Form Approved
OMB No. 0704-0188

Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

John Hyde Quarry Site Westminster, Md.			NA		
Tunnel under Maryland State Road 261			NA		
Optics Research Platform in the Chesapeake Bay, Md.			0.23	1,500	2
2 Foghorn Platforms Chesapeake Bay Bridge, Md.			NA		
Research Gondola, Chesapeake Bay Bridge, Md.			NA		
NRL Waldorf Annex, Md.	23.94	35.16		1,209,703	43
Radio Astronomy Observatory, Maryland Point, Md.	24.30		200.00	187,437	22
Radio Antenna Range, USAF Receiver Site, Brandywine, Md.			22.98		
Metallurgy and Radio Research Site, Stump Neck Annex, Naval Ordnance Station, Indian Head, Md.			NA		
Navy Radio Research Station, Sugar Grove, West Va.				74,091	4
Transducer Calibration Facility, Dresden, Lake Seneca, N.Y.			4.52	24,243	2
Satellite Tracking Facility Blossom Point, Md.			23.00		
Satellite Tracking Station, Roma, Texas	27.84	1.00		724,536	12
Satellite Tracking Station, Raymondville, Texas	171.55	2.85		1,209,599	10
Underwater Sound Reference Division, Orlando, Fla.	10.46			1,184,605	39
USRD, Leesburg Facility, Bugg Spring, Fla.			6.92	157,042	7
Marine Corrosion Laboratory, Key West, Fla.			NA		
Underwater Track Facility, Argus Island (near Bermuda)			NA		
Totals:	560.89	39.01	1608.12	\$55,575,809	

Location of the principal field stations. Others are at Sugar Grove, W.Va., and on Lake Seneca, N.Y. (near Dresden). The Underwater Sound Reference Division is located at Orlando, Fla.

RESEARCH PLATFORMS

Aircraft

1. The S2D (BUNO 149240), contains specially installed equipment and wing-mounted pods for cloud physics research. Also used in chaff research and for short-term experiments compatible with space limitations of the aircraft.
2. The C-54 (BUNO 50851), presently being used for the Omega navigation system and for infrared countermeasures studies.
3. The EC-121-K (BUNO 128324), used strictly for wave propagation studies in the four-frequency radar system.
4. The EC-121-K (BUNO 135753), used for research in cloud physics, navigation, low-frequency radar, and other projects requiring only minimal aircraft conversion.
5. The EC-121-K (BUNO 141297), used basically for matched filter radar project. Equipment may be installed for navigation experiments and other projects requiring only a small space.

Available Ships

1. USNS MIZAR (T-AGOR-11), scheduled by NRL.
2. USNS GILLISS (T-AGOR-4), USNS SANDS (T-AGOR-6), and USNS LYNCH (T-AGOR-7). Each under operational control of MSTSLANT for utilization East Coast Navy Labs with direction of NAVOCEANO; schedules prepared by NOL.
3. USNS MISSION CAPISTRANO (T-AG-162), under operational control of MSTSLANT for use in ONR-supported Project Artemis. Former tanker modified to accommodate a high-powered sonar transducer, approximately five stories high and weighing hundreds of tons, which is lowered through center well.
4. SS GROUPE (AG(SS)214), carries the XDG-1 sonar transducer and mount.
5. SSX-1, used mainly for oceanographic research; scheduled by NRL.
6. USS ALLEGHENY (ATA-179), scheduled by ONR under operational control of COMSERVRON 8. A converted fleet tug available for research work.
7. Other surface vessels and submarines occasionally scheduled for NRL use by OPTEVFOR.

THE NAVY'S CORPORATE LABORATORY

The Naval Research Laboratory is one of the principal in-house research and development institutions of the U.S. Government. It was established in 1923 to ensure that advancements in science and engineering could be readily applied to the Navy's needs. Directed always toward this end, the NRL research program has developed to its present status as a broadly based and coordinated effort in the physical, mathematical, and environmental sciences, in advanced engineering, and in naval analysis. The work of the Laboratory is conducted at the main establishment in the District of Columbia and at various field sites that provide unique environment and facilities not available at the main site.

Some principal elements of the research program include fundamental and applied work in radio wave propagation, oceanography, deep-sea instrumentation, submarine air purification, structural design theory, fracture mechanics, surface chemistry, optical physics, radar, underwater sound propagation, acoustic signal processing, sonar transducers, nuclear physics, radio astronomy, high-temperature lubricants, high-energy fuels, plasma physics, refractory metals, exotic materials for high-performance structures, x-ray astronomy, high-power lasers, solid-state physics, and stress-corrosion cracking of high-strength titanium, steels, and aluminum alloys. The NRL FY 1968 Program Budget is \$82.9 million.

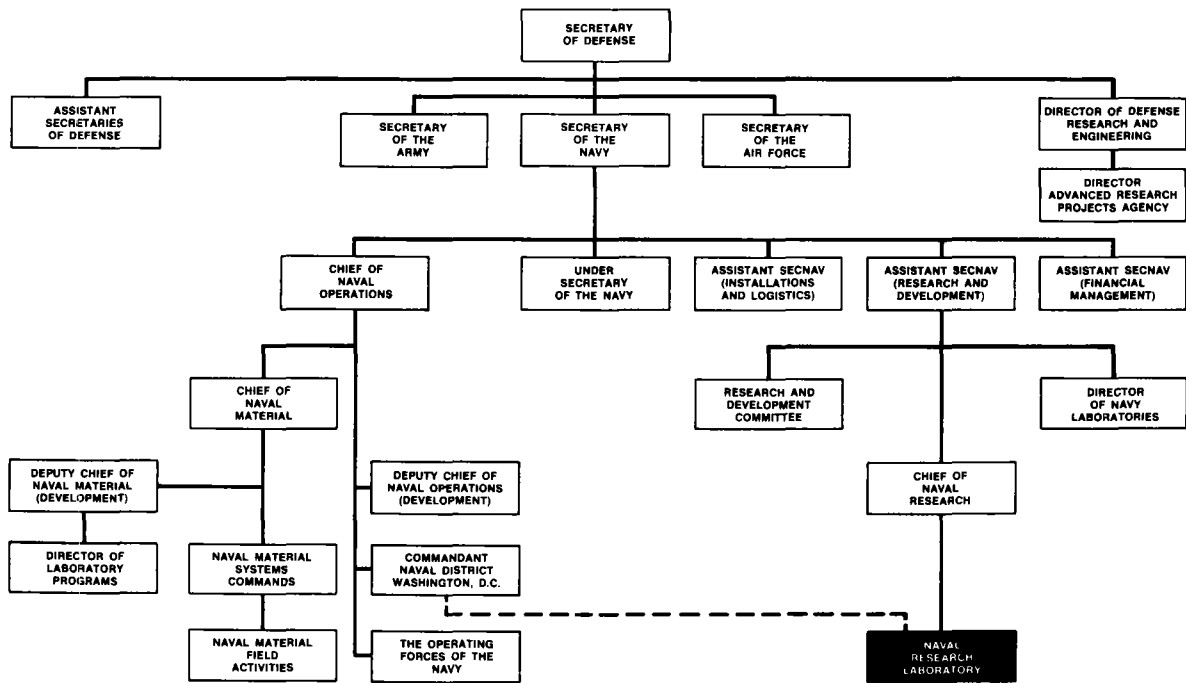

The Laboratory has about 3500 employees, including over 1100 professional scientists and engineers. During the year 1966, almost 230 official technical reports were processed, about 160 scientific papers were published in professional journals, and about 260 scientific presentations were made at meetings, both at home and in many foreign countries. Also, in the same year, 92 patents were issued to NRL personnel, and 65 additional applications were filed with the U.S. Patent Office.

In its investigations of broad scientific areas, in considering its findings for potential military applications, and in furnishing to the naval systems commands and Secretariat expert consultative services relating to science and military systems, NRL functions as the corporate laboratory of the Navy. Thus it provides a central focus of research and development activity that supports the Navy. When NRL findings and capabilities have borne fruit in particular areas, the results are made known to and used by not only the Navy but also the Army, the Air Force, the Advanced Research Projects Agency, the Atomic Energy Commission, and other agencies of the government.

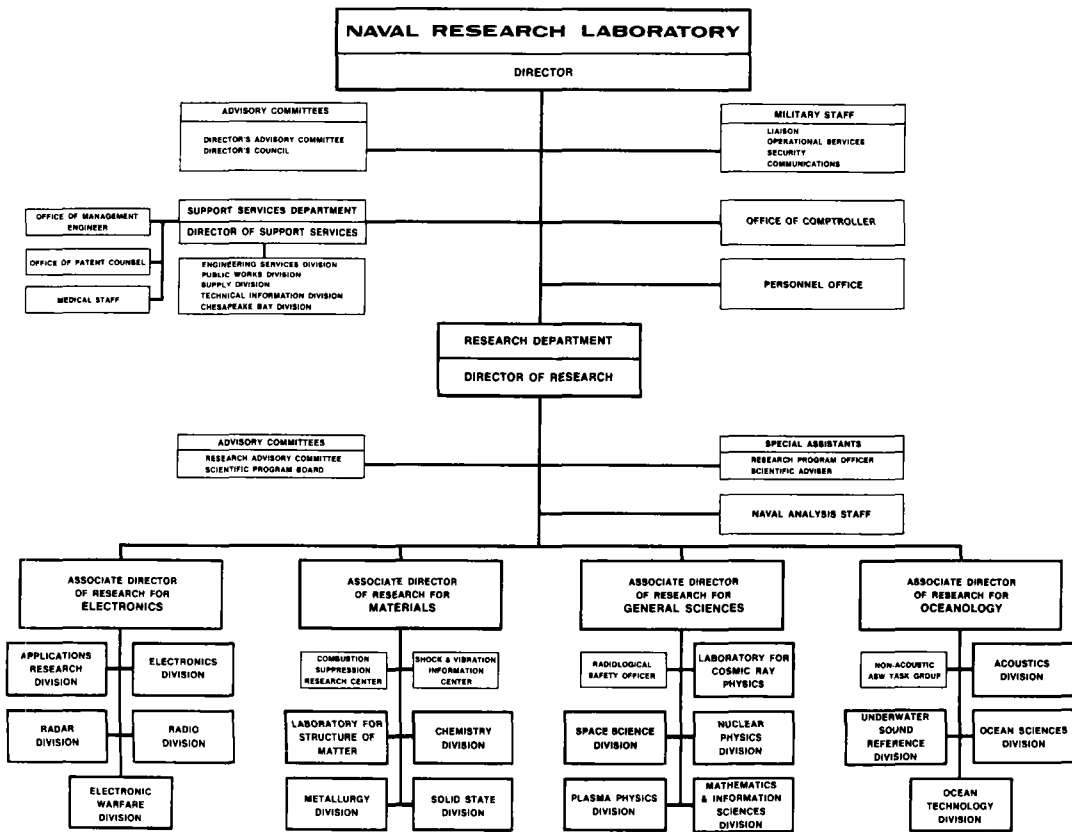

MISSION

The mission of the Naval Research Laboratory is to conduct scientific research and development in the physical sciences and related fields directed toward new and improved materials, equipment, techniques, and systems for the Navy. In fulfillment of this mission, the Naval Research Laboratory:

1. Initiates and conducts scientific research and development of a basic and long-range nature in scientific areas of special interest to the Navy.
2. Performs scientific research and development for the Systems Commands and offices of the Navy and, where specially qualified, for the Defense Department and, in defense related efforts, for other government agencies.
3. Provides to the Navy and its contractors standardized techniques and procedures for measurements and for the accurate calibration of standard instruments in areas of special Navy needs.
4. Furnishes scientific consultative services for the Navy and, where specially qualified, for the Defense Department and, in defense related efforts, for other government agencies.
5. Provides to the Navy unbiased determination of performance characteristics of developmental and prototype devices through limited engineering test and evaluation services.

