYSICS
- CHEMICAL OCEANOGRAPHY
- DEEP SEA RESEARCH
- MARINE BIOLOGY AND BIOCHEMISTRY
- NUCLEAR TECHNIQUES

BOTTOM
STUDIES

BASIC RESPONSIBILITIES

The Ocean Sciences and Engineering Division conducts basic and applied research and development in the ocean sciences. Included are studies of the physics, chemistry, geology, and biology of the oceans and of engineering applications directed toward an improved understanding and use of the oceans as the major operating environment of the Navy. Practical results lead ultimately to improvement in the design and effectiveness of naval equipment, materials, and systems.

BRANCHES

Applied Oceanography

Nonacoustic detection of submarines
Hydrodynamics of submerged bodies
Infrared characteristics of the ocean

Atmospheric Physics

Interactions between the atmosphere and the ocean
Dynamics of the atmosphere
Physics of clouds
Weather instrumentation

Chemical Oceanography

Physical and analytical chemistry of sea water, dissolved gases, and marine sediments

Deep-Sea Research

Deep-ocean instrumentation and investigations
Hydrodynamics of deep towing
Reliable acoustic paths

Marine Biology and Biochemistry

Plankton physiology and biochemistry
Surface chemistry of the ocean
Marine environments

Nuclear Techniques

Determination of trace elements in the ocean, the ocean sediments, and the atmosphere

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Grade</i>

- LINAC
- NUCLEAR SYSTEMS
- REACTORS
- THEORY
- VAN DE GRAAFF

REACTOR CORE

DOSIMETER

CYCLOTRON

BASIC RESPONSIBILITIES

The Nuclear Physics Division is engaged in a broad program of basic and applied research in nuclear physics and related areas. Included are theoretical and experimental programs in properties of nuclei, nuclear forces, nuclear reactions, shielding studies, and weapon-related research. The Division employs the NRL 75 MeV sector focussing cyclotron, 60 MeV Linac, 1 megawatt reactor, and other particle accelerators and radiation sources.

BRANCHES

Cyclotron

Low-energy nuclear physics
Nuclear reaction mechanisms
Particle scattering
Materials irradiation

Reactors

Operation and Development of NRL
1 megawatt reactor
Neutron activation analysis
Neutron diffraction

Dosimetry

Dosimetry
Thermoluminescence dosimetry
Energy dependence of thermoluminescent materials

Theory

Theory of nuclear reactions
Field theory
Elementary-particle physics
Nuclear structure and reactions

Linac

Elastic and inelastic particle scattering
Neutron capture
Effects of particle bombardment

Van de Graaff

Nuclear Systems

Low-level nuclear radiation detectors for special purposes

Nuclear structure physics
Low-energy nuclear physics
Precise nuclear energy determinations

PLASMA PHYSICS

STAR
VS.
LAB
SPECTRA

SOZOTRON

- ELECTRON BEAMS
- PLASMA PHYSICS

θ-PINCH EXPERIMENT

BASIC RESPONSIBILITIES

The Plasma Physics Division conducts both basic and applied research. Examples of effort underway in the field of plasma physics includes: fusion physics and the generation and containment of high-temperature plasmas, both directed toward eventual power sources; laboratory astrophysics; electron beams; and high-power lasers.

The Plasma Physics Division, the University of Maryland, and Cornell University engage in a formal joint program for plasma physics having as its primary objectives the pursuit of fundamental research in the field of extreme high-temperature studies and the advancement of the state-of-the-art in plasma physics.

BRANCHES

Electron Beams

Production and applications of intense electron beam
Beam stabilization

Advanced Technology

Technological support to the Division in the form of electrical, mechanical, optical, and vacuum systems

Plasma Physics

Physics and utilization of ultra-high-temperature plasmas
Nonlinear optics

Electronic Instrumentation

Instrumentation support to the Division for control measurement of experiments

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Grade</i>

Underwater Sound Reference Division

The Underwater Sound Reference Laboratory, at Orlando, Florida, became the Underwater Sound Reference Division of NRL on July 1, 1966. In most cases, the statistical data for this division is not included in the over-all totals.

Aerial view of Underwater Sound Reference Division
Orlando, Florida

BASIC RESPONSIBILITIES

The Underwater Sound Reference Division is engaged in a program of research and development in the field of underwater acoustics. Specialized programs include acoustical measurement theory, methods, and systems; development of measuring techniques and instrumentation; and development of electro-acoustic transducers. It provides primary reference calibration services for underwater acoustic devices and equipment. It also provides consultative services to government agencies and contractors engaged in underwater sound research and development.