Position of NRL in the Department of Defense structure

Burgess Prize Award of the American Society for Metals	2
Charles B. Dudley Medal of the American Society for Testing Materials	1

<u>Non-Government Awards (Continued)</u>	<u>Number</u>
Gold Medal Award of the American Society of Naval Engineers	1
Stuart Ballantine Medal of the Franklin Institute of Pennsylvania	1
A. K. Doolittle Award of the National American Chemical Society	1
Kendall Company Award of the American Chemical Society	1
Hillebrand Prize of the American Chemical Society	1
William Blum Award of the Washington-Baltimore Electrochemical Society	1
National Award of the American Society of Lubrication Engineers	1
Annual Award of the Society for Applied Spectroscopy	1
E. Edward Pendray Award of the American Rocket Society	1
James H. Wyld Memorial Award of the American Rocket Society	1
Space Science Award of the American Institute of Aeronautics and Astronautics	1
Eddington Medal of the Royal Astronomical Society (Great Britain)	1
Janssen Medal of the French Photographic Society	1
Ancel Prize of the French Photographic Society	1
Progress Award of the Photographic Society of America	1
Professional Achievement Award of the D. C. Council of Engineers and Architectural Studies	1
National Capital Award of the D. C. Council of Engineers and Architectural Studies	3
Award for Technical Achievement of the American Society of Mechanical Engineers	1
Service to Mankind Award of the Washington Sertoma Club	1
Pittsburgh Spectroscopy Award of the Spectroscopy Society of Pittsburgh	1
Pure Science Award of the Scientific Research Society of America (NRL Branch)	11
Applied Science Award of the Scientific Research Society of America (NRL Branch)	11
Arthur S. Fleming Award of the Washington Chamber of Commerce	1
Notre Dame Centennial of Science Award	2
National Civil Service League Merit Citation	1

Part 2
Office of the Director

JAMES C. MATHESON

CAPTAIN, USN

Captain Matheson [REDACTED], [REDACTED], in [REDACTED]. He attended the University of Chicago from 1939 to 1941 and was graduated from the United States Naval Academy in 1944. He holds degrees in Naval Architecture and Nuclear Engineering from the Massachusetts Institute of Technology and has completed the Advanced Management Program at the Harvard School of Business Administration.

Captain Matheson is an Engineering Duty Officer. He is qualified in submarines and served aboard the submarine DACE in the Pacific during World War II. He has held positions at the Portsmouth Naval Shipyard, at the Bureau of Ships (now Naval Ship Systems Command), and with the Atomic Energy Commission as Chief of the West Milton Site of the Knolls Atomic Power Laboratory. From 1961 to 1965 he served as the Nuclear Power Superintendent at the Mare Island Naval Shipyard. He reported to the Naval Research Laboratory as Director of Support Services in October 1965, and assumed command of the Laboratory on May 29, 1967.

He is a member of Sigma Xi, the Research Society of America, the Society of Naval Engineers, and the Philosophical Society of Washington.

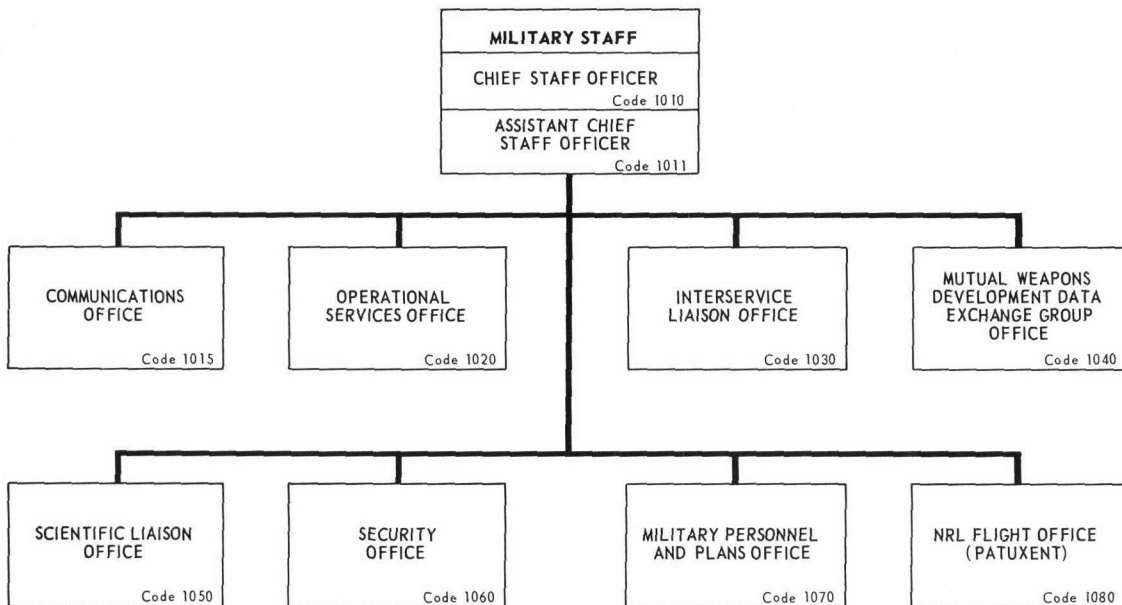

Captain James C. Matheson, USN
Director, Naval Research Laboratory

Military Staff Office

CAPT R. M. Davis, USN

- MILITARY PERSONNEL
- MILITARY PLANS
- MUTUAL WEAPONS DEVELOPMENT DATA EXCHANGE
- OPERATIONAL SERVICES
- INTERSERVICE LIAISON
- SCIENTIFIC LIAISON
- SECURITY
- COMMUNICATIONS

Basic Responsibilities

The Military Staff maintains liaison with the systems commands and offices of the Navy Department, with other units of the Naval establishment ashore and afloat, and with other governmental and nongovernmental agencies concerned with the coordination of military application of the scientific work of the Laboratory. It supports five multi-engine Laboratory aircraft and obtains and coordinates such additional air, surface, and subsurface services as are required. The Military Staff is also responsible for personnel and plant security, communications, and control of classified material.

Key Personnel

<i>Name</i>	<i>Title</i>
CAPT R. M. Davis, USN	Chief Staff Officer
CDR M. M. Gibson, USN	Assistant to the Chief Staff Officer
ENS P. A. Hughes, USNR(W)	Communications Officer
CDR A. V. McPhillips, USNR	Operational Services Officer
LTCOL G. Caridakis, USMC	Marine Corps Liaison Officer
CAPT A. M. Megrditchian, USAF	Air Force Systems Command Liaison Officer
Mr. F. W. Shannon	Head, Mutual Weapons Development Data Exchange Group
CDR M. R. Kalnitzky, USN	Scientific Liaison Officer
LCDR J. H. Dal Pian, USN	Security Officer
Mr. J. J. Bagley	Classified Material Control Officer
LCDR D. W. Richmond, USNR	Military Personnel and Plans Officer
CDR H. D. Fechtelkotter, USN	Head, NRL Flight Office (Patuxent)

Personnel Complement

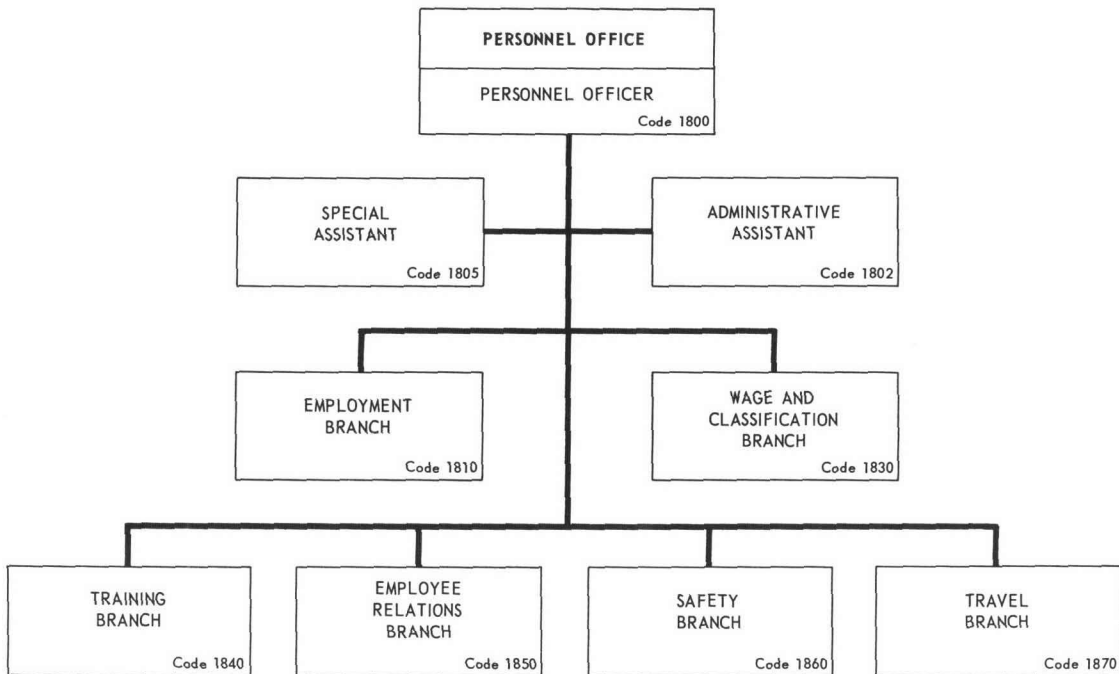

On Board: 186
(104 Civilian, 82 Military)

Personnel Office

Mr. A. G. Gross

- EMPLOYMENT
- WAGE AND CLASSIFICATION
- TRAINING
- EMPLOYEE RELATIONS
- SAFETY
- TRAVEL

Basic Responsibilities

The Personnel Office administers the Laboratory's personnel program, which provides for the selection, development, promotion, utilization, appropriate recognition, travel, and safety of all civilian personnel. It is also responsible for the establishment and review of all Classification Act and ungraded positions.

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. A. G. Gross	Personnel Officer
Mr. C. N. Mason, Jr.	Special Assistant
Mr. J. E. Goss	Head, Employment Branch
Mr. K. R. Harper	Head, Wage and Classification Branch
Mr. W. J. McLaughlin	Head, Training Branch
Mr. H. H. Kay	Head, Employee Relations Branch
Dr. R. G. Nebelung	Head, Safety Branch
Mrs. B. E. Michaud	Head, Travel Branch

Personnel Complement

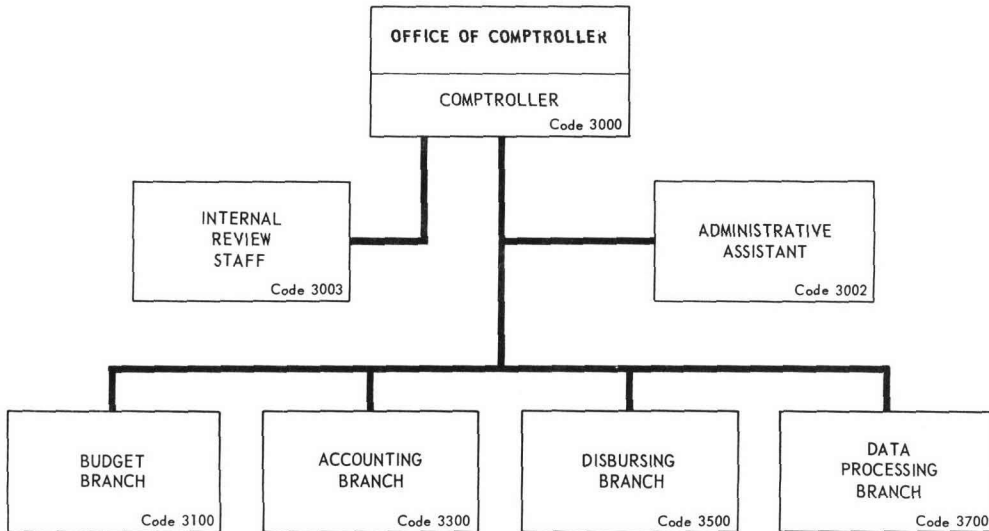

On Board: 57

Office of the Comptroller

Mr. J. P. Donovan

- BUDGET
- ACCOUNTING
- DISBURSING
- DATA PROCESSING

Basic Responsibilities

The Comptroller is the financial adviser to the Director and other officials of the Laboratory. He administers the financial program of the Laboratory.

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. J. P. Donovan	Comptroller
Mr. W. S. Slater	Budget Officer
Mr. H. I. Deichert	Accounting Officer
LTJG C. R. Grant, SC, USNR	Disbursing Officer
Mr. D. A. Staudt	Data Processing Officer
Mr. R. A. Showman	Head, Internal Review Staff

Personnel Complement

On Board: 81

Part 3
The Research Department

Dr. Alan Berman
Director of Research

Dr. Berman [REDACTED]
[REDACTED] He received the A.B. degree in Physics from Columbia College in 1947 and the Ph.D. degree in Physics from Columbia University in 1952.

From 1952 to 1955 he was a research scientist at the Hudson Laboratories of Columbia University. He became Assistant Director of Hudson Laboratories in 1955, Associate Director in 1957, and Director in 1963. On May 29, 1967, Dr. Berman became Director of Research for the Naval Research Laboratory.

Dr. Berman's research specialties include the areas of underwater acoustics, oceanography, and signal processing. He has published numerous papers on these and related subjects. At present he is a member or chairman of a wide variety of Navy and oceanographic advisory groups. He also provides advisory services for a number of Department of Defense and other Government agencies.

Dr. Berman has on three occasions been visiting scientist to the Admiralty Research Laboratory, Teddington, England (1955, 1957, 1960), and once at the SACLANT ASW Research Center, La Spezia, Italy (1960).

THE RESEARCH DEPARTMENT

The Research Department is headed by a distinguished civilian scientist and administrator. The research effort is divided into four major fields — electronics, materials, general sciences, and oceanology — which correspond to the principal areas of the Navy's interest in the physical and engineering sciences. There is an associate director of research for each of these four broad areas. Sixteen scientific divisions, each headed by a civilian scientist, pursue work in specific fields. Branches within these divisions form interrelated working units.

STRIKE WARFARE STUDIES

Basic Responsibilities

The Naval Analysis Staff program is designed to provide staff support to the Director of Research in the field of naval analysis. The program consists of providing a single point of contact with other organizations and programs, as directed; furnishing analytical support for the employment of future strategic and tactical naval systems, with emphasis on providing the appropriate technological base; developing measures of effectiveness and other criteria for decision; making technological projections; analyzing threats; and designing operational models to support analysis of warfare capabilities and advanced concept formulations.

Staff Activities

Systems Analysis Activity

Strategic warfare
Air/tactical warfare
Surface and amphibious warfare
Underseas warfare
Electronic warfare
Research program analysis
Human factors analysis
Command support
Special systems

Naval Analysis Activity

Advanced naval warfare analysis
Advanced command and control concepts
Environmental and special warfare analysis
Naval implications of technology and techniques

RESEARCH PROGRAM OFFICE

Basic Responsibilities

The Research Program Office serves as staff to the research directorate of the Laboratory. It provides an orderly plan for coordinating NRL research programs with those of ONR and other sponsors or potential sponsors throughout the Departments of the Navy, the Army, and the Air Force, the Advanced Research Projects Agency, and other agencies of the government. It also serves as a focal point for program information for project managers and other key personnel of sponsoring activities on work in progress or in various stages of planning. The Research Program Office maintains a management information center which serves as a working tool for the Laboratory directorate, and it maintains appropriate records of the Laboratory's research programs.

Electronics Area

Dr. Claud E. Cleeton
Associate Director of Research for Electronics

Dr. Cleeton [REDACTED] He received the B.S. degree from Missouri State Teachers College in 1928, the M.A. degree from the University of Missouri in 1930, and the Ph.D. in physics from the University of Michigan in 1935. His Ph.D. thesis has become a classical paper in the annals of microwave spectroscopy.

Before joining NRL's Radio Division in 1936, he taught physics and mathematics at Northeast Missouri State College, Moberly Junior College, and the University of Michigan. His first five years at the Laboratory were devoted to pioneer research in microwave communications and digital electronic circuits. He then directed his efforts to electronic identification systems, radio control, and guided missile electronics.

In 1942 Dr. Cleeton was named Technical Head of the Combined Research Group, which consisted of approximately 300 British, Canadian, and American scientists stationed at NRL and entrusted with the development of a uniform radar identification and recognition system for the Allied military forces. For his efforts he was awarded the President's Certificate of Merit (1946) and the Meritorious Civilian Service Award (1947).

In 1946 Dr. Cleeton was named head of NRL's Security Systems Branch, where he directed research and development of identification and radar beacon systems for use by all the service branches. He was appointed Superintendent of Radio Division I in 1952 and Superintendent of the Applications Research Division in 1954. For the next six years he was responsible for data processing, display of information collected by radar, organization of combat information centers, man-machine systems, and associated digital devices for computing and data transfer. His division was also responsible for the detailed technical direction of the research, development, and operation of the Space Surveillance System, which is designed to detect, track, identify, and determine the orbits of nonradiating space objects. Dr. Cleeton was named Associate Director of Research for Electronics in January 1965.

Dr. Cleeton has been granted 13 patents, and two others are pending. He is also the author and co-author of several papers published in technical journals. He is a Fellow of the Institute of Electronic and Electrical Engineers and a member of the American Physical Society and Sigma Xi.

Dr. W. R. Faust

Applications Research Division

- APPLIED PHYSICS
- OPERATIONAL RESEARCH
- SPACE APPLICATIONS
- SATELLITE TECHNIQUES
- DYNAMICS

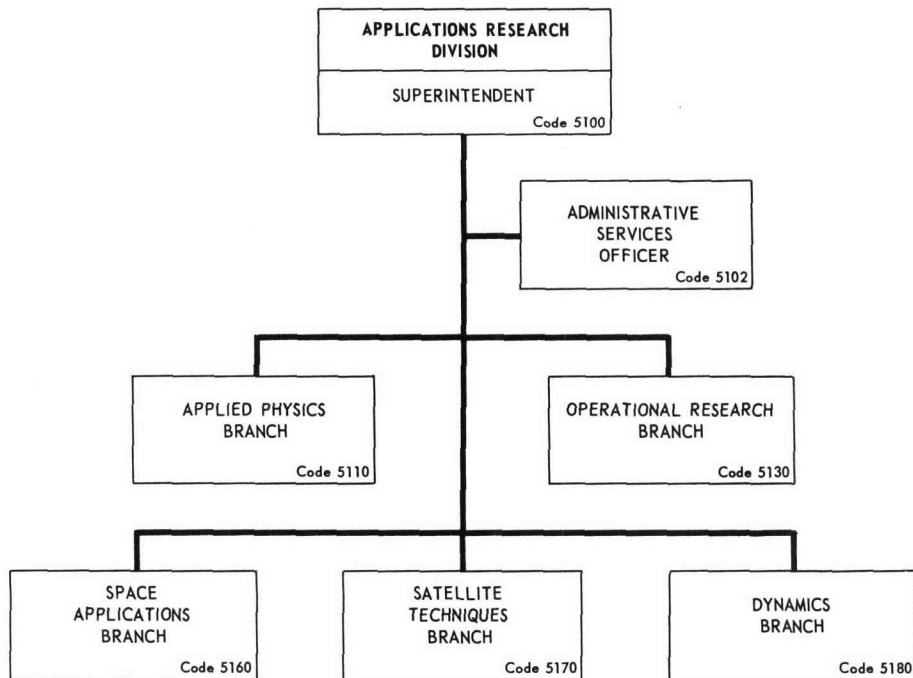

SATELLITE PREPARATION

HYPERVELOCITY GUN

ROCKET PLASMA STUDIES

Basic Responsibilities

The Applications Research Division conducts research and development in the fields of plasma physics, the effects of nuclear weapons on naval systems, defense against ballistic missiles including impact and penetration ballistics, data handling and processing, space surveillance, and celestial mechanics and navigation. As a result of these studies the Division designs and develops systems (e.g., satellites) and components (e.g., antennas for use in space) as related to such naval requirements as surveillance, navigation, guidance, and communication and provides for the evaluation of such systems.

Branches

Applied Physics

Manned orbiting laboratory experiments
Intercept control
Data processing and display
IFF display
Lasers for data processing
Space and plasma physics and quantum electronics

Space Applications

Profile techniques
Space surveillance
Rapid navigation satellite readout

Satellite Techniques

Satellite development
Calibration satellites
Research satellites, especially solar radiation devices
Navigation satellites

Operational Research

Orbit computation and celestial mechanics
Computation and digital facilities (for SPASUR)
Fire and missile control evaluation instrumentation

Dynamics

Vulnerability mechanics
Hypervelocity kill mechanisms
Hypervelocity impact mechanics
Penetration into earthy materials