RESEARCH SECTIONS (Within R&D Branch)

Acoustic Calibration

Open-water calibration
Calibration techniques
Data reduction

Research

Acoustical measurement theory
Mathematical physics

Electronics Engineering

Measuring and recording systems
Electronic equipment calibration

Transducer

Acoustic materials research
Standard transducer design and maintenance

2000 Head, Technical Information Division	Mr. W. H. Ramey (Acting)
2300 Engineering Services Officer	CDR W. M. Harrison, USN
2500 Public Works Officer	LCDR S. D. Lowe, CEC, USN
2700 Chesapeake Bay Division Officer	CDR R. M. Jonson, USN

Captain James C. Matheson, USN
Director of Support Services
Naval Research Laboratory

Captain James C. Matheson [REDACTED]. Following graduation from the Naval Academy in 1944, he spent five years on submarine duty, serving aboard the USS DACE in the Pacific theatre and the USS MEDREGAL in the Atlantic. Subsequent duty included assignments at Naval shipyards, the Bureau of Ships, and the Atomic Energy Commission. In the ten years prior to coming to NRL, he was associated with the naval nuclear propulsion program. During this period he served as senior AEC representative at the West Milton prototype site of the Knolls Atomic Power Laboratory and as Nuclear Power Superintendent at the Mare Island Naval Shipyard.

Captain Matheson holds a professional engineering degree in naval architecture from the Massachusetts Institute of Technology and a master's degree in nuclear engineering from the same institution.

SECURITY AND ADMINISTRATIVE SERVICES

- SECURITY
- CORRESPONDENCE & RECORDS MANAGEMENT
- TRAVEL
- CLASSIFIED MATERIAL CONTROL
- COMMUNICATIONS

BASIC RESPONSIBILITIES

The Security and Administrative Services Division is responsible for personnel and plant security, communications, correspondence and record management, and travel for the Laboratory. The Security and Administrative Services Officer acts as Top Secret Control Officer and as Classified Material Control Officer.

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Grade or Rank</i>
J. H. Dal Pian	Security and Administrative Services Officer	LCDR, USN
Mr. C. J. Dryer	Deputy Security Officer	GS-12

TECHNICAL INFORMATION

- EDITORIAL
- LIBRARY
- GRAPHIC ARTS
- PERIODICALS
- PUBLIC AFFAIRS

BASIC RESPONSIBILITIES

The Technical Information Division is responsible for the dissemination of technical information in support of the Laboratory's mission and for providing centralized services to the Laboratory in the general fields of photography, reproduction, editing, public affairs, and documentation. As an additional duty assignment, the Head of the Technical Information Division advises the Chief of Naval Research on printing and publication matters and directs certain information gathering, publication, and information dissemination programs for the Office of Naval Research.

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Grade</i>
Mr. W. H. Ramey	Head, Technical Information Division (Acting)	GS-13
Miss LaVera A. Morgan	Librarian	GS-14
Miss A. Pingell	Translator	GS-12
Mrs. Doris P. Baster	Head, Library Services Section	GS-13
Mrs. D. Folen	Head, Documents Section	GS-12
Mr. W. H. Ramey	Head, Graphic Arts Branch	GS-13
Mr. W. M. Leak	Head, Periodicals Branch	GS-13
Mr. I. Rudin	Head, Editorial Branch	GS-14
Mr. J. Lister	Public Affairs Officer	GS-13

ENGINEERING SERVICES

- DESIGN ENGINEERING & DRAFTING
- ELECTRONIC ENGINEERING
- MECHANICAL SHOPS
- CHEMICAL PROCESSES SHOPS
- ASSEMBLY SHOP
- ELECTRONIC MODEL SHOP
- PLANNING & PRODUCTION ENGINEERING
- PROJECT ENGINEERING

BASIC RESPONSIBILITIES

The Engineering Services Division provides the engineering, design, fabrication, assembly, and test of experimental research equipment in support of the Laboratory's research efforts.