Key Personnel

MICRO-CIRCUITRY

GAS LASERS

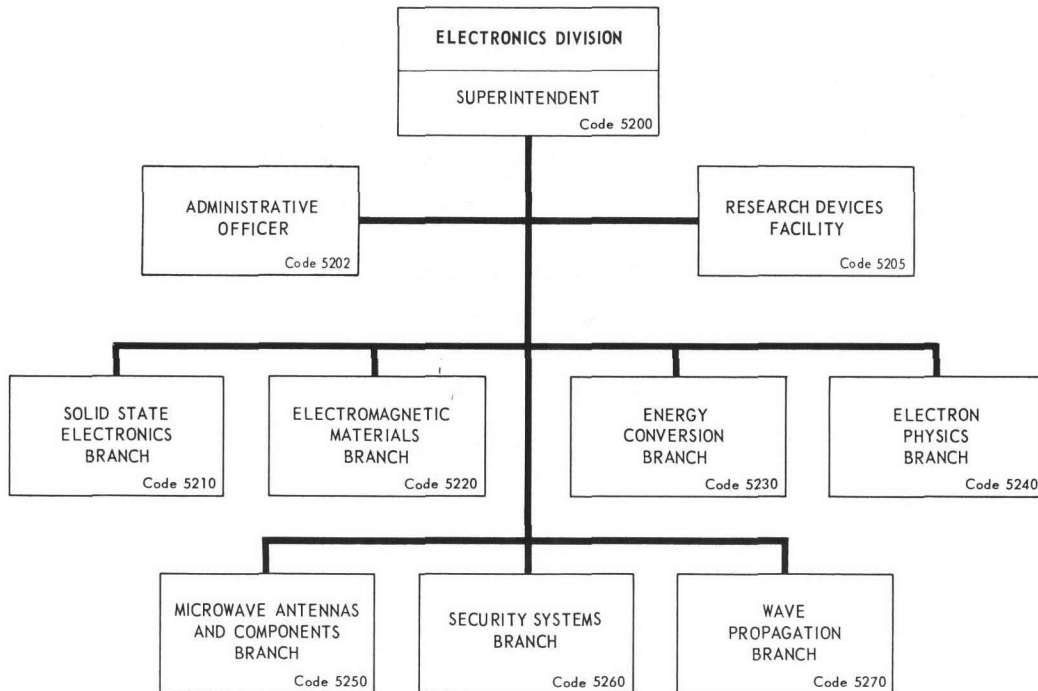

ELECTRON TUBE RESEARCH

ANTENNA RESEARCH

- SOLID STATE ELECTRONICS
- ENERGY CONVERSION
- ELECTRON PHYSICS
- MICROWAVE ANTENNAS & COMPONENTS
- SECURITY SYSTEMS & NAVIGATION
- WAVE PROPAGATION
- ELECTROMAGNETIC MATERIALS

Basic Responsibilities

The Electronics Division carries out programs of basic and applied research and development in the fields of: electronic properties of solid materials; energy conversion methods; microwave antennas and components; microelectronic technology; electronic identification systems; electromagnetic wave propagation; properties of ground and sea surface radar returns; and vacuum and gaseous electron devices.

Branches

Solid State Electronics

Semiconductor devices, materials, and circuits, both low and microwave frequencies
Thin films

Electromagnetic Materials

Backscatter from surfaces and particles
Determination of loss tangent characteristics of materials
Radar protective coatings
Advisory services on absorbent materials

Energy Conversion

Advanced electric sources
Energy processing for pulsed and low voltage
Electric power and energy control
Seawater battery

Electron Physics

Gas lasers
Millimeter wave generation
Vacuum breakdown
Surface physics research

Microwave Antennas and Components

Millimeter wave communication system
Naval electronic scanning antennas for airborne use
Advanced microwave antenna research
Microwave electronic components

Security Systems

Development of new IFF system
Miniature transponder development
Development of solid state transmitter at L-band
Consulting services to AIMS* tri-service program

Wave Propagation

Properties of ground and sea surface radar echoes
Meteorological phenomena and their effects

*AIMS

A - Air Traffic Control Radar Beacon
I - IFF (Identification Friend or Foe)

RADAR TARGETS

- HIGH RESOLUTION
- RADAR TECHNIQUES
- SEARCH RADAR
- TRACKING
- EQUIPMENT RESEARCH
- AEROSPACE RADAR

Basic Responsibilities

The Radar Division conducts research on basic physical phenomena of importance to radar and related sensors, investigates new engineering techniques applicable to radar, demonstrates the feasibility of new radar concepts and systems, performs related systems analysis and evaluation of radar, and provides special consultative services. The emphasis is on new and advanced concepts and technology in radar and related sensors which are applicable to enhancing the Navy's ability to fulfill its mission.

Branches

High Resolution

High resolution techniques
ASW radar
Ocean surface effects

Radar Techniques

High-frequency radar
Signal processing

Search Radar

Phased array techniques
Studies of the ionosphere by means of radar and satellite transmissions
Radar measurements of satellites and ballistic missiles
Moving target indication techniques for ship and airborne radars
Airborne early warning radar

Tracking

Radar target noise studies
Precision tracking radar techniques
Target signature analysis
Microwave and laser techniques
Radar evaluation

Aerospace Radar

Satellite radar

Equipment Research

Radar and infrared counter-countermeasures
Target radar-spectra studies
Airborne intercept radar consultative services

Radar Analysis

Signal processing theory
Mathematical analysis

Materials Area

Dr. James H. Schulman
Associate Director of Research for Materials

Dr. Schulman [REDACTED] He is a graduate of the Massachusetts Institute of Technology, from which he received the B.S. degree in 1939 and the Ph.D. degree in 1942, both in the field of chemistry. While working toward his doctorate he held an instructorship at Suffolk, Boston, and a Teaching Fellowship at M.I.T. In 1941, he joined the staff of the M.I.T. Laboratory for Insulation Research, where he headed a section concerned with selenium rectifiers and photocells.

Dr. Schulman joined the Sylvania research laboratories in 1944 to carry out research on luminescent materials for use in cathode-ray tubes and fluorescent lamps. He came to NRL in 1946 to initiate a research program on luminescence, with particular emphasis on inorganic luminescent materials. At NRL he has served as Head, Chemical Metallurgy Branch, Metallurgy Division; Head, Dielectrics Branch, Solid State Division; Acting Associate Superintendent, Solid State Division; and Superintendent of the former Optical Physics Division. From August 1960 until December 1961, he was Deputy Scientific Director and Liaison Scientist for Solid State Physics with the London Branch of the Office of Naval Research. Upon his return to NRL in November 1964, Dr. Schulman was appointed to the Chair of Materials Sciences in recognition of his distinguished research accomplishments. In September 1967, he was appointed Associate Director of Research for Materials.

Dr. Schulman received the Applied Science Award of the NRL Branch of the Research Society of America (1957) and the Navy Superior Civilian Service Award (1965), both in recognition of his many contributions to the study of solid luminescent materials and phenomena, the investigation of radiation-induced optical effects in solids, and the application of the radiation-sensitive properties of solids to the dosimetry of nuclear and other high-energy radiations.

Dr. Schulman is a member of the Steering Committee of the Solid State Panel of the National Academy of Sciences, a former member of the Visiting Committee of the Argonne National Laboratory, and a former Chairman of the National Academy of Sciences-National Research Council Committee on High-Level Radiation Dosimetry. He is an Associate Editor of the Journal of the Optical Society of America and of the Materials Research Bulletin. Dr. Schulman is a Fellow of the American Physical Society, of the Optical Society of America, and of the American Association for the Advancement of Science. He has written numerous technical papers, coauthored a book in a special area of solid state physics, and been awarded several patents.

SHOCK & VIBRATION INFORMATION CENTER

Basic Responsibilities

The Shock & Vibration Information Center is one of the information centers established by the Director of Technical Information, DDR&E, and assigned to Navy for management and operation. It provides a single source within the Department of Defense for up-to-date information in the fields of shock and vibration for scientists and engineers in government agencies and for government contractors.

BEARING LUBRICANTS

Basic Responsibilities

The Chemistry Division conducts a diversified program of basic and applied research and development in physical, organic, inorganic, nuclear, and biological chemistry. Specialized programs within these fields include fuels, lubricants, corrosion, surface chemistry, protective coatings, polymers, electrochemistry, molecular structure, submarine atmosphere purification, and BW/CW personnel protection. Consultative services form an important element in the division effort.

Branches

Physical Chemistry

Atmospheric radioactivity
Infrared and ultraviolet spectroscopy
Analytical mass spectrometry
Nuclear magnetic resonance spectroscopy

Organic and Biological Chemistry

Microbiological research
Functional organic coatings
Properties of resins under high compressive loads

Inorganic and Nuclear Chemistry

High temperature materials
Submarine air purification
Oxygen generating chemicals
Corrosion mechanisms

Protective Chemistry

CW/BW ship defense
Adsorbents
Properties of microbial surfaces

Electrochemistry

Fuel cells
Fundamental electrode reactions
Electrochemical power sources
Nuclear submarine atmosphere analysis and control

Surface Chemistry

CORUNDUM CRYSTALS

REMOTE HANDLING ROOM

Basic Responsibilities

The Metallurgy Division conducts research, development, and evaluation in the field of metallurgy, including the physical, mechanical, chemical, and structural aspects of metals. Important consultative services are provided to Navy and other DOD activities.

Branches

Physical Metallurgy

Physical metallurgy of high-temperature materials
Micromechanical metallurgy
Marine corrosion studies

Analytical Chemistry

Precision chemical analysis
Analytical techniques development
Determination of trace quantities of elements in small samples

Metal Physics

Solidification studies
Properties of metals in liquid state
Electronic properties of metallic materials
Metallic imperfection studies
Effects of irradiation upon the solid state properties of metals

Strength of Metals

Properties, selection criteria, and fracture-safe design parameters for high and ultra-high-strength structural metals

High-Temperature Alloys

High-temperature flow and fracture
Effects of environment on fatigue and creep
Single crystals of refractory metals

Reactor Materials

Properties of irradiated structural metals and alloys
Mechanisms of radiation degradation of metals
Engineering application of reactor materials
Neutron spectra and dosimetry

LASER DEVELOPMENT

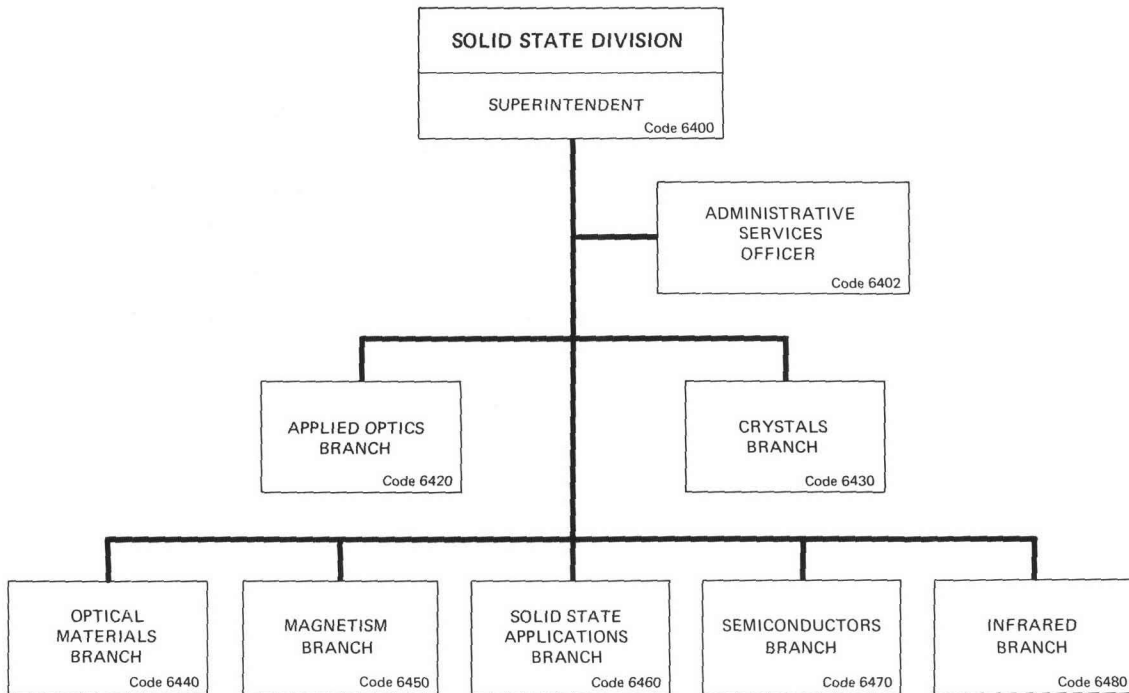

HIGH MAGNETIC FACILITY

LUMINESCENT PROPERTIES OF GLASS

- APPLIED OPTICS
- CRYSTALS
- OPTICAL MATERIALS
- MAGNETISM
- SOLID STATE APPLICATIONS
- SEMICONDUCTORS

Basic Responsibilities

The Solid State Division is concerned with fundamental and applied research in the physics of materials, including metals, semiconductors, dielectrics, and glasses. Areas under investigation include optical and electronic properties, magnetism, radiation damage, cryogenics, behavior under high pressures, and structure and preparation of materials. Optical properties of the atmosphere and the ocean are also under study.

Branches

Applied Optics

Scattering and twinkle of light
Lasers
Undersea optics
Optical properties of materials, the atmosphere, and the ocean

Crystals

Growth and structure of crystals
Electromagnetic ceramics
High-pressure effects

Optical Materials

Optical and radiation-sensitive properties of nonmetallic materials
Color centers
Thermoluminescence
Lasers

Magnetism

Electronic and nuclear paramagnetism
Spin-ordered magnetic phenomena
Properties of materials at low temperatures

Solid State Applications

Radiation effects on semiconductor material and devices used in satellites
Radiation effects on dielectric materials

Semiconductors

Electronic energy levels and band structure
Semiconductor applications
Physical properties of semiconductors
Cryomagnetism

Infrared

IR communications
Night vision systems
IR characteristics of hot gases, flares, and other materials
IR detectors
IR light sources such as semiconductor lasers

General Sciences Area

Dr. Wayne C. Hall
Associate Director of Research for General Sciences

Dr. Hall [REDACTED] [REDACTED] [REDACTED]. He was educated at the University of Kansas, where he received a Bachelor of Science degree in Electrical Engineering in 1931, a Master of Science degree in Physics in 1933, and a Ph.D. in Physics in 1936. He was an Assistant Instructor in the Physics Department at the University of Kansas from 1931 to 1935.

Dr. Hall came to the Laboratory in 1935 for research on the use of fuel cells to effect direct conversion of heat energy. During the next ten years he was also involved in studies of energy conversion, electronic strain gages, and torsion meters. His work on the problem of interference of precipitation static on aircraft radio communications ultimately led to development of the antiprecipitation static antenna and fittings now used on military and civilian aircraft to ensure the reliability of radio communications and radio navigational aids during severe weather conditions.

In January 1945 Dr. Hall was appointed Assistant Head of the Aircraft Electricity Division and later, in 1946, Superintendent of the Division. In this position he was responsible for a group of scientists conducting research and development on electrical power systems for aircraft, basic research in electricity and magnetism, and basic research in solid state physics and physical phenomena at ultralow temperatures. From 1948 through 1951, in addition to his duties as a Division Superintendent, he was Scientific Officer at NRL in charge of a project from the Los Alamos Scientific Laboratory involving diagnostic measurements in the atomic weapons program. Early in 1954 he became Superintendent of the Solid State Division at the Laboratory and was shortly thereafter appointed to the position of Associate Director of Research for Nucleonics. The title of this position was redesignated Associate Director of Research for General Sciences in February 1966.

Dr. Hall received the Distinguished Civilian Service Award in 1946 "for distinguished achievement in research on mitigation of precipitation static interference encountered by aircraft flying in adverse weather conditions."

Dr. Hall is a member of several professional societies, including the American Physical Society, Sigma Xi, RESA, Tau Beta Pi, and the National Philosophical Society and is a Fellow of the American Institute of Electrical Engineers and the Washington Academy of Sciences. He is the author of many technical papers and has been granted a number of patents.

RADIOLOGICAL SAFETY OFFICE

Basic Responsibilities

The Health Physics staff is assigned the overall responsibility for radiological safety at the Naval Research Laboratory. The NRL radiological safety program has two primary purposes: to assure that all operations in which ionizing radiation is used are safe and in compliance with Federal regulations; and to provide employees with conditions, instruments, instructions, and assistance that will assure radiological safety in the performance of their duties.

Key Personnel

Basic Responsibilities

The Space Science Division conducts research, development, and test in the fields of upper air physics, astronomy, and astrophysics. Satellites and rockets are used to obtain information on radiation from the sun and celestial sources, and to study the composition and behavior of the ionosphere. Radio telescopes are used for astronomical observations. Results are of importance to radio communications, to utilization of the space environment, and to the fundamental understanding of natural radiation phenomena.

Branches

Upper Air Physics

Gamma-ray, x-ray, ultraviolet, and infrared astronomy
Aeronomy
Solar x-ray monitoring satellites
Electronic imaging studies
Meteor astronomy

Rocket Spectroscopy

X-ray and ultraviolet solar spectroscopy
Spectroheliographic and coronagraphic research
Airglow measurements from rockets and manned space vehicles

Nuclear Physics Division

- CYCLOTRON
- DOSIMETRY
- LINAC
- NUCLEAR SYSTEMS
- REACTORS
- THEORY
- VAN DE GRAAFF
- X-RAY OPTICS

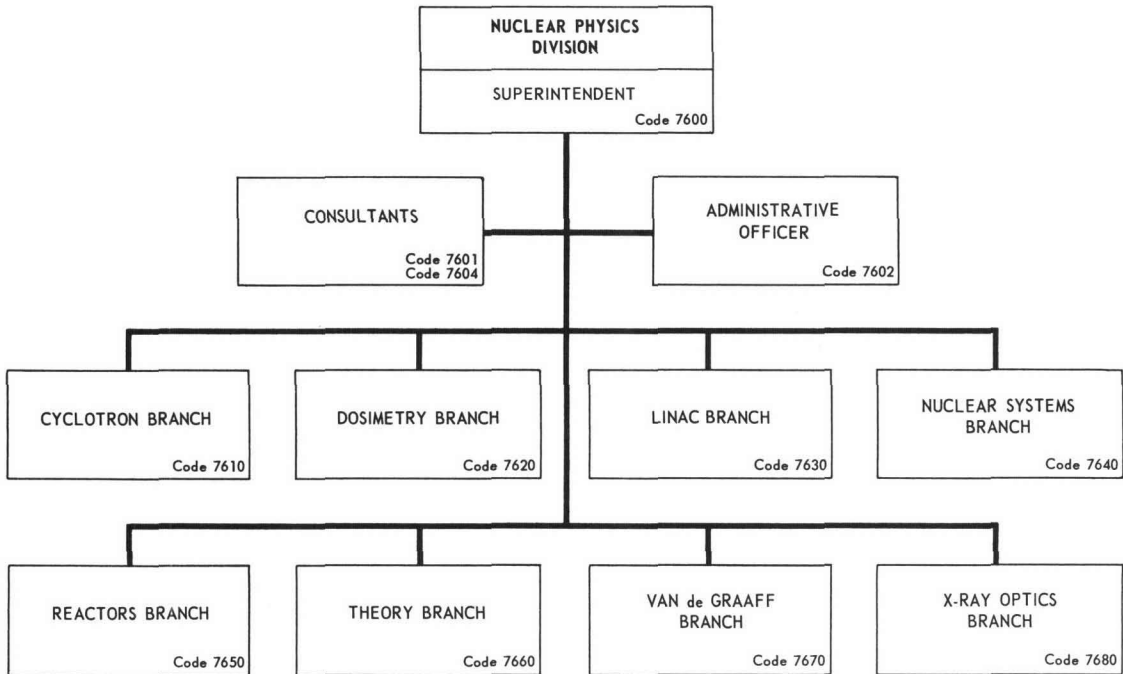

DOSIMETER

REACTOR CORE

CYCLOTRON

Basic Responsibilities

The Nuclear Physics Division is engaged in a broad program of basic and applied research in nuclear physics and related areas. Included are theoretical and experimental programs in properties of nuclei, nuclear forces, nuclear reactions, shielding studies, x-ray and electron optics, materials analysis, and weapon-related research. The Division employs the NRL 75-Mev sector focussing cyclotron, 60-Mev Linac, 1-megawatt reactor, 5-Mev Van de Graaff, 14-Mev neutron generator, and other particle accelerators and radiation sources.

Branches

Cyclotron

Charged particle nuclear reactions
Nuclear structure
Charged particle scattering
Neutron shielding
Radioactivation analysis
Production of radioactive sources

Dosimetry

Personnel dosimeters
Thermoluminescence dosimetry
Dosimetry of gamma rays, neutrons, and charged particles
Radiation calibration facilities

Linac

Electron scattering
Photonuclear reactions
Nuclear excitation
Neutron capture reactions
Pulsed radiation effects
Radioactivation analysis

Nuclear Systems

Low-level nuclear radiation detectors for special purposes

Reactor

Neutron activation analysis
Production of radioactive sources
Neutron diffraction
Polarized neutron scattering

Theory

Nuclear reactions
Field theory
Elementary-particle physics
Nuclear structure
Nonlinear optics
Mathematical physics

Van de Graaff

Charged particle nuclear reactions
Nuclear structure
Ion beam optics
Radiation damage due to charged particles
Surface and film analysis by nuclear techniques

X-ray Optics

X-ray and electron optics
Materials analysis

Key Personnel

<i>Name</i>	<i>Title</i>
Dr. J. McElhinney	Superintendent
Dr. E. A. Wolicki	Consultant and Associate Superintendent (Acting)
Dr. C. V. Strain	Consultant
Dr. R. B. Theus	Head, Cyclotron Branch (Acting)
Mr. F. H. Attix	Head, Dosimetry Branch
Dr. T. F. Godlove	Head, Linac Branch
Mr. D. C. Cook	Head, Nuclear Systems Branch
Dr. K. W. Marlow	Head, Reactors Branch
Dr. A. W. Sáenz	Head, Theory Branch
Mr. K. L. Dunning	Head, Van de Graaff Branch