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Grade or Rank</i>
W. M. Harrison	Engineering Services Officer	CDR, USN
Mr. J. G. Schumacher	Staff Assistant for Special Projects	GS-15
Mr. J. M. Cole	Industrial Engineer	GS-13
Mr. R. D. Arritt	Reliability and Quality Assurance	GS-13
Mr. M. A. Shimkus	Head, Design Engineering & Drafting (Acting)	GS-13
Mr. P. R. Shifflett	Head, Electronics Engineering	GS-15
Mr. J. P. Manning	Deputy Engineering Services Officer for Production	GS-15
Mr. J. L. Woods	Head, Mechanical Shops	Master Mechanic
Mr. J. F. Dytrt	Head, Chemical Processes Shops (Acting)	GS-13
Mr. J. L. Leizear	Head, Assembly Shop (Acting)	GS-13
Mr. J. L. Leizear	Head, Electronic Model Shop (Acting)	GS-13
Mr. S. B. Gutfreund	Head, Planning & Production Engineering (Acting)	GS-13
Dr. L. A. DePue	Head, Project Engineering Branch (Acting)	GS-14

PUBLIC WORKS

- ENGINEERING
- MAINTENANCE AND UTILITIES
- MAINTENANCE CONTROL
- TRANSPORTATION
- CONSTRUCTION

BASIC RESPONSIBILITIES

The Public Works Division is responsible for the physical plant of NRL. This includes responsibility for the design, construction, operation, maintenance, and repair of all buildings, grounds, roads, utilities, and other structures and activities. Also included are transportation; weight-handling and heavy-construction equipment; heating and refrigeration plants; electric, water, steam, air, and gas supply distribution; telephone communication systems; and sewage disposal.

The Public Works Division provides professional consulting services to the scientific divisions on facilities planning and engineering.

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Grade or Rank</i>
S. D. Lowe	Public Works Officer	LCDR, USN
R. Y. Wisenbaker	Asst. Public Works Officer	LT, USN
Mr. J. R. Lescault	Administrative Officer	GS-13
Mr. R. J. Zampell	Head, Engineering Branch	GS-14
Mr. A. N. Gawthrop	Head, Maintenance & Utilities Branch	Master Mechanic
Mr. G. Seaver, Jr.	Head, Maintenance Control Branch	GS-12
Mr. C. P. Trexler	Head, Transportation Branch	Quartermaster
*Mr. C. R. Parsons	Construction Engineer (ROICC/OICC)	GS-13

*On ceiling of Naval Facilities Engineering Command (Chesapeake Division)

Aerial view of Chesapeake Bay Division
Chesapeake Beach, Md.

BASIC RESPONSIBILITIES

The Chesapeake Division provides and maintains facilities and services for test, development, and evaluation of radar, radio, and fire control equipment. It also services and supports all research projects conducted at the Chesapeake Beach and Tilghman Island complexes of NRL.

THE PHYSICAL PLANT

Located in a relatively clear area away from any congestion or industrial interference, the main site, at Chesapeake Beach, covers 174.9 acres containing 198 structures of various size and construction, six of which are major laboratory buildings. There are over 200 feet of usable dock space with a water depth of 4 to 7 feet. Off-site facilities include the Tilghman Island Facility, located directly across the Bay from CBD at distance of about 10 miles; the Theodolite House, at North Beach; and the Off Shore Platform, approximately 2 miles southeast of CBD in the Bay.

Two 36-foot diesel-powered boats and five wherries are used in support of research projects and for transportation between off-site facilities. Housing includes 24 public quarters, a barracks of 10 rooms, and a dormitory of 11 rooms.

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Grade or Rank</i>
R. M. Jonson	Division Officer	CDR, USN
R. N. Dearborn	Security Officer	LT, USNR
T. D. Brunson	Operations Officer	BMCM, USN
F. R. Theodore	Administrative Officer	GS-11
R. M. Conlyn	Station Engineer	GS-13

Chief Staff Officer

CHIEF STAFF OFFICER

- MILITARY PERSONNEL
- MILITARY PLANS
- MUTUAL WEAPONS DEVELOPMENT DATA EXCHANGE GROUP
- OPERATIONAL SERVICES
- INTERSERVICE LIAISON
- NAVY LIAISON

BASIC RESPONSIBILITIES

The Chief Staff Officer maintains liaison with the systems commands and offices of the Navy Department, with other units of the Naval establishment ashore and afloat, and with other governmental and nongovernmental agencies concerned with the coordination of military application of the scientific work of the Laboratory. He relates definite experience with the scientific organization to the planning objectives and operational requirements of the Navy. He provides such operational services to the Laboratory as are required.

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Grade or Rank</i>
R. M. Davis	Chief Staff Officer	CAPT, USN
A. V. McPhillips	Assistant Chief Staff Officer	CDR, USN
M. M. Gibson	Administrative Officer	CDR, USN
B. P. Moore	Operational Services Officer	CDR, USN
G. Caridakis	Interservice Liaison Officer	LTCOL, USMC
R. R. Hayman	Scientific Liaison Officer	CDR, USN
Mr. F. Shannon	Mutual Weapons Development Data Exchange	GS-13
H. D. Fechtelkott	Officer in Charge, Patuxent River Detachment	CDR, USN