Plasma Physics Division

Dr. A. C. Kolb

SOZOTRON

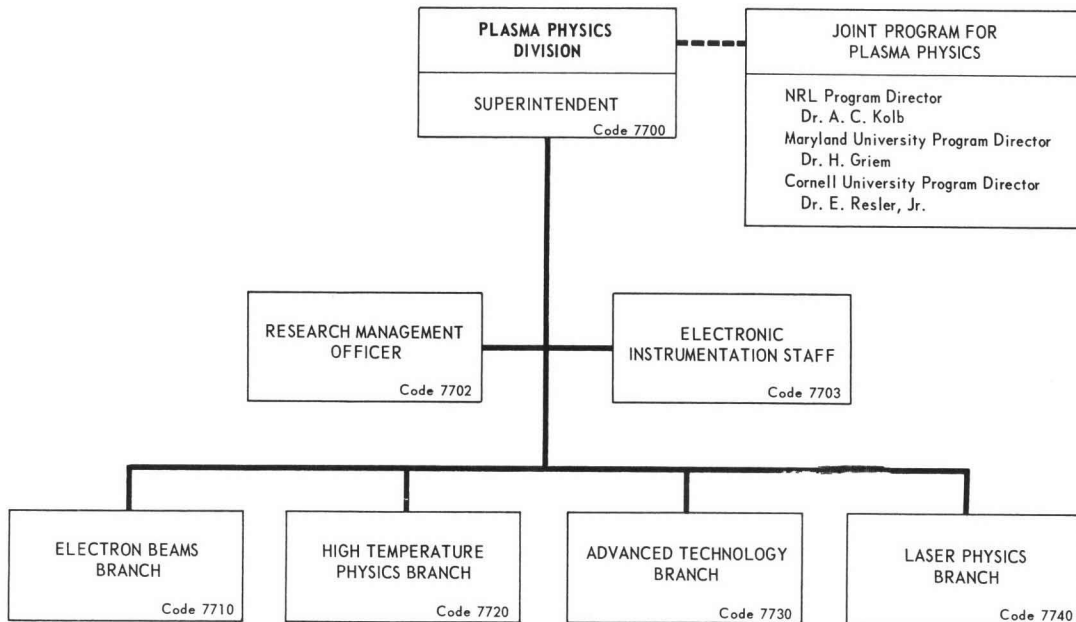

θ -PINCH FACILITY

- ELECTRON BEAMS
- HIGH TEMPERATURE PHYSICS
- ADVANCED TECHNOLOGY
- LASER PHYSICS

LASER STUDIES

Basic Responsibilities

The Plasma Physics Division conducts both basic and applied research. Examples of effort under way include: fusion physics and the generation and containment of high-temperature plasmas, directed toward eventual power sources; laboratory astrophysics; electron beams; and high-power lasers. This Division, the University of Maryland, and Cornell University engage in a joint program of research in plasma physics. In addition to increasing significantly the scientific breadth of the participating institutions, the program is acquainting graduate students with research frontiers in plasma physics through association with leading scientists in the field. Students have an opportunity to use NRL facilities and talent for thesis research, and NRL scientists, in turn, are able to use the research facilities of both universities.

Branches

Electronic Instrumentation

Instrumentation support to the Division
for control measurement of experiments

High Temperature Physics

Physics and utilization of ultra-high-
temperature plasmas
Nonlinear optics

Advanced Technology

Technological support to the Division in the
form of electrical, mechanical, optical,
and vacuum systems

Electron Beams

Production and applications of intense
electron beams
Beam stabilization

Laser Physics

Physics of solid state and gas lasers

Key Personnel

<i>Name</i>	<i>Title</i>
Dr. A. C. Kolb	Superintendent
Dr. A. J. Glass	Associate Superintendent (Acting)
Mr. J. D. Shipman	Head, Electronic Instrumentation Staff
Mr. D. C. dePackh	Head, Electron Beams Branch
Dr. A. C. Kolb	Head, High Temperature Physics Branch
Dr. W. A. Lupton	Head, Advanced Technology Branch
Dr. A. J. Glass	Head, Laser Physics Branch

Personnel Complement

On Board: 49

Mathematics and Information Sciences Division

Dr. H. Hauptman

- RESEARCH COMPUTATION
- MATHEMATICAL PHYSICS
- COMPUTER MATHEMATICS
- INFORMATION SYSTEMS

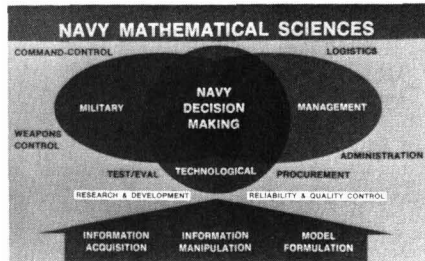

MATHEMATICAL PHYSICS

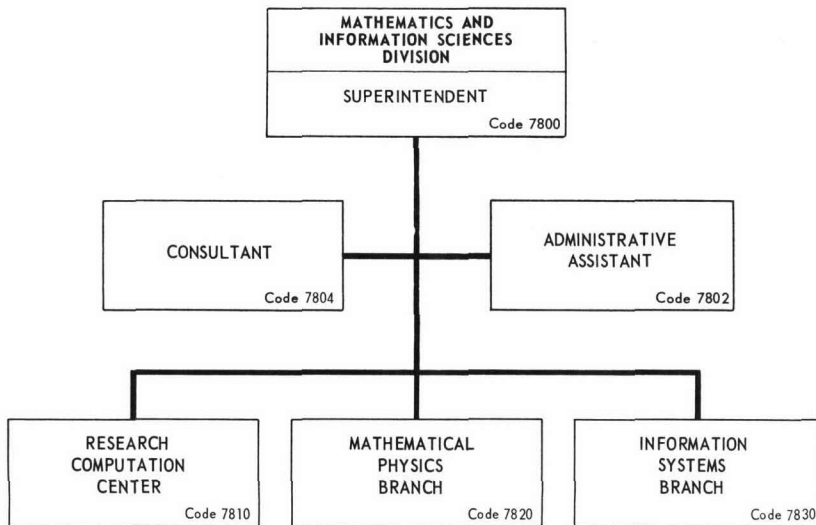

RESEARCH COMPUTATION CENTER

CDC 3800 COMPUTER

MATHEMATICS SCIENCE COORDINATION

Basic Responsibilities

The Mathematics and Information Sciences Division conducts basic and applied research in the mathematical sciences; determines present and future Navy needs with reference to mathematics and the computer-oriented sciences; and creates and maintains the competence required to formulate and to meet these needs.

Branches

Research Computation

Data engineering and operations
Analog computer
Programming
Programming systems
Information retrieval

Mathematical Physics

Consultative mathematical services
Mathematical concepts of physical phenomena
Optimization
Probability and statistics
Numerical analysis
Pure and applied mathematics

Information Systems

Information processing
Adaptive systems
Systems simulations

Key Personnel

<i>Name</i>	<i>Title</i>
Dr. H. Hauptman	Superintendent (Acting)
Dr. B. Lepson	Consultant

Dr. H. Hauptman	Head, Mathematical Physics Branch
Dr. B. Wald	Head, Information Systems Branch

Personnel Complement

On Board: 56

Total Estimated R&D Funding

Fiscal Year 1968: \$560,000

Oceanology Area

Dr. Victor J. Linnenbom
Associate Director of Research for Oceanology (Acting)

Dr. Linnenbom [REDACTED]. He attended the State University of Iowa, where in 1938 he received the B.A. and M.S. degrees. After working at the Monsanto Chemical Company for four years and serving a four-year tour of duty in the U. S. Marine Corps, he entered Washington University, at St. Louis, where he earned the Ph.D. degree in radiochemistry in 1949.

Dr. Linnenbom came to NRL in 1949. His early work included the development of chemical methods for the separation and purification of radioisotopes from irradiated target materials and research on the problems of corrosion and diffusion in support of the Navy's Nuclear Submarine Program. After directing the chemical phases of NRL's Pressurized Loop Project, he assumed complete responsibility for the Project in 1955 and directed its completion and subsequent installation and operation at the National Reactor Test Station in Idaho. The loop subsequently was transferred to the Knolls Atomic Power Laboratory for use in testing new types of reactor fuel elements for the Navy's Nuclear Submarine Program.

The results of Dr. Linnenbom's fundamental research in radiation chemistry and on the effects of radiation on materials, plus his service as a United States delegate to the International Electrochemical Commission, have contributed greatly to the establishment of feasible standards for irradiation testing. In addition to his regular duties, Dr. Linnenbom served for a number of years, as Chairman of the NRL Radiological Safety Committee. In May 1960, he was appointed Head of the Radiation Effects Branch. While serving in this position, Dr. Linnenbom was assigned collateral duty as Associate Superintendent of the Radiation Division.

In recent years, the trend of his work shifted towards the application of chemical and nuclear techniques to the field of oceanography. In December 1966, he was designated to organize the new Ocean Science and Engineering Division and to serve as its first Superintendent. In September 1967, he was appointed Acting Associate Director of Research for Oceanology.

Dr. Linnenbom received the E. O. Hulburt Science Award in 1964 for his contributions to the fields of nuclear and radiation chemistry; he also has been granted several patents.

Dr. Linnenbom is a member of the American Chemical Society, the Scientific Research Society of America, Phi Lambda Upsilon (a National Honorary Chemical Society), Phi Beta Kappa, Sigma Xi, the Washington Academy of Sciences, the American Association for the Advancement of Science, and the Institute of Electrical and Electronic Engineers. He is also a member of the United States Marine Corps Reserve Officers Association.

NONACOUSTIC ASW R&D TASK GROUP

Basic Responsibilities

The Nonacoustic ASW R&D Task Group consolidates the NRL efforts in the area of nonacoustic anti-submarine warfare research and development and also acts as the management center for the Nonacoustic Submarine Effects (NASE) program fiscally supported by the NAVAIRSYSCOM.

Key Personnel

<i>Name</i>	<i>Title</i>
Dr. J. O. Elliot	Director, Nonacoustic ASW R&D Task Group

TRANSDUCER
CALIBRATION
FACILITY

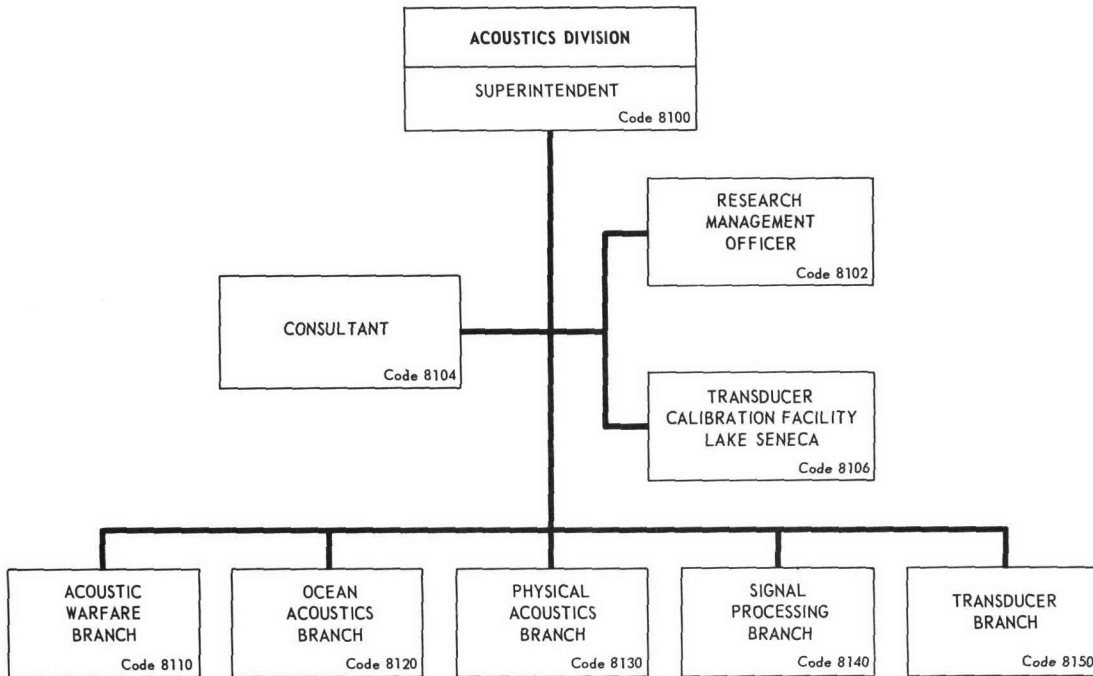

ARTEMIS TRANSDUCER ARRAY

- ACOUSTIC WARFARE
- OCEAN ACOUSTICS
- PHYSICAL ACOUSTICS
- SIGNAL PROCESSING
- TRANSDUCER

VORTEX STUDIES

Basic Responsibilities

The Acoustics Division conducts theoretical and experimental research programs in physical acoustics, ocean acoustics, and predictive oceanography to develop theory and models of the interaction of acoustic fields with structures and the ocean environment. In addition, the program is oriented so as to provide information required for the Navy Undersea Warfare programs and for research and development programs of the Division, in the fields of transducers, signal processing, countermeasures, and acoustic warfare. The Acoustics Division works closely with other Divisions that conduct research and development programs in materials, oceanography, and deep ocean technology.

Branches

Acoustic Warfare

Acoustic countermeasure techniques
Assured sonar range studies
Undersea warfare
Submarine ocean interactions

Signal Processing

Signal processing
Communication theory
Data presentation

Ocean Acoustics

Sound scattering in the ocean
Sound speeds in the ocean
Signal analysis
Shallow water propagation
Predictive oceanography

Transducer

Basic radiation theory
Electroacoustic modeling
Transducer physical models
Transducer mathematical models
Calibration of large transducer arrays
Transducer materials research

Physical Acoustics

Microacoustics
Flow acoustics
Ultrasonics

Underwater Sound Reference Division

Mr. R. J. Bobber

- UNDERWATER ELECTROACOUSTIC MEASUREMENT METHODS
- UNDERWATER ELECTROACOUSTIC STANDARDS
- UNDERWATER ELECTROACOUSTIC TEST & EVALUATION

UNDERWATER SOUND REFERENCE DIVISION, ORLANDO, FLORIDA

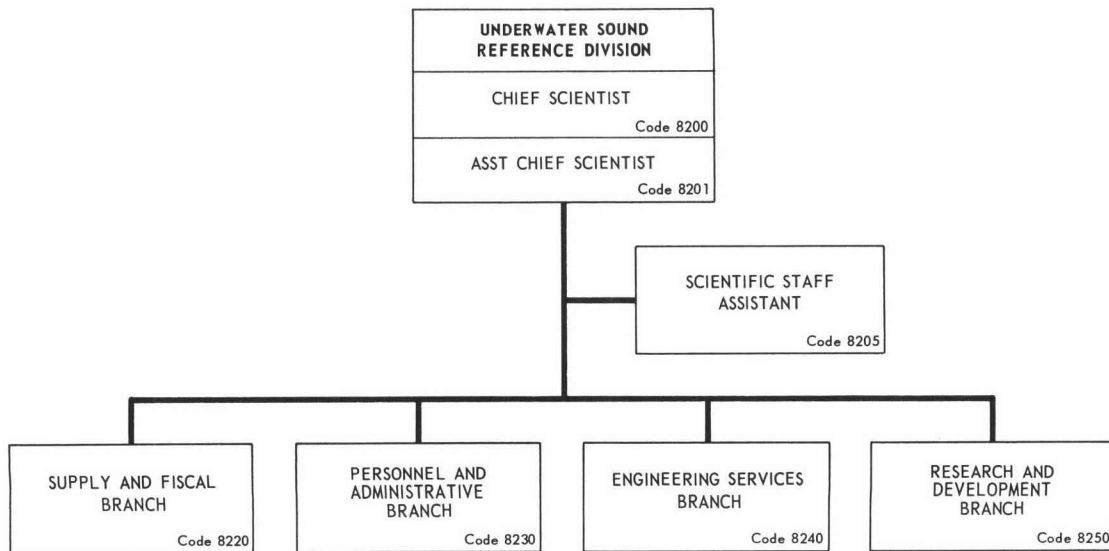

HIGH-FREQUENCY LABORATORY

ANECHOIC TANK

LEESBURG FACILITY - CALIBRATION BARGE

Basic Responsibilities

The Underwater Sound Reference Division is engaged in a program of research and development in the field of underwater acoustics. Specialized programs include acoustical measurement theory; development of measuring techniques and instrumentation; and development of electroacoustic transducers. It provides primary reference calibration services for underwater acoustic devices and equipment. It also provides consultative services to government agencies and contractors engaged in underwater sound research and development.

Research Sections (Within R&D Branch)

Acoustic Calibration

Open-water calibration
Calibration techniques
Data reduction

Electronics Engineering

Measuring and recording systems
Electronic equipment calibration
Electrical measurement methodology

Research

Acoustical measurement methodology
Mathematical physics
Simulated deep-submergence measurements
Cavitation studies
Measurement systems

Transducer

Acoustic materials research
Standard transducer design and maintenance
Electroacoustic studies
Special purpose transducer design and fabrication

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. R. J. Bobber	Chief Scientist (Acting)
Mr. D. T. Hawley	Assistant Chief Scientist
Mr. J. M. Taylor	Scientific Staff Assistant
Mr. D. T. Hawley	Head, Security Branch (Acting)
Mr. J. C. Michael	Head, Supply and Fiscal Branch
Mrs. W. M. Scott	Head, Personnel Branch
Mr. C. C. Sims	Head, Research and Development Branch (Acting)
Mr. W. L. Paine	Asst Head, R&D Branch for Test and Evaluation
Mr. J. F. Prandoni	Head, Engineering Services Branch

Ocean Sciences Division

Dr. J. E. Dinger

CLOUD PHYSICS STUDIES

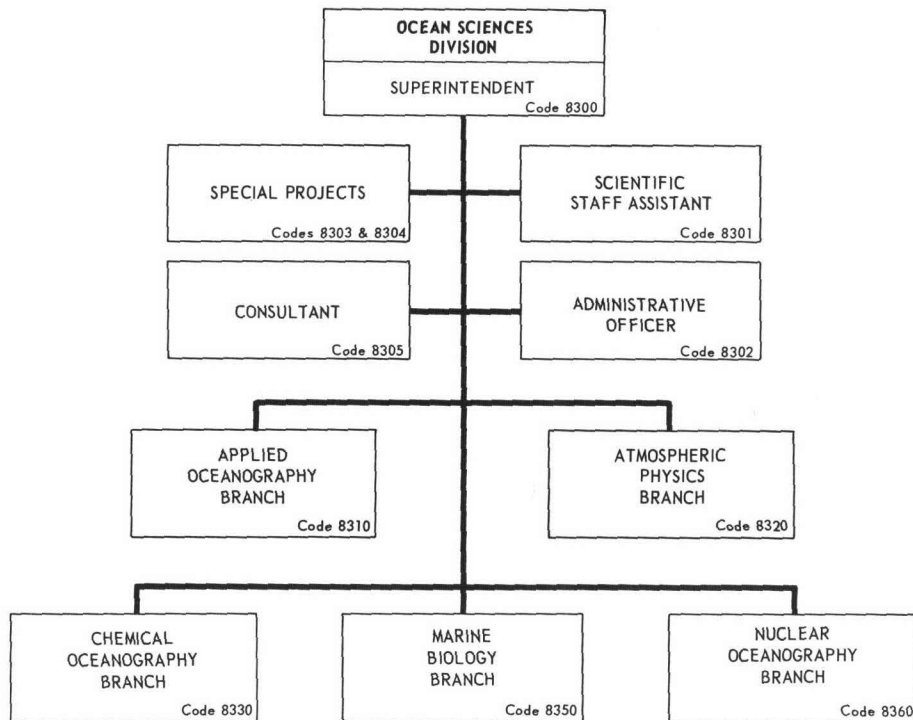

SURFACE EFFECTS

- APPLIED OCEANOGRAPHY
- ATMOSPHERIC PHYSICS
- CHEMICAL OCEANOGRAPHY
- MARINE BIOLOGY
- NUCLEAR OCEANOGRAPHY
- PHYSICAL OCEANOGRAPHY
- AIR/SEA INTERACTIONS
- GEOPHYSICS AND SEA FLOOR

NANSEN BOTTLE PREPARATION

Basic Responsibilities

The Ocean Sciences Division conducts basic and applied research and development in the ocean sciences. Included are studies of the physics, chemistry, geology, and biology of the oceans and of engineering applications directed toward an improved understanding and use of the oceans as the major operating environment of the Navy. Practical results lead ultimately to improvement in the design and effectiveness of naval equipment, materials, and systems.

Branches

Applied Oceanography

Nonacoustic detection of submarines
Hydrodynamics of submerged bodies
Infrared characteristics of the ocean

Chemical Oceanography

Physical and analytical chemistry of sea water, dissolved gases, and marine sediments

Atmospheric Physics

Interactions between the atmosphere and the ocean
Dynamics of the atmosphere
Physics of clouds
Weather instrumentation

Marine Biology and Biochemistry

Plankton physiology and biochemistry
Biophysical studies of marine environments

Nuclear Oceanography

Application of nuclear techniques to oceanography

Key Personnel

<i>Name</i>	<i>Title</i>

Ocean Technology Division

HYDROSTATIC PRESSURE FAILURE STUDIES

- OCEAN ENGINEERING
- OCEAN FLOOR OPERATIONS
- OCEAN MATERIALS CRITERIA
- OCEAN STRUCTURES

Basic Responsibilities

The Ocean Technology Division researches, develops, and applies specialized equipment, instrumentation, techniques for conducting ocean and ocean-floor operations, and evolves operational technology for advanced systems. The Division utilizes advanced materials and design technology for engineering optimization of required equipment. It also conducts research activities in select areas of ocean technology with coupling and support activities related to other ongoing research and development in these and other fields of interest. This Division in conjunction with other Divisions of NRL and out-of-house agencies brings to bear on crucial problems the collective expertise available.

Branches

Ocean Engineering

Deep-ocean instrumentation and investigations
Hydrodynamics of deep towing
Reliable acoustic paths

Ocean Materials Criteria

Fracture mechanics and fracture strength
Plastic flowing
Compression failure mechanisms
Armor research and development
Deep submergence materials-structures
Missile component failure
Nondestructive testing

Ocean Structures

Shipboard shock fundamentals
Shock protection for weapons systems
Methods for design against shock
Fracture mechanics design studies
Developmental studies of prototypes
Shock strength of materials
Shock propagation and instrumentation

Key Personnel

Fiscal Year 1968: \$2,793,000

Part 4
The Support Services Department

Captain George Maragos, USN
Director of Support Services

Captain George Maragos is a native of St. Louis, Missouri. He is a graduate of the U. S. Naval Academy (1946), the Massachusetts Institute of Technology (BSEE, 1949), and various service schools. He has had sea duty with the cruisers PORTSMOUTH and HOUSTON and the aircraft carrier SAIPAN. From 1950-1952 he was assigned to the Production Department, Portsmouth, N.H., Naval Shipyard, where he was Ship Superintendent, New Construction Submarines.

CAPT Maragos spent the next two years as Staff Electronics Officer with the Florida Group, Atlantic Reserve Fleet, and then reported to the Bureau of Ships for an assignment as Assistant to the Head of the Submarine Electronics Engineering Section (1954-1956). While assigned to the Electric Boat Division of General Dynamics, Groton, Conn. (1956-1960), he was Head of the Contract and Materials Department, which administered shipbuilding and repair contracts for submarines of all types, including nuclear and FBM (Polaris) submarines, and was responsible for fitting out new construction submarines.

CAPT Maragos returned to the Naval Academy in 1960 as an Instructor of Electronics and Electricity and as Military Chairman of the Science Department's Electronics Committee. On July 14, 1966, he reported for duty at NRL as Engineering Services Officer. He came to NRL from the Ship Systems Command Headquarters; there he was Liaison Officer, Surface Missile Systems (Talos, Tartar, and Terrier) Project Office (1962-1966).

CAPT Maragos became Director of Support Services on May 29, 1967. In this position, he administers five divisions that provide engineering and other services in support of the Laboratory's research and development program.

The Director of Support Services is a Naval Officer with the appropriate rank, training, and experience. His primary responsibility is the supervision, coordination, and control of the administrative and service operations required in support of the work of the Research Department.

Key Personnel

<u>Name</u>	<u>Title</u>	<u>Code</u>
CAPT G. Maragos, USN	Director of Support Services	1100
Mr. S. L. Cohen	Management Engineer	1103
Mr. R. S. Sciascia	Patent Counsel	1104

CDR S. D. Lowe, CEC, USN	Public Works Officer	2500
CDR R. S. Mason, USN	Chesapeake Bay Division Officer	2700

OFFICE OF THE MANAGEMENT ENGINEER

Basic Responsibilities

The Office of the Management Engineer provides staff support to management officials of the Laboratory in matters of administrative operations, management control, and facilities planning.

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. S. L. Cohen	Management Engineer
Mr. A. M. Toscano	Deputy Management Engineer

Mr. S. L. Cohen

Personnel Complement

On Board: 9

PATENT COUNSEL STAFF

Basic Responsibilities

The NRL Office of Patent Counsel provides services concerning inventions, patents, trademarks, copyrights, and other related matters. Patent applications are prepared, filed, and prosecuted on NRL inventions of significance to the Government. The patent Counsel serves as consultant and adviser on patent and data clauses in R&D and procurement contracts. Assistance is provided the Research Department through state-of-the-art searches in the patent literature pertinent to particular research problems.

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. R. S. Sciascia	Patent Counsel
Mr. R. J. Erickson	Deputy Patent Counsel

Mr. R. S. Sciascia

Personnel Complement *

On Board: 22

*Includes personnel physically located at ONR headquarters.

MEDICAL STAFF

Basic Responsibilities

The Medical Staff provides a comprehensive industrial health program. Its members serve in an advisory capacity on the Radiological, Safe Driving, Eye Hazard, and other Laboratory Committees, as directed.

Key Personnel

<i>Name</i>	<i>Title</i>
LT D. L. Keleher, MC, USN	Medical Officer

Supply Division

CDR O. L. Woodbury, USN

- STAFF SERVICES
- PURCHASE & CONTROL
- MATERIAL
- TECHNICAL

Basic Responsibilities

The Supply Division is responsible for the operation of all supply functions of the Naval Research Laboratory. These include procurement, stock control, and contract administration; physical receipt, storage, issue, sales, delivery, and shipment of supplies; disposal of excess and unusable property; and the conduct of inventories. During the fiscal year 1967, the Division occupied approximately 235,000 square feet of space, and its inventory was valued at \$800,000. Its activities for FY '67 included 39,000 purchase actions valued at \$21,000,000; 2,000,000 issues from stores; 4600 shipments with a combined weight of 1800 tons; and disposal of 1500 tons of surplus property valued at \$5,000,000.

Key Personnel

<i>Name</i>	<i>Title</i>
CDR O. L. Woodbury, (SC) USN	Supply Officer
LT J. E. Simon, (SC) USN	Assistant Supply Officer
Mrs. P. Griffin	Head, Staff Services Branch
Mrs. I. L. Bivins	Head, Purchase and Control Branch
Mr. H. W. Dickinson	Head, Material Branch
Mr. R. R. Black	Head, Technical Branch

Personnel Complement

On Board: 149

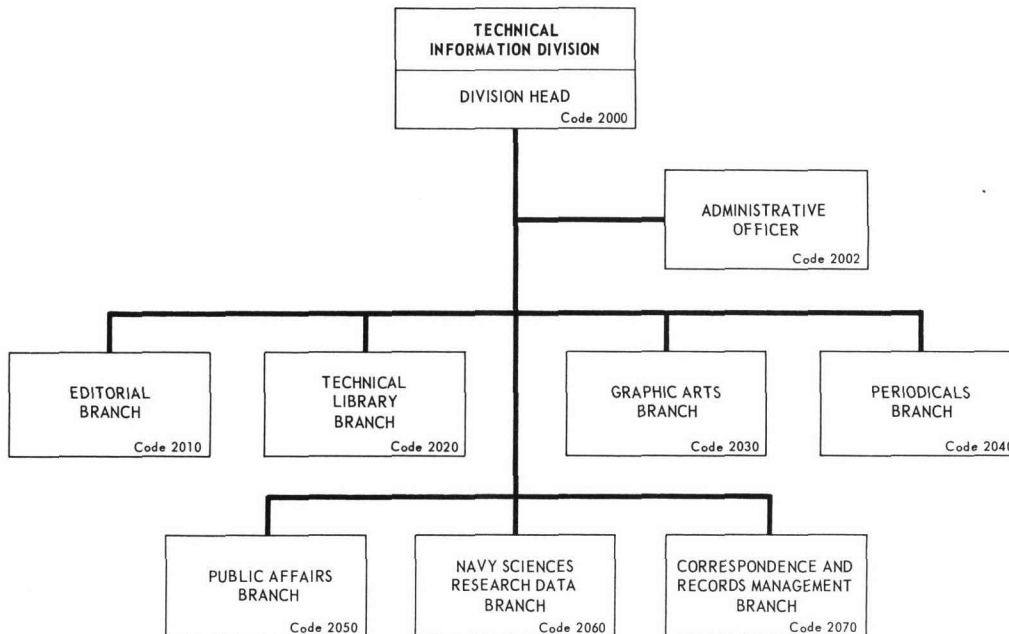

(Graded 89, Ungraded 58, Military 2)

Technical Information Division

Mr. E. L. Smith

- EDITORIAL
- LIBRARY
- GRAPHIC ARTS
- PERIODICALS
- PUBLIC AFFAIRS
- NAVY SCIENCES RESEARCH DATA - ONR
- CORRESPONDENCE AND RECORDS MANAGEMENT

Basic Responsibilities

The Technical Information Division plans and administers the Laboratory's program of preparing and disseminating the results of scientific research through official publications, scientific journals, presentations, films, exhibits, and news media. It provides centralized professional services to both NRL and ONR in writing, editing, printing, exhibits, photography, graphic arts, public affairs, documentation, language-translations, and mail-records services. It operates one of the Navy's largest integrated technical libraries with holdings of 100,000 bound volumes and 250,000 technical reports.

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. E. L. Smith	Head, Technical Information Division
Mrs. D. E. Cameron	Administrative Officer
Miss L. A. Morgan	Librarian

Mr. J. Brotzman	Head, Electronic Engineering Branch
Mr. J. L. Woods	Head, Mechanical Shops Branch
Mr. J. L. Woods	Head, Chemical Processes Branch (Acting)
Mr. J. L. Leizear	Head, Electronic Services Branch
Mr. L. G. Votta	Head, Planning and Production Engineering Branch
Mr. E. Trexler	Head, Project Engineering/R&QA Branch

Personnel Complement

On Board: 565

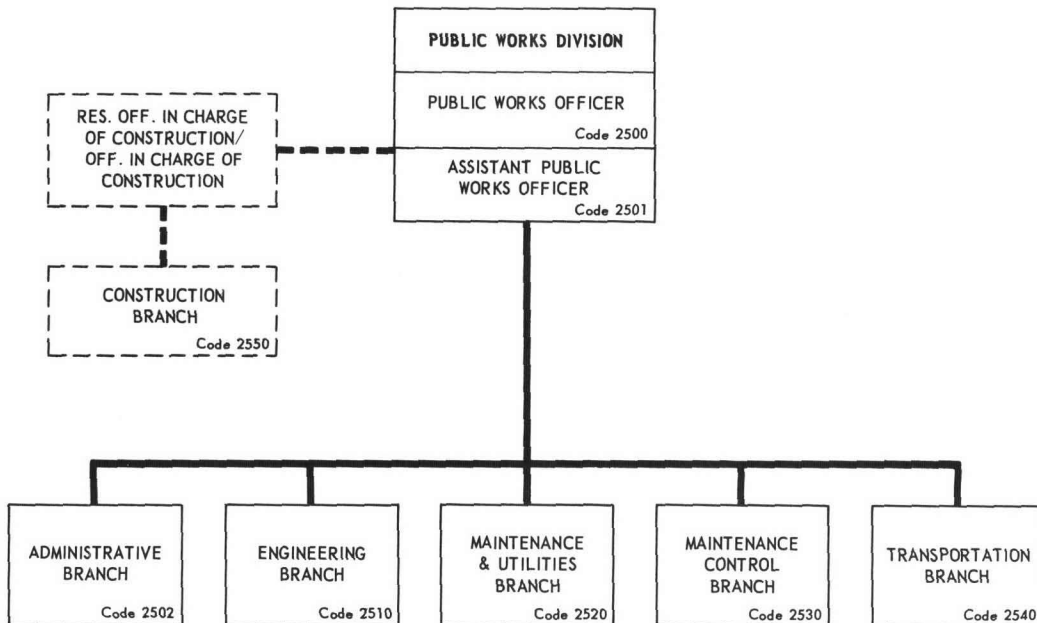

(Graded 165, Ungraded 399, Military 1)

Public Works Division

LCDR C. F. Cook, Jr., USN

- ENGINEERING
- MAINTENANCE AND UTILITIES
- MAINTENANCE CONTROL
- TRANSPORTATION
- CONSTRUCTION

Basic Responsibilities

The Public Works Division is responsible for the physical plant of NRL. This includes responsibility for the design, construction, operation, maintenance, and repair of all buildings, grounds, roads, utilities, and other structures and activities. Also included are transportation; weight-handling and heavy-construction equipment; heating and refrigeration plants; electric, water, steam, air, and gas supply distribution; telephone communication systems; and sewage disposal.

The Public Works Division provides professional consulting services to the scientific divisions on facilities planning and engineering.

Key Personnel

<i>Name</i>	<i>Title</i>
LCDR C. F. Cook, Jr., CEC, USN	Public Works Officer
LTJG F. W. Renshaw, CEC, USNR	Assistant Public Works Officer
Mr. J. R. Lescault	Administrative Officer

Chesapeake Bay Division

CDR R. S. Mason, USN

Aerial view of Chesapeake Bay Division
Chesapeake Beach, Md.

Basic Responsibilities

The Chesapeake Bay Division provides and maintains facilities and services for test, development and evaluation of radar, radio, and fire control equipment. It also services and supports all research projects conducted at the Chesapeake Beach and Tilghman Island complexes of NRL.

The Physical Plant

Located in a relatively clear area away from any congestion or industrial interference, the main site, at Chesapeake Beach, covers 174.9 acres containing 197 structures of various size and construction, six of which are major laboratory buildings. There is over 200 feet of usable dock space with a water depth of 4 to 7 feet, located 2 miles north of the main site. Off-site facilities include the Tilghman Island Facility, located directly across the Bay from CBD at a distance of about 10 miles; the Theodolite House, at North Beach; and the Off-shore Platform, approximately 2 miles southeast of CBD in the Bay.

One 36-foot diesel-powered boat and five wherries are used in support of research projects and for transportation between off-site facilities. Housing includes 24 public quarters and two dormitories.
